Taste the feeling of flexibility

ServiceNow helps Coca-Cola to make employees’ lives easier at the world’s largest bottling company

Job to be done
Setting a digital-first, self-service mindset for employee productivity and engagement

Solutions to do it
- ServiceNow® HR Service Delivery
- ServiceNow® Safe Workplace

What we did
Provided a one-stop digital workflow platform for employees

World’s largest bottling company in revenue
Coca-Cola Europacific Partners (CCEP) is the world’s largest bottling company. Combining the strength and scale of a large, multinational business with expert, local knowledge, it operates across 29 countries, serving more than 600 million consumers, and employs over 33,200 people from around the world. The business generates over €15 billion in revenue.

Creating a one-stop digital workflow platform
CCEP’s employees and workplace culture are at the heart of its success. The organization wanted to better serve its staff by simplifying and harmonizing HR processes, supporting the best possible employee experience. A one-stop digital platform was envisioned to transform these processes, do away with repetitive tasks, and contribute to a healthy workplace culture.

In five to ten years that interface will look completely different. And that’s where we’re headed. This whole idea of Google search typing and things will appear. Then it gets even more productive.

CCEP unlocked
1M
hours of productivity for employees

With
>23K
employees using the system

And just
2
weeks to deploy Safe Workplace solution
Satisfaction on the rise

"We have achieved a lot of great results," says Darren. 16 agents now take care of 50,000 employees over 24 states and achieve 90% case deflection. Employee satisfaction is also improving due to the case resolution rate; 97% of cases are now completed under the five-day SLA.

Extending ServiceNow further

The Now Platform also helped Sanford Health when the COVID pandemic broke out. Working with ServiceNow it was able to introduce a new form to make sure employees had the information they needed on how to get back to work. This enabled the team of 16 agents to support over 35,000 new COVID cases.

The HR and IT teams have also implemented capabilities such as the native mobile app and virtual agent to enhance service delivery for their employees and support a deskless workforce for nurses. "Our aim is to simplify our employees' work so they can focus on taking care of our patients and residents," concludes Darren.

"We want to push our people to ServiceNow Mobile because that is where the future is going to be." Darren Walker
Chief HR Officer, Sanford Health

Employee drives workflow

ServiceNow HR Service Delivery creates an employee engagement platform that empowers the employee to access important HR information, from onboarding to organizing work and leave days. Designed and implemented by Deloitte, the platform streamlines service delivery of key business functions while harmonizing processes across the organization. Central communication channels allow employees from across Europe to access relevant information.

Unlocking one million hours of productivity

CCEP has given back one million hours in a three-year period to its multi-generational employees through the digitization of its HR functions. That means one million hours in productivity, while offering flexibility. It intends to give back another half a million by the end of 2021. CCEP wants to empower HR to take charge of digitization through coding improvements on user interface and user experience for its workforce.

Towards making life easier

Simplification of HR functions supports great employee engagement. Better engagement means better focus on the business. With flexibility comes trust in digitization and empowerment for its staff. CCEP values human connection and wants to do away with processes for more time in communication. Pivoting from the challenges of virtual working, HR processes will be fine-tuned to improve user experience.

"Today, everything is personalized and localized. You can’t put a price on what that means for employee engagement."

Paul Ewin
Director of HR Technology
