

Deloitte Data Migration Accelerator for SAP S/4HANA® (D-DASH)

Develop a cleaner data picture to
support your digital enterprise

D-DASH for SAP S/4HANA

D-DASH is a game changer from Deloitte for the digital journey of our clients. It takes a business-focused view and accelerated data transformation to provide a competitive edge.

In moving data from one place to another, even the best data can fall through the cracks. With traditional migration methods, data can become corrupted or diluted. It can end up in the wrong place or a place where it is no longer as useful. What does your data picture look like when that happens on a broad scale? ... It can look pretty messy.

In the new digital economy, data remains the lifeblood of insights, transactions, and engagement—especially for organizations

looking to harness the power of solutions such as SAP S/4HANA®, a digital core platform for modern business. Data becomes increasingly important as organizations automate more processes and begin moving toward the vision of a digital economy.

Quality and speed matter more than ever

The faster you get your hands around data migration, the faster you can reap the benefits of SAP S/4HANA. Here are a few

benefits you could see as the result of a high-quality data picture aligned to your business objectives:

- **Enhanced ROI** as you attain your business results faster
- **Clearer data-driven insights** that can improve decision-making across the board, from strategy to operations
- **An accelerated transformation** that can help you get to market with new data-driven capabilities and offerings before competitors

It's all connected

Data lies at the heart of the digital economy, and the quality of data can have an impact on expected business results. Ensuring data quality and aligning it to business practices during a transformation becomes critical.

Highlights of our “business first” approach for data migration

- We collaborate with you to determine which business processes you will need to revisit to align them with SAP S/4HANA functionality.
- We evaluate your existing data, your current processes, and your future processes in an SAP S/4HANA environment to determine the impact across business areas.
- We measure the quality of your existing data, identifying duplicate data, the completeness of address data, orphan data, and more.
- We determine whether your data meets SAP S/4HANA requirements and help you make adjustments, if needed.
- We help you develop a data migration strategy that can accelerate your digital journey and deliver the value you expect.

Deloitte solution

D-DASH brings methodology, business process and industry knowledge, accelerators and templates under one umbrella:

- Based on core industry and business experience
- Complements SAP® RDM with prebuilt Data Services and ABAP programs for SAP S/4HANA
- Prebuilt data conversion execution tracking dashboards
- End-to-end data migration approach with a preconfigured data conversion

- Predefined data quality rules and automated data cleansing
- Comprehensive effort estimation tool
- Incorporates experience from hundreds of projects and adapted to fully support SAP S/4HANA
- Predefined data validation and reconciliation templates
- Data quality/readiness assessment approach and scorecards

D-DASH can help you fast-track data migration during your digital transformation, with an approach focused on data quality, cost-effectiveness, and business value. What does D-DASH offer? Plenty.

It's fast

Tested, preconfigured capabilities provide a jump-start that helps our clients solve the data equation faster

It's SAP+

Complements SAP Rapid Data Migration (RDM) with extensive set of data services and ABAP programs for SAP S/4HANA

It's extensive

Comes with more than 40 prebuilt conversion objects, complete with mapping sheets, predefined data quality/profiling/cleansing rules extensive and documentation

It's complete

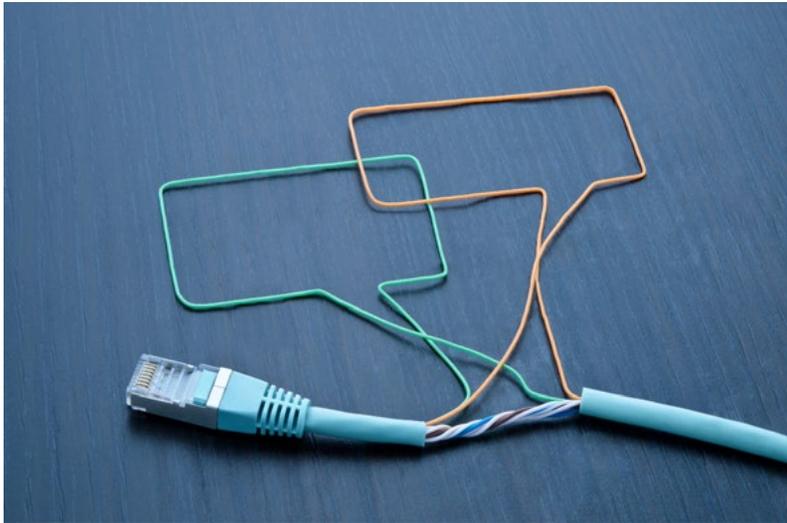

Incorporates detailed business-process impact analysis, industry knowledge, proprietary accelerators and templates

It's flexible

Identifies potential gaps in readiness of existing data and provides pointed insights for migration

It enhances ROI

Helps attain business results quicker

Gartner Inc. has cited poor data quality as a primary reason for 40 percent of all business initiatives failing to achieve their targeted benefits¹.

Why Deloitte?

D-DASH is also backed by deep Deloitte experience, which blends technology and business know-how with industry-specific insights. The result? A broad spectrum of capabilities that can address a broad set of client challenges.

Business focus

Our “business first” approach means we begin with understanding your current business processes, how you can improve them, and the value your data can unlock within a realigned set of processes in a modern SAP landscape. Before we migrate your data, we help you determine how it will fit within a new vision of your business processes.

Leadership

Our alliance with SAP extends back more than two decades, and we have numerous awards that help validate our leadership with SAP solutions, including the 2016

SAP Pinnacle Award as the SAP S/4HANA Adoption Partner of the Year. Our long-standing relationship with SAP and our co-innovation efforts with SAP mean we understand the power of SAP solutions—as well as how they are evolving to meet the demands of the digital economy.

Wide-ranging capabilities

Our global network of more than 16,000 business and technology professionals focused specifically on SAP means we can address needs across the enterprise, across industries, and across geographies. More than that, we can tailor SAP solutions to meet the unique needs of your business. And we have tools that can help you get moving fast. We leverage the SAP Activate innovation adoption framework and our proprietary Enterprise Value Delivery methodology to jump-start and then guide transformations, helping reduce the implementation timeline significantly.
