Introduction

With the recent wave of new trade regulations, corporate trade policies and regulatory frameworks are subject to increased scrutiny. To respond, multinational entities need scalable, flexible global trade management solutions that can facilitate compliance operations and adapt to the changes that are a reality in today's regulatory environments.

Deloitte's global offering of SAP Global Trade Services (SAP GTS) will help companies centralize, automate, and manage these collective requirements. For over a decade, Deloitte has led the market in global SAP GTS implementations, combining the expertise of global trade regulatory specialists, technical resources, and certified functional SAP GTS consultants. Deloitte's global network of highly experienced, international trade specialists provides clients with tailored, comprehensive regional and local regulatory support across all SAP GTS functionalities:

- **Compliance Management** maintains compliance by blocking documents through the three distinct functionalities of Sanctioned Party Lists (SPL) screening, Embargo, and Legal Control. With the SPL functionality, companies can screen documents against applicable international, national, and company-specific lists to prevent transactions with undesirable entities and individuals. The module's Embargo functionality blocks commercial transactions with embargoed countries, while Legal Control integrates license management with international and domestic regulations like the US Export Administration Regulation (EAR), US International Treaty of Arms Regulation (ITAR), and regulations from government agencies like the Food and Drug Administration.
- **Customs Management** streamlines the customs clearance process by gathering relevant trade information needed to generate and verify import and export declarations. This module enables efficient cross-border transactions by consolidating customs information in one location as well as providing the option to integrate electronic filing of import and export declarations directly with customs authorities. The Customs Management module also allows for other capabilities such as bonded warehouse management, Free Trade Zones (FTZ) management, and inward/outward processing relief.
- **Trade Preference Management** provides companies an efficient, auditable record to realize their cost-saving opportunities with international trade agreements like EU agreements, Southern Common Market (MERCOSUR), Association of Southeast Asian Nations (ASEAN) free trade agreements, and the US Mexico Canada Agreement (USMCA). The Trade Preference Management module facilitates the issuance and revocation of both vendor and customer declarations and performs preference determinations to confirm the lowest duty rates applicable.
- **Letter of Credit** helps manage and automate letter-of-credit-related activities at various stages of the order-to-cash.

Our Team

Global trade continues to evolve as one of the most complex and crucial aspects of supply chain management. Global trade requirements exist as a mix of national security, foreign policy, revenue collection, and consumer protection objectives. The complex nature of these requirements and their broad legal ramifications makes the need for technology-based solutions across this data-intensive field a business-critical one.

Designing the right solution and integrating it across various business processes requires a well-formulated approach and sound execution. Deloitte's 360° model is a comprehensive approach centered on the collaboration of Deloitte's wide network of professionals:

- **Global Trade Specialists** bring the regulatory knowledge needed to ensure the client's business processes meet regulatory requirements. Deloitte's Global Trade Specialists have a deep understanding of the SAP GTS capabilities and work closely with Deloitte's own functional and technical consultants to deploy a compliant GTS solution.
- **Functional SAP GTS Specialists** are responsible for documenting the client's business requirements and aligning the SAP GTS solution to those standards. The Functional SAP GTS specialists have a thorough understanding of SAP GTS capabilities, plus SAP ERP Central Component (ECC) and SAP S/4HANA® expertise.
- **Technical SAP GTS Specialists** implement the solution designed in collaboration with the client. Responsible for customizing the system through configurations and custom developments, the team also integrates GTS with the ERP and third-party systems.

Dedicated to delivering solutions of the highest quality, the team at Deloitte takes significant measures to manage risks and maintain quality assurance with its solutions. For three consecutive years, Deloitte earned the SAP® Pinnacle Award as SAP S/4HANA Partner of the Year, complementing its strength with SAP BusinessObjects Governance, Risk, and Compliance (GRC).

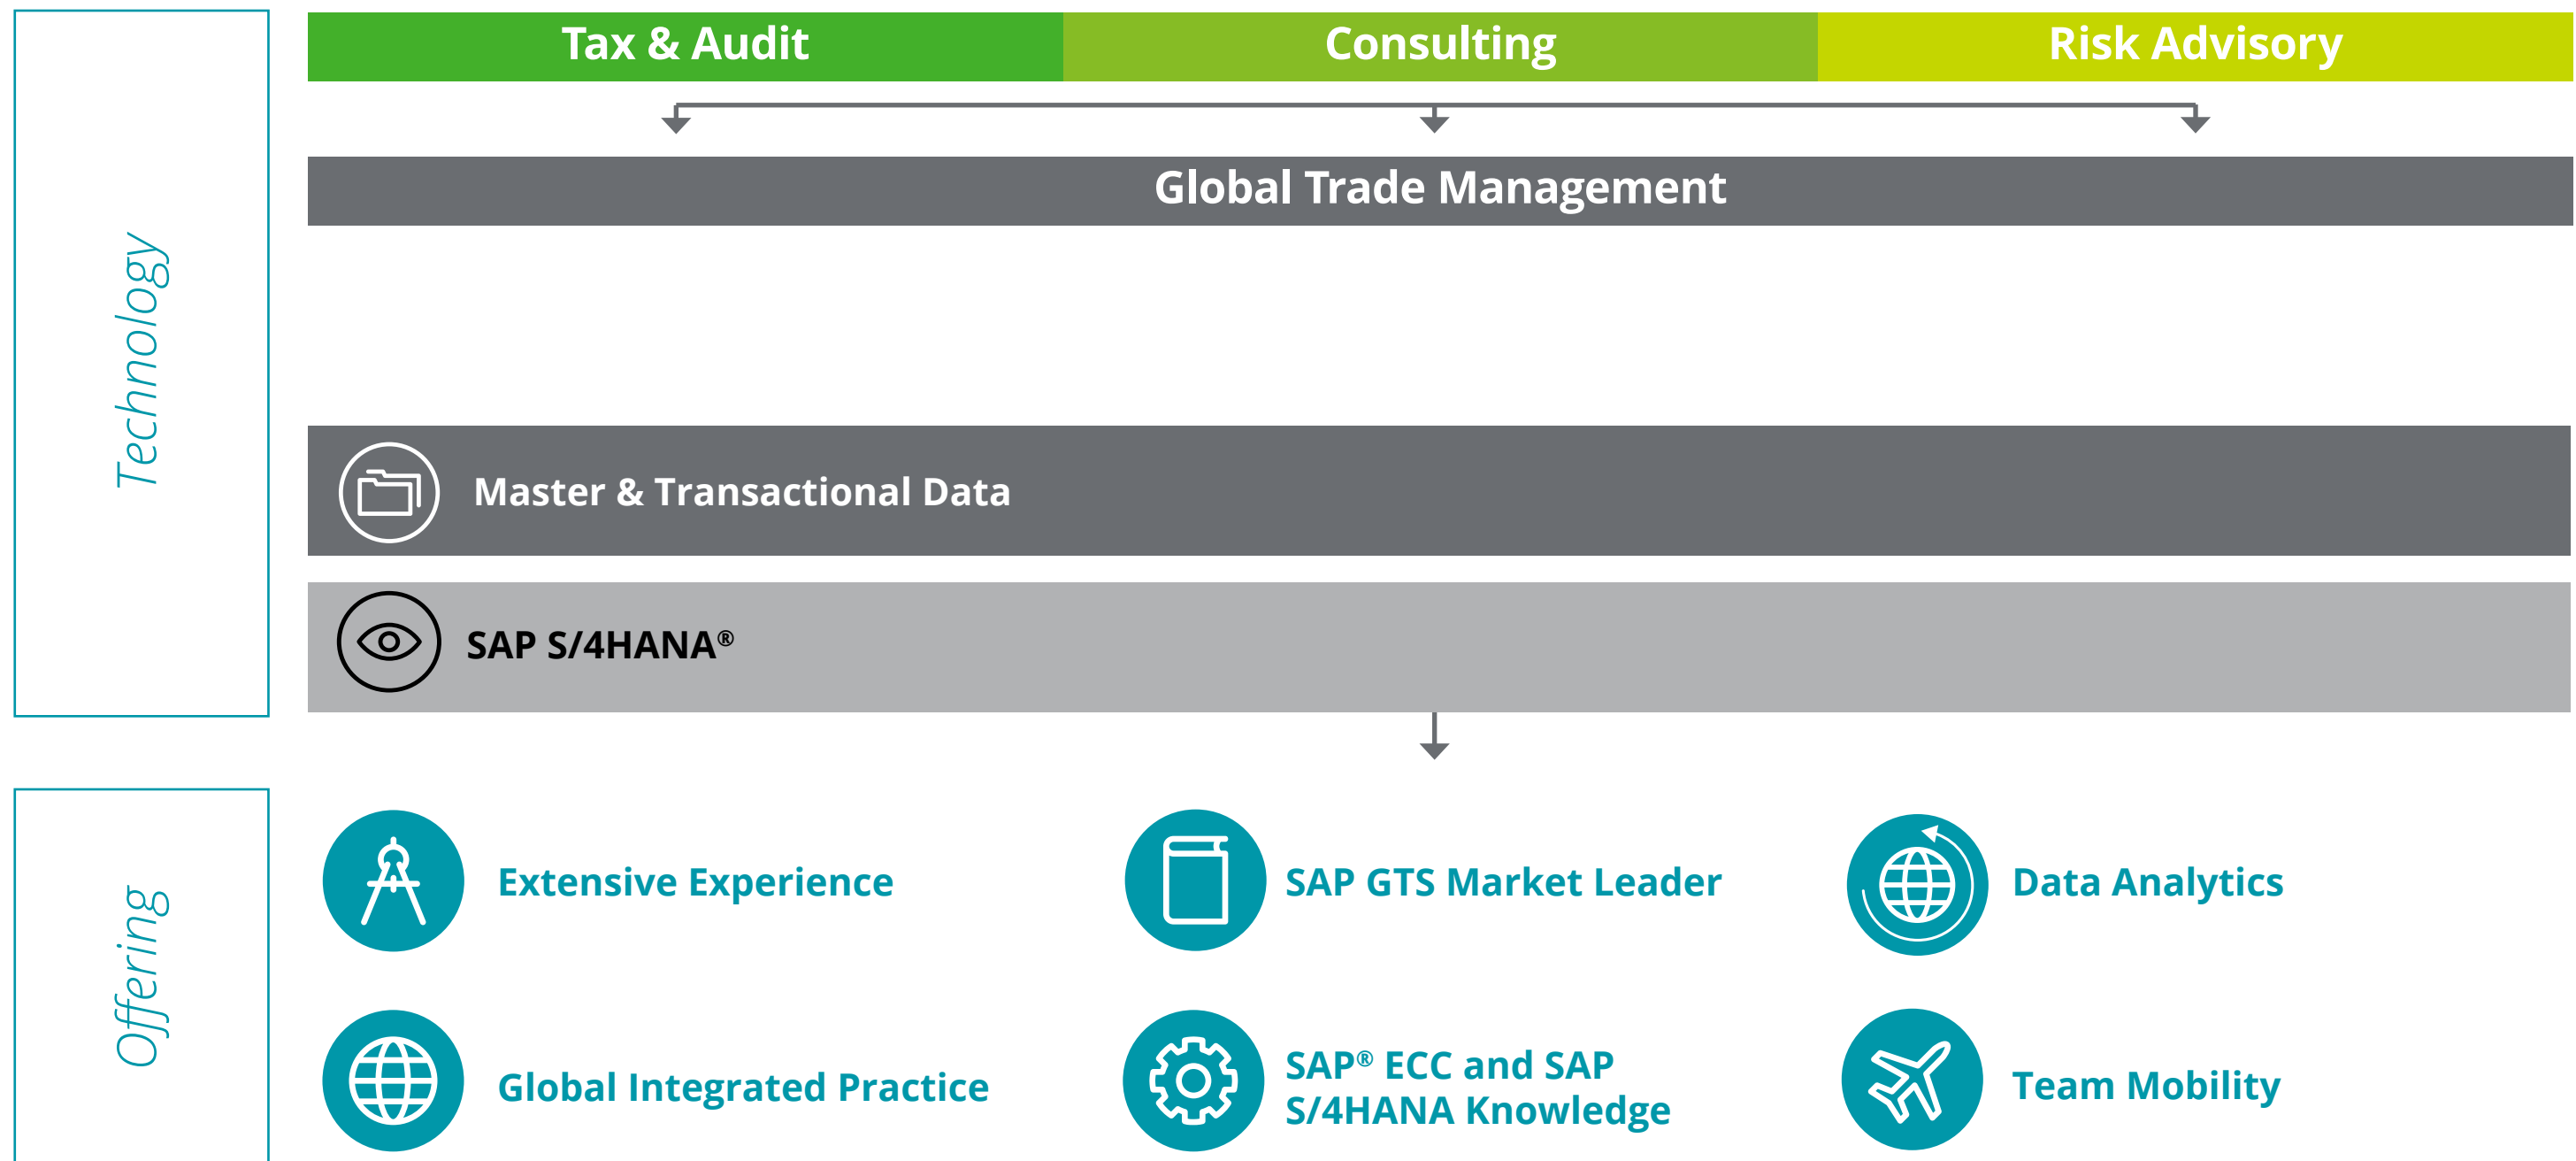

Approach & Integrated Offering

Our team of SAP GTS professionals supports clients at each stage:

- Identifying a high-level global trade automation strategy to optimize bottom-line metrics
- Designing a roadmap to achieve target global trade operations;
- Managing global trade regulatory compliance and operation costs
- Reducing financial risks associated with trade noncompliance
- Optimizing the impact of international trade duties
- Expediting cross-border transactions

Client Value

Global trade continues to evolve as one of the most complex and crucial aspects of supply chain management. With a mix of national security, foreign policy, revenue collection, and consumer protection objectives, the need for technology-based solutions across this data-intensive field with

broad legal ramifications is imperative. Architecting the right solution and blending this effort across business processes requires a well-formulated approach and sound execution. SAP Global Trade Services (SAP GTS) is an enterprise trade management platform that centralizes,

manages, and automates these collective requirements. Given Deloitte's 360° analysis of structures, processes, and systems, we are extremely well-equipped in matters of Customs and International Trade to come up with solutions for any challenges that clients might be facing.

GTS Footprint

We have built extensive experience with respect to the implementation of SAP GTS worldwide using Deloitte integrated teams combining Tax (Customs and Global Trade) and Consulting's Enterprise Applications/SAP transformation services.

Also, through close collaboration with our local customs experts, we were able to accelerate and secure legal requirement gathering and validation, delivering projects within timeline and budget.

GTS Publication

Since the inception of SAP GTS over ten years ago, Deloitte has worked alongside the SAP GTS team in Walldorf, Germany, with the shared goal of improving and developing the SAP GTS solution and related services. Three years ago, the Deloitte GTS Global Competency Center began working with SAP Press on a publication that would guide users through the design, implementation, and customization of the SAP GTS solution. The resulting book provides insights into the regulatory requirements as well as in-depth configuration guides necessary for customizing your SAP GTS solution.
