

GDPR Compliance Services

To remain compliant with constantly evolving regulations, understanding the data your company holds and how it is handled is the **key to successful data privacy management.**

We realize that effective privacy management requires a multi-disciplinary approach. Thanks to our teams made up of experts in law, process management and IT, at Deloitte we provide you with expert advice on the impacts of privacy regulation to your company.

What makes us the leaders?

PARTNERSHIP

We listen to our clients' needs and **build strong partnerships** for the future

EXPERTISE

Extensive experience and **high standards of delivery** based on proven project management methodology

MULTIDISCIPLINARY TEAMS

Our teams include **Business, IT Security, and Legal** experts

Our Expertise

As a trusted advisor we have provided **tailored end-to-end solutions** to numerous clients facing **data privacy challenges**. This gives us not only a deep understanding of your needs, but also to find an appropriate solution.

We will arrange for you:

GDPR IMPLEMENTATION & AUDIT

- Internal privacy audit of existing procedures (including GAP analyses with risk level and solution design)
- Implementation of technical, legislative and procedural changes arising from regulatory changes
- Design of internal procedures for the personal data processing
- Creation and review of privacy documentation
- DPO as a service

PRIVACY MANAGEMENT

- Automation of privacy programme (Records of processing activities, personal data mapping, data subject rights...)
- Automated compliance & Risk Assessment (PIA/DPIA) and internal audit execution
- Cookie & Consent management and Privacy Policy & notice management
- Data anonymization and deletion
- Solution for compliant data governance and monetization

DATA & IT SECURITY

- Data security analysis
- Design and implementation of functional IT system requirements according to the GDPR
- Incorporation of Privacy by Design into the entire technology life-cycle and agile project management
- Implementation of compliant data monetization
- Prevention of, and response to, security incidents or cyberattacks
