

The Deloitte South Africa transfer pricing team is a multifaceted, multidisciplinary team which forms part of an accomplished wider Africa transfer pricing team.

We bring together decades of transfer pricing experience across all major industries and sectors, and can support our clients across various jurisdictions as we form part of a comprehensive network of transfer pricing professionals worldwide. We support our clients with a full spectrum of their businesses' transfer pricing requirements; i.e., from policy design, implementation and compliance, to controversy and dispute resolution and wider advisory; while considering their commercial business requirements. To ensure we deliver value-added services, we also collaborate with our colleagues that are experts in their respective fields to deliver multidisciplinary services to our clients. We think broader than just transfer pricing.
