Deloitte .Cloud Services on AWS

Strategy and Transformation Services
Helping our clients use Amazon Web Services (AWS) cloud across the entire cloud lifecycle

Adoption	Migration	Operations and Sustainment
Guide agencies in selecting combinations of services and managing multiple vendors while providing transparency and security	Provide the analysis, architecture, engineering, and PM support needed to effectively implement cloud based services	Deploy the processes and tools needed to manage hybrid environments and support continuous integration and development
■ Deploy Managed Service Organization ■ Build Policy and Roadmap ■ Standup Cloud Services ■ Rationalize Application Portfolio ■ Define and Integrate Operating Model	■ Business Case Development ■ Engineering Design ■ Hardening and ATO Support ■ Test and Evaluation ■ Post Deployment Optimization	■ Infrastructure Automation and DevOps ■ Hybrid Cloud Orchestration ■ Shared Service Cost Management ■ Contract Management

Cloud Native Services
Modernizing software through the implementation of cloud native solutions on AWS infrastructure to deliver value at the speed of your mission

Agile
Iterative development lifecycle that sets the pace for rapid delivery and feature-rich releases in cloud applications

DevOps
Merging of development and operations through an automated pipeline that continuously builds, tests, and deploys code in the cloud

Data Discovery Services
Providing cloud-based data and analytics solutions to manage data in the cloud and drive actionable insights to your business
Data Strategy and Discovery
Understand and derive insights from your data through advanced analytics platforms in the cloud

- *Data Discovery Framework*
- *Data Management Services*
- *Analytics-as-a-Service*

Deloitte Managed Analytics Platform
Preconfigured analytics environment, accelerating the ability to deliver actionable business insights

- *Vast Data Sources*
- *Custom Visualizations*
- *Scalable Platform*
- *Faster Time to Value*

Cyber Risk Services
Providing secure, vigilant, and resilient cloud security solutions designed to proactively manage your cloud environments and protect what matters most to your mission

Strategy	Blueprint	Implementation & Operations
Develop agency strategies to manage cyber risk as the business adopts the cloud	Develop a tailored blueprint of cloud risk capabilities to meet business needs	Move on-premise security services to the cloud and implement cloud native security solutions
■ Cyber Governance Models and Strategic Roadmaps ■ Risk Policies and Procedures ■ Compliance Approach (e.g. FedRAMP) ■ Cyber Risk Assessment	■ Security Reference Architecture Development ■ Risk Management Framework Definition ■ Cyber Risk Requirements Management ■ Risk and Compliance Reporting	■ Cloud Security Broker Implementation ■ Advanced Analytics, Continuous Monitoring, and Threat Intelligence ■ Cloud Identity and Access Management ■ Issue Management and Remediation
