

Deloitte Enterprise Performance (SAP & Oracle) + Cyber

Transform your business. Grow with confidence.

Deloitte's Enterprise Performance + Cyber helps you transform your business by reimagining processes, driving innovation, and supporting growth—all while embedding robust cybersecurity measures to protect your data and systems.

Through our holistic approach, we develop an understanding of your business's unique needs and challenges, designing a tailored SAP and/or Oracle solution through an iterative process that sets you up for long-term success that is secure and compliant.

The opportunity

Digital transformation is essential to your business. But it poses cybersecurity risks.

Enterprise platforms like SAP and Oracle touch every part of your business—including finance, supply chain, human resources and customer management. It's imperative to implement comprehensive cybersecurity strategies specifically designed for these environments in a way that's both compliant with regulations and scalable for your organization.

Deloitte's Enterprise Performance + Cyber services

SAP and Oracle solutions that drive business transformation and provide ongoing operations and maintenance services.

Deloitte works with your team to understand their challenges and ambitions, ensuring that our specialists are well positioned to design and deliver the right approach to digital transformation—all with consideration for cybersecurity measures at every stage of the process.

Prepare

Set the foundation and lay out priority decisions for transformation success. Our approach considers your challenges, digital ambitions, business outcomes and benefits gained when jump-starting design.

Imagine

Use a human-centered design approach to integrate and innovate on your organizational goals—bringing awareness to the possibilities of technology and helping you define your future state.

Deliver

Develop, review and validate solutions. This iterative, collaborative approach accelerates accurate build of configuration and technical objects necessary for your transformative solution.

Run

Transition the project from the readiness activities of a preproduction environment to using the new system and supporting new business processes. This phase entails go-live, post-implementation and steady-state.

The Deloitte Enterprise Performance +Cyber difference

Integrated security approach that combines enterprise transformation with comprehensive cybersecurity measures, embedding protection throughout the entire lifecycle and addressing security at every layer—including network, application, cloud, and data.

Accelerated digital transformation by embedding security into every phase of your journey, empowering organizations to innovate and transform securely while enabling cloud adoption, automation, and analytics without compromising security.

Continuous monitoring and proactive threat management that implements advanced monitoring and threat detection capabilities, providing real-time insights and rapid response to potential security incidents within the ecosystem.

Tailored solutions for complex environments that deliver customized security strategies aligned with unique enterprise landscapes, addressing both technical and business-specific needs for on-premise, cloud, or hybrid environments.

Bridging the security-talent gap by addressing the shortage of skilled cybersecurity professionals, providing access to a cyber defense team for ongoing monitoring, threat analysis, incident response, and supplementing or operating security centers.

Risk reduction and regulatory compliance that identifies and remediates vulnerabilities, aligns environments meet industry standards and regulatory requirements, and reduces the risk of costly breaches and compliance penalties.

Make the complex easy

Embark on your SAP and Oracle transformation with Deloitte Enterprise Performance +Cyber specialists to guide the way. Our approach provides a unique integration of enterprise performance transformation with embedded cybersecurity measures, developing solutions that are tailored to both align with business needs and meet regulatory requirements.

Strategic benefits

- Cyber strategy development
- Standardized security solutions
- Cyber defense & resilience

Financial benefits

- Cost reduction
- Regulatory compliance

Operational benefits

- End-to-end security
- Proactive cyber defense
- Identity and application security alignment
