

Build a foundation of +Cyber.

In a world where cyber threats can permeate every aspect of business, traditional security add-ons fall short. Deloitte +Cyber integrates cybersecurity at the core of our priority offerings, giving clients structured, end-to-end solutions that are tailored to their unique business needs and streamlined for greater ease-of-use and efficacy. This strengthens an organization's cyber posture, empowers them to proactively address emerging risks, and drives better business outcomes.

The challenge

As businesses evolve and become more complex, they face increasing vulnerability to a myriad of sophisticated threats. Fragmented and reactive cyber solutions provided by multiple vendors can increase risk, costs, and misalignment, opening the door for attacks that could result in financial loss, operational disruption and other business impacts. Meeting this evolving threat demands a fundamentally new approach that embeds cybersecurity at the core of our technology solutions enhancing both long term resilience and business value.

The Deloitte difference

With +Cyber, our understanding of cyber becomes a key differentiator within our portfolio of offerings, giving our clients a critical edge against increasingly complex risks, and redefining how Deloitte, industries and individual businesses think about cybersecurity as an essential contributor to business value.

Client benefits

The ease of a one-stop shop

Clients can unify their strategies and avoid multiple vendors with a comprehensive set of solutions from a single trusted source.

Sector-specific solutions

Addresses their industry's specific security needs with services that are embedded into key business offerings.

Stronger cyber posture

Enhanced protection against cyber threats with security measures that are built into the core of their business solutions.

Faster deployment

Enables clients to implement, optimize, and revise their strategies quicker with a more streamlined process.

Greater cost efficiency

Eliminates redundancies and reduces downstream security costs by embedding cybersecurity capabilities upfront and offering our world class Operate services over the long term.

The +Cyber approach

A cyber-driven foundation across Deloitte's technology solutions, where security strategies and resilience are "baked in" up front to meet our client's unique business needs and drive better outcomes.

Deloitte +Cyber

Deloitte's +Cyber offering integrates cyber strategy at the core of our technology services, delivering structured, end-to-end solutions tailored to each organization's unique business needs. In a landscape where cyber threats continue to grow, +Cyber goes beyond traditional security add-ons by integrating advanced cyber capabilities directly into our priority offerings, enhancing resilience, and driving better business outcomes. Our initial set of +Cyber technology offerings include:

Mergers & Acquisitions (M&A) +Cyber

Deloitte's M&A +Cyber enables successful transactions and value realization through comprehensive cyber risk management, security planning, and optimized cyber risk transformation. These efforts help organizations achieve seamless integration, enhance combined security posture, improve resilience, and maximize the value of the new entity over the long term.

Engineering +Cyber

By embedding security activities into development lifecycles and leveraging cutting-edge tools and technologies, our specialists offer a unified approach that bridges the gap that can exist between engineering and cybersecurity—offering enhanced security, strong compliance, and operational efficiency.

Supported by Deloitte's global reach, deep industry experience, and award-winning network of cyber professionals, +Cyber helps organizations strengthen their cyber posture, stay ahead of evolving threats, and operate with confidence.

Enterprise Performance +Cyber (SAP or Oracle)

Enterprise Performance +Cyber is an integrated approach that embeds cybersecurity into the transformation of an organization's Enterprise Resource Planning (ERP) system. We help businesses upgrade their core systems to streamline operations and support growth, all while protecting data and systems with strong cybersecurity measures.

Customer +Cyber

Customer +Cyber embeds our tailored Secure by Design methodology into Deloitte's broader customer-centric strategies and technologies to protect the customer experience. By uniting digital trust, privacy, and advanced security solutions, we help clients safeguard customer interactions, build trust, and drive engagement in a dynamic digital environment.
