Rise above the Cloud

Deloitte Ascend™ for SAP

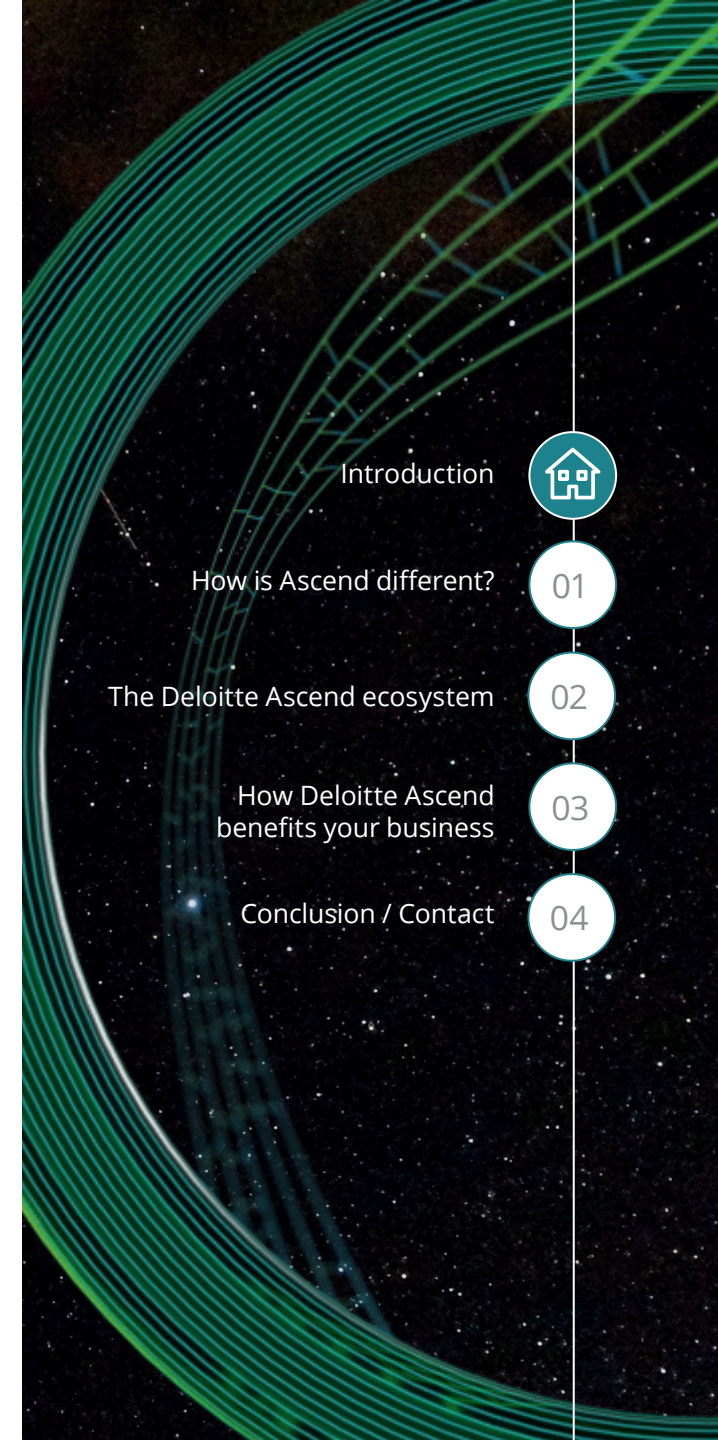

Ascend, Rise above the Cloud

In an era of unprecedented digital adoption across industries, business leaders are under pressure to rapidly execute and adapt business models and processes alike. Whether it's to meet shifting supply chain needs, volatile marketplace dynamics, or ever-changing customer demands, companies must develop both agility and resilience to succeed.

More than ever, today's organizations need a trusted approach that leverages the latest technology to deliver solutions needed to achieve a Kinetic Enterprise—one that's built to evolve and adjust rapidly, enabling it to meet today's needs and also embrace disruptive technology advances in the future.

What is Ascend?

Deloitte Ascend™ for SAP is a revolutionary integrated digital transformation platform designed to accelerate and improve the delivery of our business transformation programs. It harnesses the full breadth of Deloitte's industry and technology experience to empower a custom-tailored journey through a coordinated delivery experience, defining the business case and roadmap to launch your transformation and deliver digital innovation.

Ascend, Rise above the Cloud

The Deloitte Ascend ecosystem

End-to-end Digital Transformation Platform to define a future state Digital Transformation roadmap to design and build strategic capabilities leveraging leading practice solutions. In addition to providing various accelerators for process modeling, testing automation, and Kinetic solutions, Deloitte Ascend elevates project execution by providing meaningful insights to overall program status, issues, risks and deliverables, and seamlessly integrating with testing and agile management tools.

Building your Vision & Roadmap

Capability Edge integration to kickstart your Digital Transformation journey. The Capability Edge platform helps identify a list of prioritized initiatives and technologies and defines a future state Digital Transformation roadmap.

Reimagine your Business Processes

Enterprise Consciousness integration to help you make conscious choices, mitigate risks, enhance digital capabilities, minimize total investment spend, and accelerate benefits to the enterprise. This comprehensive look at transformation starts with process, technology, people, and data transformation and expands to include business, social, and sustainability KPIs, brand valuation, cultural changes, innovation, and stakeholder alignment—all in one unified application.

Implement Next Gen Solutions

Kinetic Assets to help unleash value from core to edge, starting with a clean SAP S/4HANA core and then solving industry-specific business challenges with machine learning and intelligent automation, using AI and bots to perform repetitive, rules-based tasks to enhance capabilities and save time. These assets provide a tried and proven approach to transformation and have been leveraged across various industries and programs. These assets include:

- Kinetic Finance Startup
- Kinetic Industry Solutions
- Kinetic Supply Chain
- Kinetic Microservices

Delivery Transformation

Amplifiers for efficient delivery including:

- Intelligent Delivery Engine to automate tasks and transports
- Suite of tools for optimized data conversion and governance
- Predefined framework, templates, and content for strategic design and development of a modern integration and interface architecture
- Automation robots and scripts for accelerating processes and testing

Ascend deliverables include standards, methods, assets, and automation to accelerate project launch.

Smart Reporting through interactive and dynamic project reporting using Digital PMO, to enhance the value and streamline the implementation; achieving optimized transparency, visibility, decision making, and driving other operational efficiencies through a digitized PMO solution.
