

Key Client Case – Finance Foundation

Setting up a strong foundational backbone with S/4 HANA at the core, enabling the digital transformation via fully integrated systems and processes, supported by future ready tools/technologies in core finance and logistics.

Deloitte is working closely with a large global chemical manufacturer specializing in synthetic fuel technologies, liquid fuels and base chemicals.

Deloitte partnered along to enable simplification/harmonization of business processes, aiming towards a fully integrated and transparent value flow.

Value Cases

Establish a **Global Template** based on harmonized and standardized business processes

Integrated key ERP and SaaS systems solutions to work in an **integrated end-to-end manner (S/4HANA, Coupa, OMP etc.)**

Deloitte's project finance team along with the tax technology team, advised client around topics of **indirect tax determination and tax reporting.**

Achieved very high rate of standardization (greater than 90%)

Establish a **Clean Core backbone** for the client, build on standardized business processes with a full adoption of SAP **Business Technology Platform (BTP)/ APIs**

Enabled Client's move to the **SAP S/4HANA RISE Private Edition**, supporting system migration/readiness in close collaboration with SAP RISE teams.

Solution Direction

Simplification of Client's business processes and definition of a global template

Harmonized heterogeneous & many versions of legacy operating CoA into **one operative CoA**

Implemented a fully integrated tax solution 'Onesource', for indirect tax determination and tax reporting.

Enables move from **cost-based COPA to Margin Analysis** solution.

Implemented **Multibank Connectivity (MBC)** to enable efficient bank communication and payment interface between the banks.

Enabled end-to-end system and process integration across SAP & non-SAP solutions, fully **integrating Coupa and OMP** Integrated Business Planning, with the S/4 HANA core processes.

Deloitte's Gen AI accelerators (autonomous spec generator, autonomous coding) for accelerated Build.

Deloitte's role

Deloitte's **Industry expertise and assets/ process repositories** for Chemical's industry was adopted and optimized to conduct process workshops across all business functions, establishing a Global Template, based on harmonized, simplified, and standardized business processes

Deloitte analyzed the business processes and conducted **process segmentation** sessions with the key stakeholders, to identify and classify the business processes into Core, Foundational and Strategic business processes

The **Deloitte's Tax technology team** is now engaged in implementing Onesource Tax solution, covering entire spectrum of business scenarios

Implement a **fully integrated digital platform** based on the leading enablers (S/4HANA, Coupa, OMP etc.)
