# Foreword

In this, the eleventh year of the Deloitte Touche Tohmatsu Limited (DTTL) Global Technology, Media & Telecommunications (TMT) Industry Group's annual Technology Fast 500 Asia Pacific Ranking, we are seeing Asia Pacific's fastest-growing TMT businesses comfortably sustain their growth figures through a second consecutive year of crisis. In the face of changing demand patterns internationally and now within the region, their power and performance is visible and clearly quantified in the statistics of the Technology Fast 500 Asia Pacific 2012 Ranking.

To ensure that we capture all of the value creation and commercial impetus of the region in our ranking of high-growth tech companies, we gather data from TMT businesses in nine Asia Pacific locations—Australia, China (including Hong Kong), India, Japan, Korea, Malaysia, New Zealand, Singapore and Taiwan. The resulting ranking serves as one of the most respected benchmarks of the success of Asia Pacific's fastest-growing 500 technology companies, both private and public, determined by their three-year historic revenue performance.

The achievement of the Fast 500 in 2012 was all the more striking for its widespreadness. The average three-year revenue growth of 467 percent for this year's high-growth businesses across the many and varied economies of the region, came within a few percentage points of last year's average of 476 percent, easily maintaining a recovery that had already taken the TMT sector well beyond the average of 374 percent in 2010. Although the top five performers in this year's survey showed lower average growth across the last three difficult years, at 6,837 percent, down from 9,910 percent in 2011, the fortunes of the underlying sector as a whole across Asia Pacific—even in the face of such unprecedented developments as a continuing eurozone crisis and a slowdown in China—clearly remain bright.

This year's fastest-growing tech company, ProCrystal Technology, demonstrates the consistency and solidity of the Asia Pacific TMT base, as much as it does the power and contribution of

innovation. Coming from a mature industry sector—Semiconductors, Components and Electronics—and Taiwan, a historic centre of Asia's post-war tech revolution, ProCrystal may not quite have matched the breakneck growth of the number-one performer in 2011, The Store Corporation (Yihaodian) of China, at 10,028 percent versus the latter's 19,218 percent. However, ProCrystal's sapphire crystal manufacturing focus and business-to-business operating model proved resilient in a period of consumer downturns almost everywhere, while its steady technological development gave it the resources and capabilities to tap new customers for its products, while holding on to the innovation lead. We talk to its President, Chang Guo-Rei, about how he is leading the firm into new markets in Asia and the West, as well as new applications in consumer devices, while garnering awards and accolades at home. His company's story shows that patience and persistence can be as important as vision and entrepreneurial zeal in achieving outperformance.

The endurance and stamina of this year's Technology Fast 500 show that Asia Pacific's high-growth companies may well be leading the TMT sector worldwide for many more years to come. The winners have our sincerest admiration and congratulations.

# DTTL TMT at a glance

---

DTTL TMT keeps abreast of TMT trends and makes significant investments in producing cutting-edge thought leadership. We are deeply committed to providing insights that keep Deloitte member-firms' clients on the forefront of critical trends. The DTTL TMT Group's innovative thinking is highly valuable to, and sought by, a range of stakeholders including business schools, trade organizations, government agencies and companies of all sizes.

## Services

Companies in the TMT sector confront a swiftly changing marketplace and Deloitte member-firms' TMT practices are helping companies adapt quickly, with extensive services across the following areas:

- Integrated Market Offerings (IMOs)
- Audit & Enterprise Risk Services (AERS)
- Tax advisory
- Consulting
- Financial Advisory (FAS) and Corporate Finance

## People

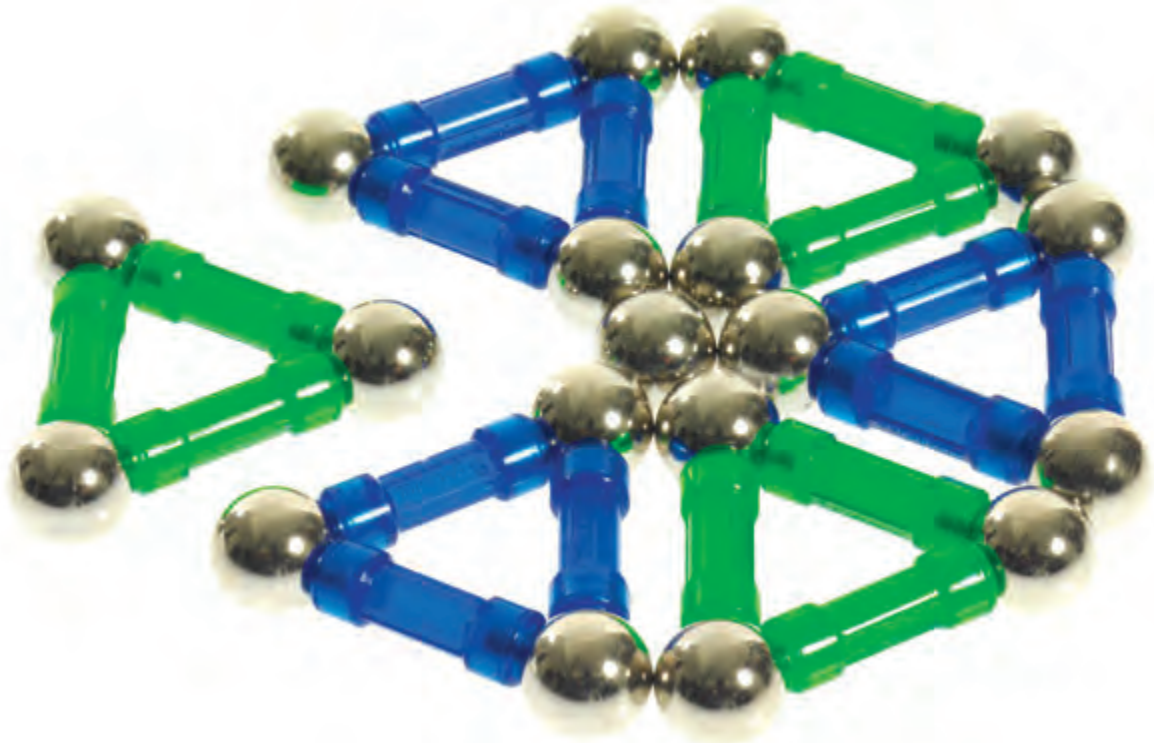

The DTTL Global Technology, Media & Telecommunications (TMT) Industry Group consists of professionals from Deloitte member-firms' TMT practices and includes more than 15,000 member-firm partners, directors and senior managers, supported by thousands of other member-firm professionals dedicated to helping their clients evaluate complex issues, develop fresh approaches to problems and implement practical solutions. The Global TMT executive committee is led by Jolyon Barker, DTTL Managing Director of Global TMT. He and the executive committee are supported by function leaders, sector leaders, regional leaders, client program leaders and marketing and eminence leaders.

### Member firms

There are dedicated TMT country leaders in over 75 member-firm practices in all major countries across the Americas; Asia Pacific; and Europe, Middle East and Africa (EMEA), and a global network of member-firm partners over the same regions, along with global virtual centers of excellence for each industry sector.

### TMT clients

- 93 percent of the TMT companies in the *Fortune* Global 500®
- 19 of the 23 largest technology companies
- All nine of the largest global media companies
- All 23 of the largest telecommunications companies

## Selected TMT thought leadership

### **Technology, Media & Telecommunications Predictions 2012**

*Technology, Media & Telecommunications Predictions* is an annual series that examines major trends in the technology, media and telecommunications (TMT) industry—both locally and worldwide—that Deloitte believes are likely to have significant medium- to long-term impact on companies in TMT and other sectors. The report is based on a year-round research process involving member-firm practitioners, member-firm clients, industry analysts and hundreds of thousands of proprietary data points generated by quantitative research.

### **Changing the game: The State of the Media Democracy International Summary**

The sixth edition of Deloitte's State of the Media Democracy survey provides unique generational insight into how consumers interact with technology, purchase products and respond to advertising, and what they are likely to be drawn to in the future. This edition assesses the media consumption preferences of nearly 2,000 consumers aged between 14 and 75, revealing significant trends, including how increased access to content is driving consumption; how smartphones are continuing to challenge other devices; and how digital video recorders are sustaining consumers' cable and satellite television subscriptions.

### **The future of TV advertising: A slow start for advanced technologies**

Deloitte UK's new analysis of the TV advertising market finds that advanced TV advertising, such as targeted and interactive advertising, is unlikely to have significant impact on Europe in the next five years. This is in line with previous Deloitte research indicating that traditional television advertising continues to dominate the advertising industry. In the US, advanced TV advertising is still in an experimental phase and faces a number of major challenges before it can achieve mainstream acceptance. The report also details the strong industry appetite for more data on viewers and viewer behavior.

### **The Connected Archipelago:**

#### **The role of the Internet in Indonesia's economic development**

The Internet is beginning to transform the way in which the Indonesian economy and society operate. While the level of Internet penetration is low in Indonesia compared to some of its neighbours—at 9.1% of the population in 2010—Internet growth has started to accelerate sharply, as have the changes that come with it.

### **Open Mobile: The growth era accelerates**

*Open Mobile: The growth era accelerates* is the latest study in a series of ongoing reports on the mobile space, offering insight and guidance on maintaining competitiveness in the face of heightened market competition and technological disruption. At the core of the study is a survey on the impact that open mobile will have over the next three to five years. Issues covered include the transformation of the planning, preparation and overall strategy-formulation process in mobile technology-oriented companies today. The survey also checks the pulse of companies in the throes of transition from closed business models to a more open, collaborative approach to competition in the 4G mobile era.

### **Innovating for a digital future: The leadership challenge**

TMT companies face a significant challenge: how to innovate beyond products or deeply ingrained ways of working, which have been successful to date, but are now holding back organizations from their next stage of evolution. The report includes perspectives derived from interviews with leaders across the TMT sector, including Telstra, ABC, Facebook, Google, BBC and Microsoft.

### **Digital disruption: Short fuse, big bang?**

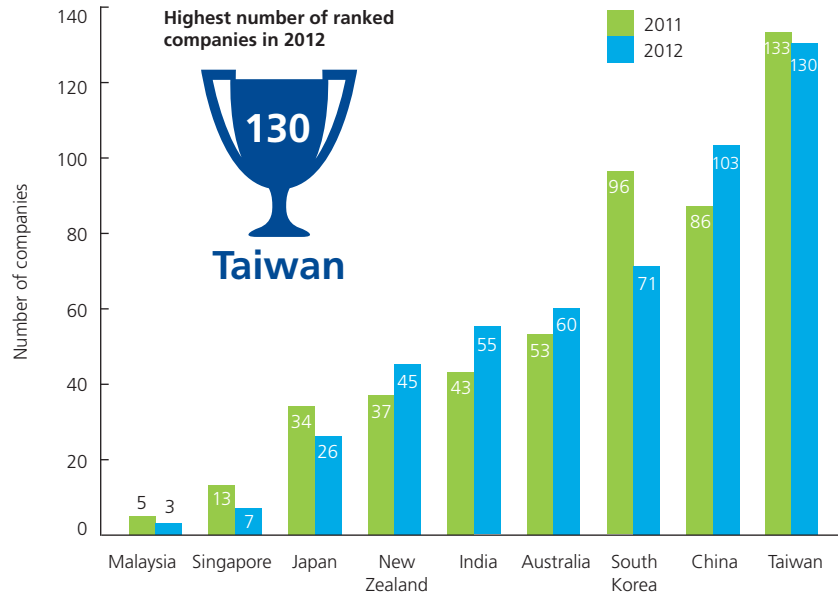

*Digital disruption: Short fuse, big bang?*, the newest paper in Deloitte's *Building the Lucky Country* series, considers the size of the 'bang': the magnitude of digital transformation within Australian business and government, as well as the length of the 'fuse': how quickly 18 industry sectors will be affected. With one-third of Australia's economy facing a 'short fuse, big bang' scenario, Deloitte offers practical advice to business leaders and government policymakers.

# Fast facts

## By location

This year, Taiwan held on to its top slot in the Fast 500 ranking, with almost the same number of companies in the ranking as last year (130 versus 133 in 2011). China moved up to second place with 103 contributions (up from last year's 86), while South Korea, last year's second-place holder, offered 71 companies compared with 96 in 2011. Australia came fourth, with 60 entrants, followed closely by India with 55.

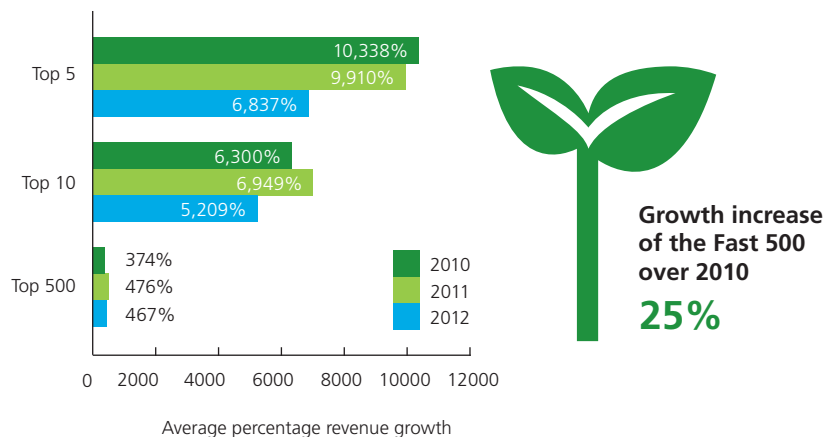

Number of ranked companies by location in 2011/2012

## By revenue growth

The top five companies' combined, average three-year revenue growth for 2012 came in at just under 6,837 percent, down from 9,910 percent in 2011 and below the 2010 figure of 10,338 percent. Encouragingly, the entire field of 500 high-growth companies delivered average growth of 467 percent in 2012, a small drop from 476 percent in 2011 and consolidating the recovery from 2010 and 2009 of 374 and 361 percent, respectively.

Average revenue growth of the top 5, 10 and 500 from 2010–2012

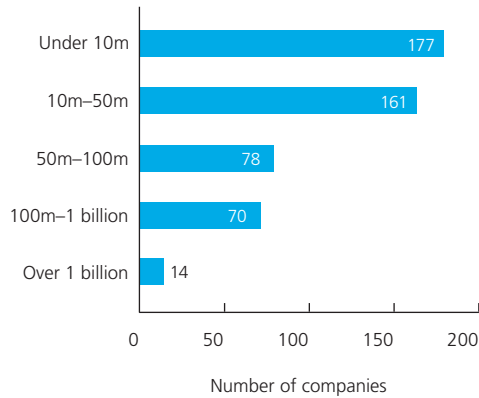

### By final-year revenue

Final-year revenue also showed respectable figures, overall. The number of companies in the highest tier, with over USD1 billion in final-year revenue, actually rose to 14 companies from eight in 2011—a 57 percent increase. Likewise, the number of companies in the USD50–100 million tier rose from 44 to 78 companies—a 56 percent increase. The number of companies with less than USD10 million in final-year revenue dropped from 207 companies in 2011 to 177 in 2012, almost back to the 2010 figure of 175.

### Final-year revenue of the Fast 500 in 2012 (USD)

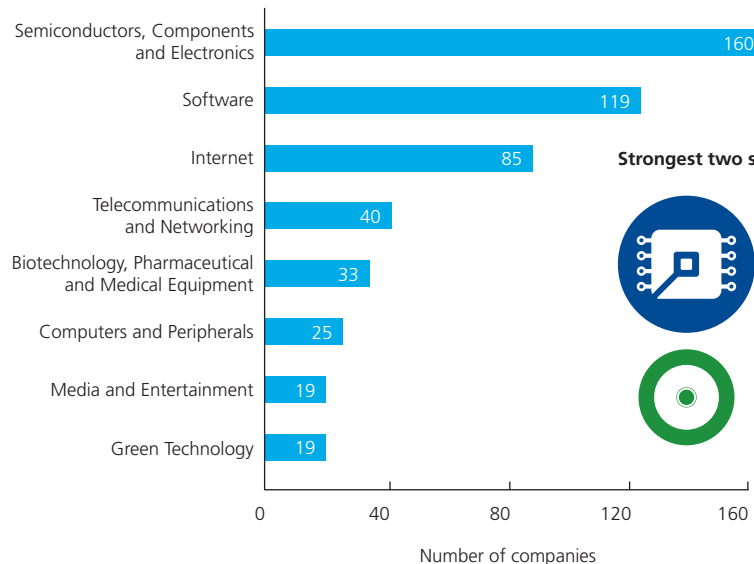

### Number of companies with over USD1 billion in final-year revenue

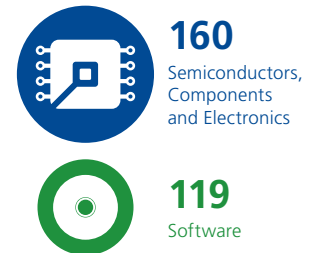

### By industry sector

In 2012, the Semiconductors, Components and Electronics sector pretty much matched its leading performance in 2011, with 160 entries versus last year's 166. The sector also contributed the year's fastest-growing company, ProCrystal Technology of Taiwan, which reported three-year growth of 10,028 percent. Software recovered something of its historic standing in the region, moving up to second place with 119 high-growth companies in its industry sector in 2012, compared with 87 in 2011. The Internet sector dropped from second to third place with 85 companies, down from 92 last year.

### Number of ranked companies by industry sector in 2012

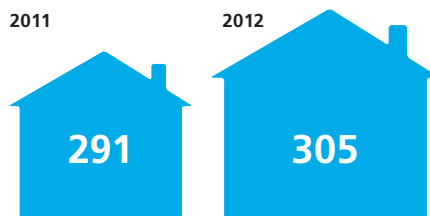

### Strongest two sectors in 2012

## Public or private

Unsurprisingly, given the volatility in global equity markets during 2012, the year saw higher growth in the privately held segment of the Asia Pacific TMT community than among the publicly listed companies. There were 305 private, high-growth companies in this year's Fast 500—five percent more than the 2011 figure of 291. Meanwhile, publicly listed high-growth companies numbered 195—seven percent fewer than the 2011 figure of 209.

## Private companies in 2011/2012

Public versus private companies		
	2011	2012
Public	209	195
Private	291	305

## Top 20 ranked companies

Although Taiwan dominates the overall ranking this year, it only contributes two companies to the top 20, compared to the five it offered in 2011. China, by contrast, boasts seven in the top 20, with South Korea mustering four. New Zealand, perhaps a surprise contender as a high-growth enterprise venue, contributes two top 20 companies, as does Japan. Seven of the top 20 companies are Software businesses, while five are Semiconductors, Components and Electronics firms.

# The power of performance:

## Interview with Chang Guo-Rei, President ProCrystal Technology

**DTTL TMT:** Has your growth over the last three years been organic or inorganic?

**Chang Guo-Rei:** It has been organic and stable. Innovation and continuous improvement are our core values, supported by the growth of key focus areas of our business.

**DTTL TMT:** Has the global slowdown affected your company growth?

**Chang Guo-Rei:** Yes it has, but we are developing new products, improving product specifications and looking for more sales channels, such as 3C products and smartphones.

ProCrystal Technology specializes in the production of sapphire wafers. We have state-of-the-art equipment incorporating high-end technology, which results in high-quality products, including sapphire ingots, sapphire wafers and PSS (pattern sapphire substrate) wafers. Most of the business applications for sapphire wafers are in the illumination area, where the products are used in automotive applications, general lighting, signage and screens, as well as in backlighting for laptops, tablets, mobile phone screens and TVs and monitors. They are also used in camera lenses and cover glass for watches and mobile phones, as well as in their traditional application in jewelry.

**DTTL TMT:** Are you confident of growth in 2013?

**Chang Guo-Rei:** Yes, we are confident that we will keep growing.

**DTTL TMT:** Has innovation played a big role in your company's success?

**Chang Guo-Rei:** Innovation has played a very important role in ProCrystal Technology and represents a fundamental value for the company. ProCrystal differentiates itself from competitors with its three major product lines: ingots, sapphire wafers and PSS. Our ability to combine and manufacture all related products together makes us a convenient one-stop shop for our clients. Competitors have the ability to produce only one of these product offerings, so they have to work with other suppliers to offer all three, which results in additional costs and schedule delays.

### Up close and personal

Chang Guo-Rei is a serial entrepreneur with a track record of leading companies. His philosophy, he says, is best summed up as "driven to perfection".

Chang is devoted to his work and family. Prior to the age of 40, he admits to having spent most of his time working, but now tries to devote more time to leisure activities, such as painting, and his office walls are covered with his own creations.

Chang loves the great outdoors and enjoys cycling and golf on weekends. He plays golf for the Taiwan PGA and is proud to have played with Taiwanese golfer Yani Tseng, currently ranked number one in the Women's World Golf Rankings.

---

**DTTL TMT:** Can you highlight any key changes to strategy ahead?

**Chang Guo-Rei:** We are expanding into new markets such as Japan, Korea, China and the United States. However, our main focus remains on Asia. Also, we are developing new sapphire applications, such as 3C products: sapphire screen covers, sapphire lens covers and so on.

**DTTL TMT:** What percentage of spend do you allocate to R&D?

**Chang Guo-Rei:** More than ten percent each year.

**DTTL TMT:** Which company achievement are you most proud of, to date?

**Chang Guo-Rei:** ProCrystal has successfully developed the first eight-inch sapphire ingot and eight-inch sapphire-wafer facility in Taiwan, for which we received an industry innovation award from the MOEA (Ministry of Economic Affairs) this year.

**DTTL TMT:** What is the greatest challenge the company faces, currently?

**Chang Guo-Rei:** Our greatest challenge is our competitors in China and South Korea, who are continuously expanding their sapphire capacity. However, markets outside Taiwan struggle to maintain production quality. ProCrystal's highly qualified R&D engineer teams keep pushing development and raising expectations for stable production quality.

# The strongest outperformers: The top five companies

This year's top five companies demonstrate that the business environment has changed and companies are recalibrating their expectations to reach the top. Their average three-year growth rate was 6,837 percent, down on the 2011 figure of 9,910 percent and even the 2009 figure of 8,980 percent, showing that even in Asia, today's top players are overcoming major challenges.

Best of the best in 2012 is ProCrystal Technology of Taiwan with three-year growth of 10,028 percent, a result that demonstrates the continuing importance of the semiconductor sector and the contribution of Taiwan, even as China asserts its predominance. ProCrystal's success arose partly through surmounting obstacles, evident when comparing its growth with the 19,218 percent growth rate of last year's winner, The Store Corporation (Yihaodian).

#### Top five companies at a glance

- Two from China, two from Taiwan and one from India
- Three-year average growth rate of 6,837%
- Two Semiconductor companies
- Two Internet companies
- One Media and Entertainment company

## 1. ProCrystal Technology

<b>Sector</b>	Semiconductors, Components and Electronics
<b>Location</b>	Taiwan
<b>Three-year growth</b>	10,028%
<b>Founded</b>	2008
<b>CEO</b>	Chang Guo-Rei
<b>Website</b>	<a href="http://www.procrystal.com.tw">www.procrystal.com.tw</a>

ProCrystal Technology Co Ltd (PCT) specializes in the manufacture of high-quality sapphire wafers. Using its own R&D technology, PCT is continually extending the operational scale and market reach of its business, and improving its product quality, with full ISO 9001:2008 certification. Most of the business applications for sapphire wafers are in the illumination area, where the products are used in automotive applications, general lighting, signage and screens, as well as in backlighting for laptops, tablets, mobile phone screens and TVs and monitors. They are also used in camera lenses and cover glass for watches and mobile phones, as well as in their traditional application in jewelry.

## 4. Online Recharge Services

<b>Sector</b>	Internet
<b>Location</b>	India
<b>Three-year growth</b>	5,227%
<b>Founded</b>	1997
<b>CEO</b>	Sharat Jain
<b>Website</b>	<a href="http://www.rechargeitnow.com">www.rechargeitnow.com</a>

Online Recharge Services Private Limited operates [rechargeitnow.com](http://rechargeitnow.com), an online, multi-operator, instant prepaid recharge station. It specializes in delivering online recharge solutions for prepaid mobile, direct-to-home broadcasting and other providers of account- and coupon-based services. The company's vision is to create a recharge payment gateway through which customers can make all their recharges, at any time, and from any location.

---

## 5. Brightek Optoelectronic

<b>Sector</b>	Semiconductors, Components and Electronics
<b>Location</b>	Taiwan
<b>Three-year growth</b>	4,719%
<b>Founded</b>	2005
<b>CEO</b>	Huang Jian-Jung
<b>Website</b>	<a href="http://www.brightekled.com">www.brightekled.com</a>

Brightek Optoelectronic Co Ltd is principally engaged in the manufacture, processing and distribution of optoelectronic, semiconductor and electronic components. The company provides light-emitting diode (LED) lamps, including LEDs in visible and invisible wavelengths, and its products are used in the manufacture of household appliances, lighting solutions, automobile products, outdoor electronic panels, traffic signals, display panels and backlit products. In 2011, the company obtained approximately 93.35 percent of its total revenue from LED lamps with visible light.

# Deloitte Technology Fast 500 Asia Pacific 2012 Ranking

A league of its own.

The Deloitte Technology Fast 500 Asia Pacific Ranking measures and recognizes growth of the fastest-growing technology companies in the region. Five hundred companies are ranked according to revenue growth rates over the past three years.

## How does the DTTL TMT Industry Group determine the winners?

The Deloitte Technology Fast 500 Asia Pacific 2012 winners consist of the 500 public and private technology, media and telecommunications companies headquartered in Asia Pacific, that have achieved the highest rates of revenue growth over the past three years. In order to be eligible for Technology Fast 500 recognition, companies must have base-year operating revenue of at least USD50,000.

The DTTL TMT Industry Group assumes that all information provided by each company is accurate and does not independently verify such information.

The 500 companies in the 2012 ranking did surprisingly well considering macroeconomic circumstances, maintaining an average three-year growth rate of 467 percent versus 476 percent in 2011 and still representing steady recovery from the 2010 figure of 374 percent. The sharp drop-off in the average growth rate of this year's top five performers (from 9,910 percent in 2011 to 6,837 percent in 2012) was not duplicated in the rest of the field: there the story was of steady resurgence, demonstrating the strength and depth that Asia Pacific TMT companies can deliver at every stage of the business cycle.

Semiconductors, Components and Electronics remained the leading sector in a year dominated by traditional technology, contributing 160 companies versus 166 in 2011. And despite the presence of two Internet companies in this year's top five fastest-growing companies, Software ranked second as a leading growth sector, up to 119 entrants from 87 in 2011. Internet companies as a whole numbered 85.

## About O'Melveny & Myers LLP Asia Practice

O'Melveny began its practice in Asia nearly 25 years ago, and over this time has become one of the most respected legal service providers in the region. The firm has 150 lawyers on the ground in the region, with experience spanning China, Hong Kong, Japan, Singapore, Australia, South Korea, India, Indonesia, Thailand, the Philippines and other emerging Asian markets. Most of our lawyers are native to the region, understand local law and business practices, speak local languages and, most importantly, function as an integrated team that taps the firm's vast resources in Asia and globally, delivering value and expediency to our clients.

Our China practice is widely and frequently recognized as one of the strongest in the market. In Japan, the firm is recommended by *The Legal 500 Asia Pacific* and *Chambers Global* for corporate, mergers and acquisitions (M&A) and dispute resolution work.

Our Singapore office, opened in 2008, has grown rapidly and is recognized as a hub for corporate, finance and private equity work for the entire South and Southeast Asia region. The office was named 'Corporate Law Firm of the Year' and 'Emerging Companies Law Firm of the Year' at the 2011 Acquisition International Legal Awards.

In 2011, O'Melveny established a non-exclusive association in Indonesia with Tumbuan & Partners, one of the most respected corporate law firms in Indonesia. *Asian-MENA Counsel* recently named the firm '2011 In-House Community Firm of the Year' for Indonesian Corporate and M&A and shortlisted us for the 'Most Responsive International Firm of the Year' Award in Indonesia. This network provides us with one of the largest and most experienced Asia practices of any international law firm. For more information, please visit [www.omm.com](http://www.omm.com).

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see [www.deloitte.com/about](http://www.deloitte.com/about) for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

**Deloitte global profile**

Deloitte provides audit, tax, consulting and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte's approximately 200,000 professionals are committed to becoming the standard of excellence.

**Disclaimer**
