# Deloitte Global 2023 Gen Z and Millennial Survey

**Country profile: Czech Republic** 

#### Deloitte Global 2023 Gen Z and Millennial Survey

## Methodology and global key messages

#### **Key global findings:**

Broad societal change has spurred some workplace progress in recent years, but new setbacks are impacting Gen Zs' and millennials' ability to plan for their futures

**Employers have made some progress since pre-pandemic times, but business more broadly is still not meeting expectations**. Satisfaction with work/life balance, and employer progress on DEI, societal impact, and environmental sustainability have improved. While they are slightly more satisfied with their own employers, less than half are convinced that business more broadly is having a positive societal impact. But they continue to have high expectations for business leaders and expect them to drive progress on societal and environmental issues.

**The cost-of-living crisis looms large for Gen Zs and millennials.** Half of Gen Zs and millennials say they live paycheck to paycheck. They worry that a potential economic recession may cause employers to backtrack on climate action. They also worry it will hamper their ability to ask for much needed pay increases, to continue pushing for flexibility, or to find new jobs.

Gen Zs and millennials are rethinking the role of work in their lives. Roughly half of Gen Zs and millennials say work is central to their identity, but work/life balance is key. This is reflected in the fact that having a good work/life balance is the No. 1 trait they admire in their peers, and their top consideration when choosing a new employer.

Both generations said they still feel stressed or anxious all or most of the time. Their longer-term financial futures, day-to-day finances, and the health/welfare of their families are their top stress drivers, while concerns about mental health and workplace issues such as heavy workloads, poor work/life balance, and unhealthy team cultures are also challenging. Linked to the results around work-related stress drivers are increasingly high levels of burnout due to work pressures.

**Harassment is at a worryingly high level in the workplace, particularly for Gen Zs.** Three in five Gen Zs (61%) and around half of millennials (49%) have experienced harassment or microaggressions at work in the past 12 months. Inappropriate emails, physical advances, and physical contact are the most common harassment experiences, while exclusion, gender-based undermining and unwanted jokes are the most common microaggressions experienced. Around eight in 10 did report the harassment they experienced to their employer, but a third of Gen Zs and a quarter of millennials think the issues were not handled effectively.

**Climate change is a major stressor for Gen Zs and millennials, and it's impacting their lifestyle and career decisions.** Six in 10 Gen Zs and millennials say they have felt anxious about the environment in the past month. Their climate concerns impact their decision-making, from family planning and home improvements, to what they eat and wear. It also plays a key role in their career choices—more than half of respondents say they research a brand's environmental impact and policies before accepting a job.

## Our methodology:

The 2023 Gen Z and Millennial Survey solicited the views of 14,483 Gen Zs and 8,373 millennials (22,000 respondents in total), from 44 countries across North America, Latin America, Western Europe, Eastern Europe, the Middle East, Africa and Asia Pacific.

Fieldwork was conducted between November and December 2022, with qualitative interviews conducted in March 2023.

As defined in the study, Gen Z respondents were born between January 1995 and December 2004, and millennial respondents were born between January 1983 and December 1994.
