Bridge Your GAAP

The cloud solution to standardize your external reporting globally

Implementing changes to your local country reporting templates in a timely manner can be a struggle—tax teams remain highly dependent on local finance teams. Collaborating through spreadsheets and manual reconciliations, often error-prone, is also difficult and time-consuming.

Deloitte understands these obstacles, and after more than 10 years of external reporting experience, has developed Bridge Your GAAP, a solution to address these issues.

What is Bridge Your GAAP?

Bridge Your GAAP is a cloud-based solution that provides a view of your:

- originating accounts
- account-level detail of GAAP differences
- local statutory trial balance
- equity reconciliation

The application, available on Deloitte's myInsight platform, helps to categorize the differences that have an impact on your statutory accounts, and the dual language (English and local language) feature supports local requirements alongside global corporate income tax compliance.

Highlights

Standardized

The solution offers a consistent and comprehensive view of your accounts

Efficient

The automated controls inherent in the application address everything from data integrity to completeness of GAAP-to-GAAP adjustments

Real-time access

Bridge Your GAAP is cloud-based, which allows data to be shared, accessed and edited from virtually any location. Updates are visible in real-time

Continual updates

Deloitte has first-hand knowledge of the local requirements and maintains the local country charts of accounts and statutory financial statement templates within the system, upholding local requirements

Easy to use

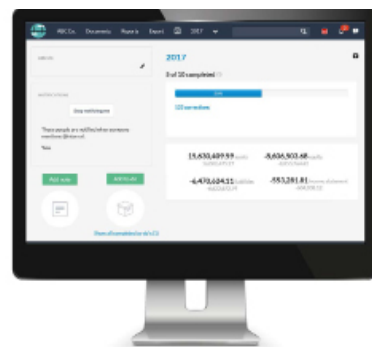

The intuitive user interface means that only limited training is required

Collaborative

The communication platform allows you to comment and notify the relevant party directly that they need to review and respond

Flexible

The modular approach allows you to choose your level of access: complete preparation by Deloitte professionals, co-sourcing Deloitte's knowledge with your own resources, or in-sourcing—effectively a “software as a service”
