

Spend Analytics - Spend Control Tower

TARGET PAIN POINTS

- Limited operational efficiency
- Routine tasks requiring manual efforts

BUSINESS BENEFITS

Dashboards with standardized hierarchies. ✓

Efficient aggregation and application of enriched values. ✓

AI/ML models and user feedback integration. ✓

Timely, accurate spend report for business value. ✓

OFFERING DESCRIPTION

Elevate your financial oversight with SAP Spend Control Tower, an advanced analytics solution designed to enhance visibility into your company's overall spending data. Built on the robust SAP Business Technology Platform (SAP BTP), this innovative solution aggregates and transforms data from various source systems into actionable insights, all conveniently accessible in a single location. As a superior replacement for SAP's Ariba Spend Analysis solution, SAP Spend Control Tower empowers your organization to make informed decisions and optimize spending strategies with unparalleled clarity and precision.

VALUE STATEMENT

Deloitte's SAP Ariba Practice boasts a powerhouse team of over 750 functional and technical experts across 43 countries. Our dedicated SAP Ariba team has a proven track record, having successfully implemented nearly 400 global Ariba Source-to-Pay transformation programs. With unparalleled expertise and a global reach, Deloitte is your trusted partner for driving procurement excellence and achieving transformative results.

THE WHAT?

- Analytics dashboard with charts, visualizations, text, images.
- Integration with ERP and CRM systems.
- Seamless data flow and holistic organizational view.

THE HOW?

- For over a decade, Deloitte has been a leading SAP Ariba Implementation Partner, providing comprehensive advisory services on end-to-end cloud solutions. Our goal is to enhance the SAP Ariba Source-to-Pay practice by establishing a global platform for collaboration and knowledge sharing. We support clients in all facets, including Process, Organization, Technology, and Supplier Enablement.

WHY DOES IT MATTER?

Enhanced analytical tools for effective procurement data use.

Aggregated cross-functional data for informed decisions.

Identifying trends and forecasts demand.
