Ethical technology guiding principles
A values-based approach to the creation and use of technology at Deloitte

January 2023
Introduction

Deloitte’s Purpose is to make an impact that matters—for clients, our people, and society. We recognize technology provides tremendous opportunities to help us live our Purpose. It enables us to serve clients with distinction, provide our people with a leading talent experience, and contribute to communities through our WorldImpact programs. But, with opportunity comes responsibility.

Deloitte has developed this set of ethical technology guiding principles to help guide our people’s choices and prompt them to consider both the ethical implications of their tech-related activities and how their actions could affect end users and society. These principles reflect our collective commitment to responsible business practices and are rooted in our Shared Values to lead the way, take care of each other, foster inclusion, collaborate for measurable impact, and serve with integrity.
Our guiding principles

Regulations, local laws, and other industry-accepted guidance concerning technology should be followed

Deloitte serves with integrity and develops trust with our stakeholders by creating technology that complies with current local laws and regulations to advance the collective good.

- We strive to meet high standards of technical governance, security, and privacy.
- We encourage the consideration of the ethical and legal impacts of technology to maintain the trust of our people and stakeholders.
- We support the evolution of existing regulations to advance the ethical use of technology.

Technology should enhance lives and benefit society

Deloitte leads the way in leveraging our talent, ideas, and relationships to meaningfully contribute to and champion ethical technology.

- We aim to design, develop, and use technology with the goals of simplifying our lives and supplementing human ingenuity. We seek to anticipate the potential consequences automation and the use of technology may have on society, our clients, and our people.
- We are mindful of Deloitte’s sustainability goals as articulated in our WorldClimate commitments, and the potential impact of those decisions on the environment and natural resources when making internal technology decisions.
- We aspire to empower people through education and skills-building, including through the advancement of science, technology, engineering, and mathematics (STEM) knowledge through our WorldClass ambition.
Our guiding principles

The design and use of technology should respect individuals’ privacy rights

- We take care of each other by designing and considering security and confidentiality in our systems, consistent with privacy laws and regulations, to uphold our obligations to our people, end users, and stakeholders.
- We respect the people behind the data and comply with our obligations related to personal data.
- We seek to prioritize safety and security ahead of ease of access to shield data from unauthorized users.
- We strive to implement appropriate safeguards to uphold our commitments to our people, our communities, and those with whom we work.
- We aim to be transparent about why we collect data and how it will be used.

Technology should promote equitable, unbiased outcomes

- Deloitte strives to design, use, and apply technology to foster inclusion and equitable outcomes.

- We endeavor to design, develop, and use technology that’s aligned with Deloitte’s commitment to diversity, equity, and inclusion (DEI).
- We seek to examine the assumptions used when designing and evaluating technology to enable better informed, more transparent, and consistent decisions.
- We strive to minimize bias in our algorithms, data, and technology.

Design practices should be transparent and enable understandable outcomes

- Deloitte works collaboratively to incorporate good governance practices, including human review, into the technologies we design and develop to assess the soundness of our approaches and technical implementations.
- We focus on open and explainable data practices and advanced analytics so that our activities and decisions can be understood by our stakeholders.
- We seek transparency about the contexts, uses, and outcomes of technologies.
Governance

Deloitte’s ethical technology guiding principles will help inform decision making related to responsible business practices, and our senior executives oversee our commitments to these practices.

Deloitte offers specific channels for reporting incidents that appear to demonstrate irresponsible business conduct. We firmly prohibit retaliation against those who report in good faith or who otherwise participate in related investigations. Our ethics reporting channels are available to Deloitte professionals and we also provide a reporting channel for third parties.
Deloitte, "us," "we" and "our" refer to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organization"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte provides industry-leading audit and assurance, tax and legal, consulting, financial advisory, and risk advisory services to nearly 90% of the Fortune Global 500® and thousands of private companies. Our professionals deliver measurable and lasting results that help reinforce public trust in capital markets, enable clients to transform and thrive, and lead the way toward a stronger economy, a more equitable society and a sustainable world. Building on its 175-plus year history, Deloitte spans more than 150 countries and territories. Learn how Deloitte’s approximately 415,000 people worldwide make an impact that matters at www.deloitte.com.
