

Sustainable Development Goals (SDGs) Impact Management

An intelligent solution to guide decisions on your
business and its effect on the planet

Sustainability goals are on the minds of leaders in every industry today as they work to run their businesses more responsibly, meet stakeholder expectations, and make a positive impact on the planet—all while operating profitably.

Data-driven insights and speed will be essential for making effective decisions to support the Sustainable Development Goals (SDGs)—to understand your options and how they can support sustainability objectives as well as business outcomes. Having a real-time financial lens to guide your decisions will also be essential.

Introduction

01

Designed for impact

Integrated, insights-driven, intuitive

Enabled with intelligent SAP solutions/
Envision potential impact

Extended value with SAP
sustainability solutions

Making an impact with Deloitte and
SDG Impact Management

A growing portfolio of sustainable solutions

Why Deloitte?

Let's talk

Designed for impact

Deloitte's SDG Impact Management solution can help—providing deep, real-time, data-driven insights that offer a more detailed view into your activities, their impact, and how potential changes can influence your long-term ambitions.

SDG Impact Management integrates data from multiple SAP and non-SAP solutions, including financial data, to provide a robust engine for understanding where you stand and what specific changes could mean—all delivered via an intuitive cloud-based dashboard.

SDG Impact Management also fully integrates with offerings from SAP Cloud for Sustainable Enterprises, a wide-ranging portfolio that includes solutions focused on climate change, the circular economy, and climate/sustainability reporting and steering.

02

Finance in focus

A critical differentiator of SDG Impact Management is its ability to incorporate your financial data into analyses and simulations—so that you can understand the true top-line and bottom-line impact on your business. The benefit? You can adjust and re-adjust your models based on specific financial considerations as well as sustainability goals—helping you make more informed decisions that are good for the planet and your business.

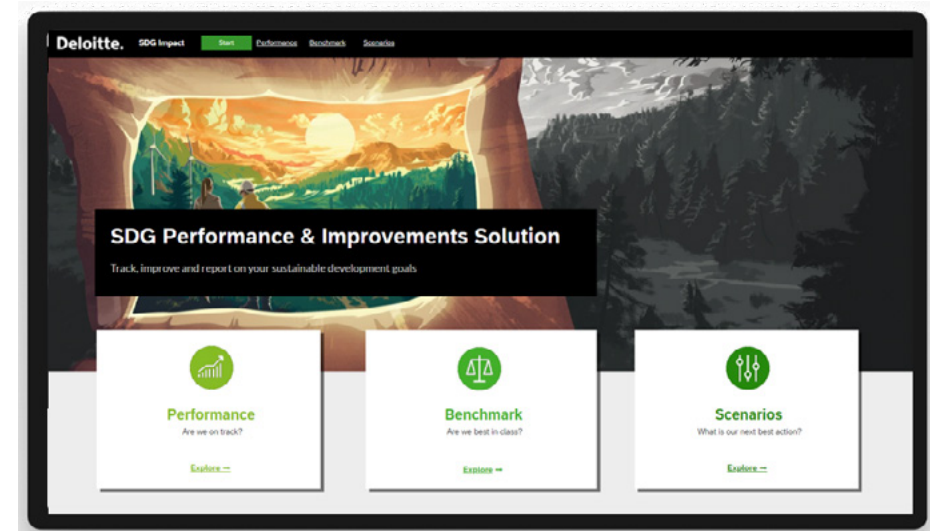

Integrated, insights-driven, intuitive

With Deloitte's SDG Impact Management solution, you can measure, simulate, and explore the impact of activities against any of the 17 SDGs that relate to your business. The solution allows you to:

- View in detail your enterprise's performance, progress and impact against selected SDGs
- Benchmark against your peers worldwide
- Simulate sustainability and financial scenarios
- Steer toward positive sustainability and financial impacts

03

Enabled with intelligent SAP solutions

SDG Impact Management can bring together multiple SAP solutions and other technologies to help you create an integrated data landscape to support reporting needs and steer your sustainability efforts. As an evolving offering, SDG Impact Management may leverage SAP Cloud for Sustainable Enterprises solutions and other core SAP offerings such as:

Envision potential impact

See in detail how large and small adjustments to your operations—such as a new vendor, logistics plan, product, material, or ingredient—will influence your SDG ambition and your business performance.

SAP S/4HANA

For steering sustainable economical growth and managing investments in sustainability improvement measures

SAP S/4HANA for Environment, Health & Safety

For supporting safe operations and risk management, including monitoring and analysis of environmental emission-related data

SAP Human Capital Management / Success Factors

For driving improvements in of social aspects of sustainability – e.g. gender equality, diversity

SAP S/4HANA for Product Compliance

For enforcing compliance at each step of the product lifecycle

Extended value with SAP sustainability solutions

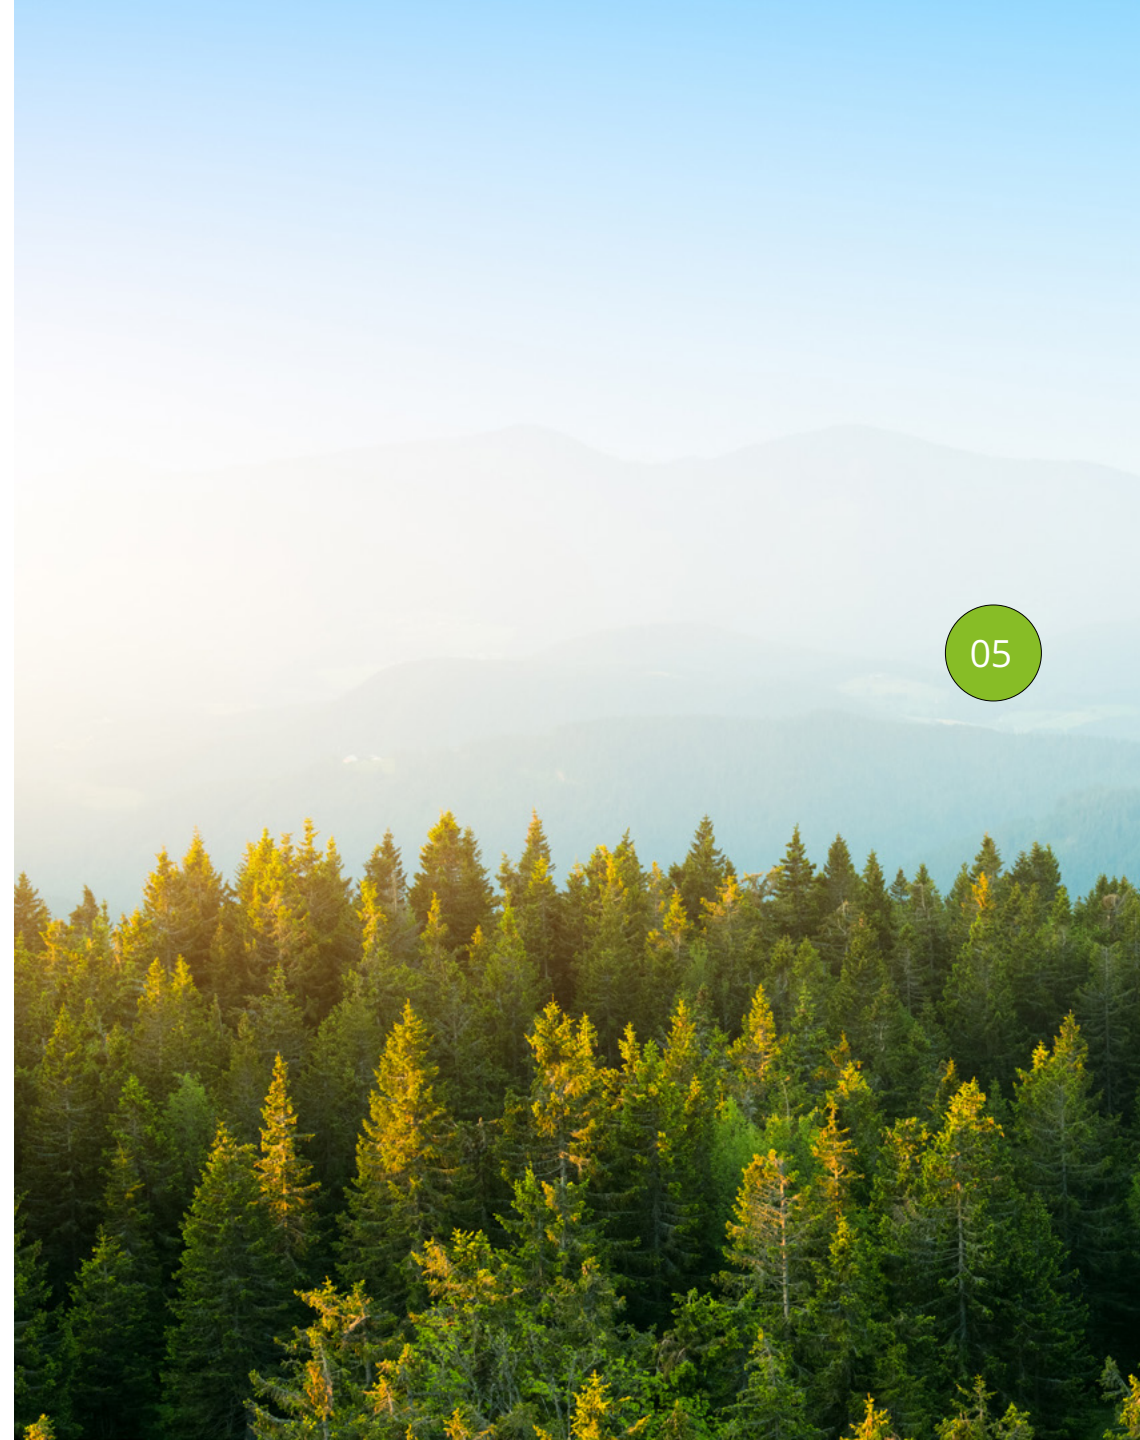

SDG Impact Management aligns tightly with the vision of the cloud-enabled intelligent enterprise and solutions from the SAP sustainability portfolio—including SAP Cloud for Sustainable Enterprises. When you work with Deloitte to deploy SDG Impact Management, we can help you unlock additional layers of value with SAP Cloud for Sustainable Enterprises, which covers:

Climate Change solutions such as SAP Product Footprint Management.

Circular Economy solutions such as SAP S/4HANA for Product Compliance and SAP Responsible Design and Production.

Climate & Sustainability Reporting and Steering solutions such as SAP Sustainability Controls Tower

Social Responsibility solutions such as SAP Environment, Health and Safety Management

Making an impact with Deloitte and SDG Impact Management

How we can help you achieve more with SAP Cloud for Sustainable Enterprises

SAP Product Footprint Management

Improve insights on carbon emissions across the value chain

Deloitte's decarbonization domain expertise, assets, and implementation experience plus SAP's leading enterprise technology allows you to deploy a scalable, tech-enabled solution in the emerging climate space—while managing the roadmap to decarbonization. SAP's solutions enable robust data management, performance tracking, and efficient collaboration.

SAP Responsible Design and Production

Accelerate your transition to circular-economy business practices

Combining our supply chain and sustainability domain expertise, assets and implementation experience with SAP's leading enterprise technology allows you to see, manage, and improve performance across the value chain and better collaborate with suppliers. Additionally, our combined approach to circularity enables extended intelligence, with transparent insights from EPR and product design.

SAP Sustainability Control Tower

Enhance performance by embedding sustainability metrics and insights into core business processes

Deloitte brings significant sustainability reporting experience (including a role within standards-setting forums), assets, and extensive reporting implementations across SAP solutions. Together, with SAP's holistic steering, integrated and automated sustainability reporting, and enterprise performance management solutions, you can drive performance and transparency.

Our growing portfolio of sustainable solutions

SDG Impact Management joins a portfolio of Deloitte offerings based on SAP technologies and focused on helping organizations operate more sustainably. Put them all together, and it's a solid suite that can help leaders respond to the strategic priority of sustainability across the enterprise. Our current and future solutions include:

D-CARB on SAP IBP

- Leverages SAP Integrated Business Planning and greenhouse gas emissions data to add the “carbon dimension” to planning and the supply chain—integrating indirect and direct product CO2e emissions, such as those from purchased materials as well as energy, production activities, and transportation

Sustainability Analytics Platform

- Acquires and harmonizes ecological information along the value chain to enable standardized sustainability reporting, benchmarking, simulations, predictions, and optimizations

Carbon Analytics

- Uses machine learning and cloud for simulation and optimization—helping to report and predict CO2-relevant KPIs, as well as guide related business considerations

Intelligent Infrastructure Control Centre (IICC) – Carbon Dashboard

- Winner of a 2021 SAP Innovation Award: Synthesizes operational data from national infrastructure projects onto a common digital platform—to support operations management, inform key processes, and reduce risks through predictive analytics

Kenyan Wildlife Trust Program – Efficient Market Solution

- Through scalable, financially inclusive digital functionality, provides farmers with better access to markets and real-time pricing

Why Deloitte?

When it comes to running your business more sustainably, you have a lot of questions to answer—and a lot of dots to connect. Deloitte can help you address the challenge confidently.

When you work with Deloitte to enable SDG Impact Management, SAP Cloud for Sustainable Enterprises, and other solutions, you get access to Deloitte's extensive industry-specific experience at the intersection of business transformation and SAP technology enablement. And it's all rooted in our three decades of SAP experience and supported by a worldwide team of sustainability experts as well as specialists in procurement, tax, human capital, risk, customer experience, data management, cloud enablement, analytics and other business-critical needs.

With SDG Impact Management, Deloitte can help you:

- Aggregate, integrate, and manage your enterprise data
- Analyze the financial and SDG impact of your activities
- Determine your ambitions and your future enterprise vision
- Identify and prioritize actions to support sustainability
- Design and develop a framework for continuously mapping your data directly to your SDGs
- Formulate KPIs, benchmark your activities, develop simulation models, and track performance

And the services we offer do not end there. From business case development to technology implementation to operations, Deloitte brings a complete set of solutions and services for helping you respond at the speed of disruption—as a built-to-evolve Kinetic Enterprise™. We also can help you rapidly deploy our SAP industry cloud solutions—such as Operations Agility and Intelligent Spend Management—to help amplify the value of SDG Impact Management.
