

Accelerate Smart Manufacturing Engagements with IntelligentOps™

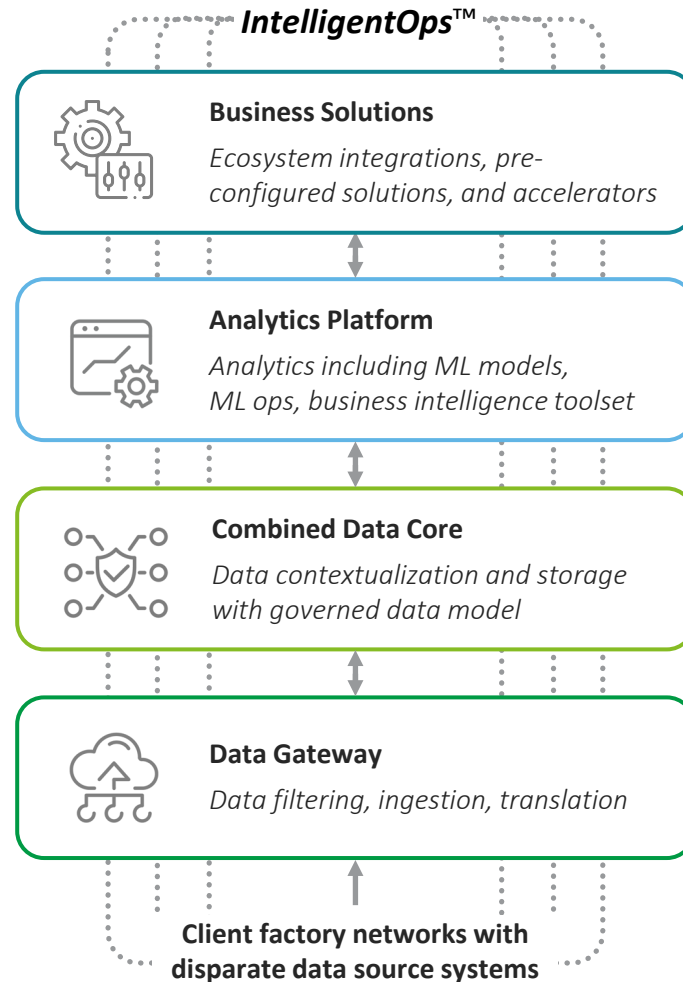

Smart Manufacturing transformations are about more than adding new technology. Organizations must integrate solutions into their daily operations while driving user adoption, ensuring change management, and gaining workforce buy-in.

Deloitte brings:

- Manufacturing professionals and industry experts
- Proven methodology and innovative thinking
- People-first, user-centric mindset
- Scalable solutions that fit with your existing technology, powered by our proprietary IntelligentOps™ accelerator

IntelligentOps™

accelerates the deployment of Smart Manufacturing solutions, leveraging your existing technology and growing with you as your organization transforms

Our secure, scalable **IntelligentOps™** accelerator offers:

- Analytics foundation to enable improved production operations and efficiency, and cost savings, at scale
- Real-time and historical data-driven actionable insights to produce measurable results
- Extendable platform to provide client-focused data visualizations and reporting
- Contextualized data in ML models and predictive analytics to create intelligent insights
- Integration with industry-leading BI tools to support deeper analysis by Deloitte industry experts

We offer a library of **capabilities** to support your Smart Manufacturing journey, including:

Production Scheduling	Predictive Quality	Worker Safety
Generative AI	Predictive Maintenance	Modular Data Core
