

Deloitte.

Building on connectivity for superior data-driven asset management

“We wanted an enterprise IoT platform that could generate new insights, support our core business, improve billing accuracy, and help us work more efficiently—so that our technicians, for example, could have instant information for installing and maintaining smart meters. SAP® Leonardo technologies and assistance from Deloitte helped us do that—with data-driven analytics serving as a key component.”

—Client Customer Manager

QUICK STATS

- Residential and commercial units managed: 35,000
- Hotel rooms managed: 5,700

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. Please see www.deloitte.com/about for a more detailed description of DTTL and its member firms.

Deloitte provides audit & assurance, consulting, financial advisory, risk advisory, tax and related services to public and private clients spanning multiple industries. Deloitte serves four out of five Fortune Global 500® companies through a globally connected network of member firms in more than 150 countries and territories bringing world-class capabilities, insights, and high-quality service to address clients’ most complex business challenges. To learn more about how Deloitte’s approximately 245,000 professionals make an impact that matters, please connect with us on Facebook, LinkedIn, or Twitter.

This communication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively, the “Deloitte network”) is, by means of this communication, rendering professional advice or services. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser. No entity in the Deloitte network shall be responsible for any loss whatsoever sustained by any person who relies on this communication.

THE ISSUE

Tracking residential, commercial, and industrial real estate assets works better when all the information they generate is tracked as well.

THE SOLUTION

A large EMEA-based asset management organization has customer operations that span residential and commercial properties; industrial plots of land; and leisure, entertainment, hotel, and serviced apartment properties. ABO Data, now part of Deloitte, helped implement a “smart building” IoT solution that integrates all the organization’s major building systems into a common network. Now the organization can share information and functionality between systems to improve building operations.

SAP technologies leveraged

SAP Leonardo IoT

SAP® Cloud Platform

SAP Customized Dashboard

THE IMPACT

New data-driven insights to support decision-making and proactive maintenance

Increased automation plus operational efficiencies

Integration with multiple device types and protocols/subsystems

Centralized monitoring platform for water and electricity consumption
