# CareConductor™

Orchestrate virtual care with customizable care pathways

A digital core that addresses fragmented care delivery by enabling connected, coordinated care outside of a formal health care setting. Through integrating with EMR, medical devices and smart apps, CareConductor™ helps deliver a seamless care experience for patients and care teams to improve health outcomes.

## Why now?

Health care continues to invest in siloed technologies at an increasing rate with remote patient monitoring growing at a CAGR of 11.6%. While investing in technologies is critical, it is the connectedness of those that can create an ecosystem that supports effective and efficient remote patient monitoring, leading to improved patient outcomes.

## CareConductor Benefits:

01

### Scale for Any Use Case

Customizable care pathways to manage any virtual care use case

03

### Enhance the Provider Experience

Customizable workflows and alerts that minimize clinical burden and allows for the provision of longitudinal care

02

### Improve Patient Outcomes

Track patients' vital signs, symptoms, and more from a distance and with more frequency to improve patient outcomes

04

### Deep EHR Integration

SSO and HL7 FHIR-based integration that flows seamlessly with the EMR

## Key CareConductor Features:

Configurable Care Pathways (Prenatal, Cancer, etc.)

700+ connected devices

Multi-modal chat communications (In-app, SMS, Email)

FHIR-based Interoperability w/ Smart Alerts

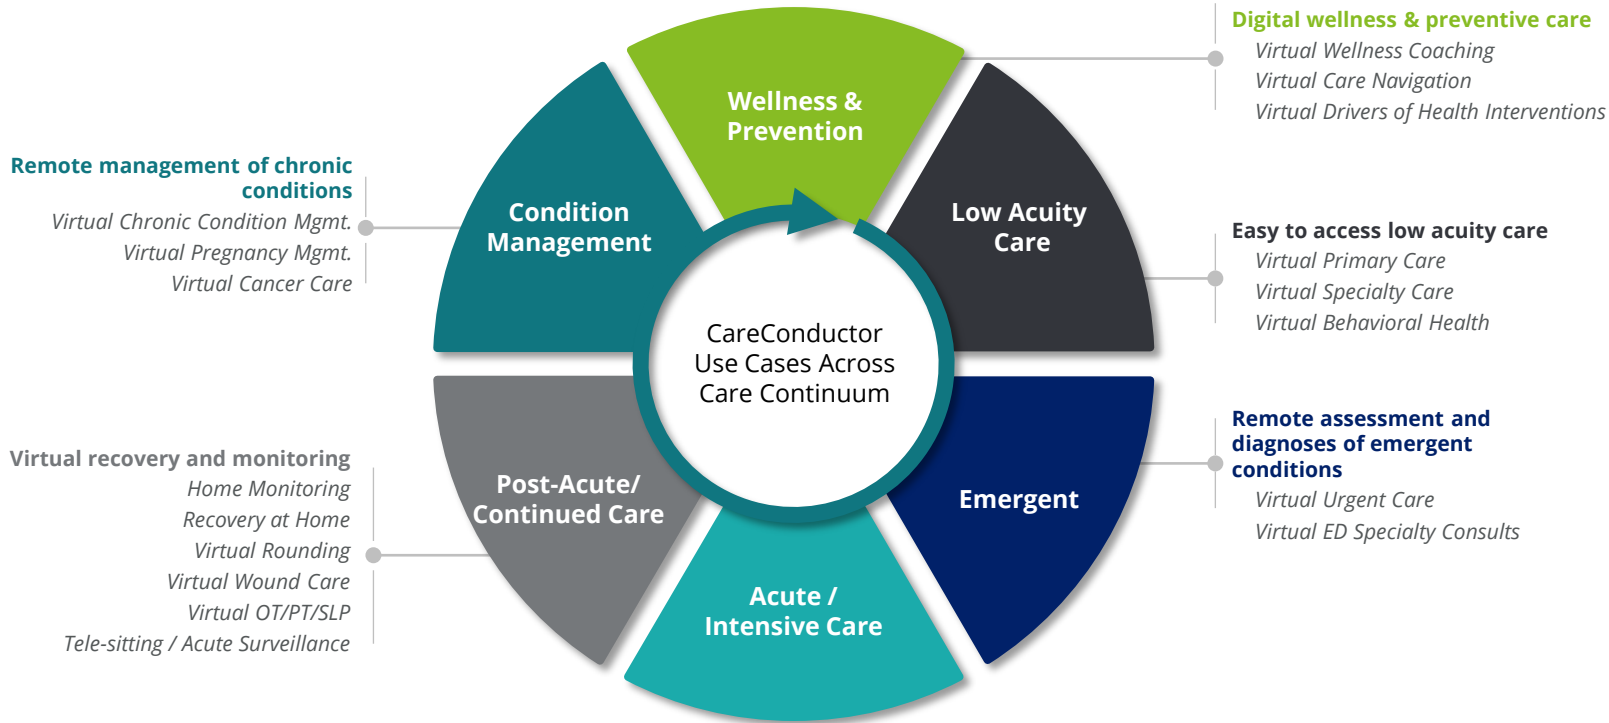

iOS and Android Mobile Apps
