Leadership message¹

Resilient leadership will guide us to a new normal

The pandemic has had massive impact on all aspects of society, our lives and behaviour. It completely changed the agenda in the sense that we went from helping our clients transform and develop to help save their business, sometimes their life's work. We went from advising the government and leaders in Denmark about how to become a Small Great Nation that would lead in innovation and climate change to advising on the best aid packages possible, a corona fund worth DKK 300bn and how to move from the long-term view and zoom in on short-term action.

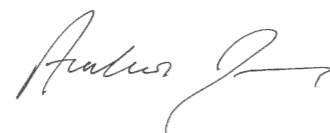

As a global as well as Danish organisation we are very concerned with the impact that COVID-19 will have on many societies, their families and daily lives. We are helping many societies around the world, their governments, institutions and corporates in fighting and recovering from the pandemic. But we also believe that a crisis significantly accelerates current megatrends. Sustainability, climate solution, digitalisation and the future of work with industry 4.0 are just some of those trends.

Deloitte is part of a global firm of 330,000 employees in 150 countries that just turned 175 years old. I am proud to be part of a firm and culture that have been able to innovate through four industrial revolutions and are resilient to withstand crises like the pandemic. We leverage our global capabilities to serve our clients with distinction through centres of excellence and our global community of talented people – also in times of crisis.

Quality and trust will always be at the heart of our business. And quality is not only a matter of having the right technologies and processes – it is also about delivering to our clients and investing in our culture and people. Quality also means showing transparency about audits and our profession to continue to build trust in capital markets.

In order to provide insight into how Deloitte is organized, our ethical principles and how to ensure a consistent, high quality of our audit and advisory services, we have prepared this transparency report – for 11 consecutive years now.

Happy reading!

Anders Vad Dons, CEO and partner

¹ Deloitte Statsautoriseret Revisionspartnerselskab is the Danish affiliate of Deloitte North and South Europe (NSE) LLP, a member firm of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee. DTTL – also referred to as Deloitte Global - and each of its member firms are legally separate and independent entities. DTTL and Deloitte NSE LLP do not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms.

COVID-19

Deloitte's highest priority is the safety and well-being of its professionals. As the impact of COVID-19 unfolds, investors and stakeholders are looking to auditors to provide an independent opinion on companies' financial statements more than ever. Deloitte remains committed to this critical role and delivering the highest quality audits.

Entity management and auditors alike are affected by restrictions on travel and requirements to stay at home. With travel restrictions affecting entities' personnel and auditors, companies may obtain information in new or different ways. In addition, entity management is faced with significant uncertainty in making judgments to project future operating results and cash flows, going concern, and developing valuation analysis, etc. The financial reporting process likely requires careful analysis and further considerations of impact from management and auditors given the current environment.

All stakeholders of the financial reporting ecosystem must exercise significant judgment in this unprecedented and uncertain environment—governments, when projecting the length of closures; bankers, when deciding if a loan can be repaid in full; management, when evaluating if a company can continue operating as a going concern and audit committees providing oversight of management; auditors, when assessing these judgments; and investors, when analyzing the available financial information in light of these unprecedented uncertainties.

Although the existing accounting frameworks have provisions for uncertainties, it is important for financial statement users and regulators to expect a higher degree of market and economic volatility in the near future.

Deloitte welcomes the public statements and guidance issued by regulators that recognize the current uncertainties and emphasize the importance of high-quality, forward-looking corporate disclosures. Importantly, some regulators have conveyed that good faith attempts to provide investors and other market participants with appropriately framed forward-looking information will not be second-guessed. Deloitte seeks to raise awareness about the areas that pose challenges and require more scrutiny, context-specific judgment, and increased skepticism and documentation. There is benefit to the public for greater transparency from various financial reporting ecosystem stakeholders raising awareness about these issues. This includes providing more clarity on the responsibilities of management, audit committees, companies, auditors, regulators, and other stakeholders.

Deloitte's global technology and infrastructure has allowed for an agile and rapid response to the various impacts of COVID-19. We have prepared for various contingencies in order to support changing client needs and to keep Deloitte professionals informed while working remotely. Deloitte's business continuity plans have been updated and we have affirmed that Audit & Assurance products and solutions have the necessary bandwidth to ensure continuity. A Deloitte Global Audit & Assurance Technical Delivery Resource Center—a central location for globally relevant and locally adaptable Audit & Assurance COVID-19 related resources is launched as well as a local COVID-19 resource center. In addition, COVID-19 industry disclosures have been added to the Disclosure Analytics tool to provide example disclosures across several areas, including risk factors, subsequent events, and management's discussion and analysis.

Deloitte network

Deloitte Denmark: legal structure and ownership²

Deloitte Statsautoriseret Revisionspartnerselskab is connected to the Deloitte network through Deloitte North and South Europe (NSE) LLP, a member firm of Deloitte Touche Tohmatsu Limited. Deloitte Statsautoriseret Revisionspartnerselskab is referred to throughout this report as “Deloitte Denmark”, and Deloitte North and South Europe (NSE) LLP is referred to throughout this report as “Deloitte NSE”. Deloitte NSE holds practice rights to provide professional services using the “Deloitte” name which it extends to Deloitte entities within its territory, including Deloitte Denmark. Deloitte Denmark is authorised to serve as an auditor for clients in Denmark and Greenland.

Until 2016, Deloitte Statsautoriseret Revisionspartnerselskab was the Danish member firm of the Deloitte network.

In June 2016, Deloitte Denmark entered into a closer cooperation with the other Nordic countries through the establishment of a new member firm, Deloitte Nordic, and in June 2017, an agreement was made with Deloitte North West Europe (NWE) LLP (“Deloitte NWE”) that Deloitte NWE was the new member firm of Deloitte Global in which Deloitte Statsautoriseret Revisionspartnerselskab is the Danish part.

On 1 June 2019, the Deloitte Central Mediterranean member firm joined with Deloitte NWE, which at the same time changed its name to Deloitte NSE. On 1 June 2020 the Deloitte Middle East and Cyprus joined with Deloitte NSE. As of today, Deloitte NSE consists of the former member firms in UK, Switzerland, Ireland, Belgium, Holland, Norway, Sweden, Finland, Iceland, Italy, Greece, Malta, Libya, Egypt, Palestinian Ruled Territories, Lebanon, Jordan, Saudi Arabia, Iraq, Kuwait, Bahrain, Qatar, UAE (United Arab Emirates), Oman, Yemen, Cyprus and Denmark. The firms mentioned will still operate as separate independent legal entities and provide services in their respective countries

in accordance with professional standards. Deloitte NSE is registered in UK and Ireland through the Institute of Chartered Accountants in England and Wales, but does not provide services to clients.

Network description

The Deloitte network

The Deloitte network is a globally connected network of member firms and their affiliates operating in more than 150 countries and territories across the world. These separate and independent member firms operate under a common brand.

Deloitte Touche Tohmatsu Limited (DTTL or Deloitte Global)

Deloitte Touche Tohmatsu Limited is a UK private company limited by guarantee incorporated in England and Wales. DTTL serves a coordinating role for its member firms and their affiliates by requiring adherence to policies and protocols with the objective of promoting a consistently high level of quality, professional conduct and service across the Deloitte network. DTTL does not provide professional services to clients, or direct, manage, control or own any interest in any member firm or any member firm's affiliated entities.

For more information about the Deloitte network, please see: [About Deloitte](#).

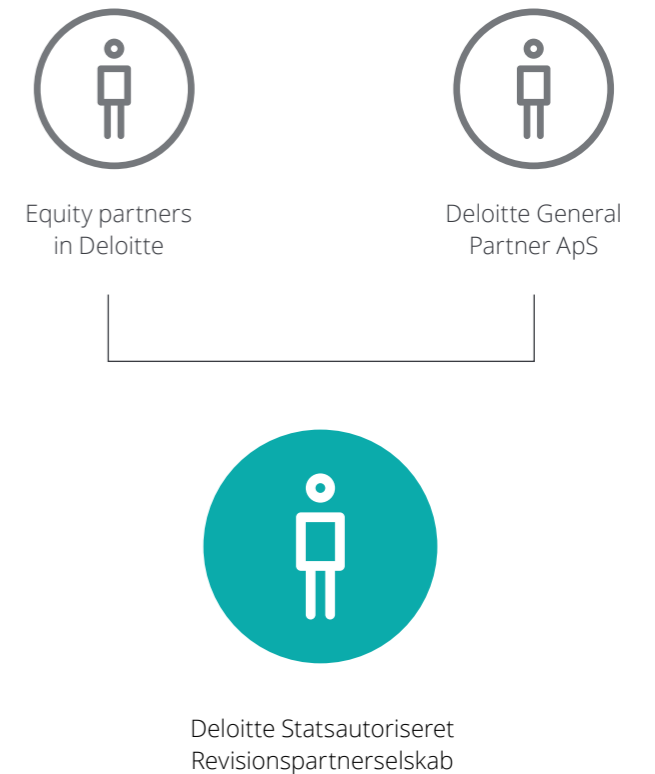

Legal structure and ownership

The main activity in Deloitte Denmark is to deliver audit and advisory services in Denmark and Greenland within the limits of the auditor legislation. In Denmark, the activity is primarily conducted from properties owned by the Deloitte Foundation. The main activity in the Deloitte Foundation is among other things through the subsidiaries Deloitte Huset Holding A/S and Deloitte Huset A/S to own and rent properties in Denmark to Deloitte Statsautoriseret Revisionspartnerselskab.

The Deloitte Foundation is independent of Deloitte Statsautoriseret Revisionspartnerselskab.

Deloitte General Partner ApS acts as general partner and is owned by Deloitte NSE.

Ownership structure in Deloitte Denmark

² Article 13 of Reg. 537/2014 requires: EU transparency reporting requirement: description of the legal structure and ownership of the audit firm.

Deloitte Denmark

Governance – leadership in action³

Objective

The leadership structure in Deloitte Statsautoriseret Revisionspartnerselskab is established to comply with the requirements of the Danish Companies Act and to support an active and involving partnership.

Equity partners

Deloitte Statsautoriseret Revisionspartnerselskab is a partner company whose ultimate owners are the Danish equity partners. The equity partners have influence on overall decisions like policies, strategies and action plans. This influence is implemented informally through the equity partners' daily work in the Company and through discussions with the Company's Board, CEO and Executive team. Formally, the influence is implemented through partner meetings and at the Company's general assembly.

Additionally, the equity partners will be able to influence decisions through formal roles in the Board and the Executive team.

Partner Council

The equity partners elect five equity partners to form the Partner Council. The Partner Council oversees and ensures fairness in the Danish partnership.

Board

The Board consists of six members among which 3 are appointed by the equity partners. 1 member is appointed by Deloitte NSE LLP. All four are elected at the Company's general assembly, and two are elected by the employees. Four of the six members are state authorised public accountants or statutory auditors.

CEO

The CEO is Anders Vad Dons who is in charge of the daily management of Deloitte Denmark in accordance with the policies, strategies and action plans developed in cooperation with the Company's equity partners and approved by the Board.

Executive team

The CEO has established an Executive team to support him in the daily management of the Company. In addition to the CEO, the Executive team consists of the Heads of the five business units, Clients & Industries, Private, Talent, Quality Risk and Security and the COO. The Executive team meets regularly to implement the approved policies, strategies and action plans.

Our purpose and commitment Instilling trust and confidence

At Deloitte Denmark, our purpose is to make an impact that matters. For Audit & Assurance, this means a focus on delivering independent high quality audits and instilling confidence and trust in the capital markets through our reports. This requires us to continuously build capabilities to support the delivery of high quality audits and make leading contributions to shaping the future of the audit profession.

NSE Governance

On 1 June 2020 the Deloitte Middle East and Cyprus joined forces with Deloitte NSE.

The Deloitte NSE governance structure consists of the NSE Board, NSE Executive, Geography governance bodies and Geography Executive, underpinned by the NSE Partnership Agreement as set out below:

- The **NSE Partnership Agreement** underpins the governance of NSE
- The **NSE Board** is the primary governance body of NSE, responsible for ensuring high quality governance and stewardship of NSE. The NSE Board works with the NSE Executive to set and approve the long-term strategic objectives of NSE and the markets in which it operates. The NSE Board comprises the NSE CEO, NSE Chair and elected members, as well as Independent Non-Executives (INEs) and a Deloitte Global Representative. The latter does not have voting rights
- The **NSE Board** Board oversees the risk appetite in each business area; is responsible for the oversight of the Executive function, ensuring alignment with Deloitte Global obligations; and is responsible for the promotion and protection of NSE Equity Partner interests generally
- The **NSE Executive** is responsible for developing the NSE strategy and vision as well as NSE policies, and overseeing their implementation and execution
- **Geography governance bodies** exist where this is required for legal and/or regulatory purposes and to oversee local Partner matters
- The **Geography Executive** works with the NSE Executive to reflect the Connected+ Autonomy operating model (balancing local and central requirements), including the development and delivery of approved plans, in line with the NSE strategy, tailored to reflect local market conditions.

Reimagine Audit – a new era for Audit & Assurance

The audit of today is not the audit of tomorrow. That's why we are reimagining it. By going broader and deeper to unlock relevant insights that will help our clients thrive in a quickly changing business environment. With cutting edge technology, world-class solutions, and the best teams locally and across the globe. And assurance offerings that advise within compliance, regulatory, finance, tech and much more.

What Deloitte Audit & Assurance brings to the capital markets

Deloitte Global leadership

The Global Audit & Assurance Leadership Team is led by Jean-Marc Mickeler, Global Managing Director Audit & Assurance. Global Audit & Assurance responsibilities include:

- Developing and driving Audit & Assurance strategy
- Setting audit methodology standards and approving audit policy and methodology changes with the objective of enhancing audit quality across the Deloitte network
- Driving key audit quality initiatives and policies across the Deloitte network

Audit engagement acceptance and continuance

As a part of Transformation efforts, global initiatives are underway to foster a standard approach to audit engagement acceptance across the Deloitte network, resulting in consistent decisions and consideration of risks.

Deloitte Denmark has detailed policies and procedures in place for accepting prospective clients and engagements and assessing engagement risk. These policies and procedures are designed with the objective that Deloitte Denmark only accepts engagements where it:

- Is able to perform the engagement and has the capabilities, including time and resources, to do so
- Can comply with all relevant ethical requirements and professional standards, including independence and conflicts of interest assessments and considerations
- Considered the integrity of the potential client's management team

Audit innovation⁴

With The Deloitte Way, Deloitte is bringing innovation into the core of how we audit: with automation that improves routine tasks, analytics that yield a deeper and more insightful view into the data, and artificial intelligence that enhances human discovery and problem-solving. As a result, clients get an experience that is less burdensome, with more transparency and deeper insight.

Innovation is an expectation in today's fast-changing business environment, and this expectation holds true for the audit profession as well. Today's complex business environment requires that the audit be dynamic, multidimensional, and

insightful. There is a demand for real-time, relevant information, and clients expect audits to evolve as they innovate their businesses and processes. While traditional procedures still have a place in auditing, Deloitte Denmark auditors are enhancing procedures by making more use of technology-based analytics, artificial intelligence (AI) and cloud-based technologies, etc. This is due in part to the increased automation and effectiveness such data analytics and other tools may provide, but also the need for Deloitte Denmark to stay in front of technological advances used by the entities that we audit.

Innovation is an integral part of the entire audit delivery process.

Deloitte is committed to the continued investment in emerging technologies and diversity of thought that enables the delivery of enhanced quality, insights, and value to our clients and markets. This includes our state-of-the-art analytics platforms, as well as an integrated suite of enabling innovative tools all connected in the cloud. We are also deploying our next-generation cloud-based audit platform Levvia in FY21 - a solution to deliver and document the audits of our small and medium sized engagements.

Furthermore, Deloitte Denmark has deployed several global innovative tools as well as locally developed solutions, including:

- Deloitte Connect – Online communication, information sharing, and progress tracking of audit deliverables.
- Icount – Mobile-enabled solution to support auditors on inventory counts
- FACT – New DK developed, cloud-based financial statement preparation tool

to optimize our production of annual reports and taxable income statements for our clients.

- Deloitte Direct - Digital platform for online collaboration with clients including new value adding, digitally-enabled market offerings
- 42 Deloitte – our new self-service Audit Analytics and Business Intelligence platform.

Learning and development initiatives⁵

Deloitte's transformed approach to audit delivery is changing the audit experience for our professionals. Audit teams are empowered by more advanced tools and technologies and more extensive use of data analytics within a guided workflow to execute the end-to-end audit cycle. For our professionals, this means focusing on how the engagement is planned, executed, and managed consistently across the globe using forward looking techniques and capabilities. It also offers opportunities to enhance their technical and professional skillsets and capabilities. For example, the following skills become more important—enhanced data analytics, project management, critical thinking, communication, enhanced professional judgment, and the application of accounting and auditing principles to work more effectively and deliver higher quality engagements.

Not only do we deliver value in more areas, but as we enhance capabilities and skillsets, we build greater confidence and become ever-better evaluators of risk.

Deloitte has made substantial investments in our talent and learning strategies and transformed our technical audit curriculum to build the relevant and necessary proficiency required by level. At the core,

we have a single, global mandatory audit technical learning curriculum for auditors as well as we have a focused Audit & Assurance professional & leadership learning curriculum, targeting learners by level, using a dynamic blend of live instructor-led, and digital on-demand courses to develop and enhance business critical capabilities. Capabilities necessary to be the auditor of the future and to tackle and solve the challenges our clients meet. Deloitte has also established specific learning opportunities for specialists working on audit engagements to support their knowledge and understanding of the audit process.

Enhanced project management, a key capability for executing audit engagements, has been included in the annual development programs and talent strategies (e.g. recruitment and learning).

The objective of the Deloitte Denmark professional development program is to help partners and other professionals maintain and enhance their professional competence and ensure consistency of audit execution. To supplement on-the-job development, Deloitte Denmark provides formal continuing professional development programs in relevant subject areas consistent with the Deloitte Global Audit Curriculum.

Deloitte Denmark has established minimum levels of continuing professional development to be undertaken by partners and other professionals within a specific period of time. To achieve these levels of development, we offer structured, formal learning programs, such as internal or external courses, seminars, or e-learning covering all areas of the competency modul (e.g. shared competencies, function-specific technical competencies, and competencies in areas of specialization).

Audit & Assurance Transformation

Being a relevant profession of the future and a sustainable practice that evolves with the pace of change in technology and society is critical. Driving this goal is the Deloitte Audit & Assurance Transformation initiative, which is currently being developed and deployed across the Deloitte network, including Deloitte Denmark.

Audit & Assurance Transformation is an important shift across the network in the way Deloitte professionals work and includes:

Grow through a differentiated client experience with focused client programs and market teams across Private and Industries

Grow through higher value services with the development of assurance offerings, increased MDM and innovation

Sustain market-leading quality through the audit quality plan, Deloitte Way Workflows, and Levvia

Attract and develop world class talent from diversified talent and partner models and an enhanced talent experience

Ensure profitability in all service areas and offices while maintaining One A&A & Deloitte collaboration

Leverage digitization and delivery centers to standardize and thereby improve efficiency and value creation

⁴ For more information about Deloitte audit innovation, please refer to [Global Impact Report](#).

⁵ EU transparency reporting requirement: a statement on the policy followed by the audit firm concerning the continuing education of statutory auditors.

Deloitte University

Deloitte actively cultivates its collective knowledge and skills of professionals globally through continuing to invest in Deloitte Universities (DU). These are state-of-the-art learning and development centres focused on Deloitte culture, and rooted in the principles of connectedness and leadership in a highly inclusive learning environment⁶.

Partner remuneration⁷

Execution of high quality audits is expected from all professionals and is embedded across the Deloitte network. Audit quality is built into performance standards at every level against which professionals overall evaluations are measured.

In accordance with global policies, Deloitte Denmark's partners are evaluated on a yearly basis, and depending on the outcome of the evaluation, the remuneration of partners may increase or decrease. Specifically, partner evaluations take the following factors into account:

- Quality:** Uncompromising quality in all professional work
- Risk:** Consistent and strong contributions across all areas of risk
- Performance:** Strong performance against key metrics and objectives
- Leadership:** Demonstration of strong leadership skills and partner behaviours which reflect the organisation's culture
- Clients:** Client portfolio managed and roles performed
- Business:** Shaping and delivering on the firm's strategic and financial plan
- People/Talent:** Contributions across all aspects of talent management, including people development, coaching and mentoring
- Stewardship:** Thought leadership, innovation and brand protection roles
- Collaboration:** Working across the firm and being inclusive of other partners and our people.

⁶ For more information about Deloitte Universities, please refer to Global Impact Report.

⁷ EU transparency reporting requirement: information concerning the basis for the partners' remuneration in audit firms.

The high-quality audits we deliver

The experience of a high-quality audit, delivered well, will provide the audit committees, investors, and other stakeholders of the companies with (but not limited to):

- An audit report that is appropriate to the circumstances
- Innovation in how we do the audit
- More insights about their company than they had at the outset of the process

Deloitte is proud of its role supporting the capital markets, protecting investors and the public trust.

External and internal audit quality monitoring

Audit Quality Monitoring & Measurement

A continued focus on audit quality is of key importance to the Deloitte brand. It is critical that a Deloitte audit is consistently executed and of high quality, wherever in the world it is performed.

The objectives of the Global Audit Quality Monitoring & Measurement (AQMM) program are to:

- Transform the way audit quality is monitored and measured and audit deficiencies are resolved; and
- Enhance the internal system of quality control which all Deloitte network firms follow

The AQMM program is focused on driving:

- Continuous, consistent, and robust monitoring of completed and in-flight engagements
- Fundamental understanding of deficiencies and timely execution of corrective actions by all member firms consistently
- Greater transparency and consistency in reporting key measures of audit quality

Deloitte Denmark maintains policies and procedures to promote an internal culture based on the recognition that quality is the number one priority. Deloitte Denmark focuses on professional excellence as the foundation for achieving audit quality on a consistent basis.

Multidisciplinary model

Audit is the foundation of the Deloitte brand. In addition to Audit & Assurance, Deloitte Statsautoriseret Revisionspartnerselskab has Consulting, Financial Advisory, Risk Advisory, and Tax & Legal practices. The diversity of five different businesses under one umbrella (multidisciplinary model) is one of the key differentiators of high-quality audits.

Among the benefits of the multidisciplinary model for audit:

- It is possible to develop industry insights through multiple lenses, which enhance auditors' understanding of business risks relevant to conducting audits.
- The audit practice has immediate access to specialised resources and expertise in other business lines. It promotes audit quality because auditors can tap the expertise of advisory professionals who are skilled in subjects that often are not native to auditors.
- A diverse organisation helps attract and retain premier talent.
- Intellectual capital is available within the network to innovate audit processes, technologies, etc.

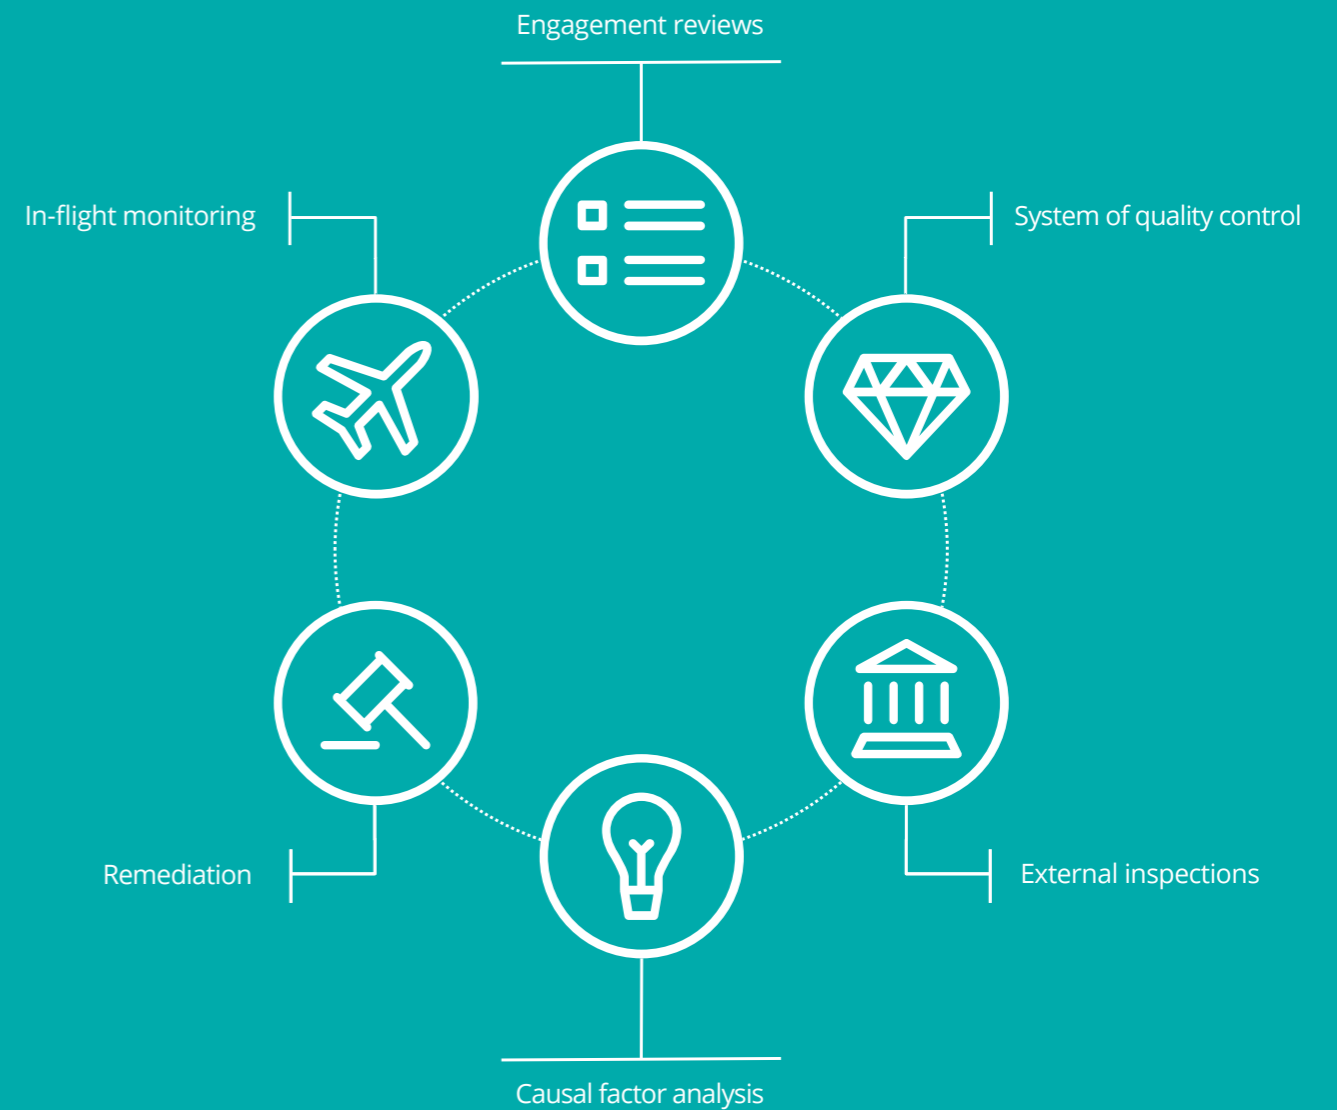

Different parts of our business grow at different rates during different time periods in different markets. Our multidisciplinary model provides a hedge against market volatility that is important to long-term viability of the network and makes significant investments in audit quality and innovation possible, even in times at financial pressures on the audit business.

Deloitte's response to COVID-19 demonstrates both resiliency in putting audit quality, and public interest first which is further supported by the significant benefits of the multidisciplinary model.

Negative quality events have the potential to impact the Deloitte brand as a whole. As such, each non-audit Deloitte business has a shared and vested interest in supporting audit quality initiatives.

Audit Quality Monitoring & Measurement

In-flight monitoring

Continuous audit quality monitoring by Deloitte Denmark drives a faster response to audit issues on "in-flight" engagements, driving identification, timely solutions, and real time corrective actions achieved by:

- Deployment and monitoring of a series of core Diagnostics, enabling engagement partners and teams, as well as Deloitte Denmark audit quality leaders to continuously monitor audit quality and take immediate action.
- A program of subject matter specific "health checks" to assist Deloitte Denmark audit quality leaders in assessing progress and identifying potential issues on in-flight engagements.

In addition, proper timing and sequencing of audit activities, including timely reviews of work performed and the resolution of matters identified, are closely associated with high quality audits. Audit Quality Milestones are intended to drive consistency of engagement teams in project management, timing of when the work is done, and necessary focus on engagement staffing, including sufficiency and expertise of assigned resources.

Engagement reviews

Key components of engagement reviews (internal practice reviews) include:

- Risk-based engagement selection and consideration of all major industries served by Deloitte Denmark.
- Mandatory moderation panel to drive consistency in findings and engagement ratings.
- External partners and deputies who oversee practice reviews to increase global consistency.
- Identifying appropriate resources (from within Deloitte Denmark as well as from other Deloitte geographies) with the right experience and industry expertise, including establishing central review teams.

System of quality control (SQC)

SQC includes numerous elements such as documenting key areas of the SQC processes and controls and performing procedures for testing the operating effectiveness of the SQC, including execution of a comprehensive SQC review program.

Used in conjunction with other metrics, Audit Quality Indicators (AQIs) further assist Deloitte Denmark in developing and monitoring audit quality action plans and reporting on the progress in its audit quality journey. AQIs are integrated with ongoing AQMM activities.

Causal factor analysis and remediation

Focusing on continuous improvement is essential to driving improvements in audit quality. Understanding why audit deficiencies occur is essential to the design of effective actions to remediate findings. Further, actions are taken when audit deficiencies in the performance of an audit engagement are identified. Engagement level remediation is imperative to drive continuous improvement in audit quality and avoid future similar findings. An Audit Quality Plan is prepared by Deloitte Denmark and provides for effective implementation and monitoring of key audit quality priorities.

External inspections⁸

In addition to our own monitoring of audit quality, we are subject to external reviews by the Danish Business Authority (DBA) and the US Public Company Accounting Oversight Board (PCAOB).

The results of the latest inspection by the DBA were published in May 2019. The conclusion from the DBA was the following:

"The Business Authority has not had any significant observations in 2018 regarding the areas of the quality control system reviewed in whole or in part.

When reviewing one assurance engagement, the Business Authority did not become aware of circumstances leading to the conclusion that the assurance engagement selected for quality control had not been performed, in all material respects, in accordance with the audit firm's quality control system and statutory requirements.

The Business Authority finds that the audit firm's internal organization and quality control system are

adequate given the firm's size and client portfolio. Nothing has come to the Business Authority's attention that causes it to believe that an appropriate quality control system has not been established, implemented and used.

Based on the quality control performed, the Business Authority has decided to close its review without any further follow-up, refer to Danish Public Accountants Act S 35a(1)(1).

Therefore, the Business Authority considers the 2018 quality control closed."

We concur and are very pleased with the Danish Business Authority's conclusion.

The Public Company Accounting Oversight Board (PCAOB) conducted together with the Danish Business Authority a joint inspection of Deloitte in the spring of 2016. The final inspection report was received in April 2017 and contained a few material remarks to the audit of two of the inspected audit engagements as well as to the system of quality control. We concur with the conclusion and we have immediately taken remedying measures. In January 2019, the PCAOB determined that Deloitte had addressed the observations to the satisfaction of the PCAOB.

In the spring of 2019, the PCAOB conducted an inspection of Deloitte Denmark. The final inspection report is not yet received.

Statement on the effectiveness of the functioning of the internal quality control system⁹

We confirm that we are satisfied that our internal quality controls and systems are robust, operate effectively, and allow us to readily identify any areas of potential enhancement. We continually seek to refine all aspects of our business and we use the findings of the practice review, other internal reviews and external regulatory reviews to enhance our system of quality control.

⁸ EU transparency reporting requirement: an indication of when the last quality assurance review referred to in Article 26 was carried out

⁹ EU transparency reporting requirement: a description of the internal quality control system of the audit firm and a statement by the administrative or management body on the effectiveness of its functioning.

The organizational capabilities we build

Deloitte culture and the design of our learning programs place our people at the forefront. Deloitte professionals are technically proficient with high levels of ethics, integrity, professional skepticism, and objectivity, and continuously enhancing their skillset and experience.

Deloitte is committed to developing its people and accelerating their careers by creating a life-long learning environment. We are advancing audit education, skillsets, and flexible career options that appeal to future auditors.

Deloitte professionals brings diverse backgrounds, knowledge, and skillsets that enhance our capability as organization in delivering the highest quality audits.

In addition, operational discipline, effective management of our business, and the development of a singular approach to doing audits known as The Deloitte Way, provide the foundation for our commitment to bring consistency to our audits. We are driving a sustainable audit and assurance business that compensates its people fairly and funds ongoing investment in our business.

Independence, ethics, and additional disclosures

Deloitte Global Independence

Sets **independence policies and procedures** based upon the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants and the independence standards of the US Securities and Exchange Commission and the Public Company Accounting Oversight Board. Performs full reviews of independence quality controls on a three-year cycle; provides an annual focused review program to be performed by member firms as part of their Audit Practice Review for the off-cycle years, and performs in-depth follow-up reviews as needed.

Performs **on-going monitoring** activities of firms—enabling continuous enhancements to global policies, quality controls, tools, and practice support activities.

Delivers **global systems** to provide professionals with entity information to support compliance with personal and professional independence requirements, including financial interests and scope of service approvals.

Supports **independence awareness** across the Deloitte network through active engagement with independence and business leadership groups, periodic communications and alerts, and development of guidance, learning and instructions.

Deloitte Denmark Independence¹⁰

Deloitte Denmark has policies and procedures designed to address compliance with applicable professional standards that relate to independence. These policies and procedures are based on the Deloitte Global Independence policy, and are supplemented, as appropriate, to reflect additional national

or regional requirements that may be more restrictive than Deloitte Global policies. Deloitte Denmark leadership reinforces the importance of compliance with independence and related quality control standards, thereby setting the appropriate tone at the top and instilling its importance into the professional values and culture of Deloitte Denmark. Strategies

and procedures to communicate the importance of independence to partners, other professionals and support staff have been adopted, emphasizing each individual's responsibility to understand and meet the independence requirements.

The Director of Independence is responsible for overseeing independence matters within the member firm, including the design, implementation, operation, monitoring and maintenance of the system of quality control related to independence.

The key elements of the system of quality control that Deloitte Denmark implemented in accordance with global policies include the following:

- Engagement acceptance and monitoring
- Monitoring long association of partners and professionals with audited entities
- Business relationship assessments and monitoring
- Use of independence business process tools, including the Deloitte Entity Search and Compliance (DESC) system and the Global Independence Monitoring System (GIMS).
- An Inspection & Testing program, annual and special purpose independence

confirmations, and consultations procedures to monitor individuals' compliance with independence requirements

- Procedures to identify and analyze non-compliance with independence requirements and apply related disciplinary measures and actions.
- Independence-related learning and communications

DESC Deloitte Entity Search and Compliance

Global, searchable database containing specific entity information relevant in determining personal and professional independence restrictions

GIMS Global Independence Monitoring System

Application that contains financial relationship data with relevant independence compliance indicators

Rotation of key audit partners and professionals¹¹

The rotation requirements in the Audit Act states that it is not possible to sign the audit report for a public interest entity for more than seven years. In Deloitte Denmark a leadership group monitors the staffing of the firm's public interest entities and ensures rotation of key members of the audit team in compliance with the requirements and without loss of important knowledge and experience about the client's business.

Confirmation of review of independence practices and monitoring

In accordance with Article 13.2 (g) of the EU Audit Regulation, we confirm that an internal review of our independence practices has been properly conducted in the year as a part of the 2018 practice review. Our internal and global practice reviews and other monitoring processes provide us with assurance that these policies are, in general, appropriately observed and, where exceptions are noted, identify where further action is required. In addition, the practice review includes an assessment of compliance with Deloitte Global independence policies and Danish additions. The results of these internal reviews are reported to the Executive team.

Deloitte Denmark Ethics

All Deloitte professionals are expected to act with integrity in accordance with high ethical standards as described in the [Deloitte Global Principles of Business Conduct](#) ("Global Code"). The Global Code is embedded into each member firm's Code of Conduct, and defines the commitments that all Deloitte professionals make regarding ethical standards, as well as explaining each individual's responsibilities to their clients, colleagues, and society.

In addition to the Global Code, other foundational elements of Deloitte's ethics program include global policies, a program of training and communications, and established reporting channels supported by defined incident management protocols. For continuous improvement, regular program assessments and reviews are conducted and feedback is collected from our professionals through an annual ethics survey.

Ethics at Deloitte is led by the Deloitte Global Chief Ethics Officer at the global level, and by member firm Ethics Officers at the local level, who are experienced partners with direct access to the member firm's CEO and governing body. Deloitte Global and member firm ethics leaders work together to continually monitor risk and to reinforce compliance with the Global Code.

Deloitte Denmark maintains policies and procedures that build on the global policies and are designed to provide reasonable assurance that its professionals comply with relevant ethical requirements.

The ethical requirements for audit and related assurance services provided by Deloitte Denmark are in accordance with Deloitte Global policies and procedures, which align with the requirements and guidance set out in the international Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, a standard-setting body of the International Federation of Accountants (IFAC).

Deloitte Denmark reinforces its commitments to ethics and integrity through communication tools, learning programs, compliance processes, and measurements systems. In addition, Deloitte Denmark requires all partners, other professionals and support staff to confirm annually that they have read and comprehended the member firm's Code of Conduct and understand that it is their responsibility to comply with it.

¹⁰ EU transparency reporting requirements: a statement concerning the audit firm's independence practices which also confirms that an internal review of independence compliance has been conducted.

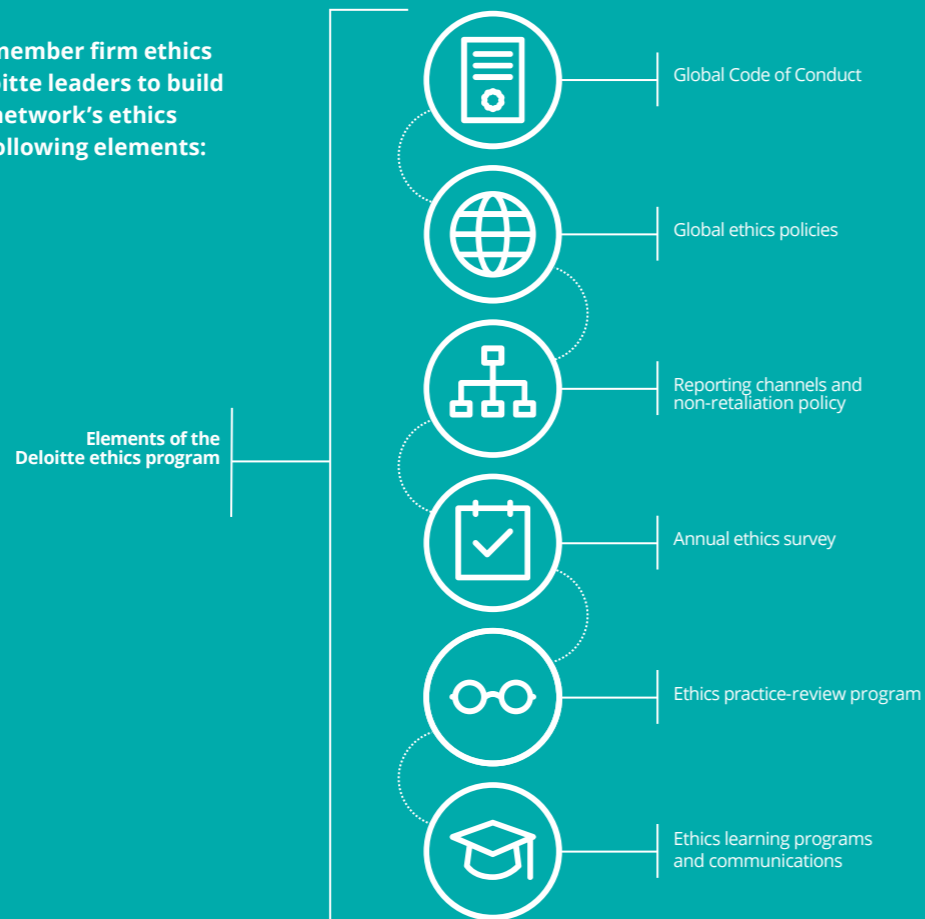

¹¹ EU transparency reporting requirements: a description of the audit firm's policy concerning the rotation of key audit partners and staff.

Deloitte Global Ethics and Integrity Imperative

Deloitte is committed to conducting business with honesty, distinctive quality, and high standards of professional behavior.

Deloitte's Global Principles of Business Conduct ("Global Code") outlines Deloitte's ethical commitments as a network and expectations for Deloitte's approximately 330,000 people, giving a strong, principled foundation. The Deloitte Integrity Imperative amplifies the Global Code across the network by empowering leaders to set a strong tone from the top; encouraging people to speak up when they witness anything that runs counter to the Global Code; and helping Deloitte act quickly and appropriately in the face of misconduct.

The Deloitte Global Ethics team and member firm ethics officers work closely with senior Deloitte leaders to build and enhance the foundations of the network's ethics program, which is comprised of the following elements:

Disclosure in accordance with Article 13.2 (b)(iv) of the EU Audit Regulation¹⁶

The total turnover achieved by the audit firms that are members of the network, resulting from the statutory audit of annual and consolidated financial statements: € 2.1 billion¹⁷

¹⁶ EU transparency reporting requirement: the total turnover achieved by the audit firms that are members of the network, resulting from the statutory audit of annual and consolidated financial statements.

¹⁷ Amount represents an estimate determined based upon best efforts to collect this data. Certain Deloitte audit firms registered to perform statutory audits in respective Member States provide statutory audit services as well as other audit, assurance and non-audit services. While Deloitte endeavored to collect specific statutory audit turnover for each EU/EEA Deloitte audit firm, in certain cases turnover from other services has been included. The turnover amounts included herein are as of 31 May 2020, except for a limited number of instances where a Deloitte audit firm has different financial year-end or has not finalized its reporting for such period. In these cases, turnover amounts are for the relevant financial year or preceding financial year. Where currency other than Euros is used in the Member State, the amount in Euros was translated using an average exchange rate in effect for the period 1 June 2019 to 31 May 2020.

Appendix B | Financial information¹⁸

Disclosure in accordance with Article 13.2 (k)(i)-(iv) of the EU Audit Regulation

The breakdown of the Deloitte Statsautoriserede Revisionspartnerselskabs 2019/20 revenue¹⁹:
