Industry Stats

Survey Demographics

Responses and Demographics

347 responses from nine countries

- 48% from U.S.
- 52% non-U.S. countries

Survey conducted in the U.S., Canada, U.K., China, France, Germany, India, Brazil, Israel

Responses from large, mid-sized and small firms, with the largest concentration, 36%, with \$100 - \$499 million in assets under management

Key Findings

- Over 80 percent of global venture capitalists believe that current IPO activity levels in their home countries are too low
- Venture capitalists believe higher returns generated by IPOs are critical in providing superior returns to limited partners and growth capital to developing portfolio companies
- Of those who are investing outside their home countries, more than half (57 percent) plan to increase this activity during the next five years and an additional 35 percent plan to maintain their level of investment.
- Excitement around IT, healthcare services and clean tech innovation globally

IPO Market

Is an active IPO market in your home country essential for the success of the venture capital industry in your country?

Is an active IPO market in your home country essential for the success of the venture capital industry in your country?

Is an active IPO market in other geographies essential for the success of the venture capital industry in your country?

Is an active IPO market in other geographies essential for the success of the venture capital industry in your country?

Respondents who indicated that an active IPO market was important either at home or abroad state why an IPO market is essential for the success of the venture capital industry

- Provide growth capital to developing portfolio companies
- Provide superior returns to limited partners
- Attract public attention to emerging companies
- Provide access to capital required to compete in global marketplace

The current level of IPO activity in your home country is

Top 3 factors that create a healthy and vibrant IPO market

| | Brazil | Canada | China | France | Germany | India | Israel | United Kingdom | United States |
|--|--------|--------|-------|--------|---------|-------|--------|----------------|---------------|
| A competitive investment banking community for IPOs | 44% | 14% | 22% | 14% | 50% | 29% | 40% | 24% | 30% |
| Healthy investor appetite for equity in public companies | 94% | 77% | 75% | 93% | 92% | 90% | 70% | 84% | 81% |
| Freely available capital | 19% | 32% | 44% | 18% | 17% | 19% | 20% | 43% | 25% |
| Ability to move capital out of country | 6% | 0% | 17% | 0% | 0% | 14% | 10% | 0% | 3% |
| Economic stability | 69% | 45% | 58% | 43% | 25% | 52% | 40% | 68% | 52% |
| Adequate stock analyst coverage | 19% | 36% | 14% | 46% | 17% | 52% | 10% | 32% | 33% |
| Companies with leading edge technology | 19% | 50% | 28% | 36% | 67% | 0% | 40% | 24% | 27% |

Methodology

The 2011 Global Venture Capital Survey was conducted jointly by Deloitte & Touche LLP and the National Venture Capital Association. It was administered to venture capitalists in the following countries: Brazil, Canada, China, France, Germany, India, Israel, United Kingdom and the United States. Deloitte received 347 responses from general partners with assets under management ranging from less than \$100 million to greater than \$1 billion. Multiple responses from the same firm were encouraged as the survey was a general measurement of the state of global investing from general partners, not attitudes of specific firms.

The survey was conducted during February and March 2011.
