# INTRODUCTION

For 25 years, Deloitte's Tech Fast 50 has recognised and celebrated Australia's fastest-growing technology companies.

The Tech Fast 50 program ranks the nation's top 50 public and private technology companies based on percentage revenue growth over three years (2024 to 2026).

Against a backdrop of selective capital, rapid technological change and economic uncertainty, this year's cohort has demonstrated remarkable resilience and ambition, achieving an average growth rate of 481%, with seven companies growing by more than 1,000%. The entry point for the Top 50 was 80%, while 22% of companies reported more than $50 million in revenue.

Who made the list in this milestone year? Discover the technology companies achieving extraordinary growth and shaping the next chapter of Australia's tech sector.

# A WORD FROM JOSH TANCHEL & BEC MCCONNOCHIE

**Josh Tanchel**
Tech Fast 50 Program Lead Partner
Deloitte

**Bec McConnochie**
National Industry, Sectors & Alliances Lead & Tech Sector Lead Partner
Deloitte

## Australia's technology sector has never stood still, but the complexity of change today feels different.

The **2026 Tech Fast 50** comes at a time when technology companies are navigating a more demanding environment. Capital is harder to secure as businesses remain cautious about investment, while the development of AI is forcing investors and technology companies alike to reconsider where enduring value will come from.

In this environment, investors are becoming more selective about where they put their money. For many companies, that means finding ways to grow organically and do more with the resources they already have.

Against that backdrop, this year's Tech Fast 50 companies have achieved average growth of 481%. Seven grew by more than 1,000%, while the median of the top 50 was 211%.

These are impressive numbers in any environment. In the current one, they emphasise the resilience and adaptability of Australia's technology sector and its ability to continue finding new avenues for growth.

### MEET AUSTRALIA'S FASTEST-GROWING TECH BUSINESSES

We're very pleased to congratulate our first-place winner, **Stakk**, which achieved an impressive growth rate of 2,993%. **Stakk** is an AI-native digital trust business helping organisations combat fraud through identity verification, document authentication and real-time decision-making.

Serving more than 300 enterprise customers globally and processing more than 110 billion interactions annually, the company is building a growing intelligence base to identify and respond to evolving AI-driven fraud threats.

Second place goes to **WorkflowMAX**, which recorded growth of 2,610%. The job and project management platform helps professional services businesses manage their workflows in one place, supporting thousands of architects, engineers, agencies, consultants and construction firms globally.

**Mesoblast** ranks third with growth of 1,937%. The biotechnology company develops off-the-shelf cellular medicines to treat severe and life-threatening inflammatory conditions.

There is real breadth at the top of this year's list. Seven companies recorded growth of more than 1,000%, spanning software, medical technology, manufacturing, fintech and semiconductors.

### CELEBRATING OUR 2026 CATEGORY WINNERS

Our **Leadership & Enterprise Growth** award celebrates companies demonstrating excellence across innovation, diversity and inclusion, scalability, industry recognition and social impact. This year's winner is **Mesoblast**, whose cellular medicines are treating severe inflammatory conditions around the world.

Its success demonstrates the potential for Australian medical innovation and intellectual property to find markets well beyond our shores.

The 2026 **Tech Female Leader** award goes to Melinda Snowden, Chair and Non-Executive Director at **Megaport**, a network-as-a-service provider that helps businesses connect their digital infrastructure.

Since becoming Chair in June 2024, Melinda has guided Megaport through a period of exceptional growth, including the acquisition of Latitude.sh and expansion into new markets as demand for AI infrastructure grows. Drawing on more than 30 years' experience in business, finance and corporate governance, she has also led a review of the company's executive governance framework to help it scale.

**JOLT Charge** takes out this year's **Climate & Sustainability** award after recording growth of 386%. The company is helping accelerate the transition to electric vehicles through its public charging and digital out-of-home media network, with chargers powered by 100% GreenPower.

This year's **Rising Star** award, which recognises companies that have traded for less than three years, goes to Queensland-based **Tonic Technologies**, which achieved an impressive growth rate of 2,130%. The consulting business helps organisations simplify, transform and scale through expertise in TechnologyOne and MYOB Acumatica. In second place is **PRiMAX** with growth of 1,894%, followed by **AMR Technology** at 1,823%, rounding out a very strong top three.

## AUSTRALIAN STATE CHAMPIONS

Our **Australian State Champion** awards celebrate the fastest-growing tech companies across Australia. We congratulate our 2026 winners:

- **NSW**: Stakk – 2,993%
- **VIC**: WorkflowMAX – 2,610%
- **QLD**: Wingman Group – 374%
- **SA**: splose – 314%
- **WA**: PictureWealth – 123%

## AI ON BOTH SIDES OF THE EQUATION

Unsurprisingly, AI runs through this year's **Tech Fast 50** in many different forms.

Across businesses like **Luyten3D**, **Software at Scale** and **splose**, AI is becoming increasingly central to the technology on offer rather than simply being added to an existing product. It's showing up across very different industries and changing what companies can build and the problems they can tackle.

But we're also seeing AI introduce new risks, including more sophisticated fraud and identity crime. This is increasing the need for businesses that can help organisations verify identities, authenticate documents and detect fraudulent activity – a dynamic reflected in this year's cohort through businesses such as **Stakk** and **Fortiro**.

In many ways, this captures the moment the technology sector finds itself in: AI is creating new opportunities for Australian technology businesses while simultaneously creating new problems for them to solve.

## TECH TACKLES THE SQUEEZE

Not every defining trend in this year's list starts with a new technology. Some start with the problems customers are facing.

With households and businesses watching their spending carefully, there is clear value in technology that helps people make their money go further or get greater value from purchases they are already making.

That theme can be seen across businesses such as **EatClub**, **Wagepay** and **Prezzee**, as well as financial and payments platforms including **Sniip** and **pay.com.au**.

These businesses have very different propositions, but they are operating in an environment where convenience alone is not always enough. Customers increasingly want technology to deliver tangible value and savings.

That focus on solving practical, everyday problems is an important part of the Tech Fast 50 story. Some of the most compelling opportunities for technology companies are not necessarily about creating entirely new markets, but finding better ways to help people navigate the one they are already in.

## FINTECH KEEPS FINDING THE GAPS

Financial services continues to be a particularly fertile area for innovation.

**Hello Clever** is one of this year's standout performers, placing fifth overall with growth of 1,553%. **Bridgit** follows with growth of 908%, while others like **pay.com.au**, **mx51**, **Sniip** and **Driva** also appear in this year's top 50.

What's interesting is the breadth of opportunity that remains.

We continue to see fintech businesses finding gaps around payments and other areas where technology can offer customers something different from established models. **Bridgit**, for example, has found opportunity in bridging finance, a part of the market not conventionally prioritised by traditional financial services providers.

The continued presence of fintech businesses in the Tech Fast 50 shows that disruption in this industry is far from finished. There are still problems to solve and parts of the market where more specialised technology businesses can find room to grow.

## MEDTECH AND HEALTH

Healthcare and medical technology are another strong feature of this year's list.

**Mesoblast** placed third overall with growth of 1,937%, while **Kismet Healthcare**, **BLS Pharma**, **splose**, **Updoc** and **Retina Visions** are among the other healthcare and medtech businesses represented in the Top 50.

There's considerable variety within that group. Some are using software to change the way healthcare services are administered or delivered. Others are operating deeper within medical technology, biotechnology and research.

**Mesoblast** is particularly noteworthy because it represents a different kind of Australian technology success story: sophisticated medical research and intellectual property developed here and taken to the world.

That's an important part of the Australian technology story. We shouldn't just measure the strength of our ecosystem by the technologies Australians adopt, but by the ideas and intellectual property developed here that have the potential to compete globally.

## QUEENSLAND'S GROWING GLOBAL PRESENCE

Queensland, by way of Brisbane's emergence as an increasingly connected global city, is also showing up in this year's Tech Fast 50.

Queensland accounts for 11 companies, or 22% of the 2026 cohort, its highest share in the decade since we began tracking at a regional level. That's up from 13% last year, with Queensland matching Victoria this year and sitting behind only New South Wales.

There are signs of depth among the next generation too, with three of this year's nine Rising Star companies based in Queensland, including category winner **Tonic Technologies**.

As the state becomes more connected to international markets, talent and investment, its business ecosystem is becoming increasingly global in its outlook and ambitions.

This year's results are another sign that Australia's technology ecosystem is broadening, with Queensland and its capital playing an increasingly important role in its growth.

## WHAT'S NEXT?

For more than two decades, Tech Fast 50 has provided a window into where Australian technology is heading and the businesses taking us there.

The picture emerging in 2026 is particularly interesting. AI is creating opportunities while introducing new risks to solve. Cost-of-living pressures are sharpening the focus on businesses that deliver tangible value. Fintech continues to find gaps in established markets, Australian medical innovation is reaching beyond our shores, and Brisbane is emerging as an increasingly important technology centre.

All of this is happening in an environment where capital remains selective and the pace of technological change continues to accelerate.

That makes the achievements of this year's Tech Fast 50 all the more impressive. Growth matters, but so does the ability to adapt, identify where markets are heading and keep moving through uncertainty.

Congratulations to **Stakk**, **WorkflowMAX** and **Mesoblast**, our category winners and every company recognised in the **2026 Deloitte Tech Fast 50**. We can't wait to see where you take Australian technology next.

> "Congratulations to Stakk, WorkflowMAX and Mesoblast, our category winners and every company recognised in the 2026 Deloitte Tech Fast 50. We can't wait to see where you take Australian technology next.

# SPONSORS

# A WORD FROM ASX

ASX

## ASX: a springboard for fast-growing companies.

For more than a decade, ASX has proudly sponsored the Deloitte Tech Fast 50. Now in its 25th year, the program is more than a celebration – it recognises the companies turning ambitious ideas into fast-growing, industry-leading technology businesses. Many of its alumni, including Afterpay, Zip, NEXTDC and, most recently, Koala, have gone on to list on ASX and become leaders in their sectors.

We extend our warm congratulations to this year's winner, Stakk, and to every finalist for the resilience, leadership and ingenuity they have shown. We're especially pleased to see several ASX-listed companies in this year's cohort, proof that public markets can be a springboard for growth.

Australia's tech scene has grown significantly over the past 25 years. A decade ago, the local venture capital industry was still small and only a handful of technology companies were listed on ASX. Today, the S&P/ASX All Technology Index includes 43 companies worth more than $225 billion combined. The next wave of technology leaders, celebrated in this year's Tech Fast 50, is already taking shape.

> "Our real strength is helping companies raise follow-on capital after they list.

Our real strength is helping companies raise follow-on capital after they list. ASX has ranked first globally by number of follow-on transactions in nine of the last ten financial years. Over the past five years tech companies have raised $23.6 billion in follow-on capital including, Xero who raised $2 billion, NEXTDC $1.5 billion and Megaport $827 million to fund acquisitions, expansion and AI infrastructure. For listed companies that perform and deliver on their targets, the public market offers access to capital at scale.

Behind this is one of the world's deepest pools of capital. Australia's $4.4 trillion superannuation system is the fifth-largest pension market globally, taking in around $226 billion of new money each year. ASX also rewards growth earlier than other markets, mainly through relatively earlier entry into globally recognised indices.

Offshore investors now account for roughly 45% of institutional ownership on the S&P/ASX 200, giving companies access to a uniquely broad investor base, from local super funds to global institutions. For ambitious founders, this demand and scale matters, underpinned by a regulatory framework that gives investors confidence.

Our message to this year's finalists is to keep building with the long term in mind. Markets reward those who are persistent, communicate clearly and stay true to their mission. Whether you are a fast-growing private company, preparing to list, or scaling as a listed company, ASX is committed to supporting you, and we look forward to welcoming the next generation of Tech Fast 50 alumni to ASX.

# A WORD FROM AWS

## Agentic AI is transforming how work gets done. AWS and Deloitte help make it work for you.

Congratulations to every company in the 2026 Deloitte Technology Fast 50. Each of you has earned your place through sustained growth, turning an ambitious idea into a business that customers can rely on. AWS is proud to support the program, the founders and the people behind it.

### BUILD FAST, SCALE WITH CONFIDENCE

Real transformation is not about bolting AI into old processes. It redesigns them. AWS and Deloitte help teams deploy agents that handle routine work, so people can spend their time on customers and product. A company can grow from its first customer to global demand on the same infrastructure.

### TRUST AS THE MULTIPLIER

Deloitte's multidisciplinary model and Trustworthy AI framework build in governance, security and regulatory readiness from day one. With Amazon Bedrock, each organisation can choose the right model for each job. Trust is what turns bold ideas into systems a business can rely on.

From idea to scale, Deloitte and AWS help founders move fast with AI that is secure and responsible.

> "From idea to scale, Deloitte and AWS help founders move fast with AI that is secure and responsible.

# A WORD FROM BAKER MCKENZIE

Baker McKenzie.

## Leading global law firm, Baker McKenzie, is back for its third year partnering with Deloitte Tech Fast 50, supporting the next generation of Australian tech entrepreneurs.

For over 60 years in Australia and 75 globally, Baker McKenzie has been at the forefront of enabling technology entrepreneurship as a legal services innovator.

Technology has no borders – and neither does Baker McKenzie. Our global specialists connect across markets, providing deep sector expertise to an unrivalled portfolio of technology clients.

From established market leaders to emerging digital players delivering new technology to the world, we are there beside you, bringing you holistic and commercially pragmatic advice to deliver your objectives.

Deloitte's Tech Fast 50 Australia awards embody Baker McKenzie's long-standing commitment to support technology businesses and play a meaningful role in Australia's fast-growing tech industry.

We provide:

- Integrated end-to-end services for tech businesses that includes corporate, tax, merger and foreign investment control, as well as IP, data privacy/cybersecurity, employment and compliance advice
- Advice on M&A, joint ventures and strategic alliances to access the right technology to support tech focused and enabled businesses
- Help managing your industrial and employee relations strategies. We have deep expertise in the technology sector.

With increased scrutiny on the technology sector – and regulatory bodies racing to keep pace with technological advancement – tech businesses need seamless, real-time advice from specialists on the ground in the markets in which they operate.

Our experts navigate challenges around technologies such as AI, virtual worlds and gaming, from risk mitigation and management to dispute resolution and enforcement measures.

We ensure contracts are watertight, structuring digital asset contracts to comply with financial and other regulations. And we facilitate proactive cooperation and policy discussions to contribute to the broader development of the tech sector.

We can't wait to see what incredible founders, operators and businesses this year's Tech Fast 50 Awards unearths! To learn more about Baker McKenzie, visit:

https://www.bakermckenzie.com/en/locations/asia-pacific/australia

# A WORD FROM SAP

## SAP proud to support the leading growth companies in Australia.

On behalf of SAP, we would like to congratulate all the companies recognised in the prestigious Deloitte Tech Fast 50 awards. Your achievements are a powerful testament to the relentless innovation, bold vision, and strategic ambition driving the technology sector today. You represent the essential momentum that is redefining Australia's economic landscape whilst operating in a volatile and fast changing environment.

The pace of growth demonstrated by you, the Tech Fast 50 winners is extraordinary, proving the resilience and global competitiveness of Australian innovation.

That's why SAP has chosen to present the Leadership & Enterprise Growth award. We know growth is complex and not easily achieved. Complexity in the form of scaling operations; managing global supply chains; ensuring compliance; and integrating new technologies. This is the critical moment when a company's foundational technology must evolve to support, rather than hinder, its trajectory.

At SAP, we are committed to providing the right systems for every stage of a company's technology journey. For many of the fast-growing businesses honoured here, SAP Cloud ERP solutions are purpose-built for rapid deployment, helping companies move from early systems to a robust, cloud-based ERP with pre-configured industry best practices in a matter of months.

> "We are committed to providing the right backbone for every stage of a company's technology journey.

The rise of AI creates new opportunities for growing companies. At SAP, we believe that AI is not just a feature but a core growth engine, helping businesses automate processes, accelerate decision-making, and build unprecedented resilience.

SAP is proud to sponsor the Deloitte Tech Fast 50, championing you, the companies who refuse to stand still. We are dedicated to enabling your transformation, ensuring the digital foundation you build today enables you to grow without limits, go live with confidence, and continuously transform operations with embedded AI, turning your exponential growth into a sustainable, resilient, and enduring competitive advantage for tomorrow.

To find out how SAP can support your growing company visit SAP GROW.

Stakk

## Stakk is a scaled, profitable and globally relevant AI-native Digital Trust infrastructure group focused on combating fraud.

Its integrated platform enables financial institutions, governments, law-enforcement agencies, healthcare providers, insurers, telecommunications companies, and other regulated enterprises to establish trust across the complete interaction – from identity verification and document authentication through to fraud prevention, transaction authorisation, and real-time contextual decisioning.

Stakk combines more than 30 years of proprietary AI-powered document intelligence with contextual Digital Personas, federated signal intelligence and pre-execution decisioning. The group serves more than 300 enterprise customers across the United States, Europe, the Middle East and Australia and processes more than 110 billion interactions annually, creating a continuously expanding intelligence asset that strengthens its ability to identify and respond to evolving AI-driven fraud threats.

Tech Fast 50

# #2

**WorkflowMAX**

+2,610%

workflowmax.com

WorkflowMAX is a B2B SaaS company headquartered in Melbourne that helps professional services firms run more profitable businesses.

Its cloud platform brings quoting, job management, time tracking, invoicing, capacity planning and profitability reporting together, giving firms real-time visibility of the margin on every job.

When Xero retired the original product, the team didn't take on legacy code. They rebuilt the platform from scratch to be open, connected and AI-ready.

That innovative approach now sets WorkflowMAX apart. Through its open API and Model Context Protocol (MCP) server, AI agents can create jobs, quote, log time and invoice directly in the platform. WorkflowMAX also sits within an integrated ecosystem: Xero and QuickBooks Online at the core, extended through other integrations and a global network of implementation partners, which connects it to the tools firms already use.

Today, firms across Australia, New Zealand, the UK and US rely on WorkflowMAX to run their work.

megaport.com

# MELINDA SNOWDEN

## Melinda Snowden has more than 30 years' experience in business, finance, and corporate governance.

As Chair of Megaport, she helps guide an Australian technology company building a globally distributed AI infrastructure platform.

Since becoming Chair in June 2024, Melinda has led the Board through a period of exceptional growth and strategic expansion. Over the past year, Megaport has significantly broadened its global reach and capabilities, bringing together compute, network, and storage. The acquisition of Latitude.sh and entry into new markets are helping position the company to meet growing global demand for AI infrastructure.

Melinda brings independent judgement and strategic oversight to this growth, supporting innovation while helping ensure the company's governance and leadership structures evolve alongside it. She has led a review of Megaport's executive governance framework to strengthen leadership alignment, organisational resilience, and the company's ability to scale.

A professional non-executive director since 2010, Melinda also serves on the boards of Temple & Webster and WAM Leaders. Her earlier career spans investment banking at Grant Samuel, Merrill Lynch, and Goldman Sachs, and corporate law at Herbert Smith Freehills Kramer.

Rising Star

# #2

**PRiMAX**

**+1,894%**

primaxai.io

PRiMAX

### In property, location used to be the differentiator. Now it is intelligence.

PRiMAX AI is an Australian data platform built for residential and commercial developers selling off the plan. It creates a digital twin of a development and measures how buyers behave across a purchase that can run 9 months, online, with the sales agent and in the display suite. Developers see which stock demand is concentrating on, which buyers are close to committing, and where their marketing spend is working. That intelligence flows into the systems their sales teams already use.

More than $3 billion of property is now transacting on PRiMAX across Australia and New Zealand, with expansion into the UAE, the United States and Europe underway.

Launching a building has changed little in thirty years: a website, a registration form and hope. PRiMAX replaces guesswork with evidence.

From soil to settle.

# ABOUT OUR TOP 3

Rising Star

**#3**

**AMR Technology**

+1,823%

amrtech.com.au

AMR

## AMR Technology is a sovereign Australian technology integrator for government, defence and regulated enterprise.

The company was founded in 2024 by Amy Reynolds and Morgan Rickett on a structural idea. An executive layer holds the architecture, security and governance authority on a client's program, and delivery runs through a governed network of more than thirty-five onboarded sovereign partners. The people who design the environment stay accountable for it. All work is performed onshore by cleared Australian personnel.

In its first full year of trading AMR delivered cyber security uplift, IRAP and ISO 27001 assurance, Microsoft platform modernisation and AI governance programs across government, defence industry and enterprise clients.

AMR was named SME of the Year at the 2026 Australian Defence Industry Awards. Co-Director Amy Reynolds was named National Entrepreneur of the Year at the 2026 Women in ICT Awards and is a finalist for the 2026 Innovation Awards.

**JOLT Charge**

+386%

joltcharge.com

JOLT

## JOLT is a digital street furniture and EV charging network operating across Australia, New Zealand, the United Kingdom, Canada and the United States.

The network combines highly visible digital screens with EV charging in high-traffic urban locations, creating a new generation of sustainable street furniture for cities, communities and advertisers.

Through partnerships with governments and private landlords, JOLT's almost 3,000 global charging locations make it faster, easier and simpler to transition to EVs by providing accessible, reliable EV charging infrastructure in urban capitals around the world.

JOLT has been recognised by TIME and Statista as one of the world's top 250 greentech companies.

JOLT. Accelerating the shift to a zero emissions future.

stakk.tech

Stakk

## Stakk is a scaled, profitable and globally relevant AI-native Digital Trust infrastructure group focused on combating fraud.

Its integrated platform enables financial institutions, governments, law-enforcement agencies, healthcare providers, insurers, telecommunications companies, and other regulated enterprises to establish trust across the complete interaction – from identity verification and document authentication through to fraud prevention, transaction authorisation, and real-time contextual decisioning.

Stakk combines more than 30 years of proprietary AI-powered document intelligence with contextual Digital Personas, federated signal intelligence and pre-execution decisioning. The group serves more than 300 enterprise customers across the United States, Europe, the Middle East and Australia and processes more than 110 billion interactions annually, creating a continuously expanding intelligence asset that strengthens its ability to identify and respond to evolving AI-driven fraud threats.

**WorkflowMAX**

+2,610%

workflowmax.com

## WorkflowMAX is a B2B SaaS company headquartered in Melbourne that helps professional services firms run more profitable businesses.

Its cloud platform brings quoting, job management, time tracking, invoicing, capacity planning and profitability reporting together, giving firms real-time visibility of the margin on every job.

When Xero retired the original product, the team didn't take on legacy code. They rebuilt the platform from scratch to be open, connected and AI-ready.

That innovative approach now sets WorkflowMAX apart. Through its open API and Model Context Protocol (MCP) server, AI agents can create jobs, quote, log time and invoice directly in the platform. WorkflowMAX also sits within an integrated ecosystem: Xero and QuickBooks Online at the core, extended through other integrations and a global network of implementation partners, which connects it to the tools firms already use.

Today, firms across Australia, New Zealand, the UK and US rely on WorkflowMAX to run their work.

## Wingman Group

+374%

wingmangroup.com.au

WINGMAN

Wingman Group is an Australian offshoring and technology company helping real estate agencies and mortgage brokers scale without the headcount and administrative complexity that typically come with growth.

Founded by Jonny Bell, Wingman has evolved from a labour hire provider into a complete offshore ecosystem, connecting businesses with more than 1,200 trained remote professionals and supporting them with the systems, training, marketing, IT and cyber security needed to perform from day one.

Through Wingman Group, WingmanX, Wingman Broking, Wingman Creative, Wingman Technology and Wingman Advisory, the group pairs world-class offshore talent with proprietary platforms, AI-enabled workflows and enterprise-grade security.

Its mission is to deliver exceptional talent and strategic support while creating meaningful, life-changing opportunities for remote professionals in the Philippines and beyond.

splose

+314%

splose.com

splose

## Founded in Adelaide, it’s built for Allied Health practitioners and the unique clinical and administrative needs of their practices.

splose runs the whole patient journey in one place on one login and one subscription. This covers everything from bookings, clinical records, client engagement, invoicing, payments and reporting.

splose AI, built natively into the platform, turns a practitioner’s session into clear clinical notes. It also seamlessly drafts treatment plans and NDIS-compliant letters with clear guardrails to have every one reviewed by the practitioner before it reaches a record. Since its inception, it has produced 972,468 clinical notes and saved more than 75,000 hours of administration.

Today, splose supports almost 30,000 practitioners across 8,000+ practices across the globe, caring for 6 million clients, and grew recurring revenue 66% last year. In February 2026 splose raised $46 million led by Spectrum Equity, the largest Series A by a South Australian SaaS company on record.

**PictureWealth**

+123%

picturewealth.com

picturewealth

## PictureWealth is regulated advice infrastructure: the platform economy for financial advice.

In the way Uber connects riders to drivers and Amazon connects buyers to sellers, PictureWealth connects clients to qualified financial advisers, with an AI-native platform carrying the work in between.

Founded in Perth in 2017, the group now oversees more than $22 billion in funds under advice across 365 advisers – 55 employed and 310 in licensed practices – serving clients connected to more than 22,000 financial institutions through Welfie, our client application.

Our proprietary stack (Welfie, PiWe and PWHub) produces regulator-ready advice in hours rather than weeks, at a cost the mass market can afford. Australia has 11.8 million advice-ready adults and an adviser population that has roughly halved since 2019; PictureWealth exists to close that gap. Our mission: connect more advice to more lives.
