SUSTAINABILITY TRANSFORMATION LAB FOR FSI CLIENTS

Addressing sustainability and climate change is moving higher on the agenda for financial institutions (FIs). Those that see sustainability not only as a risk, but an opportunity, might be best placed to unlock new innovations. How can you accelerate your organization's sustainable transformation? What do you need to do to rally your teams and take steps towards creating a truly sustainable business?

WHY NOW? FIs are under growing pressure from regulators, customers, employees and civil society to consider the

WHO IS THIS LAB FOR? This Lab is for teams of FI executives and directors looking to:

WHAT DOES SUCCESS LOOK LIKE? Executive teams can expect to:

THE GREENHOUSE EXPERIENCE DIFFERENCE:

Breakthroughs don't just happen by accident...

So we've studied how to consciously create them. We dug into the science of group dynamics and team performance. We looked at environmental psychology and the effect of design thinking on creativity.

Through this research, we discovered the power of immersive experiences tailored to address specific business challenges. We call these experiences "Labs" because they promote experimentation in a controlled environment.

The result? Behavioural science, design thinking, and strategy converge to help you solve your toughest business challenges.
