Consolidated entity disclosure statement	176

The information in this publication is current as of 30 April 2024 and entities should ensure any developments occurring from this date to the date of authorising of the financial statements are appropriately taken into account. This publication is updated annually (for December reporting periods) and when necessary, also for June. The latest edition can be found at www.deloitte.com/au/models.

Introduction

Use this opportunity to refine accounting policies to make disclosures relevant and reduce the volume of disclosures.

The Tier 2 reporting framework is now an accepted part of the Australian corporate reporting framework. Having simplified disclosures included in one standard with a lower overall disclosure burden has been well received.

In the current period, entities using Tier 2 reporting need to respond to the following challenges:

- For public companies, the introduction of a new 'consolidated entity disclosure statement', which in consolidated financial reports requires a full listing of all entities consolidated into the financial statements, along with information such as their place of incorporation, tax residency and involvement with other entities such as trusts and partnerships within the group
- New requirements for the disclosure of accounting policy information – providing the opportunity to slim down existing accounting policy disclosures and making them more entity-specific and meaningful
- Considering other new mandatory financial reporting requirements – including around deferred taxes, OECD Pillar Two reforms and insurance contracts (which is not purely for insurance entities)
- Preparing for implementation of climate-related financial disclosures, with time frames depending on the entity's nature and size.

In addition, entities that have transitioned from special purpose financial statements to Simplified Disclosures will be well aware of the amount of data and effort required to do so, and may have implemented ad-hoc or temporary solutions. We recommend that entities now take the time to reform the overall reporting processes in the context of the forthcoming sustainability disclosure requirements – which may well be more challenging than the Simplified Disclosures transition.

In this edition of our Tier 2 model financial report, we have included helpful guidance to respond to new financial reporting requirements noted above, including an illustrative example of the new consolidated entity disclosure statement.

April 2024

“Entities should bed down their corporate reporting processes and refine financial statement disclosures while preparing for Australia’s move to a new era of mandatory climate reporting”

Alison White
National Leader
Accounting & Corporate Reporting

About the Tier 2 model financial report

This Tier 2 model financial report can be used as a guide in achieving best practice outcomes in Tier 2 full-year financial reporting.

About these illustrative disclosures

Basis of preparation

This document contains an illustrative example of general purpose financial statements prepared in accordance with AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* (AASB 1060) on the basis the entity:

- Has subsidiaries, joint ventures and associates
- Is **not** applying Australian Accounting Standards – Simplified Disclosures for the first time (i.e. there are no transitional disclosures or guidance provided in relation to the application of Australian Accounting Standards – Simplified Disclosures. This model financial report does not deal with transition¹).

This example includes the disclosures required by AASB 1060, either in illustrative or narrative form, in so far as those disclosures relate to **private sector for-profit entities**². This version provides a comprehensive illustration of the disclosures required by AASB 1060 (subject to the limitations noted below).

For-profit entity disclosures

This model annual report has been designed by Deloitte Touche Tohmatsu to assist in the preparation of **general purpose financial statements** of a **for-profit public company**³ in accordance with:

- Australian Accounting Standard AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* (as amended)
- The recognition and measurement requirements of all Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB)
- Provisions of the *Corporations Act 2001*, insofar as they relate to the primary financial statements and notes to the financial statements
- Other requirements and guidelines, including Australian Securities and Investments Commission (ASIC) Class Orders/Corporations Instruments, Regulatory Guides and Media Releases in so far as they relate to the primary financial statements and the notes to the financial statements.

The versions of the above pronouncements referred to in this publication are those on issue at 30 April 2024.

¹ See our [Model Tier 2 financial report Financial reporting periods ending on or after 30 June 2022](#) for an illustrative example of general purpose financial statements prepared in accordance with AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* on the basis the entity is applying Australian Accounting Standards – Simplified Disclosures for the first time.

² See *Not-for-profit private sector and public sector entities* below for application of this document to private sector not-for-profit entities and public sector entities.

³ Although the illustrative disclosures in this document are based on the example entity being a public company, the document can be used as the basis for developing disclosures for other entities. The key differences for other entities will be the contents of the accompanying documents to the financial statements (e.g. the directors' report) and the basis of preparation in Note 1 where the entity is not reporting in accordance with the *Corporations Act 2001*. Other differences may result from the nature of the entity, e.g. its capital structure. See *Not-for-profit private sector and public sector entities* below for application of this document to private sector not-for-profit entities and public sector entities. Illustrative disclosures in this document which apply only to public companies have been labelled as such.

Not-for-profit private sector and public sector entities

Paragraph 214 of AASB 1060 contains a summary of disclosures applicable only to not-for-profit private sector entities and public sector entities. In addition, some not-for-profit entities may be affected by the provisions of the *Australian Charities and Not-for-profits Commission Act 2012*, insofar as they relate to the primary financial statements and notes to the financial statements.

Illustrative disclosures and guidance specific to not-for-profit entities have been highlighted in this document by being shaded using teal colouring as illustrated here.

Illustrative disclosures and guidance specific to public sector entities have been highlighted in this document by being shaded using light green colouring as illustrated here.

The illustrative disclosures are suitable for use as a guide only and will not be appropriate for use by all not-for-profit private sector and public sector entities. Each not-for-profit private sector and public sector entity should consider its respective circumstances and amend the disclosures as necessary.

Best practice disclosures

In some instances, additional 'best practice' disclosures commonly included in financial statements have been illustrated in these model financial statements. These additional disclosures do not have source references included in the left-hand column.

Showing 'nil' amounts

The disclosures included in this publication are illustrated without amounts. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that, in practice, entities are required to display line items for 'nil' amounts.

Changes from the prior Tier 2 model financial report

To assist readers to identify changes from the last Tier 2 model financial report (i.e. for financial reporting periods ending on or after 30 June 2023), we have included this blue colour-coded bar in the left margin of the model financial statements (e.g. for illustrative disclosures of new pronouncements, consolidated entity disclosure statement). The blue colour-coded bar is not included where disclosures have been removed.

The prior Tier 2 model financial report (i.e. for financial reporting periods ending on or after 30 June 2023) was prepared for a proprietary, whereas this 30 June 2024 Tier 2 model financial report is prepared for a public company. Accordingly, information highlighted with a blue bar in the Directors' report is not a new requirement of the Corporations Act, but due to a change in the nature of the entity for which disclosures are being illustrated.

Overview of Simplified Disclosures

Australian financial reporting tiers

AASB 1053 *Application of Tiers of Australian Accounting Standards* identifies two tiers of reporting requirements for preparing general purpose financial statements (AASB 1053.7):

- Tier 1: Australian Accounting Standards, which incorporate IFRS Accounting Standards issued by the IASB and include additional requirements specific to Australian entities
- Tier 2: Australian Accounting Standards – Simplified Disclosures.

Tier 2 comprises the recognition and measurement requirements of Tier 1 (including consolidation and the equity method of accounting where applicable) but substantially reduced disclosure requirements when compared to Tier 1 (AASB 1053.9). Therefore, entities will adopt the same recognition and measurement requirements whether they apply Tier 1 or Tier 2.

Similarly, the presentation requirements of Tier 1 and Tier 2 are the same, except for:

- The requirement to present a third statement of financial position, which is required in Tier 1 financial statements when an entity applies an accounting policy retrospectively or makes a retrospective restatement of items in its financial statements, or reclassifies items in its financial statements
- The option of not presenting a statement of changes in equity in Tier 2 financial statements, whereby an entity presents a single statement of income and retained earnings in place of a statement of changes in equity provided certain conditions are met (see the illustrative example on page 39).

The disclosure requirements for Tier 2 financial statements are included in AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities*.

Entities applying Simplified Disclosures

In broad terms, Simplified Disclosures are applied by:

- Private sector for-profit entities with a legislative requirement to prepare financial statements in accordance with Australian Accounting Standards or accounting standards, where that entity does not have public accountability and is not required by its reporting mandate to apply Tier 1 (and has not chosen to do so)
- Private sector for-profit entities with a non-legislative requirement to prepare financial statements in accordance with Australian Accounting Standards, which arises through a constituting document or other document which has been created or amended on or after 1 July 2021
- Other entities applying Simplified Disclosures, including not-for-profit entities which are required to, or choose to, apply Tier 2.

Entities transitioning to Tier 2 Simplified Disclosures can refer to our June 2022 Tier 2 model financial report which can be accessed at www.deloitte.com/au/models.

Tier 2 presentation and disclosure checklist

An excel checklist that summarises the presentation and disclosure requirements of AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* and other relevant Australian Accounting Standards is available at www.deloitte.com/au/models.

Source references

References to the relevant requirements are provided in the left hand column of each page of this illustration. Where doubt exists as to the appropriate disclosure requirement, examination of the source of the disclosure requirement is recommended.

Abbreviations

Abbreviations used in this publication are as follows:

What's new in corporate reporting?

This section provides a high-level overview of the key reporting considerations in Tier 2 financial statements for annual reporting periods ending on 30 June 2024

The information in this section was prepared as of 30 April 2024 and entities should ensure any developments occurring from this date to the date of authorising of the financial statements are appropriately taken into account. This publication is updated for each June reporting period. The latest edition can be found at www.deloitte.com/au/models.

As occurs so often with changes to accounting standards and financial reporting requirements, some of the new or revised pronouncements and other information noted in this section may have a substantial impact on particular entities. Therefore, it is important that the information in this section is carefully reviewed for any potential impacts or opportunities.

Summary of key corporate reporting considerations for 30 June 2024

Relevant to full year Tier 2 financial reports at 30 June 2024

The following should be considered for full year Tier 2 financial reports at 30 June 2024. More information is provided in our *Tier 1 models and reporting considerations* publication, which is available at www.deloitte.com/au/models.

Transparent reporting in the current economic environment

Current economic conditions require a wide ranging response in financial reporting in areas such as impairment, expected credit losses, contract modifications and liquidity risk management.

Sustainability reporting is imminent

The International Sustainability Standards Board has issued its first IFRS® Sustainability Disclosure Standards to serve as a global baseline for sustainability disclosures. In Australia, the Federal Government is moving toward mandatory climate-related financial disclosures with Treasury releasing proposed legislation to implement reporting through the Corporations Act. The AASB has also released an exposure draft of proposed Australian Sustainability Reporting Standards (based on the IFRS Sustainability Disclosure Standards but using a 'climate first' approach).

New financial reporting standards

New requirements apply in full-year financial reports for the first time:

- A requirement to disclose **material accounting policy information** (rather than significant accounting policies) provides an opportunity to reduce the volume of disclosure and focus on pertinent information
- The **new insurance standard** applies to insurance contracts irrespective of the issuer (not just insurance entities or reinsurance entities)
- Entities with leases or decommissioning liabilities need to respond to an amended 'initial recognition exemption' when calculating **deferred taxes**
- Entities subject to the **OECD Pillar Two reforms** (broadly, entities with more than approximately \$1.2 billion in revenue) have an exemption from deferred tax accounting in relation to the impacts of Pillar Two but must disclose the impact of Pillar Two taxes on the entity.

ASIC surveillance activities and focus areas

ASIC has implemented a new data-led risk-based approach to its surveillance of financial reporting and audit, which integrates financial reporting and audit surveillance. Whilst ASIC focus areas for June 2024 are not known at the time of finalisation of this publication, we expect them to be largely consistent with prior periods covering recoverability of assets, adequacy of provisions, classification of debt as current or non-current and disclosures of material business risks, climate change risk and cyber security risks⁴.

New financial reporting requirements for public companies

Public companies (listed and unlisted) will be required to include a consolidated entity disclosure statement in their financial reports for the first time at 30 June 2024.

The above is a high-level summary and each entity will be affected differently. Accordingly, financial report preparers should consider their own specific circumstances when preparing their financial reports and ensure they fully consider all the requirements discussed in section B of the 30 June 2024 *Tier 1 models and reporting considerations* publication.

Our Corporate reporting update series provide insights from leading specialists in financial reporting from our Accounting & Corporate Reporting team and audit practice who share thoughts and lessons learnt from the recent reporting seasons. Corporate reporting updates can be accessed at www.deloitte.com/au/cfru.

⁴ ASIC's 30 June 2024 focus areas are expected to be announced on the ASIC website in the near future. More information on key matters to consider can be found in our [Clarity publication](#) *ASIC releases results of first integrated surveillance program and December 2023 focus areas*. We will provide updates in future editions.

Summary of mandatory new and amended pronouncements

This section outlines new and revised pronouncements that have not been previously applied in financial reports.

The tables and other information in this section outline the new and revised pronouncements and other requirements that are to be applied for the first time for Tier 2 full-financial years ending 30 June 2024.

Overall considerations

Impacts of adopting new and revised pronouncements

Applying new and revised pronouncements for the first time can result in direct changes in recognition, measurement, presentation and disclosure requirements. In addition, there can be consequential impacts on financial reports through the transitional provisions of the pronouncement and the existing requirements of other Australian Accounting Standards.

The table below outlines some of the areas where these consequential impacts should be considered:

Area	Consideration
Updates to accounting policies	The terminology and substance of accounting policies may need to be updated to reflect new recognition, measurement and other requirements.
Impact of transitional provisions	AASB 108 <i>Accounting Policies, Changes in Accounting Estimates and Errors</i> contains a general requirement that changes in accounting policies are retrospectively applied, but this does not apply to the extent an individual pronouncement has specific transitional provisions.
Disclosures about changes in accounting policies	Where an entity changes its accounting policy as a result of the initial application of an Accounting Standard (including Interpretations as a result of AASB 1048 <i>Interpretation of Standards</i>) and it has an effect on the current period or any prior period, AASB 1060 (subject to any specific transitional provisions of the Accounting Standard) requires the disclosure of a number of matters, e.g. the nature of the change in accounting policy and the amount of the adjustment for each financial statement line item affected.

Pronouncements not yet effective

AASB 1060 does not require disclosure of new accounting standards and interpretations that are not yet effective.

Early adoption

Where early adoption is being contemplated, it is important to address any necessary procedural requirements, e.g. for entities reporting under the Corporations Act, appropriate directors' resolutions for early adoption must be made under s.334 (5).

Summary of mandatory new and amended pronouncements

The table below summarises the amended reporting requirements that must be applied for the first time for Tier 2 full-financial years ending 30 June 2024.

See our *Tier 1 models and reporting considerations* publication for the year ended 30 June 2024 for a summary of each pronouncement, available at www.deloitte.com/au/models and see Note 2. *Changes in accounting policies and changes in estimates* of this publication for illustrative disclosures of the pronouncement applying in annual financial statements.

Pronouncement⁵ Changes

Applicable to all Tier 2 annual financial statements⁶

AASB 17 (new)	Insurance contracts (AASB 17 and related amendments) ⁷
AASB 1060/108	Disclosure of accounting policies and definition of accounting estimates (AASB 2021-2, AASB 2021-6)
AASB 112	Deferred tax related to assets and liabilities arising from a single transaction (AASB 2021-5)
Various	Editorial corrections and repeal of superseded and redundant standards (AASB 2022-7)
AASB 1060	International tax reform – Pillar two model rules: Tier 2 disclosures (AASB 2023-4)

Applicable to all Tier 2 half-year financial statements⁸

AASB 16	Lease liability in a sale and leaseback (AASB 2022-5)
AASB 1060	Disclosure of non-current liabilities with covenants (AASB 2023-3) (<i>half-years only</i>)
AASB 1060	Supplier finance arrangements: Tier 2 disclosures (AASB 2024-1) (<i>half-years only</i>)

⁵ Where AASB 1060 is referenced in this column, the change relates to presentation and disclosure in the financial statements. Where other Accounting Standards are included, the changes refer to recognition and measurement requirements.

⁶ AASB 2022-6 is applied in conjunction with AASB 2020-1 *Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-Current*, the effective date of which was amended by AASB 2020-6 *Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-current – Deferral of Effective Date*. AASB 2020-6, although itself is effective for annual reporting periods beginning on or after 1 January 2022 (the original effective date of AASB 2020-1), had the effect of deferring the effective date of the amendments in AASB 2020-1 to annual reporting periods beginning on or after 1 January 2023. AASB 2022-6 *Amendments to Australian Accounting Standards – Non-current Liabilities with Covenants* further defers the mandatory application of those amendments to annual reporting periods beginning on or after 1 January 2024, in addition to amending original amendments. Therefore AASB 2020-6 and AASB 2020-1 are not included in the table.

⁷ Although most insurers would have public accountability (see paragraph B4 of AASB 1053 *Application of Tiers of Australian Accounting Standards*) and so not be able to prepare Tier 2 general purpose financial statements, some insurance entities may not have public accountability. Furthermore, AASB 17 applies to insurance contracts, which can arise outside of insurance entities and so the recognition and measurement requirements of AASB 17 may therefore be relevant in Tier 2 financial reports.

⁸ AASB 1060 does not apply to half-year or other interim financial reports. A Tier 2 entity presenting a half-year or other interim financial report should apply AASB 134 *Interim Financial Reporting* (AASB 1060:33). The Standards listed are for completeness purposes only.

IFRS Interpretations Committee agenda decisions

Along with its activity developing formal interpretations of IFRS and proposing that the IASB make amendments to Standards, the IFRS Interpretations Committee regularly publishes summaries of issues that it has decided not to add to its agenda, often accompanied by a discussion of the accounting issue submitted.

Whilst the commentary included in an agenda decision is not formally part of IFRS, it is an important source of guidance that should be carefully considered when selecting a suitable accounting policy. In many jurisdictions there is an expectation from regulators that agenda decisions will be considered, with the European Securities and Markets Authority (ESMA), for example, publicly stating an expectation to this effect. In Australia, the AASB has indicated that an entity is required to apply the Standards, reflecting the explanatory material in a relevant agenda decision.

The table below outlines the agenda decisions published by the Committee since July 2022, grouped by the standards to which they relate. Where a decision relates to more than one standard, it is listed under each standard. Links in the table are to the IASB website. The IASB has also released ten volumes of its *Compilation of agenda decisions*, covering all agenda decisions from January 2019 to April 2024. The documents are available at www.ifrs.org.

Tentative agenda decisions are available at www.ifrs.org.

Pronouncement	Agenda decision topic	Month finalised	More information
IFRS 2 Share-based Payment	Special purpose acquisition companies (SPACs): Accounting for warrants at acquisition	October 2022	Agenda decision
IFRS 3 Business Combinations	Payments contingent on continued employment during handover periods	April 2024	Agenda decision
IFRS 9 Financial Instruments	Premiums receivable from an intermediary	October 2023	Agenda decision
	Guarantee over a derivative contract	October 2023	Agenda decision
	Homes and home loans provided to employees ⁹	October 2023	Agenda decision
	Lessor forgiveness of lease payments	October 2022	Agenda decision
IFRS 16 Leases	Homes and home loans provided to employees ⁹	October 2023	Agenda decision
	Definition of a lease — Substitution rights	April 2023	Agenda decision
	Lessor forgiveness of lease payments	October 2022	Agenda decision
IFRS 17 Insurance Contracts	Premiums receivable from an intermediary	October 2023	Agenda decision
	Multi-currency groups of insurance contracts	October 2022	Agenda decision
	Transfer of insurance coverage under a group of annuity contracts	July 2022	Agenda decision
IAS 19 Employee Benefits	Homes and home loans provided to employees ⁹	October 2023	Agenda decision
IAS 21 The Effects of Changes in Foreign Exchange Rates	Multi-currency groups of insurance contracts	October 2022	Agenda decision
IAS 27 Separate Financial Statements	Merger between a parent and its subsidiary in separate financial statements	January 2024	Agenda decision

⁹ The [agenda decision](#) does not mention particular standards as the IFRS Interpretations Committee performed no technical analysis of the subject matter of the agenda decision as the issue was not seen to be “widespread”. Accordingly, explanatory material often included in an agenda decision was not included in this decision, as under the IASB [Due Process Handbook](#) such explanatory material would ordinarily only be included when the reason for not adding a standard-setting project on the work plan is the Committee’s conclusion that the principles and requirements in IFRS Accounting Standards provide an adequate basis for an entity to determine the required accounting. However, the papers considered by the Committee in [March 2023](#) and [September 2023](#) discuss various possible treatments (without discussing the technical merit of those treatments). We have listed the agenda decision under the IFRS Accounting Standards mentioned in those papers (i.e. IFRS 9 *Financial Instruments*, IFRS 16 *Leases* and IAS 19 *Employee Benefits*).

Pronouncement	Agenda decision topic	Month finalised	More information
IAS 32 Financial Instruments: Presentation	Special purpose acquisition companies (SPACs): Accounting for warrants at acquisition	October 2022	Agenda decision
	Special purpose acquisition companies (SPACs): Classification of public shares as financial liabilities or equity	July 2022	Agenda decision
IAS 37 Provisions, Contingent Liabilities and Contingent Assets	Negative low emissions vehicle credits	July 2022	Agenda decision
	Climate-related commitments	April 2024	Agenda decision

Reporting deadlines

Summary of reporting deadlines for annual financial reporting

Entities reporting under the Corporations Act

The following table summarises the reporting deadlines for Tier 2 annual reports under the Corporations Act.

Source	Requirement	Public companies	Proprietary companies
Annual financial reporting			
s.314 s.315	Sending of financial report to members	Earlier of 21 days before the next AGM or 4 months after the end of the financial year	Within 4 months after the end of the financial year
s.319	Lodgement of the Corporations Act annual report and concise report with ASIC	Within 4 months after the end of the financial year	Within 4 months after end of the financial year
Annual general meetings			
s.250N	Hold the Annual General Meeting (AGM)	Within 5 months after the end of the financial year (unless exempted) ¹⁰	n/a

Entities reporting to the ACNC

The following table summarises the reporting deadlines for Tier 2 annual reports under the ACNC.

Source	Requirement	Small	Medium	Large
Annual financial reporting				
ACNC Governance Standard 2: Accountability to members ¹¹	Sending of financial report to members	Whilst annual financial reports are optional, members should be able to ask for some financial information	Annual financial reports must be maintained and provided to members explaining the charity's financial position	

¹⁰ A wholly-owned public company (i.e. a public company with one member) is not required to hold an AGM under s.250N(4). Similarly, under s.250N(5) and s.250N(6), certain companies eligible for limited governance requirements under s.738ZI (i.e. certain entities raising funds under crowd-sourced funding arrangements), are not required to hold an AGM. This latter concession is only available to companies that register as, or convert to, a public company after the commencement of the crowd-sourced funding regime under the Corporations Act. For more information on entities involved in crowd-sourced funding, see our *Australian financial reporting guide*, available at www.deloitte.com/au/models.

¹¹ If a charity meets the definition of Basic Religious Charity, it does not have to answer financial information questions in its Annual Information Statement, submit annual financial reports (regardless of its size), or comply with the ACNC Governance Standards. However, Basic Religious Charities must still meet all other ongoing obligations, including submitting their Annual Information Statement each year.

Source	Requirement	Small	Medium	Large
Australian Charities and Not-for-profits Commission Act 2012 s.60-10	Lodgement of the annual report with the ACNC ¹²	Submission of annual reports are optional unless required by its own governing document. Annual information statements (AIS) however must still be submitted within 6 months from reporting period end	Annual reports must be submitted as part of the Annual Information Statements within 6 months from reporting period end	
Annual general meetings				
ACNC Governance Standard 2: Accountability to members ¹³	Hold the Annual General Meeting (AGM) ¹⁴	Organise a meeting at least annually with members (such as an AGM) with opportunities for members to ask questions and vote on resolutions		

Dates applicable for 30 June 2024 reports

Deadlines applicable for annual reporting periods ending 30 June 2024

The following tables summarise the reporting deadlines for Tier 2 annual reporting periods ending 30 June 2024.

Entities reporting under the Corporations Act

Obligation	Deadline	Date for 30 June 2024 financial reports
Lodgement of audited annual financial report with ASIC	4 months	31 October 2024
Reporting to members – public companies	Earlier of 21 days before AGM or 4 months	Earlier of 21 days before AGM or 31 October 2024
Reporting to members – proprietary companies	4 months	31 October 2024
Holding of AGM – public companies	5 months	2 December 2024 ¹⁵

Not-for-profit ACNC registered entities

Obligation	Deadline	Date for 30 June 2024 financial reports / AIS
Lodgement of annual financial report / Annual Information Statement (AIS) with the ACNC	6 months	31 December 2024

¹² A company limited by guarantee that is a registered charity only needs to submit an Annual Information Statement to the ACNC (with a financial report, if it is medium or large). It does not have to report to ASIC.

¹³ ACNC Governance Standard 2 only applies to charities with members. For example, incorporated associations, companies and unincorporated associations. Other structures, such as trusts, do not have members.

¹⁴ A company limited by guarantee that is a registered charity does not have to comply with the requirement to hold general meetings of members or annual general meetings under the Corporations Act. Instead, it must comply with the requirements of ACNC Governance Standard 2.

¹⁵ Where a deadline under the Corporations Act falls on a Saturday, Sunday or public holiday, section 36(2) of the Acts Interpretations Act 1901 permits the deadline to be met on the next day that is not a Saturday, Sunday, or public holiday. 30 November 2024 (which is 5 months after the 30 June 2024 reporting period) is a Saturday, and accordingly, the deadline will be met on the next day that is not a Saturday, Sunday, or public holiday.

Other deadlines

Directors' report

Source

The directors of Tier 2 Limited submit herewith the annual report of the company for the financial year ended 30 June 2024. In order to comply with the provisions of the *Corporations Act 2001*, the directors report as follows:

Information about the directors

The names and particulars of the directors of the company during or since the end of the financial year are:

s.300(1)(c)
s.300(10)(a)

Name [all entities]	Particulars [public companies only]
Mr C.J. Chambers	Chairman, Chartered Accountant, joined the Board in 2018 in a non-executive capacity and is a non-executive director of the ultimate holding company, Y Holdings Limited. Mr C.J. Chambers is also a director of Eastwood Limited. He is a member of the audit committee and the risk management committee.
Mr P.H. Taylor	Chief Executive Officer, joined the Board in 2020. Mr P.H. Taylor was previously the CEO at a large manufacturing company.
Ms F.R. Ridley	Chartered Accountant, joined the Board in 2021 in a non-executive capacity. Ms F.R. Ridley is a member of the nomination and remuneration committee, and of the audit committee.
Mr A.K. Black	Industrial Engineer, joined the Board on 19 July 2023. He previously held various senior management positions in manufacturing and wholesale companies.
Mr B.M. Stavrinidis	Director of Merchant Bank Limited, joined the Board in 2019 in a non-executive capacity. Mr B.M. Stavrinidis is a member of the nomination and remuneration committee, the audit committee, and the risk management committee.
Mr W.K. Flinders	Practicing Solicitor, joined the Board in 2016 in a non-executive capacity and resigned during the year. Mr W.K. Flinders was a member of the nomination and remuneration committee until his resignation.
Ms S.M. Saunders	Practicing Solicitor, joined the Board on 4 August 2023 in a non-executive capacity and resigned after year end. Ms S.M. Saunders was a member of the nomination and remuneration committee and the risk management committee until her resignation.

s.300(1)(c)

The above named directors held office during the whole of the financial year and since the end of the financial year except for:

- Mr W.K. Flinders – resigned 19 July 2023
- Ms S.M. Saunders – appointed 4 August 2023, resigned 15 July 2024
- Mr A.K. Black – appointed 19 July 2023.

s.300(10)(a)

Particulars include each director's qualifications, experience and special responsibilities.

Source

s.300(10)

Information about the directors (continued)

A public company that is a wholly-owned subsidiary of another company is not required to disclose each director's qualifications, experience and special responsibilities, the number of meetings of the board of directors and each board committee, or the qualifications and experience of each company secretary.

s.300(1)(ca)

Former partners of the audit firm

The directors' report must disclose the name of each person who:

- Is an officer of the company, registered scheme or disclosing entity at any time during the year
- Was a partner in an audit firm, or a director of an audit company, that is an auditor of the company, disclosing entity or registered scheme for the year

Was such a partner or director at a time when the audit firm or the audit company undertook an audit of the company, disclosing entity or registered scheme.

s.300(10)(d)

Company secretary [public companies only]

Mr A.B. Grey, Chartered Accountant, held the position of company secretary of Tier 2 Limited at the end of the financial year. He joined Tier 2 Limited in 2020 and previously held the company secretary position at a large manufacturing company. He is a member of the Governance Institute of Australia Ltd.

s.300(10)

Disclosure of the company secretary's qualifications and experience is not required for a public company which is a wholly-owned controlled entity of another company.

s.299(1)(c)

Principal activities

The company's principal activities in the course of the financial year were *[describe]*.

During the financial year the company sold its *[describe]* business. Details of the sale are contained in the notes to the financial statements.

s.299(1)(a)

Review of operations

The directors' report must contain a review of the company's operations during the financial year and the results of those operations.

ASIC-RG 247

ASIC Regulatory Guide 247 Effective disclosure in an operating and financial review

In preparing this disclosure, entities may wish to refer to [ASIC Regulatory Guide 247 Effective disclosure in operating and financial review](#) (RG 247) and the ASX Guidance Note 10 *Review of Operations and Activities: Listing Rule 4.10.17* and to the G100's *Guide to Review of Operations and Financial Condition*. These documents provide guidance on the form and content of a listed entity's review of operations and the results of those operations, including specific guidance on items which might be appropriately included in such a review.

Although the guidance has been issued with respect to listed companies it represents best practice and may provide guidance to directors when complying with the review of operations requirements of the *Corporations Act 2001*.

Source

ASIC-RG 230

Review of operations (continued)

Non-IFRS financial information

If the directors consider it appropriate to include non-IFRS financial information in the OFR, the directors' report or another document in the annual report, the guidelines in Section D of [Regulatory Guide 230](#) *Disclosing non-IFRS financial information* should be followed to assist in reducing the risk of non-IFRS financial information being misleading¹⁷.

Important considerations include that:

- IFRS financial information should be given equal or greater prominence compared to non-IFRS financial information, in particular IFRS profit
- Non-IFRS information should:
 - Be explained and reconciled to IFRS financial information
 - Be calculated consistently from period to period
 - Be unbiased and not used to remove 'bad news'.

Entities should refer to Regulatory Guide 230 when preparing their reports as it provides detailed guidance for presenting non-IFRS financial information.

A clear statement should be made about whether the non-IFRS financial information has been audited or reviewed in accordance with Australian Auditing Standards.

s.299(1)(b)

Changes in state of affairs

During the financial year, the company disposed of its *[describe]* business. The company is also seeking to dispose of its *[describe]* business, in order to focus its operations toward the *[describe]* market. Other than the aforementioned changes, there was no significant change in the state of affairs of the company during the financial year.

s.299(1)(d)

Subsequent events

There has not been any matter or circumstance occurring subsequent to the end of the financial year that has significantly affected, or may significantly affect, the operations of the company, the results of those operations, or the state of affairs of the company in future financial years.

Otherwise, describe the matter(s) or circumstance(s).

¹⁷ Non-IFRS financial information is financial information presented other than in accordance with all relevant accounting standards.

Source

Future developments

s.299(1)(e), s.299(3) Directors must bring likely developments in the operations of the entity in future financial years and the expected results of those operations to the attention of the users of the annual report. These disclosures are not required where they would result in unreasonable prejudice to the entity.

Use of the 'unreasonable prejudice' exemption

ASIC RG 247 In determining whether any information should be omitted in the case of 'unreasonable prejudice', ASIC RG 247 *Effective disclosure in an operating and financial review* suggests that:

- Unreasonable prejudice means the consequence would be unreasonable if, for example, disclosing the information is likely to give third parties (such as competitors, suppliers and buyers) a commercial advantage, resulting in a material disadvantage to the entity
- Likely means 'more than a possibility' or 'more probable than not'.

Even where the exemption is relied upon it is still expected that some information should be able to be disclosed about an entity's business strategies and prospects.

Environmental regulations

s.299(1)(f) If the entity's operations are subject to any particular and significant environmental regulation under a law of the Commonwealth or of a State or Territory, the directors' report should disclose details of the entity's performance in relation to the environmental regulation.

ASIC-RG 68.74 ASIC has provided the following guidance on completing environmental regulations disclosures:

- Prima facie, the requirements would normally apply where an entity is licensed or otherwise subject to conditions for the purposes of environmental legislation or regulation
- The requirements are not related specifically to financial disclosures (e.g. contingent liabilities and capital commitments) but relate to performance in relation to environmental regulation. Hence, accounting concepts of materiality in financial statements are not applicable
- The information provided in the directors' report cannot be reduced or eliminated because information has been provided to a regulatory authority for the purposes of any environmental legislation

The information provided in the directors' report would normally be more general and less technical than information which an entity is required to provide in any compliance reports to an environmental regulator.

Dividends

s.300(1)(a) In respect of the financial year ended 30 June 2023, as detailed in the directors' report for that financial year, a final dividend of ___ cents per share franked to ___ % at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 8 August 2023.

s.300(1)(a) In respect of the financial year ended 30 June 2024, an interim dividend of ___ cents per share franked to ___ % at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 10 January 2024.

s.300(1)(a) In respect of the financial year ended 30 June 2024, an interim dividend of ___ cents per share franked to ___ % at 30% corporate income tax rate was paid to the holders of redeemable cumulative preference shares on 19 April 2024.

s.300(1)(b) In respect of the financial year ended 30 June 2024, the directors recommend the payment of a final dividend of ___ cents per share franked to ___ % at 30% corporate income tax rate to the holders of fully paid ordinary shares on 27 September 2024.

Source

Dividends (continued)

Where no dividends have been paid or declared since the start of the financial year, and/or the directors do not recommend the payment of a dividend in respect of the financial year, the directors' report should disclose that fact.

AASB 1060:187

If dividends are declared (i.e. the dividends are appropriately authorised and no longer at the discretion of the entity) after the reporting date but before the financial statements are authorised for issue, the dividends are not recognised as a liability at the reporting date because no obligations exist at that time. Such dividends are disclosed in the notes to the financial statements in accordance with paragraph 187 of AASB 1060.

Share options

s.300(3)

The disclosures required by s.300(1)(d), s.300(1)(e) and s.300(1)(f) (illustrated in our *Tier 1 models and reporting considerations* publication, available at www.deloitte.com/au/models) cover:

- Options over unissued shares and interests of the company, registered scheme or disclosing entity
- If consolidated financial statements are required – options over unissued shares and interests of any controlled entity that is a company, registered scheme or disclosing entity.

The above requirements (i.e., s.300(1)(d), s.300(1)(e) and s.300(1)(f)) do not apply to options over shares in the entity's parent.

Share options granted to directors and senior management

s.300(1)(d)

The directors' report should include details of options that are:

- Granted over unissued shares or unissued interests during or since the end of the financial year
- Granted to any of the directors or any of the 5 most highly remunerated officers of the company (other than the directors)
- Granted to them as part of their remuneration.

s.300(5)

The details of an option granted during or since the end of the financial year should include:

- The identity of the company, registered scheme or disclosing entity granting the option
- The name of the person to whom the option is granted
- The number and class of shares or interests over which the option is granted.

Shares under option or issued on exercise of options

The directors' report should include details of:

s.300(1)(f)

- Shares or interests issued during or since the end of the financial year as a result of the exercise of an option over unissued shares or interests

s.300(1)(e)

- Unissued shares or interests under option as at the date of the directors' report.

s.300(6)

The details of unissued shares or interests under option should include:

- The company, registered scheme or disclosing entity that will issue shares or interests when the options are exercised
- The number and classes of those shares or interests
- The issue price, or the method of determining the issue price, of those shares or interests
- The expiry date of the options.

Source

Share options (continued)

Shares under option or issued on exercise of options (continued)

Any rights that option holders have under the options to participate in any share issue or interest issue of the company, registered scheme or disclosing entity or of any other body corporate or registered scheme.

s.300(7)

The details of shares and interests issued as a result of the exercise of any option should include:

- The company, registered scheme or disclosing entity issuing the shares or interests
- The number of shares or interests issued
- If the company, registered scheme or disclosing entity has different classes of shares or interests, the class to which each of those shares or interests belongs
- The amount unpaid on each of those shares or interests
- The amount paid, or agreed to be considered as paid, on each of those shares or interests.

Indemnification of officers and auditors

s.300(1)(g), s.300(8),
s.300(9)

During the financial year, the company paid a premium in respect of a contract insuring the directors of the company (as named above), the company secretary, Mr A.B. Grey, and all executive officers of the company and of any related body corporate against a liability incurred as such a director, secretary or executive officer to the extent permitted by the *Corporations Act 2001*. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The company has not otherwise, during or since the end of the financial year, except to the extent permitted by law, indemnified or agreed to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as an officer or auditor.

Where the company has not indemnified or agreed to indemnify an officer or auditor against a liability incurred, or paid an insurance premium in respect of a contract insuring against a liability incurred by an officer or auditor, the following disclosure is encouraged:

'During or since the end of the financial year the company has not indemnified or made a relevant agreement to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as an officer or auditor. In addition, the company has not paid, or agreed to pay, a premium in respect of a contract insuring against a liability incurred by an officer or auditor.'

Source

s.300(10)(b), (c)

Directors' meetings [public companies only]

The following table sets out the number of directors' meetings (including meetings of committees of directors) held during the financial year and the number of meetings attended by each director (while they were a director or committee member). During the financial year, 12 board meetings, 2 nomination and remuneration committee meetings, 4 audit committee meetings and 4 risk management committee meetings were held.

Directors	Board of directors		Nomination & remuneration committee		Audit committee		Risk management committee	
	Held	Attended	Held	Attended	Held	Attended	Held	Attended
C.J. Chambers	12	12	-	-	4	4	4	4
P.H. Taylor	12	10	-	-	-	-	-	-
F.R. Ridley	12	11	2	2	4	4	-	-
A.K. Black	-	-	-	-	-	-	-	-
B.M. Stavrinidis	12	12	2	2	4	4	4	4
W.K. Flinders	1	1	1	1	-	-	-	-
S.M. Saunders	10	9	1	1	-	-	4	4

s.300(10)

Disclosure of directors' meetings is not required for a public company which is a wholly-owned controlled entity of another company.

Proceedings on behalf of the company

s.300(14)

The directors' report should disclose, with respect to persons applying for leave under s.237 to bring, or intervene in, proceedings on behalf of the company, the applicant's name and a statement whether leave was granted.

s.300(15)

Where leave is granted under s.237, the directors' report should disclose the following details of any proceedings that a person has brought, or intervened in, on behalf of the company:

- The person's name
- The names of the parties to the proceedings

Sufficient information to enable members to understand the nature and status of the proceedings (including the cause of action and any orders made by the court).

Auditor's independence declaration

s.298(1AA)(c)

The auditor's independence declaration is included on page 29.

True and fair view

s.298(1A)

If the financial statements for a financial year include additional information under s.295(3)(c) to give a true and fair view of financial position and performance, the directors' report for the financial year must also:

- Set out the directors' reasons for forming the opinion that the inclusion of that additional information was necessary to give a true and fair view required by s.297
- Specify where that additional information can be found in the financial statements.

Source

Rounding off of amounts

ASIC-CI 2016/191.5(f) If the company is of the kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and consequently the amounts in the directors' report and the financial statements are rounded, that fact must be disclosed in the financial statements and the directors' report.

Where the conditions of the Corporations Instrument are met, entities may round to the nearest dollar, nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars, depending upon the total assets of the entity. The appropriate rounding should be included in the disclosure below:

ASIC-CI 2016/191 The company is a company of the kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and in accordance with that Corporations Instrument amounts in the directors' report and the financial statements are rounded off to the nearest [*dollar / thousand dollars / hundred thousand dollars / million dollars*], unless otherwise indicated.

ASIC-CI 2016/191 Where the Corporations Instrument is applied, certain amounts in the directors' report and financial report are required to be rounded to differing levels of precision (e.g. details of indemnities given and insurance premiums paid for officers or auditors, share-based payments, remuneration of auditors, compensation of key management personnel and certain related party information). It is important to ensure these amounts are shown using the correct level of precision and column headings and narrative information uses the correct level of rounding as required by the Corporations Instrument.

s.298(2) This directors' report is signed in accordance with a resolution of directors made pursuant to s.298(2) of the *Corporations Act 2001*.

On behalf of the Directors

s.300(2)

Transfer of information from the directors' report into another document forming part of the annual report

Information required by s.300 need not be included in the directors' report where such information is disclosed in the financial statements.

ASIC-CI 2016/188

Information required by s.298(1AA)(c), s.298(1AB)(b), s.298(1A), s.299 to s.300 (other than s.300(11B) and (11C)) and s.300B to the extent that these sections require certain information to be included in the directors' report (or in the financial report under s.300(2)) may be transferred to a document attached to the directors' report and financial report where a prominent cross reference to the pages containing the excluded information exists and certain conditions are satisfied. The information required by s.298(1A), s.299, s.299A and s.306(2) may not be transferred into the financial report.

Where information is transferred into the financial report it will be subject to audit.

Application to different types of entities

This model financial report is intended to illustrate the minimum information to be disclosed in the annual report of a **public company** (that is not a wholly owned subsidiary of another company) in order to satisfy the reporting requirements of the Corporations Act.

s.300(10)

The following disclosures are **only required** to be included in the directors' report if the (Tier 2) annual report is being prepared for a public company that is not a wholly owned subsidiary of another company:

s.300(10)(a)
s.300(10)(b)

- Each director's qualifications, experience and special responsibilities
- The number of meetings of the board of directors held during the year and each director's attendance at those meetings
- The number of meetings of each board committee held during the year and each director's attendance at those meetings
- The qualifications and experience of each person who is a company secretary of the company as at the end of the year.

s.300(10)(c)

s.300(10)(d)

These disclosures are illustrated in this publication.

Inclusion of additional information in the directors' report

s.1308(7)

Where the directors' report contains information in addition to that required by the Corporations Act, the information will be regarded as part of the directors' report for the purposes of s.1308 'False or misleading statements'.

The Board of Directors
Tier 2 Limited
167 Second Terrace
SYDNEY NSW 2000

14 October 2024

Dear Board Members

Auditor's Independence Declaration to Tier 2 Limited

s.298(1AA)(c), s.307C,
ASIC-CI 2016/188

In accordance with section 307C of the *Corporations Act 2001*, I am pleased to provide the following declaration of independence to the directors of Tier 2 Limited.

As lead audit partner for the audit of the financial report of Tier 2 Limited for the financial year ended 30 June 2024, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

Yours faithfully
DELOITTE TOUCHE TOHMATSU

T.L. Green
Partner
Chartered Accountants

Liability limited by a scheme approved under Professional Standards Legislation.
Member of Deloitte Asia Pacific Limited and the Deloitte organisation.

Source

s.307C(1), (3)

If an audit firm, audit company or individual auditor conducts an audit or review of the financial report for the financial year, the lead auditor must give the directors of the company, registered scheme, registrable superannuation entity or disclosing entity a written declaration that, to the best of the individual or lead auditor's knowledge and belief, there have been:

- No contraventions of the auditor independence requirements of the Corporations Act in relation to the audit or review
- No contraventions of any applicable code of professional conduct in relation to the audit or review.

Alternatively, if contraventions have occurred, the auditor is required to set out those contraventions in a written declaration that, and include a statement in the declaration that to the best of the individual or lead auditor's knowledge and belief, those contraventions are the only contraventions of:

- The auditor independence requirements of the Corporations Act in relation to the audit or review, or
- Any applicable code of professional conduct in relation to the audit or review.

s.307C(5)(a)

The auditor's independence declaration must be given when the audit report is given to the directors of the company, registered scheme, registrable superannuation entity or disclosing entity (other than when the conditions in s.307(5A) are satisfied – see below) and must be signed by the person making the declaration.

s.307C(5A)

A declaration under s.307C(1) or s.307C(3) in relation to a financial report for a financial year satisfies the conditions in subsection 307C if:

- The declaration is given to the directors of the company, registered scheme, registrable superannuation entity or disclosing entity before the directors pass a resolution under s.298(2) in relation to the directors' report for the financial year
- A director signs the directors' report within 7 days after the declaration is given to the directors
- The auditors' report on the financial report is made within 7 days after the directors' report is signed
- The auditors' report includes either of the following statements:
 - A statement to the effect that the declaration would be in the same terms if it had been given to the directors at the time that auditors' report was made
 - A statement to the effect that circumstances have changed since the declaration was given to the directors and setting out how the declaration would differ if it had been given to the directors at the time the auditor's report was made.

s.307C(5B)

An individual auditor or lead auditor is not required to give a declaration under s.307C(1) and s.307C(3) in respect of a contravention if:

- The contravention was a contravention by a person of s.324CE(2) or s.324CG(2) (strict liability contravention of specific independence requirements by individual auditor or audit firm), or s.324CF(2) (contravention of independence requirements by members of audit firms)
- The person does not commit an offence because of s.324CE(4), s.324CF(4) or s.324CG(4) (quality control system defence).

Independent auditor's report

Source

An independent auditor's report shall be prepared by the auditor in accordance with Australian Auditing Standards.

Duty to form an opinion

The auditor is required to form an opinion on the following:

s.307(a), s.308(1)

- Whether the financial report is in accordance with the Corporations Act, including:
 - Whether the financial report complies with Australian Accounting Standards
 - Whether the financial report gives a true and fair view of the financial performance and position of the entity (or consolidated entity)

s.307(aa)

- If the financial report includes additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance) – whether the inclusion of that additional information was necessary to give the true and fair view required by s.297

s.307(b)

- Whether the auditor has been given all information, explanations and assistance necessary for the conduct of the audit

s.307(c)

- Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept financial records sufficient to enable a financial report to be prepared and audited

s.307(d)

- Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept other records and registers as required by the Corporations Act.

s.308(3)(b)

The auditor is required to include in the audit report particulars of any deficiency, failure or shortcoming in respect of any matter referred to in s.307(b), (c) or (d) above (see 'Duty to report' below).

Qualified audit opinions

s.308(2)

Where, in the auditor's opinion, there has been a departure from a particular Australian Accounting Standard, the audit report must, to the extent that is practicable to do so, quantify the effect that non-compliance has on the financial report. If it is not practicable to quantify the effect fully, the report must say why.

Source

s.308(3)

Duty to report

The auditor's report must describe:

s.308(3)(a)

- Any defect or irregularity in the financial report

s.308(3)(b)

- Any deficiency, failure or shortcoming in respect of the matters referred to in s.307(b), (c) or (d), i.e.:

s.307(b)

- Whether the auditor has been given all information, explanations and assistance necessary for the conduct of the audit

s.307(c)

- Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept financial records sufficient to enable a financial report to be prepared and audited

s.307(d)

- Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept other records and registers as required by the Corporations Act.

s.308(3A)

The audit report must include any statements or disclosures required by the auditing standards.

s.308(3B)

If the financial report includes additional information under s.295(3)(c) (information included to give true and fair view of financial position and performance), the audit report must also include a statement of the auditor's opinion on whether the inclusion of that additional information was necessary to give the true and fair view required by s.297.

Duty to inform

s.311

The auditor must inform ASIC in writing if the auditor is aware of circumstances that:

- The auditor has reasonable grounds to suspect amount to a contravention of the Corporations Act, or
- Amount to an attempt, in relation to the audit, by any person to unduly influence, coerce, manipulate or mislead a person involved in the conduct of the audit, or
- Amount to an attempt, by any person, to otherwise interfere with the proper conduct of the audit.

s.311

The auditor is required to notify ASIC in writing of the circumstances of the matters outlined above as soon as practicable and in any case within 28 days, after the auditor becomes aware of those circumstances.

ASIC-RG 34

[ASIC Regulatory Guide 34](#) *Auditor's obligations: Reporting to ASIC* provides guidance on the procedures to be followed by registered company auditors in complying with s.311 of the *Corporations Act 2001*, including specific reference to evidence of a contravention, examples of contraventions and timing of notification.

Directors' declaration

Source

The directors declare that:

s.295(4)(c)

(a) in the directors' opinion, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable;

s.295(4)(d)

(b) in the directors' opinion, the attached financial statements and notes thereto are in accordance with the *Corporations Act 2001*, including compliance with accounting standards and giving a true and fair view of the financial position and performance of the consolidated entity; and

s.295(4)(da)

(c) in the directors' opinion, the attached consolidated entity disclosure statement is true and correct¹⁸.

Where the entity and its closely-held subsidiaries have entered into a deed of cross guarantee pursuant to *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785*, the following statements must be included in order to be compliant with the conditions of the Instrument:

ASIC-CI 2016/785,
s.6(w)

At the date of this declaration, the company is within the class of companies affected by *ASIC Corporations (Wholly owned Companies) Instrument 2016/785*. The nature of the deed of cross guarantee is such that each company which is party to the deed guarantees to each creditor payment in full of any debt in accordance with the deed of cross guarantee.

In the directors' opinion, there are reasonable grounds to believe that the company and the companies to which *ASIC Corporations (Wholly owned Companies) Instrument 2016/785* applies, as detailed in note 41 to the financial statements will, as a group, be able to meet any liabilities to which they are, or may become, subject because of the deed of cross guarantee.

s.295(5)

Signed in accordance with a resolution of the directors made pursuant to s.295(5) of the *Corporations Act 2001*.

On behalf of the directors

(Signature)

C.J. Chambers
Director

Sydney, 14 October 2024

AASB 1060:26

Alternative presentation available in certain circumstances

The entity may present a single statement of income and retained earnings in place of the statement of comprehensive income and statement of changes in equity if the only changes to equity during the periods for which financial statements are presented arise from:

- Profit or loss
- Payment of dividends
- Corrections of prior period errors
- Changes in accounting policy.

AASB 1060:27

If an entity has no items of other comprehensive income in any of the periods for which financial statements are presented, it may present only a statement of profit or loss or it may present a statement of comprehensive income in which the 'bottom line' is labelled 'profit or loss'

AASB 1060:50

A change from the single-statement approach to the two-statement approach, or vice versa, is a change in accounting policy to which AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* applies.

AASB 1060:30

An entity may use titles for the financial statements other than those used in AASB 1060 as long as they are not misleading.

AASB 1060:37

Current/non-current distinction

An entity presents current and non-current assets, and current and non-current liabilities, as separate classifications in its statement of financial position in accordance with paragraphs 38-41, except when a presentation based on liquidity provides information that is reliable and more relevant. When that exception applies, all assets and liabilities shall be presented in order of approximate liquidity (ascending or descending).

AASB 1060:38

An entity shall classify an asset as current when:

- It expects to realise the asset, or intends to sell or consume it, in the entity's normal operating cycle
- It holds the asset primarily for the purpose of trading
- It expects to realise the asset within twelve months after the reporting date, or
- The asset is cash or a cash equivalent, unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

AASB 1060:39

An entity shall classify all other assets as non-current. When the entity's normal operating cycle is not clearly identifiable, its duration is assumed to be twelve months.

AASB 1060:40

An entity shall classify a liability as current when:

- It expects to settle the liability in the entity's normal operating cycle
- It holds the liability primarily for the purpose of trading
- The liability is due to be settled within twelve months after the reporting date, or
- The entity does not have an unconditional right to defer settlement of the liability for at least twelve months after reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

AASB 1060:41

An entity shall classify all other liabilities as non-current.

Sequencing of items and format of items in the statement of financial position

AASB 1060:42

AASB 1060 does not prescribe the sequence or format in which items are to be presented. In addition:

- Line items are included when the size, nature or function of an item or aggregation of similar items is such that separate presentation is relevant to an understanding of the entity's financial position
- The descriptions used and the sequencing of items or aggregation of similar items may be amended according to the nature of the entity and its transactions, to provide information that is relevant to an understanding of the entity's financial position.

AASB 1060:43

The judgement on whether additional items are presented separately is based on an assessment of all of the following:

- The amounts, nature and liquidity of assets
- The function of assets within the entity
- The amounts, nature and timing of liabilities.

Additional sources: AASB 1060:73

AASB 1060:70, 73	The above illustrates the direct method of reporting cash flows from operating activities. Under the direct method, net cash flow from operating activities is presented by disclosing information about major classes of gross cash receipts and gross cash payments.
	Reporting cash flows on a net basis
AASB 1060:75, 76, 77	Cash flows arising from the following operating, investing or financing activities may be reported on a net basis: <ul style="list-style-type: none"> • Cash receipts and payments on behalf of customers when the cash flows reflect the activities of the customer rather than those of the entity (e.g. the acceptance and repayment of demand deposits with a bank, funds held for customers by an investment entity, and rents collected on behalf of, and paid over to, the owners of properties) • Cash receipts and payments for items in which the turnover is quick, the amounts are large, and the maturities are short (e.g. principal amounts relating to credit card customers, the purchase and sale of investments, and other short-term borrowings).
AASB 1060:78	Cash flows arising from each of the following activities of a financial institution may be reported on a net basis: <ul style="list-style-type: none"> • Cash receipts and payments for the acceptance and repayment of deposits with a fixed maturity date • The placement of deposits with and withdrawal of deposits from other financial institutions • Cash advances and loans made to customers and the repayment of those advances and loans.

Notes to the consolidated financial statements

Source

General requirements for the financial statements

AASB 1060:90

Scope

Notes contain information in addition to that presented in the statement of financial position, the statement of profit or loss and other comprehensive income (if presented), the statement of profit or loss and the statement of comprehensive income (if presented), the combined statement of income and retained earnings (if presented), the statement of changes in equity (if presented) and the statement of cash flows. Notes provide narrative descriptions or disaggregations of items presented in those statements and information about items that do not qualify for recognition in those statements.

AASB 1060:91

Structure

The notes:

- Present information about the basis of preparation of the financial statements and the specific accounting policies used
- Disclose the information required by AASB 1060
- Provide information that is not presented elsewhere in the financial statements but is relevant to an understanding of any of them.

AASB 1060:92

An entity, as far as practicable, presents the notes in a systematic manner. An entity cross references each item in the financial statements to any related information in the notes.

AASB 1060:94

An entity may present notes providing information about the basis of preparation of the financial statements and specific accounting policies as a separate section of the financial statements.

AASB 1060:93

Order

Examples of systematic ordering or grouping of the notes include:

- Giving prominence to the areas of its activities that the entity considers to be most relevant to an understanding of its financial performance and financial position, such as grouping together information about particular operating activities
- Grouping together information about items measured similarly such as assets measured at fair value
- Following the order of the line items in the statement(s) of profit or loss and other comprehensive income and the statement of financial position, such as:
 - Statement of compliance with Australian Accounting Standards – Simplified Disclosures
 - Material accounting policy information
 - Supporting information for items presented in the statements of financial position and in the statement(s) of profit or loss and other comprehensive income, and in the statements of changes in equity and of cash flows, in the order in which each statement and each line item is presented
 - Other disclosures, including: (1) contingent liabilities and unrecognised contractual commitments (2) non-financial disclosures.

Source

General requirements for the financial statements (continued)

Comparative information

AASB 1060:20

Except when AASB 1060 permits or requires otherwise, an entity discloses comparative information in respect of the previous comparable period for all amounts presented in the current period's financial statements. An entity includes comparative information for narrative and descriptive information when it is relevant to an understanding of the current period's financial statements.

Materiality

AASB 1060:23

AASB 1060 specifies information that is required to be included in the financial statements, which include the notes. An entity need not provide a specific disclosure if the information resulting from that disclosure is not material. This is the case even if AASB 1060 contains a list of specific requirements or describes them as minimum requirements.

Disclosures in separate financial statements

These financial statements illustrate the disclosures in consolidated financial statements rather than separate financial statements.

AASB 1060:105

When a parent, an investor in an associate or venturer with an interest in a joint venture prepares separate financial statements, those separate financial statements disclose:

- That the statements are separate financial statements
- A description of the methods used to account for the investments in subsidiaries, joint ventures and associates,

and identify the consolidated financial statements or other primary financial statements to which they relate.

Source

General requirements for the financial statements (continued)**Definitions and presentation requirements of other Australian Accounting Standards**

AASB 1060:2

Except to the extent specifically addressed in AASB 1060, the definitions and presentation requirements of other Australian Accounting Standards continue to apply. Entities are permitted to refer to other Standards for guidance on the requirements in AASB 1060, including:

- AASB 7 *Financial Instruments: Disclosures*
- AASB 12 *Disclosure of Interests in Other Entities*
- AASB 101 *Presentation of Financial Statements*
- AASB 107 *Statement of Cash Flows*
- AASB 124 *Related Party Disclosures*.

AASB 1060:IG1

In addition to the disclosure requirements of AASB 1060, entities applying Australian Accounting Standards – Simplified Disclosures are therefore required to comply with the presentation requirements and associated guidance of these Australian Accounting Standards²¹:

- AASB 5 *Non-current Assets Held for Sale and Discontinued Operations* – paragraphs 31, 32, 33A, 34, 36 and 37-40
- AASB 6 *Exploration for and Evaluation of Mineral Resources* – paragraphs 15-17
- AASB 15 *Revenue from Contracts with Customers* – paragraphs 105-109
- AASB 16 *Leases* – paragraphs 47-50 and 88
- AASB 112 *Income Taxes* – paragraphs 71-78
- AASB 119 *Employee Benefits* – paragraphs 131-134
- AASB 120 *Accounting for Government Grants and Disclosure of Government Assistance* – paragraphs 24-31
- AASB 132 *Financial Instruments: Presentation*
- AASB 1050 *Administered Items* – paragraphs 9-21 and 23-25
- AASB 1055 *Budgetary Reporting* - paragraph 9-15
- Interpretation 17 *Distributions of Non-current Assets to Owners* – paragraph 15.

In some cases, the presentation requirements outlined above refer to other requirements of Australian Accounting Standards that are not applicable in financial statements prepared in accordance with AASB 1060. For example, many of these presentation requirements refer to AASB 101 *Presentation of Financial Statements*, even though that Standard does not apply to entities applying Australian Accounting Standards – Simplified Disclosures.

In these cases, we believe that entities applying Australian Accounting Standards – Simplified Disclosures should instead refer to the equivalent requirements in AASB 1060, which the guidance in those other Standards referred to as guidance.

Presentation and disclosure requirements of AASB 1060 which are not required under Tier 1

AASB 1060:BC70

Presentation and disclosure requirements required by AASB 1060 that are not required under Tier 1 financial statements include:

AASB 1060:63(a)-(e)

- Disclosures where an entity has applied the option of not presenting a separate statement of changes in equity, but instead presented a statement of income and retained earnings

AASB 1060:173-175

- Information about the nature of termination benefits and other long-term benefits, the amount of the obligations and extent of funding.

²¹ See section *Initial adoption of AASB 17 Insurance Contracts (and related amending standards)* on page 64 for the application of AASB 17 *Insurance Contracts* by entities applying Tier 2 reporting requirements.

Source

General requirements for the financial statements (continued)**Accounting policy disclosures**

In these model financial statements the accounting policies have been presented as the last note to the financial statements. Entities may wish to present accounting policies earlier in the notes to the financial statements, or together with the relevant notes.

Accounting policy disclosure changes

Effective for annual reporting periods beginning on or after 1 January 2023 entities are required to disclose material accounting policy information (as opposed to significant accounting policies). Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

AASB 101 *Presentation of Financial Statements*²² notes the following areas as examples where an entity is likely to consider accounting policy information material to its financial statements if that information relates to material transactions, other events or conditions and:

Potentially material accounting policy information	Illustrative examples
The entity changed its accounting policy during the reporting period and this change resulted in a material change to the information in the financial statements	<ul style="list-style-type: none"> Application of a new or revised Australian Accounting Standards Applying an IFRIC agenda decision that changes the accounting policy previously adopted by the entity
The entity chose the accounting policy from one or more options permitted by Australian Accounting Standards	<ul style="list-style-type: none"> Measurement of property, plant and equipment at cost or on the revaluation basis Classification of investments in equity instruments as fair value through other comprehensive income
The accounting policy was developed in accordance with AASB 108 in the absence of an Australian Accounting Standard that specifically applies	<ul style="list-style-type: none"> Accounting for the R&D tax offset as either a government grant or income tax
The accounting policy relates to an area for which an entity is required to make significant judgements or assumptions in applying an accounting policy, and the entity discloses those judgements or assumptions	<ul style="list-style-type: none"> Allocation of the transaction price to performance obligations and when the entity recognises revenue in relation to complex revenue streams Treatment of uncertain tax positions

²² Although AASB 101 *Presentation of Financial Statements* does not apply directly to entities applying AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities*, paragraph 2 of AASB 1060 permits entities to refer to other standards for guidance on the requirements in AASB 1060. Therefore, the guidance in AASB 101 on disclosure of accounting policy information may be referred to by entities applying AASB 1060.

Source

General requirements for the financial statements (continued)**Accounting policy disclosures (continued)***Accounting policy disclosure changes (continued)***Potentially material accounting policy information****Illustrative examples**

The accounting required for the material transactions, other events or conditions is complex and users of the entity's financial statements would otherwise not understand those material transactions, other events or conditions

- Recognition and measurement of written puts over non-controlling interests
- Deferred tax consequences of investments in subsidiaries within tax-consolidated groups.

AASB Practice Statement 2 *Making Materiality Judgements* (which was amended in March 2021 by AASB 2021-2 *Amendments to Australian Accounting Standards – Disclosure of Accounting Policies and Definition of Accounting Estimates*) provides further non-mandatory guidance on determining whether accounting policy information is material. In part, the Practice Statement notes the following:

“Paragraph 117C of AASB 101 describes the type of material accounting policy information that users of financial statements find most useful. Users generally find information about the characteristics of an entity's transactions, other events or conditions—entity-specific information—more useful than disclosures that only include standardised information, or information that duplicates or summarises the requirements of the Australian Accounting Standards. Entity-specific accounting policy information is particularly useful when that information relates to an area for which an entity has exercised judgement—for example, when an entity applies an Australian Accounting Standard differently from similar entities in the same industry.”

AASB 101: 117A

Accounting policy information which relates to immaterial transactions, other events or conditions is immaterial and does not need to be disclosed. However, there may be accounting policy information which is considered material due to the nature of related transactions, other events or conditions even if the amounts are immaterial. Conversely, accounting policy information relating to material transactions, other events or conditions should not necessarily be considered material.

AASB 101: 117C

Accounting policy information which is entity-specific, focusing on how the entity has applied the requirements of Australian Accounting Standards to its own circumstances, is more useful to users of the financial statements than standardised information or information which duplicates or summarises the requirements of the relevant Australian Accounting Standards.

Removal of this 'boilerplate' information can substantially reduce the volume of disclosure in financial statements.

AASB 101: 117D

If an entity chooses to disclose immaterial accounting policy information, that information should not obscure material accounting policy information.

AASB 101: 117E

Further, if an entity concludes that accounting policy information is immaterial, that conclusion does not affect the related disclosure requirements of other Australian Accounting Standards.

Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity.

Source

General requirements for the financial statements (continued)

Accounting policy disclosures (continued)

Accounting policy disclosure changes (continued)

These model financial statements are provided for illustrative purposes, without an assessment of materiality. Therefore, for completeness, in these model financial statements accounting policies have been provided for some immaterial items, although this is not required under Australian Accounting Standards. The illustrative accounting policies disclosures in Note 46. *Accounting policies* should be tailored to be specific to the entity.

Source

1. General information

Basis of preparation

AASB 1060:91(a), 94

AASB 1060:11(a)

These general purpose financial statements have been prepared in accordance with the *Corporations Act 2001*, Australian Accounting Standards and other authoritative pronouncements issued by the Australian Accounting Standards Board (AASB), and comply with other requirements of the law.

AASB 1060:31(b)

AASB 1060:11(b)

The financial statements comprise the consolidated financial statements of Tier 2 Limited (the Company) and the entities it controls (together the Group). For the purposes of preparing the consolidated financial statements, the Company is a for-profit entity.

AASB 1060:31(d)

AASB 1060:181

The presentation currency used in these financial statements is Australian dollars (\$). Amounts in these financial statements are stated in Australian dollars unless otherwise noted.

AASB 1060:181

An entity discloses the currency in which the financial statements are presented. When the presentation currency is different from the functional currency, an entity states that fact and discloses the functional currency and the reason for a different presentation currency.

AASB 1060:182

When there is a change in the functional currency of either the reporting entity or a significant foreign operation, the entity discloses that fact and the reason for the change in functional currency.

AASB 1060:179

References to 'functional currency' in the paragraphs above apply, in the case of a group, to the functional currency of the parent.

AASB 1060:183

An entity to which AASB 129 *Financial Reporting in Hyperinflationary Economies* applies discloses the following:

- The fact that the financial statements and other prior period data have been restated for changes in the general purchasing power of the functional currency
- The identity and level of the price index at the reporting date and changes during the current reporting period and the previous reporting period
- The amount of gain or loss on monetary items.

AASB 1060:184

An entity applying AASB 129 also discloses whether the financial statements are based on a historical cost approach or a current cost approach.

Statement of compliance

AASB 1060:9

The Company does not have 'public accountability' as defined in AASB 1053 *Application of Tiers of Australian Accounting Standards* and is therefore eligible to apply the 'Tier 2' reporting framework under Australian Accounting Standards.

AASB 1060:10

The financial statements comply with the recognition and measurement requirements of Australian Accounting Standards, the presentation requirements in those Standards as modified by AASB 1060 *General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities* (AASB 1060) and the disclosure requirements in AASB 1060. Accordingly, the financial statements comply with Australian Accounting Standards – Simplified Disclosures.

1. General information (continued)

Rounding off of amounts

ASIC-CI 2016/191,
Clause 5(f)

If the company is of the kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and consequently the amounts in the directors' report and the financial report are rounded, that fact must be disclosed in the relevant eligible report.

Where the conditions of the Corporations Instrument are met, entities may round to the nearest dollar, nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars, depending upon the total assets of the entity.

ASIC-CI 2016/191,
Clause 5(v)
AASB 1060:31(e)

The company is a company of the kind referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* and in accordance with that Corporations Instrument amounts in this directors' report are rounded off to the nearest [*dollar / thousand dollars/ hundred thousand dollars / million dollars*], unless otherwise indicated.

ASIC-CI 2016/191,
Clause 4, 5(g)

Where the Corporations Instrument is applied, certain amounts are required to be rounded to differing levels of precision. It is important to ensure these amounts are shown using the correct level of precision and column headings and narrative information uses the correct level of rounding as required by the Corporations Instrument. The relevant eligible report must clearly disclose on each page where amounts have been rounded and the extent to which those amounts have been rounded.

Not-for-profit private sector entities and public sector entities should only refer to the ASIC Corporations Instrument when they are preparing financial statements under the Corporations Act.

Information about the Company

AASB 1060:31(a)

Tier 2 Limited is a public company incorporated in Australia under the *Corporations Act 2001*.

AASB 1060:31(a)

[*The Company changed its name from ____ Limited on ____*].

AASB 1060:32(a)

The addresses of its registered office and principal place of business are as follows:

Registered office

167 Admin Ave
SYDNEY NSW 2000
Tel: (02) 9332 5000

AASB 1060:32(b)

The nature of the Group's operations and its principal activities are [*describe*].

Source

1. General information (continued)

Going concern basis

AASB 1060:14

When preparing financial statements, the management of an entity makes an assessment of the entity's ability to continue as a going concern. An entity is a going concern unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so. In assessing whether the going concern basis is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the reporting date.

AASB 1060:15

When management is aware, in making its assessment, of material uncertainties related to events or conditions that cast significant doubt upon the entity's ability to continue as a going concern, the entity discloses those uncertainties.

AASB 1060:15

When an entity does not prepare financial statements on a going concern basis, it discloses that fact, together with the basis on which it prepared the financial statements and the reason why the entity is not regarded as a going concern.

Source

2. Changes in accounting policies and changes in estimates

AASB 1060:106

Changes in accounting policies on initial application of Accounting Standards

When an amendment to an Australian Accounting Standard has an effect on the current period or any prior period, or might have an effect on future periods, an entity discloses the following

- The nature of the change in accounting policy
- For the current period and each prior period presented, to the extent practicable, the amount of the adjustment for each financial statement line item affected
- The amount of the adjustment relating to periods before those presented, to the extent practicable
- An explanation if it is impracticable to determine the amounts to be disclosed.

Financial statements of subsequent periods need not repeat these disclosures.

The above information would usually be disclosed in the accounting policy note of the relevant item and the relevant note for the item, or in a change in accounting policy note.

AASB 1060:107

Where an entity has selected a transition option under another Standard and there are specific transition disclosure requirements in that Standard, the entity applies the full transition disclosure requirements in that Standard instead of the above requirements.

Example wording where the adoption of new pronouncements is not material

The disclosures in this section are only required where the impact of adopting new Standards and amendments thereof and Interpretations has a material on the financial statements. Where the Group/entity has adopted new Standards and amendments thereof and Interpretations but they do not have a material impact on the financial statements below is example wording that can be included in the financial statements.

The Group has adopted all new and revised Standards and amendments thereof and Interpretations effective for the current year that are relevant to the Group. None have a material impact on the Group's consolidated financial statements.

Source

2. Changes in accounting policies and changes in estimates (continued)

Changes in accounting policies on initial application of Accounting Standards (continued)

AASB 1060:106

The Group has adopted all the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are relevant to its operations and effective for an accounting period that begins on or after 1 July 2023.

Set out below are the new and revised Standards and amendments thereof [*and Interpretations*] effective for the current year that are relevant to the Group²³:

Pronouncement	Impact
AASB 2021-2 <i>Amendments to Australian Accounting Standards – Disclosure of Accounting Policies and Definition of Accounting Estimates</i>	Requires the disclosure of material accounting policy information and clarifies how entities should distinguish changes in accounting policies and changes in accounting estimates.
AASB 2021-6 <i>Amendments to Australian Accounting Standards – Disclosure of Accounting Policies: Tier 2 and Other Australian Accounting Standards</i>	The application of the amendments did not have a material impact on the Group's consolidated financial statements but has changed the disclosure of accounting policy information in the financial statements.
AASB 2021-5 <i>Amendments to Australian Accounting Standards – Deferred Tax related to Assets and Liabilities arising from a Single Transaction</i> ²⁴	Clarifies that deferred taxes must be recognised where, on initial recognition of an asset or liability, the transaction gives rise to equal taxable and deductible temporary differences. The Group has recognised an increase of \$__ million in deferred tax liabilities for right-of-use assets and an increase of \$__ million in deferred tax assets for lease liabilities as at 30 June 2023. The previously recognised net deferred tax [<i>liability/asset</i>] of \$__ million was derecognised. In accordance with the transition provisions, similar adjustments were made at 1 July 2022 in respect of right-of-use assets and lease liabilities. There was no impact on the statement of financial position, statement of cash flows or profit or loss in the current or preceding period.

²³ AASB 2020-6, although itself effective for annual reporting periods beginning on or after 1 January 2022 (the original effective date of AASB 2020-1 *Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-current*), defers the effective date of AASB 2020-1 to annual reporting periods beginning on or after 1 January 2023. AASB 2022-6 however, subsequently defers the effective date of AASB 2020-1 to annual reporting periods beginning on or after 1 January 2024 and defers the effective date of AASB 2020-6 (i.e. paragraph 139U of AASB 101) with immediate effect on issue of AASB 2022-6 in December 2022 (in other words, to require the amendments in AASB 2020-1 and AASB 2022-6 to be applied at the same time and to give effect to the deferral of the effective date of all amendments to annual reporting periods beginning on or after 1 January 2024). Therefore AASB 2020-6 and AASB 2020-1 are not included in the list (as effective for the current reporting period ending 30 June 2024).

²⁴ This example disclosure assumes that the entity currently recognises deferred taxes arising from leases, decommissioning obligations and similar items on the basis of the transaction as a whole. Where the entity currently adopts different accounting treatment for these items, the wording should be amended and tailored as necessary. This example also illustrates the disclosures about the adjustments made in respect of right-of-use assets and lease liabilities. Similar disclosure should also be included where the entity has decommissioning, restoration and similar liabilities with a corresponding amount recognised as part of the cost of the asset.

Source

2. Changes in accounting policies and changes in estimates (continued)

Changes in accounting policies on initial application of Accounting Standards (continued)

Pronouncement	Impact
AASB 2023-2 <i>Amendments to Australian Accounting Standards – International Tax Reform – Pillar Two Model Rules</i> (paragraph 4A)	Prohibits the recognition and disclosure of deferred taxes arising from OECD Pillar Two income taxes and requires certain disclosures related to those taxes.
AASB 2023-4 <i>Amendments to Australian Accounting Standards – International Tax Reform – Pillar Two Model Rules: Tier 2 Disclosures</i> ²⁵	<p>The Group has applied the mandatory exception to the recognition and disclosure of deferred taxes arising from OECD Pillar Two income taxes. The Group will disclose information that helps users of financial statements understand the entity's exposure to Pillar Two income taxes arising from Pillar Two legislation that is substantively enacted in any jurisdiction in which the entity operates. As at 30 June 2024, substantive enactment has not occurred in any of those jurisdictions.</p> <p>Furthermore, the entity will separately disclose the amount of current tax arising from Pillar Two taxes in periods where the Pillar Two legislation is operative.</p>

Pronouncements effective in the current period for not-for-profit and public sector entities

Pronouncement	Impact
AASB 2022-8 <i>Amendments to Australian Accounting Standards – Insurance Contracts: Consequential Amendments</i>	<p>Amends a number of Standards to permit public sector entities to continue applying AASB 4 <i>Insurance Contracts</i> and AASB 1023 <i>General Insurance Contracts</i> to annual periods beginning on or after 1 January 2023 but before 1 July 2026. It also repeals AASB 1038 <i>Life Insurance Contracts</i> and supersedes Interpretation 1047 <i>Professional Indemnity Claims Liabilities in Medical Defence Organisations</i> for annual periods beginning on or after 1 January 2023, on the basis that AASB 17 applies to those periods in respect of private sector entities and the pronouncements are not relevant to public sector entities.</p> <p>The application of the amendments did not have a material impact on the Group's consolidated financial statements.</p>

²⁵ AASB 2023-4 is effective for annual periods beginning on or after 1 January 2023 that end on or after 30 September 2023, with earlier application permitted. Therefore effective for the first time for annual reporting periods ending 30 June 2024.

Source

2. Changes in accounting policies and changes in estimates (continued)

Changes in accounting policies on initial application of Accounting Standards (continued)

The below mandatorily effective standards for the current year have not been included in the illustrative disclosures above as they are not relevant, or are not material, to the Group. Although not relevant to the Group illustrative disclosures for not-for-profit and public sector entities are included above.

- AASB 17 *Insurance Contracts* (as amended)²⁶
- AASB 1056 *Superannuation Entities*
- AASB 2022-7 *Editorial Corrections to Australian Accounting Standards and Repeal of Superseded and Redundant Standards*.

AASB 1060: BC88

Initial adoption of AASB 17 Insurance Contracts (and related amending standards)

The AASB [Board] decided not to address AASB 4 *Insurance Contracts*, AASB 17 *Insurance Contracts*, AASB 1023 *General Insurance Contracts*, AASB 1038 *Life Insurance Contracts* and AASB 1056 *Superannuation Entities* in AASB 1060 as the majority of the entities applying these Standards would have public accountability by holding assets in a fiduciary capacity.

AASB 1060: BC88

The Board acknowledged that AASB 4 and AASB 17 would also be applicable to entities such as 'captive insurers' which may not be publicly accountable and hence would be eligible to apply this Standard [*i.e.* AASB 1060]. These entities will have to provide the full disclosures of AASB 4 or AASB 17, as the disclosures in these standards have not been replaced by AASB 1060. However, the Board was of the view that 'captive insurers' deal only with insurance contracts within their own group and as a result are likely to have relatively simple insurance arrangements. They would therefore not be unduly impacted by the full disclosure requirements under these Standards.

Illustrative disclosures for entities applying AASB 17 are available in [Deloitte's publication](#) *Illustrative disclosures for insurers applying IFRS 17*.

²⁶ Relevant amendments include AASB 2020-5 *Amendments to Australian Accounting Standards – Insurance Contracts*, AASB 2021-7 *Amendments to Australian Accounting Standards – Effective Date of Amendments to AASB 10 and AASB 128 and Editorial Corrections* (insofar as the Standard relates to editorial corrections that are effective for the current year), AASB 2022-1 *Amendments to Australian Accounting Standards – Initial Application of AASB 17 and AASB 9 – Comparative Information* and AASB 2022-8 *Amendments to Australian Accounting Standards – Insurance Contracts: Consequential Amendments*. The editorial corrections in AASB 2021-7 that apply to annual reporting periods beginning on or after 1 January 2023 relate to AASB 17 *Insurance Contracts*. Therefore, this Standard should only be included where AASB 17 is applicable to the entity.

2. Changes in accounting policies and changes in estimates (continued)

Changes in accounting policies on initial application of Accounting Standards (continued)

International Tax Reform – Pillar Two Model Rules

AASB 112:4A

AASB 2023-2 *Amendments to Australian Accounting Standards – International Tax Reform – Pillar Two Model Rules* amends the scope of AASB 112 *Income Taxes* to clarify that the Standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two model rules published by the OECD, including tax law that implements qualified domestic minimum top-up taxes described in those rules.

The amendments introduce a temporary exception to the accounting requirements for deferred taxes in AASB 112, so that an entity would neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes.

AASB 1060:178A,
178B

Following the amendments in AASB 2023-2, the AASB issued AASB 2023-4 *Amendments to Australian Accounting Standards – International Tax Reform – Pillar Two Model Rules: Tier 2 Disclosures* in September 2023 which require an entity to disclose that it has applied the exception and disclose separately its current tax expense (income) related to Pillar Two income taxes.

AASB 1060:176

Further, in periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect (in any jurisdiction in which an entity operates), an entity is required to disclose information that helps users of financial statements understand the entity's exposure to Pillar Two income taxes arising from that legislation. (See note 7. *Income tax*).

Entities may choose to provide any known or reasonably estimable information about the entity's exposure to Pillar Two taxes if it is available even if legislation has not yet been enacted or substantively enacted but not yet in effect.

For more information and illustrative disclosures see our [Clarity publication](#) *Responding to Pillar Two*.

Voluntary changes in accounting policies

AASB 1060:108

When a voluntary change in accounting policy has an effect on the current period or any prior period, an entity shall disclose:

- The nature of the change in accounting policy
- The reasons why applying the new accounting policy provides reliable and more relevant information
- To the extent practicable, the amount of the adjustment for each financial statement line item affected, shown separately:
 - For the current period
 - For each prior year presented
 - In the aggregate for periods before those presented
- An explanation if it is impracticable to determine the amounts to be disclosed.

Financial statements of subsequent periods need not repeat these disclosures.

Source

2. Changes in accounting policies and changes in estimates (continued)

Disclosure of a change in estimate

AASB 1060:109

An entity discloses the nature of any change in an accounting estimate and the effect of the change on assets, liabilities, income and expense for the current period. If it is practicable for the entity to estimate the effect of the change in one or more future periods, the entity discloses those estimates.

Disclosure of prior period errors

AASB 1060:110

An entity shall disclose the following about prior period errors:

- (a) The nature of the prior period error
 - (b) For each prior period presented, to the extent practicable, the amount of the correction for each financial statement line item affected
 - (c) To the extent practicable, the amount of the correction at the beginning of the earliest prior period presented
 - (d) An explanation if it is not practicable to determine the amounts to be disclosed in (b) or (c).
- Financial statements of subsequent periods need not repeat these disclosures.

Early adoption of Accounting Standards

The following disclosure is recommended where an Accounting Standard has been adopted early:

s.334(5)

'The directors have elected under s.334(5) of the *Corporations Act 2001* to apply Accounting Standard AASB XX [title] for this financial year, even though the Standard is not required to be applied until annual reporting periods beginning on or after [date].'

Source

3. Judgements and key sources of estimation uncertainty

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity. Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant note, or as part of the relevant accounting policy disclosures.

In the application of the Group's accounting policies, which are described in Note 46, the directors of the Group are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

AASB 1060:96

Judgements made in applying accounting policies

The following are the critical judgements, apart from those involving estimations (which are presented separately below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Revenue recognition

Expenditure was required during the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of [month] to [month] 2024, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2026. In the light of the problems identified, management was required to consider whether it was appropriate to recognise the revenue from these transactions of \$__ in the current year, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue set out in AASB 15 *Revenue from Contracts with Customers* and, in particular, whether the Group had transferred control of the goods to the customer. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that control has been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate provision for the rectification costs.

Revenue recognition

To determine if a grant contract should be accounted for under AASB 1058 or AASB 15, the Group has to determine if the contract is 'enforceable' and contains 'sufficiently specific' performance obligations. When assessing if the performance obligations are 'sufficiently specific', the Group has applied significant judgement in this regard by performing a detailed analysis of the terms and conditions contained in the grant contracts, review of accompanying documentation (e.g. activity work plans) and holding discussions with relevant parties.

Income recognition from grants received by the Group has been appropriately accounted for under AASB 1058 or AASB 15 based on the assessment performed.

[Expand as necessary to highlight any specific areas that were assessed and the judgements made]

Source

3. Judgements and key sources of estimation uncertainty (continued)

Judgements made in applying accounting policies (continued)

Business model assessment

Classification and measurement of financial assets depends on the results of the 'solely payments of principal and interest' (SPPI) and the business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the periods presented.

Significant increase in credit risk

As explained in Note 46, expected credit losses (ECLs) are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. AASB 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Group takes into account qualitative and quantitative reasonable and supportable forward-looking information.

Deferred taxation on investment properties

For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted.

Control over Subtwo Limited

AASB 1060:104(b)

Subtwo Limited has been identified as a subsidiary of the Group even though the Group has only a 45 % ownership interest and has only 45 % of the voting rights in Subtwo Limited. Subtwo Limited is listed on the ASX Limited. The Group has held its 45 % ownership since June 2021 and the remaining 55 % of the ownership interests are held by thousands of shareholders that are unrelated to the Group.

The directors of the Company assessed whether or not the Group has control over Subtwo Limited based on whether the Group has the practical ability to direct the relevant activities of Subtwo Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in Subtwo Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of Subtwo Limited and therefore the Group has control over Subtwo Limited.

If the directors had concluded that the 45 % ownership interest was insufficient to give the Group control, Subtwo Limited would instead have been classified as an associate and the Group would have accounted for it using the equity method of accounting.

Source

AASB 1060:97

3. Judgements and key sources of estimation uncertainty (continued)

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below or elsewhere in the financial statements:

Taxation provisions

The Group's current tax provision of \$ ___ relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with *[insert name of relevant Tax Authority]*. Uncertain tax items for which a provision of \$ ___ is made, relate principally to the interpretation of tax legislation regarding arrangements entered into by the Group. Due to the uncertainty associated with such tax items, there is a possibility that, on conclusion of open tax matters at a future date, the final outcome may differ significantly. Whilst a range of outcomes is reasonably possible, the extent of the reasonably possible range is from additional liabilities of up to \$ ___ to a reduction in liabilities of up to \$ ___.

Impairment testing

Following the assessment of the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets', to which goodwill of \$ ___ is allocated, the directors consider the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets' to be most sensitive to the achievement of the 2025 budget. Budgets comprise forecasts of revenue, staff costs and overheads based on current and anticipated market conditions that have been considered and approved by the Board. Whilst the Group is able to manage most of 'Leisure goods – retail outlets' costs, the revenue projections are inherently uncertain due to the short-term nature of the business and unstable market conditions. Revenue of the CGU is most sensitive to changes in the sector's demand for sales in retail outlets, reflecting the increased use of internet sales by rivals, a service which the Group does not currently offer.

The market for 'Leisure goods – retail outlets' products has seen a significant slowdown over the past 18 months due to a decline in the customer appetite for retail sales and increases in internet sales of rivals in the sector. It is possible that further underperformance may occur in 2025 if prevailing trends continue.

Calculation of loss allowance

When measuring ECL the Group uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

If the ECL rates on trade receivables between 61 and 90 days past due had been ___% higher (lower) as at the end of the financial year, the loss allowance on trade receivables would have been \$___ (2023: \$___) higher (lower).

Source

3. Judgements and key sources of estimation uncertainty (continued)

Key sources of estimation uncertainty (continued)

Calculation of loss allowance (continued)

If the ECL rates on trade receivables between 31 and 60 days past due had been ___% higher (lower) as at the end of the financial year, the loss allowance on trade receivables would have been \$ ___ (2023: \$ ___) higher (lower).

Fair value measurements and valuation processes

Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The board of directors of the Company has set up a valuation committee, which is headed up by the Chief Financial Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The valuation committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Financial Officer reports the valuation committee's findings to the board of directors of the Company every quarter to explain the cause of fluctuations in the fair value of the assets and liabilities.

The valuations of private equity investments, contingent consideration in business combinations and non-derivative financial assets held for trading are particularly sensitive to changes in one or more unobservable inputs which are considered reasonably possible within the next financial year.

Provision for restoration of contaminated land

During June 2024, new legislation in [A Land] was enacted which resulted in the requirement for the Group to clean up historically contaminated waste sites in [A Land] and bear the costs thereof. Consequently, a provision of \$ ___ has been recognised. In estimating the provision, the directors have made assumptions regarding the interpretation of the legislation and have estimated costs based on currently available information about the likely extent of contamination and potential clean-up techniques. Due to the associated uncertainty, it is possible that estimates may need to be revised during the next year as interpretations of the legislation evolve and the extent of contamination and potential approaches to clean-up are assessed in more detail. Whilst a range of outcomes is possible, the directors believe that the reasonably possible range is an increase in provisions of up to \$ ___ to a reduction in provisions of up to \$ ___.

Source

3. Judgements and key sources of estimation uncertainty (continued)

Key sources of estimation uncertainty (continued)

Assessment as to whether the right-of-use assets are impaired

In January 2018 [*Subone Limited*], a subsidiary of the Group, entered into a 10-year lease for an office building located in [*location*]. Following the acquisition of [*Subseven Limited*] on [*date*] 2024 and the subsequent restructuring programme, the Group identified that the office space occupied by [*Subtwo Limited*], which is also located in [*location*], could accommodate all of the staff of [*Subone Limited*], and took the decision to relocate staff to a single office. The leased property previously occupied by [*Subone Limited*], has been marketed with a local estate agent and is expected to be sub-leased by the firm for the remainder of the lease term.

The directors have estimated that the entirety of the lease payment will be recoverable through the sub-lease of the property. This reflects the current achievable market rates for similar properties with similar lease terms and therefore no impairment has been recognised. The carrying amount of right-of-use asset in respect of the property is \$ ____ at 30 June 2024 (2023: \$ ____).

In estimating the recoverable amount of the right-of-use asset, the directors have made assumptions about the achievable market rates for similar properties with similar lease terms. Due to the associated uncertainty, it is possible that the estimates of the amount of lease payment that will be recovered through the sub-lease of the property may need to be revised during the next year. Achieving a sub-lease for only 95 per cent of the lease payment is considered reasonably possible based on recent experience in the market and would lead to an impairment charge of \$ ____ against the right-of-use asset in respect of the property.

Source

4. Revenue (continued)**Information about revenue sources (continued)****Sale of leisure goods (continued)**

AASB 1060:157(a)

The Group sells sport shoes, sport equipment and outdoor play equipment both to the wholesale market and directly to customers through its own retail outlets. Sales-related warranties associated with leisure goods cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Group accounts for warranties in accordance with AASB 137 *Provisions, Contingent Liabilities and Contingent Assets*.

For sales of leisure goods to the wholesale market, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the wholesaler's specific location (delivery). Following delivery, the wholesaler has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when on-selling the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the Group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.

For sales of goods to retail customers, revenue is recognised when control of the goods has transferred, being at the point the customer purchases the goods at the retail outlet. Payment of the transaction price is due immediately at the point the customer purchases the goods.

Under the Group's standard contract terms, customers have a right of return within 30 days. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. At the same time, the Group has a right to recover the product when customers exercise their right of return so consequently recognises a right to returned goods asset and a corresponding adjustment to cost of sales.

Sale of electronic equipment

AASB 1060:157(a)

The Group sells electronic equipment to the wholesale market and directly to customers both through its own retail outlets and through internet sales.

For sales of electronic equipment to the wholesale market and through retail outlets and internet sales, revenue is recognised by the Group at a point in time in line with the policy outlined above for the sale of leisure goods. For sales to retail customers (from both retail outlet and internet sales) there exists the same 30-day right of return and accordingly a refund liability and a right to returned goods asset are recognised in relation to electronic equipment expected to be returned.

For internet sales, revenue is recognised when control of the goods has transferred to the customer, being at the point the goods are delivered to the customer. Delivery occurs when the goods have been shipped to the customer's specific location. When the customer initially purchases the goods online the transaction price received by the Group is recognised as a contract liability until the goods have been delivered to the customer.

'Maxi-Points' customer loyalty programme

AASB 1060:157(a)

The Group operates a 'Maxi-Points' loyalty programme through which retail customers accumulate points on purchases of leisure goods and electronic equipment that entitle them to discounts on future purchases. These points provide a discount to customers that they would not receive without purchasing the leisure goods or electronic equipment (i.e. a material right). The promise to provide the discount to the customer is therefore a separate performance obligation.

Revenue from the loyalty points is recognised when the points are redeemed by the customer. Revenue for points that are not expected to be redeemed is recognised in proportion to the pattern of rights exercised by customers.

Source

4. Revenue (continued)**Information about revenue sources (continued)****Maintenance relating to electronic equipment**

AASB 1060:157(a)
AASB 1060:158

Included in the transaction price for the sale of electronic equipment is an after-sales service. This service relates to maintenance work that may be required to be carried out on the equipment for a three-year period after sale. This period can then be extended if the customer requires additional years of maintenance services. The renewal of services after the three-year period will be for the price at which these are sold by the Group to all of its customers as at the date of renewal regardless of the existence of a renewal option. Consequently, the option to extend the renewal period does not provide customers with any advantage when they enter into the initial contract and therefore no revenue has been deferred relating to this renewal option.

The maintenance service is considered to be a distinct service as it is both regularly supplied by the Group to other customers on a stand-alone basis and is available for customers from other providers in the market. Discounts are not considered as they are only given in rare circumstances and are never material.

Revenue relating to the maintenance services is recognised over time. The transaction price allocated to these services is recognised as a contract liability at the time of the initial sales transaction and is released on a straight-line basis over the period of service (i.e. three years when the services are purchased together with the underlying equipment).

Installation of software services

AASB 1060:157(a)
AASB 1060:158

The Group provides a service of installation of various software products for specialised business operations. Such services are recognised as a performance obligation satisfied over time. Revenue is recognised for these installation services based on the stage of completion of the contract. The directors have assessed that the stage of completion determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period is an appropriate measure of progress towards complete satisfaction of these performance obligations under AASB 15 *Revenue from Contracts with Customers*.

Payment for installation of software services is not due from the customer until the installation services are complete and therefore a contract asset is recognised over the period in which the installation services are performed representing the entity's right to consideration for the services performed to date.

Construction of residential properties

AASB 1060:157(a)
AASB 1060:158

The Group constructs and sells residential properties under long-term contracts with customers. Such contracts are entered into before construction of the residential properties begins. Under the terms of the contracts, the Group is contractually restricted from redirecting the properties to another customer and has an enforceable right to payment for work done. Revenue from construction of residential properties is therefore recognised over time on a cost-to-cost method, i.e. based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs.

The Group becomes entitled to invoice customers for construction of residential properties based on achieving a series of performance-related milestones. When a particular milestone is reached the customer is sent a relevant statement of work signed by a third party assessor and an invoice for the related milestone payment.

Source

4. Revenue (not-for-profit entities)

	30/06/2024 \$'000	30/06/2023 \$'000
AASB 1060:229 Government grant		
AASB 1060:229 Donations and bequests		
AASB 1060:229 Capital grants		
Total		

Capital grants

The entity has recognised the following liabilities arising from capital grants received to construct an asset to be controlled by the entity:

	30/06/2024 \$'000	30/06/2023 \$'000
AASB 1060:233 Included in contract liabilities from contracts with customers are capital grants received as follows:		
Balance as at 1 July		
Additional grants received during the year		
Revenue recognised in profit or loss		
Refunds during the year		
Balance as at 30 June		

As the capital grants received by the Group are primarily for the construction of buildings, the Group recognises income as the buildings are constructed (as it satisfies its obligation).

Revenue recognition

AASB 1058.8-10 The Group recognises income from its main revenue/income streams, as listed below:

- Government grants
- Donations and bequests
- Capital grants.

AASB 1058.15-17 **Capital grants - Buildings**

For capital grants received under an enforceable agreement where it includes a transfer to enable the Group to acquire or construct a recognisable non-financial asset to identified specifications which will be controlled by the Group when completed, the Group recognises a liability for the excess of the fair value of the transfer over any related amounts recognised and recognises income as it satisfies its obligations under the transfer.

As the capital grants received by the Group are primarily for the construction of buildings, the Group recognises income as the buildings are constructed (when it satisfies its obligations).

Source

4. Revenue (not-for-profit entities) (continued)

Unrecognised revenue

Volunteer services (not-for-profit private sector entities only)

The Group regularly receives volunteer services as part of its operations. Under AASB 1058, private sector not-for-profit entities have a policy option to account for donated services at fair value if the fair value can be reliably measured.

While the Group has assessed that the fair value of its volunteer services can be reliably measured, it has decided to adopt the policy option not to recognise volunteer services. Accordingly, no amounts are recognised in the financial statements for volunteer services.

Donated inventories

As part of its operations, the Group receives donations of goods which may then be used in its activities. AASB 102 *Inventories* requires the donated inventories to be measured at current replacement cost and any related amounts to be accounted for under AASB 1058.

The Group has decided to make use of the practical expedient under AASB 102 *Inventories* and apply the materiality assessment at the individual item level (instead of the portfolio level) when recognising donated inventories. Based on an assessment, the Group has noted that it only receives individually immaterial donations of inventory and accordingly will not be required to recognise such donated inventories. Accordingly, no amounts are recognised in the financial statements for donated inventories.

7. Income tax (continued)

Income tax recognised outside of profit or loss

	30/06/2024 \$'000	30/06/2023 \$'000
Aggregate current and deferred tax related to:		
AASB 1060:178(a) - Items that are recognised in other comprehensive income		
AASB 1060:178(b) - Items charged or credited directly to equity		

Pillar Two top up taxes

AASB 112:4A
AASB 1060:178A

The Group is within the scope of the Pillar Two top up tax that has been substantively enacted in *[specify jurisdictions in which the entity operates where legislation has been substantively enacted]* for income years beginning on or after 1 January 2024. The first period for which a Pillar Two return will be required is the income year ending on 30 June 2025. The Group has applied the mandatory exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.

AASB 112:176

The Group has performed the necessary analysis in preparation for complying with the Pillar Two model rules for the income year ending on 30 June 2025. Based on the analysis derived from information in respect of the financial year ended 30 June 2024, the Group does not expect any potential exposure to Pillar Two top up taxes.

The illustrative disclosure directly above assumes that the Group has no exposure to Pillar Two at 30 June 2024. Entities would need to provide disclosures based on their specific facts and circumstances.

For more information and illustrative disclosures see our [Clarity publication](#) *Responding to Pillar Two*.

Finance lease receivables		
AASB 1060:147(d) Less: Accumulated allowance for uncollectable minimum lease payments receivable		
Current (recoverable within 12 months)		
Non-current (recoverable after 12 months)		

Description of the Group's finance lease arrangements

AASB 1060:147(f) The Group enters into finance lease arrangements as a lessor for certain store equipment to its retailers. The equipment is necessary for the presentation and testing of footwear and equipment manufactured by the Group. The average term of finance leases entered into is ___ years. Generally, these lease contracts do not include extension or early termination options. Variable lease payments arise in relation to a usage charge for each test undertaken by the lessee using the leased equipment.

AASB 1060:147(c) Residual value risk on the equipment under the lease is not significant, because of the existence of a secondary market with respect to the equipment.

AASB 1060:147(e) During the year, income of \$ ___ (2023: \$ ___) was recognised in relation to variable lease payments which were not included in the measurement of the net investment in the lease.

AASB 1060:147(a) Amounts receivable under finance leases

	Investment in the lease		Minimum lease payments	
	30/06/2024 \$'000	30/06/2023 \$'000	30/06/2024 \$'000	30/06/2023 \$'000

11. Other financial assets (continued)**Financial assets measured at fair value**

AASB 1060:115

Some of the Group's financial assets are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets are determined :

Financial asset	Valuation techniques and key inputs
Shares	Quoted bid prices in an active market.
Foreign currency forward contracts and interest rate swaps	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.
Commodity options	Black-Scholes model. The following variables were taken into consideration: current underlying price of the commodity, options strike price, time until expiration (expressed as a percent of a year), implied volatility of the commodity and the relevant risk-free rate (RFR).
Redeemable notes	Discounted cash flow at a discount rate of ___ % (2023: ___ %) that reflects the current market rate at the end of the reporting period.
Investment in unlisted shares	Income approach – in this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees. Significant unobservable inputs include: <ul style="list-style-type: none"> • Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from ___ % to ___ % (2023: ___ % to ___ %) • Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from ___ % to ___ % (2023: ___ % to ___ %) • Weighted average cost of capital, determined using a Capital Asset Pricing Model, ranging from ___ % to ___ % (2023: ___ % to ___ %) • Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from ___ % to ___ % (2023: ___ % to ___ %).

AASB 1060:116

For all financial assets and financial liabilities measured at fair value, the entity discloses the basis for determining fair value, for example, quoted market price in an active market or a valuation technique. When a valuation technique is used, the entity discloses the assumptions applied in determining fair value for each class of financial assets or financial liabilities. For example, if applicable, the entity discloses information about the assumptions relating to prepayment rates, rates of estimated credit losses, and interest rates or discount rates.

There is no further explicit guidance provided on the extent of the disclosures required to comply with these requirements. Accordingly, each entity should exercise judgement to develop disclosures that are appropriate for the nature of the entity's operations, the significance of financial instruments to the entity, and the nature of the key assumptions on which financial instruments have been measured.

AASB 1060:2

Entities are permitted to refer to other Standards for guidance on the requirements in AASB 1060, including AASB 13 *Fair Value Measurement*. Therefore, some of the disclosures required by AASB 13 may be a useful reference in developing disclosures to meet these requirements.

Source

11. Other financial assets (continued)**Derecognition**

AASB 1060:116

If the entity has transferred financial assets to another party in a transaction that does not qualify for derecognition (see paragraph 3.2.15 of AASB 9 *Financial Instruments*), the entity discloses the following for each class of such financial assets

- The nature of the assets
- The nature of the risks and rewards of ownership to which the entity remains exposed
- The carrying amounts of the assets and of any associated liabilities that the entity continues to recognise.

12. Inventories

Fair value measurement of the Group's freehold land and buildings

AASB 1060:134(a) The Group's freehold land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

AASB 1060:136(a)-(c) The fair value measurements of the Group's freehold land and buildings as at 30 June 2024 and 30 June 2023 were performed by *[Name of valuers]*, independent valuers not related to the Group. *[Name of valuers]* are members of the Institute of Valuers of *[A Land]*, and they have appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations. The valuation conforms to International Valuation Standards and was based on recent market transactions on arm's length terms for similar properties.

AASB 1060:136(c) The fair value of the freehold land was determined based on the market comparable approach that reflects recent transaction prices for similar properties/other methods *[describe]*.

AASB 1060:136(c) The fair value of the buildings was determined using the cost approach that reflects the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence/other methods *[describe]*. *[Describe the valuation techniques and the inputs used in determining the fair value.]*

There has been no change to the valuation technique during the year.

Assets pledged as security

AASB 1060:135(a) Freehold land and buildings with a carrying amount of \$ ____ (2023: \$ ____) have been pledged to secure borrowings of the Group. Under the terms of the financing facilities, the Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

Source

16. Investment property (continued)

Other information (continued)

AASB 1060:132(b)

The fair value of the Group's investment property at 30 June 2024 has been arrived at on the basis of a valuation carried out at that date by *[Name of valuers]*, independent valuers not connected with the Group. The valuation conforms to International Valuation Standards. The fair value was determined based on an income capitalisation approach taking into account:

- The capitalisation rate (___ %, 2023: ___ %) takes into account the capitalisation of rental income potential, the nature of the property and prevailing market conditions
- Monthly market rent, taking into account differences in location and individual factors, such as frontage and size, between comparable properties and the property, at an average of ___ (2023: ___) per square metre per month.

[Other alternatives might include: "based on the market comparable approach that reflects recent transaction prices for similar properties/other methods [describe]".

AASB 1060:132(c)

The Group has pledged all of its investment property to secure general banking facilities granted to the Group. In accordance with the terms of these banking facilities, the Group cannot realise more than 25% of its investment property portfolio in any financial year without permission from the financier.

AASB 1060:132(d)

The Group has entered into a contract for the maintenance of its investment property for the next five years, which will give rise to an annual charge of \$ ___ .

AASB 1060:135(c)

If the entity has investment property whose fair value cannot be measured reliably is discloses that fact and the reasons why fair value cannot be measured reliably for those items of investment property

Material intangibles

AASB 1060:138(a) The Group holds a patent for the manufacture of *[describe]* equipment. The carrying amount of the patent of \$ ____ (2023: \$ ____) will be fully amortised in 14 years (2023: 15 years).

Intangible assets acquired through government grant

AASB 1060:138(b) During the year, the Group obtained a *[describe the intangible asset]* by way of government grant under a government business development program (2023: no grant). This intangible was recognised at its fair value of \$ ____ on the acquisition date and has a carrying amount of \$ ____ at 30 June 2024 (2023: \$ nil).

Commitments

AASB 1060:138(d) The Group has the following contractual commitments for the acquisition of intangible assets: *[describe]*

Research and development

AASB 1060:139 An entity discloses the aggregate amount of research and development expenditure recognised as an expense during the period. Research and development expenditure comprises all expenditure that is directly attributable to research or development activities. (See paragraphs 66 and 67 of AASB 138 *Intangible Assets* for guidance on the type of expenditure to be included for the purpose of this disclosure requirement).

Source

20. Other intangible assets (continued)

Intangible assets measured on the revaluation basis

AASB 1060:140

If items of intangible assets are stated at revalued amounts²⁷, an entity discloses the following:

- The effective date of the revaluation
- Whether an independent valuer was involved
- The methods and significant assumptions applied in estimating the items' fair values
- The revaluation surplus, indicating the change for the period and any restrictions on the distribution of the balance to shareholders
- Increases or decreases during the period resulting from revaluations and for impairment losses recognised or reversed in other comprehensive income accordance with AASB 136 *Impairment of Assets*.

Intangible assets with indefinite useful lives

AASB 1060:141

An entity discloses for an intangible asset assessed as having an indefinite useful life, the carrying amount of that asset and the reasons supporting the assessment of an indefinite useful life. In giving those reasons, the entity describes the factor(s) that played a significant role in determining that the asset has an indefinite useful life.

Restricted title and pledged assets

AASB 1060:138(c)

The entity discloses the existence and carrying amount of intangible assets to which the entity has restricted title or that are pledged as security for liabilities.

21. Other assets

	30/06/2024 \$'000	30/06/2023 \$'000

Current		
Non-current		

²⁷ In the Australian context, it would be rare that an intangible asset would be measured using the revaluation basis. ASIC has noted concerns about the revaluation of intangible assets in its published results of reviews of financial reports over a number of periods. For example, ASIC media release [11-312MR](#) *Improved financial information for investors and others* noted "ASIC is not aware of any identifiable intangible assets for which an active market exists in Australia".

Non-current		

Significant leasing arrangements

AASB 1060:144(c) Lease liabilities are secured by the assets leased and represent the discounted future rentals payable by the Group for:

- Certain of its office properties and leased property, plant and equipment. These leases are negotiated for an average term of *[number]* years and rentals are fixed for an average of *[number]* years with an option to extend for a further *[number]* years at the then prevailing market rate
- Leases of plant and equipment used in the Group's manufacturing facilities. These are negotiated on an average term not exceeding 10 years and are priced on a mix of variable and fixed interest rates.

Future minimum lease payments

AASB 1060:144(b) The future minimum lease payments arising under the Group's lease contracts at the end of the reporting period are as follows:

	30/06/2024	30/06/2023
	\$'000	\$'000
AASB 1060:144(b)(i) Not later than one year

AASB 1060:144(b)(iii) Later than five years		

Source

23. Lease liabilities (continued)

Short-term leases and leases of low value assets

AASB 1060:146

A lessee makes the following disclosures for short-term leases and leases of low-value assets that are not recognised as right-of-use assets under the exemption in paragraph 6 of AASB 16 *Leases*:

- The amount of its lease commitments for short-term leases if the portfolio of short-term leases to which it is committed at the end of the reporting period is dissimilar to the portfolio of short-term leases to which the short-term lease expense disclosed relates
- Lease payments recognised as an expense.

Concessionary leases

AASB 1060:151

The Group leases a building from the [*Name of State, e.g. New South Wales*] State Government with significantly below-market terms and conditions principally to enable it to further its objectives.

The Group is dependent on this lease to further its objectives as it utilises the building to run its operations to deliver its services. The Group is restricted on the use of the building as agreed with the State Government and may not utilise it for other purposes including sub-leasing to other entities. The lease term is for 10 years and the lease payments are \$___ per annum, payable annually.

As outlined in the Group's accounting policy in Note 46, the Group has elected to measure this lease at cost.

Information about the Group's borrowings

AASB 1060:114

The principal features of the Group's borrowings are as follows:

AASB 1060:114

- (i) Redeemable preference shares of \$ ____ were issued on *[date]* at an issue price of \$ ____ per share. The shares carry ____ % non-discretionary dividends and are mandatorily redeemable on *[date]* at \$ ____ per share. The preference shares do not carry any equity component and are classified as financial liabilities in their entirety. At the same date when the preference shares were issued, the Group entered into pay-floating, receive-fixed interest rate swap to reduce the fair value risk of changing interest rates. The swap's notional is \$ ____ and matches the principal of the preference shares. The swap matures on *[date]*.

To mitigate the accounting mismatch arising on measuring the liability as amortised cost and measuring the derivative at FVTPL, the Group designated the preference shares as at FVTPL. The changes in the fair value of the preference shares due to the changes in the credit risk do not create or enlarge the accounting mismatch and, therefore, they are recognised in other comprehensive income and accumulated in revaluation reserve. The cumulative amount change in fair value due to credit risk was \$ ____ (2023: \$ ____). The difference between the carrying amount (i.e. the fair value) of the preference shares and the contractual amount that will be required to pay at maturity is \$ ____ (2023: \$ ____).

Source

24. Other borrowings (continued)**Information about the Group's borrowings (continued)**

AASB 1060:117

(ii) Bank overdrafts are repayable on demand. Overdrafts of \$ ____ (2023: \$ ____) have been secured by a charge over certain debentures held by the Group dated *[date]*. In line with the minimum required security, the carrying value of these debentures is \$ ____ (2023: \$ ____). The average effective interest rate on bank overdrafts approximates ____ % (2023: ____ %) per annum and are determined based on ____ % plus prime rate.

(iii) Bills of exchange with a variable interest rate were issued on *[date]*. The current weighted average effective interest rate on the bills is ____ % (2023: ____ %) per annum. The bills mature *[provide details]*

AASB 1060:114

(iv) The Group has two principal bank loans:

AASB 1060:117

- A loan of \$ ____ (2023: \$ ____). The loan was taken out on *[date]*. Repayments commenced on *[date]* and will continue until *[date]*. The loan is secured by a floating charge over certain of the Group's trade receivables dated *[date]*, whose carrying value is \$ ____ (2023: \$ ____). The Group is required to maintain trade receivables that are neither past due nor impaired with carrying value of \$ ____ as security for the loan. The loan carries interest rate at ____ % above the relevant 3-month Bank Bill Swap Rate (BBSW).
- An unsecured loan of \$ ____ (2023: \$ ____). This loan was advanced on *[date]* and is due for repayment in full on *[date]*. The bank loan carries fixed interest rate at ____ % (2023: ____ %) per annum. The Group hedges a portion of the loan for interest rate risk using an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the 6-month BBSW rate. The cumulative fair value adjustment to the loan was \$ ____ (2023: \$ ____).

(v) Amounts repayable to related parties of the Group carry interest of ____ % to ____ % (2023: ____ % to ____ %) per annum charged on the outstanding loan balances.

(vi) On *[date]*, the Group received an interest-free loan of \$ ____ from the government of *[country]* to finance *[description of what loan is for]*. The loan is repayable in full at the end of a two-year period. Using prevailing market interest rates for an equivalent loan of ____ %, the fair value of the loan is estimated at \$ ____ . The difference of \$ ____ between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred income (see note 59). Interest charges will be recognised on this loan in 2025 (\$ ____) and 2026 (\$ ____).

(vii) Perpetual notes of \$ ____ carrying interest of ____ % were issued on *[date]* at principal value. Issue costs of \$ ____ were incurred.

Liquidity analysis

The following tables detail the group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the group can be required to pay. The table includes both interest and principal cash flows. To the extent that interest cash flows are floating rate, the undiscounted amount is derived from interest rate curves at the reporting date.

The contractual maturity is based on the earliest date on which the group may be required to pay.

Determining the level of detail for these disclosures

AASB 1060:114 The entity discloses information that enables users of its financial statements to evaluate the significance of financial instruments for its financial position and performance. For example, for long-term debt such information would ordinarily include the terms and conditions of the debt instrument (such as interest rate, maturity, repayment schedule, and restrictions that the debt instrument imposes on the entity).

AASB 1060:BC76 While paragraph 144(b) of AASB 1060 requires disclosure of a quantitative maturity analysis for future lease payments, paragraph 114 only has a general requirement for other financial liabilities to disclose terms and conditions “such as ... maturity, repayment schedule ...”.

AASB 1060:BC77 In developing AASB 1060, the AASB acknowledged that information about the maturity of an entity’s financial liabilities is important as the users of financial statements of entities that do not have public accountability are particularly interested in information about short-term cash flows, obligations and commitments, and liquidity. However, the AASB decided to retain the disclosures consistent with the *IFRS for SME* Standard.

AASB 1060:BC78 However, the AASB noted that while paragraph 114 only has general disclosure requirements, these still require disclosure of the terms and conditions of the debt instrument and make specific reference to the instrument’s maturity and repayment schedule. The AASB therefore expects entities to provide this information in some form.

The illustrative disclosures above are one way of satisfying the disclosure requirements.

Defaults and breaches on loans payable

AASB 1060:118 For loans recognised at the reporting date for which there is a breach of terms or a default of principal, interest, sinking fund or redemption terms that have not been remedied by the reporting date, an entity discloses the following:

- Details of that breach or default
- The carrying amount of the related loans payable at the reporting date
- Whether the breach or default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue.

Financial liabilities measured at fair value

AASB 1060:115 Some of the Group’s financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial liability	Valuation technique(s) and key inputs(s)
Redeemable preference shares	Discounted cash flow at a discount rate of ___ % (2023: ___ %) that reflects the Group’s current borrowing rate at the end of the reporting period.

See Note 25 below for commentary on the requirements of financial liabilities measured at fair value under AASB 1060.

Source

AASB 1060:116

25. Other financial liabilities (continued)

For all financial assets and financial liabilities measured at fair value, the entity discloses the basis for determining fair value, for example, quoted market price in an active market or a valuation technique. When a valuation technique is used, the entity discloses the assumptions applied in determining fair value for each class of financial assets or financial liabilities. For example, if applicable, the entity discloses information about the assumptions relating to prepayment rates, rates of estimated credit losses, and interest rates or discount rates.

There is no further explicit guidance provided on the extent of the disclosures required to comply with these requirements. Accordingly, each entity should exercise judgement to develop disclosures that are appropriate for the nature of the entity's operations, the significance of financial instruments to the entity, and the nature of the key assumptions on which financial instruments have been measured.

AASB 1060:2

Entities are permitted to refer to other Standards for guidance on the requirements in AASB 1060, including AASB 13 *Fair Value Measurement*. Therefore, some of the disclosures required by AASB 13 may be a useful reference in developing disclosures to meet these requirements.

Source

26. Provisions (continued)**Additional information**

- AASB 1060:153(b) The warranty provision represents management's best estimate of the Group's liability under 12-month warranties.
- AASB 1060:153(b) The restructuring provision relates to redundancy costs incurred on the disposal of *[name of subsidiary]* (see note 52). As at 30 June 2024, approximately 50 per cent of the affected employees had left the Group's employment, with the remainder departing in July 2023.
- AASB 1060:153(b),(c) The restoration provision has been created upon the enactment of new environmental legislation in *[A Land]* on *[date]* 2024 which requires companies in *[A Land]* to clean up contaminated land by 30 June 2026 and bear the associated costs thereof. Management is in the process of clarifying certain aspects of the legislation and therefore the final assessment of costs that the Group will need to incur may change materially based on the outcome of this process. Based on the current interpretation of the legislation, the directors have estimated a liability of \$ _____. In estimating the liability, the directors have made assumptions regarding the following: local site volume of contamination, proximity to approved landfill sites, technology available to decontaminate and costs required to dispose of specialised raw materials.
- AASB 1060:153(b),(c) The *[describe 'other' provision, including a brief description of the nature of the obligation and the expected amount and timing of any resulting payments, and an indication of the uncertainties about the amount or timing of those outflows.]*

Expected reimbursements

- AASB 1060:153(d) Where the entity has a right of reimbursement from a third party in respect of a provision, the amount of any expected reimbursement is required to be disclosed, including stating the amount of any asset that has been recognised for that expected reimbursement.

Prejudicial disclosures

- AASB 1060:156 In extremely rare cases, disclosure of some or all of the information required can be expected to prejudice seriously the position of the entity in a dispute with other parties on the subject matter of the provision. In such cases, an entity need not disclose the information, but discloses the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.

<hr/>		
<hr/>		
AASB 1060:160(a)	The deferred income arises as a result of:	
	<ul style="list-style-type: none"> The benefit received from an interest-free government loan received in June 2024. The revenue will be offset against training costs to be incurred in 2024 (\$___) and 2023 (\$___) The obtaining of a <i>[describe the intangible asset]</i> by way of government grant under a government business development program (2023: no grant). The revenue will be offset against the amortisation of the asset. 	
Government grants recognised as income		
AASB 1060:160(a)	The Group has benefited from the following government support packages during the current and/or prior period:	
AASB 1060:160(a)	Support received	Description
	Staff retraining scheme (<i>[A land]</i>)	<p>The Group received subsidies of \$ ___ (2023: nil) under a job re-training scheme operated by the government of <i>[A land]</i>. Under the scheme, the Group was entitled to claim a 50% subsidy in respect of the total employee cost for eligible employees who were employed from prescribed industries during the period <i>[date]</i> to <i>[date]</i>.</p> <p>Certain requirements were imposed on eligibility, including increasing total employee headcount and increased overall payroll expense.</p> <p>The amounts were paid to the company as a reimbursement once the eligible employees had been paid. The amounts received have been recognised as other income in profit or loss.</p>
	<i>[Describe]</i>	<i>[Provide details of the nature of the support received, the amount recognised in the financial statements (or other assistance received) and other information to allow users to understand its impacts]</i>
AASB 1060:160(b)	There are no unfulfilled conditions or other contingencies attaching to the government grants that have been recognised as income.	
AASB 1060:160(c)	In addition to the above grants, the Group also benefits from the other forms of government assistance: <i>[describe]</i>	

Source

AASB 1060:160

28. Government grants (continued)

A for-profit entity is required to disclose:

- The nature and amounts of government grants recognised in the financial statements
- Unfulfilled conditions and other contingencies attaching to government grants that have been recognised in income
- An indication of other forms of government assistance as defined in AASB 120 *Accounting for Government Grants and Disclosure of Government Assistance* from which the entity has directly benefited
- Material accounting policy information for government grants, including the methods of presentation adopted in the financial statements.

Governments may be providing support to entities through programmes that do not result in recognition of income in the financial statements of the participating entities.

To the extent that the interest rate paid by the borrower and other terms of the debt instruments reflect market conditions, the borrowing does not include a government grant that requires recognition in the financial statements. Nevertheless, such support is considered government assistance under AASB 120. Entities will need to consider if the significance of the benefit received is such that disclosure of the nature, extent and duration of the assistance is necessary to avoid the financial statements from being misleading.

Information about government grants received by not-for-profit entities can be found in Note 4.

When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the properties revaluation reserve are not reclassified subsequently to profit or loss. Distribution of amounts from the reserve is subject to the relevant distribution requirements of the <i>Corporations Act 2001</i>		
AASB 1060:45(b)	(2) The investments revaluation reserve represents (i) the cumulative gains and losses arising on the revaluation of investments in equity instruments designated as at FVTOCI, net of cumulative gain/loss transferred to retained earnings upon disposal; and (ii) Investments in debt instruments classified as at FVTOCI, net of cumulative loss allowance recognised on these investments and cumulative gain/loss reclassified to profit or loss upon disposal or reclassification of these investments.		
AASB 1060:45(b)	(3) The share-based payments reserve is used to separately account for the grant of share options to employees of the Group under the employee share option plan. Share options are granted to employees over the shares of the entity's parent company, who is responsible for the granting of those share options. An agreement is in place with the parent company whereby no reimbursement for costs associated with the grant of options will be sought by the parent from the entity. As such, amounts relating to grants are recorded as an equity contribution from the parent company in its capacity as owner.		
AASB 1060:45(b)	(4) The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated in the cash flow hedging reserve will be reclassified to profit or loss only when the hedged transaction affects profit or loss, or is included as a basis adjustment to the non-financial hedged item, consistent with the relevant accounting policy.		
AASB 1060:45(b)	(5) Exchange differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Company's presentation currency (i.e. Australian dollars) are recognised directly in other comprehensive income and accumulated in the foreign currency translation reserve. Gains and losses on hedging instruments that are designated as hedging instruments for hedges of net investments in foreign operations are included in the foreign currency translation reserve. Exchange differences accumulated in the foreign currency translation reserve (in respect of translating both the net assets of foreign operations and hedges of foreign operations) are reclassified to profit or loss on the disposal of the foreign operation.		
AASB 1060:45(b)	(6) The option premium on convertible notes reserve represents the equity component (conversion rights) of the <i>[number]</i> ___% convertible notes issued during the year

- Final dividend				
Unrecognised amounts				
Fully paid ordinary shares				
- Final dividend				

The above information is not explicitly required by AASB 1060, but may be useful to users of the financial statements.

AASB 1060:187 On *[date]*, the directors declared an ___% franked final dividend of ___ cents per share to the holders of fully paid ordinary shares in respect of the financial year ended 30 June 2024. This dividend has not been recognised as a liability in these financial statements and will be paid to shareholders on *[date]*. The total estimated dividend to be paid is \$ ___.

Imputation credits (franking credits)

AASB 1060:101 The information below is considered best practice for the disclosure of imputation credits (franking credits). AASB 1060 only specifically requires the disclosure of the amount of imputation credits available for use in subsequent reporting periods (i.e. the 'adjusted franking account balance' in the information below). The disclosures below reconcile from the actual franking account balance at the reporting date to the adjusted franking account balance using the guidance in AASB 1060:102, and also discloses the impact of franking debits arising from declared dividends which have not been recognised as a liability in the financial statements.

	Company	
	30/06/2024 \$'000	30/06/2023 \$'000
Franking account balance at 30 June

AASB 1060:100

AASB 1060:103

32. Dividends on equity instruments (continued)**Imputation credits (franking credits) (continued)**

The term 'imputation credits' in AASB 1060 is used to also mean 'franking credits'. The disclosures required by AASB 1060 are made separately in respect of any New Zealand imputation credits and any Australian imputation credits.

Where there are different classes of investors with different entitlements to imputation credits, disclosures are made about the nature of those entitlements for each class where this is relevant to an understanding of them.

Exempting accounts

Exempting accounts are held by companies wholly-owned by non-residents or tax exempt institutions and are similar to franking accounts. AASB 1054 *Australian Additional Disclosures* does not specifically require the disclosure of exempting account balances, however, where considered necessary (i.e. to satisfy the information needs of the likely users of the financial report), directors may consider disclosing the exempting account balance.

Deferred franking debits

The receipt of refundable R&D tax offsets gives rise to deferred franking debits which will reduce future franking credits. This is because a franking credit will not arise as a result of income tax payments until the deferred franking debits are recovered. The impacts of accrued refundable R&D tax offset amounts should be considered when disclosing the amount of franking credits available. This may require additional narrative or other disclosure so that users understand the future impacts of the deferred franking debits.

The following illustrative example can be adapted to develop relevant disclosures where an entity has deferred franking debits:

"As disclosed in Note [x], under the R&D Tax Incentive of Australian tax law, the Group is eligible to receive a refundable R&D tax offset in respect of its eligible research and development expenditure. The receipt of such amounts results in deferred franking debits in the entity's franking account. The Group will not generate franking credits on the payment of corporate income tax amounts in future periods until the deferred franking debits are recovered.

The aggregate deferred franking debits at reporting date is \$ ____ (2023: \$ ____). The entity will be required to make future income tax payments of this amount before further income tax payments will give rise to franking credits. In addition, the entity has recognised a receivable in respect of the current period R&D tax offset of \$ ____ which will give rise to additional deferred franking debits when received."

For more information, see our [Clarity publication](#) *Accounting for the R&D tax offset*.

	30/06/2024	30/06/2023
	\$'000	\$'000
Consideration paid in cash		
Less: cash and cash equivalent balances acquired		
Net outflow of cash per the statement of cash flows		

The above reconciliation is not specifically required by AASB 1060, but may be useful to users of the financial statements.

34. Notes to the statement of cash flows**Reconciliation of cash**

AASB 1060:88

For the purposes of the statement of cash flows, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts. Cash and cash equivalents at the end of the reporting period as shown in the statement of cash flows can be reconciled to the related items in the statement of financial position as follows:

	30/06/2024	30/06/2023
	\$'000	\$'000
Cash and bank balances		
Bank overdraft (see note 24. Other borrowings)		

AASB 1060:88

An entity is not required to present the above reconciliation if the amount of cash and cash equivalents presented in the statement of cash flows is identical to the amount similarly described in the statement of financial position.

Cash balances not available for use

AASB 1060:89

An entity discloses, together with commentary by management, the amount of significant cash and cash equivalent balances held by the entity that are not available for use by the entity. Cash and cash equivalents held by an entity may not be available for use by the entity because of, among other reasons, foreign exchange controls or legal restrictions.

Non-cash transactions

AASB 1060:87

During the current year, the Group entered into the following non-cash investing and financing activities which are not reflected in the statement of cash flows:

- The Group disposed of property, plant and equipment with an aggregate fair value of \$___ to acquire *[describe]*.
- Proceeds in respect of the Group's disposal of *[describe]* (\$ ___) had not been received in cash at the end of the reporting period
- Additions to equipment during the year amounting to \$__ million (2023: \$ ___) were financed by new leases.

Source

35. Share-based payment

Equity-settled share option plan

AASB 1060:164(a)

The Group has a share option plan for all employees of the Group. In accordance with the terms of the plan, as approved by the directors, employees with more than ___ years' service with the Group may be granted options to purchase ordinary shares.

Each employee share option converts into one ordinary share of the Group on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at the previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures:

- Improvement in net profit
- Improvement in return to shareholders
- Reduction in warranty claims
- Results of client satisfaction surveys
- Reduction in rate of staff turnover.

Options are exercisable at a price determined by a theoretical listed price of the entity's shares if it were a listed entity. The vesting period is three years. If the options remain unexercised after a period of five years from the date of grant the options expire. Options are forfeited if the employee leaves the Group before the options vest.

Details of the share options outstanding during the year are as follows.

	30/06/2024		30/06/2023	
	Number of share options	Weighted average exercise price	Number of share options	Weighted average exercise price
AASB 1060:164(b)(i) Outstanding at the beginning of the year				
AASB 1060:164(b)(ii) Granted during the year				
AASB 1060:164(b)(iii) Forfeited during the year				
AASB 1060:164(b)(iv) Exercised during the year				
AASB 1060:164(b)(v) Expired during the year				
AASB 1060:164(b)(vi) Outstanding at the end of the year				
AASB 1060:164(b)(vii) Exercisable at the end of the year				

AASB 1060:165

The fair value of the options granted were measured using a [*specify model*] model. The inputs used in the model include notional share prices, expected volatility, expected life of the option, relevant risk-free rates and expected dividend yields. This model was chosen as it is a generally accepted valuation methodology for pricing financial instruments, incorporating all factors and assumptions that knowledgeable, willing market participants would consider setting the price.

Source

35. Share-based payment (continued)**Cash-settled share option plan**

AASB 1060:166
AASB 1060:168(a)
AASB 1060:168(b)

The Group issues to certain employees share appreciation rights (SARs) that require the Group to pay the intrinsic value of the SAR to the employee at the date of exercise. The Group has recorded liabilities of \$ ___ and \$ ___ in 2024 and 2023. Fair value of the SARs is determined by using the *[specify model]* model using the same inputs as noted above for the equity settled share option plan above. The Group recorded total expenses of \$ ___ and \$ ___ in 2024 and 2023, respectively. The total intrinsic value 30 June 2024 and 2023 was \$ ___ and \$ ___ respectively.

Total expense recognised

AASB 1060:168(a)

The total expense recognised in profit or loss for the period in respect of all share-based payment transactions was \$ ___ (2023: \$ ___).

Modifications

AASB 1060:167

Where share-based payment arrangements are modified during the period, the entity discloses an explanation of those modifications.

36. Employee benefits**Defined contribution plans**

AASB 1060:172

Amount recognised as an expense for defined contribution plans

30/06/2024	30/06/2023
\$'000	\$'000

Defined benefit plans

AASB 1060:172
AASB 1060:173

If an entity treats a defined benefit multi-employer plan as a defined contribution plan because sufficient information is not available to use defined benefit accounting (see paragraph 34 of AASB 119 *Employee Benefits*), it discloses the fact that it is a defined benefit plan and the reason why it is being accounted for as a defined contribution plan, along with any available information about the plan's surplus or deficit and the implication, if any, for the entity. The disclosures below in respect of defined benefit plans are not required for such plans.

AASB 1060:173(a)

The Group sponsors defined benefit plans for qualifying employees of its subsidiaries in *[D Land]* and previously for the employees of *[name of company]*. The defined benefit plans are administered by a separate fund that is legally separated from the Group. The defined benefit plans require contributions from employees. Contributions are in the following two forms; one is based on the number of years of service and the other one is based on a fixed percentage of salary of the employees. Employees can also make discretionary contributions to the plans.

AASB 1060:173(b)

Movement in defined benefit obligation

The amount included in the statement of financial position arising from the Group's obligations in respect of its defined benefit retirement benefit plans is as follows:

AASB 1060:173(b)
AASB 1060:173(b)
AASB 1060:173(b)

36. Employee benefits (continued)

AASB 1060:173(d)

Total cost

The total cost relating to defined benefit plans during the period are as follows:

	30/06/2024	30/06/2023
	\$'000	\$'000
AASB 1060:173(d) Total cost of defined benefit plans	<u> </u>	<u> </u>

Subsidiaries within groups

AASB 1060:173

A subsidiary that recognises and measures employee benefit expense on the basis of a contractual agreement or stated policy for charging the net defined benefit cost or based on their contributions payable for the period (see paragraph 41 of AASB 119 *Employee Benefits*), in its separate financial statements, describes the contractual agreement or stated policy for charging the net defined benefit cost or the fact that there is no such policy, and the policy for determining the contributions to be paid by the entity and makes the disclosures above for the plan as a whole. The subsidiary can disclose this information by cross-reference to disclosures in another group entity's financial statements if:

AASB 1060:173(i)

- That group entity's financial statements separately identify and disclose the information required about the plan

AASB 1060:173(j)

- That group entity's financial statements are available to users of the financial statements on the same terms as the financial statements of the entity and at the same time, or earlier than, the financial statements of the entity

Termination benefits

AASB 1060:174

For each category of termination benefits that an entity provides to its employees, the entity discloses the nature of the benefit, the amount of its obligation and the extent of funding at the reporting date.

AASB 1060:175

When there is uncertainty about the number of employees who will accept an offer of termination benefits, a contingent liability exists. An entity discloses information about its contingent liabilities unless the possibility of an outflow in settlement is remote.

Source

37. Hedges**Fair value hedges**

AASB 1060:120

The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate option contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite; ensuring the most cost-effective hedging strategies are applied.

AASB 1060:120

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt held. The fair value of interest rate swaps at the reporting date is determined by discounting the future cash flows using the curves at the reporting date and the credit risk inherent in the contract.

The following information relates to the Group's fair value hedges

	30/06/2024	30/06/2023
	\$'000	\$'000
AASB 1060:121(a)		
AASB 1060:121(b)		

Change in fair value of hedging instruments recognised in profit or loss

Change in fair value of hedged items recognised in profit or loss

Cash flow hedges

AASB 1060:120

AASB 1060:122(a)

It is the policy of the Group to enter into foreign exchange forward contracts to manage the foreign currency risk associated with anticipated sales and purchase transactions out to 6 months within ___ % to ___ % of the exposure generated. Basis adjustments are made to the initial carrying amounts of inventories when the anticipated purchases take place.

AASB 1060:120

AASB 1060:122(a)

The Group has entered into contracts to supply goods to customers in *[B Land]*. The Group has entered into foreign exchange forward contracts (for terms not exceeding three months) to hedge the exchange rate risk arising from these anticipated future transactions. It is anticipated that the sales will take place during the first three months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.

AASB 1060:120

AASB 1060:122(a)

The Group has entered into contracts to purchase raw materials from suppliers in *[B Land]* and *[C Land]*. The Group has entered into foreign exchange forward contracts (for terms not exceeding six months) to hedge the exchange rate risk arising from these anticipated future purchases.

AASB 1060:122(a)

It is anticipated that the purchases will take place during the first six months of the next financial year at which time the amount deferred in equity will be removed from equity and included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase.

Source

37. Hedges (continued)**Cash flow hedges (continued)**

The following information relates to the Group's cash flow hedges:

	30/06/2024	30/06/2023
	\$'000	\$'000
AASB 1060:122(c)	Change in fair value of hedging instruments recognised in other comprehensive income	
AASB 1060:122(d)	Amount reclassified to profit or loss for the period	
AASB 1060:122(e)	Hedge ineffectiveness recognised in profit or loss	
AASB 1060:122	Foreign currency forward contract assets and liabilities are presented in the line 'other financial assets' and 'other financial liabilities' (as applicable) in the statement of financial position.	

AASB 1060:122(b) In addition, the entity discloses a description of any forecast transaction for which hedge accounting had previously been used, but which is no longer expected to occur.

Net investment hedges

AASB 1060:120 In the current year, the Group has designated certain forward contracts as a hedge of its net investment in *[name of foreign operation]*, which has *[Currency B]* as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in *[Currency B]*, it was decided to hedge up to ___% of the net assets of the *[name of foreign operation]* for foreign currency forward risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.

AASB 1060:120 The Group had, in previous years, hedged its investment in *[name of foreign operation]* against the foreign currency risk arising from the translation of *[name of foreign operation]'s* net assets from *[Currency A]* into the Parent's functional currency. However, the Group ceased to hedge this investment a few years ago based on management's expectation of the continued strength of *[Currency A]*. The investment in *[name of foreign operation]* was fully disposed of in the current year and the cumulative amount arising from the previous hedging relationships which was deferred in equity was reclassified to profit or loss on disposal.

The following information relates to the Group's net investment hedges:

	30/06/2024	30/06/2023
	\$'000	\$'000
AASB 1060:122(c)	Change in fair value of hedging instruments recognised in other comprehensive income	
AASB 1060:122(d)	Amount reclassified to profit or loss for the period	
AASB 1060:122(e)	Hedge ineffectiveness recognised in profit or loss	
AASB 1060:122(b)	In addition, the entity discloses a description of any forecast transaction for which hedge accounting had previously been used, but which is no longer expected to occur.

38. Related parties

ASIC-CI 2016/191

An entity considers the extent to which *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191* permits information about related parties to be rounded.

AASB 1060:197

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party, regardless of whether a price is charged. Examples of related party transactions include, but are not limited to:

- Transactions between an entity and its principal owners
- Transactions between an entity and another entity when both entities are under common control of a single entity or person
- Transactions in which an entity or person that controls the reporting entity incurs expenses directly that otherwise would have been borne by the reporting entity.

Information about the parent and subsidiaries

AASB 1060:192

Relationships between a parent and its subsidiaries are disclosed irrespective of whether there have been related party transactions. An entity discloses the name of its parent and, if different, the ultimate controlling party. If neither the entity's parent nor the ultimate controlling party produces financial statements available for public use, the name of the next most senior parent that does so (if any) is also disclosed.

AASB 1060:192

Tier 2 Limited is a wholly-owned subsidiary of *[Parent name]*.

[Parent name] is incorporated in *[F Land]* and is itself wholly-owned by *[Intermediate parent name]*, incorporated in *[G Land]*. Financial statements of *[Intermediate parent company]* are publicly available at *[website or other location]*.

The ultimate controlling entity is *[Ultimate controlling entity name]*, incorporated in *[H Land]*.

The ultimate controlling party does not need to be a company, trust or other incorporated entity and may be an individual.

Balances and transactions between the Company and its subsidiaries, which are related parties, have been eliminated on consolidation and are not disclosed in this note. Transactions between the Group and its other related parties are disclosed below.

Remuneration of key management personnel

AASB 1060:194

Aggregate key management personnel compensation

	30/06/2024	30/06/2023
	\$	\$
	<hr/>	<hr/>
	<hr/>	<hr/>

AASB 1060:195

If an entity obtains key management personnel services from another entity (the 'management entity'), the entity is not required to disclose the total key management personnel compensation paid or payable by the management entity to the management entity's employees or directors.

AASB 1060:196

Amounts incurred by the entity for the provision of key management personnel services that are provided by a separate management entity are disclosed.

Source

38. Related parties (continued)**Transactions with related parties**

During the year, entities within the Group entered into the following transactions with related parties who are not members of the Group:

AASB 1060:198(a)	Sale of goods		Purchase of goods	
	30/06/2024	30/06/2023	30/06/2024	30/06/2023
	\$'000	\$'000	\$'000	\$'000
<i>[Ultimate parent company name]</i>				
Associates				
<i>[Describe nature of each related party relationship]</i>				

At the end of the year, the following balances were outstanding between entities within the Group and related parties who are not members of the Group:

AASB 1060:198(b)	Amounts owed by related parties		Amounts owed to related parties	
	30/06/2024	30/06/2023	30/06/2024	30/06/2023
	\$'000	\$'000	\$'000	\$'000
<i>[Ultimate parent company name]</i>				
Associates				
<i>[Describe nature of each related party relationship]</i>				
AASB 1060:199				
AASB 1060:198(c)				
Less: Allowance for uncollectable amounts				

AASB 1060:198 Sales of goods to related parties were made at the Group's usual list prices, less average discounts of ___ %. Purchases were made at market price discounted to reflect the quantity of goods purchased and the relationships between the parties.

AASB 1060:198(b)
AASB 1060:198(d) The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. During the period, an expense of \$ ___ (2023: \$ ___) for an allowance for doubtful debts in respect of the amounts owed by related parties was recognised. Amounts repayable to *[related party]* carry interest of ___ % to ___ % (2023: ___ % to ___ %) per annum charged on the outstanding loan balances.

Source

38. Related parties (continued)**Loans to related parties**

AASB 1060:198(b)

The following are details of loans to related parties:

		30/06/2024	30/06/2023
		\$'000	\$'000
AASB 1060:199(a)	Loans to entities with control, joint control or significant influence over the Company <i>[describe]</i>		
AASB 1060:198(c)	Less: Allowance for uncollectable receivables		
AASB 1060:199(b)	Loans to associates		
AASB 1060:198(c)	Less: Allowance for uncollectable receivables		
AASB 1060:199(c)	Loans to key management personnel		
AASB 1060:198(c)	Less: Allowance for uncollectable receivables		
AASB 1060:199(d)	Loans to other related parties <i>[describe]</i>		
AASB 1060:198(c)	Less: Allowance for uncollectable receivables		

AASB 1060:198
AASB 1060:198(a)

During the period, the Group has provided its associates with short-term loans of \$ ____ (2023: \$ ____) at rates comparable to the average commercial rate of interest.

AASB 1060:198

[Provide additional information necessary for an understanding of each related party relationship on the financial statements.]

Other related party transactionsAASB 1060:197
AASB 1060:198

The following additional related party transactions occurred during the current and prior periods:

- The provision of office space and office management services (including IT resources) at no cost by *[related party]*
- Transfer of income tax payables *[tax losses]* to *[related party]* under the provisions of tax-consolidation applying in Australia, and the corresponding accrual of a related party payable *[receivable]* of \$ ____ (2023: \$ ____)

Source

38. Related parties (continued)**Examples**

AASB 1060:201

The following are examples of transactions that would be disclosed if they are with a related party:

- Purchases or sales of goods (finished or unfinished)
- Purchases or sales of property and other assets
- Rendering or receiving of services
- Leases
- Transfers of research and development
- Transfers under licence agreements
- Transfers under finance arrangements (including loans and equity contributions in cash or in kind)
- Provision of guarantees or collateral
- Settlement of liabilities on behalf of the entity or by the entity on behalf of another party
- Participation by a parent or subsidiary in a defined benefit plan that shares risks between group entities
- Commitments to do something if a particular event occurs, or does not occur in the future, including executory contracts (recognised or unrecognised).

39. Contingent liabilities and contingent assets**Contingent liabilities**

AASB 1060:154

During the reporting period, a customer of the Group instigated proceedings against it for alleged defects in an electronic product which, it is claimed, were the cause of a major fire in the customer's premises on [date]. Total losses to the customer have been estimated at \$ ____ (2023: nil) and this amount is being claimed from the Group.

The Group's lawyers have advised that they do not consider that the claim has merit, and they have recommended that it be contested. No provision has been made in these financial statements as the Group's management does not consider that there is any probable loss.

Contingent assets

AASB 1060:155

If an inflow of economic benefits is probable (more likely than not) but not virtually certain, an entity discloses a description of the nature of the contingent assets at the end of the reporting period and, where practicable, an estimate of their financial effect, measuring using the principles set out in paragraphs 36-51 of AASB 137 *Provisions, Contingent Liabilities and Contingent Assets*. Where any of the information required is not disclosed because it is not practicable to do so, that fact is stated.

Prejudicial disclosures

AASB 1060:156

In extremely rare cases, disclosure of some or all of the information required can be expected to prejudice seriously the position of the entity in a dispute with other parties on the subject matter of the contingent liability or contingent asset. In such cases, an entity need not disclose the information, but discloses the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.

Source

40. Subsequent events

AASB 1060:187	On <i>[date]</i> the premises of <i>[name of subsidiary]</i> were seriously damaged by fire. Insurance claims have been submitted but the cost of refurbishment is currently expected to exceed the amounts to be received from these claims by \$ ____ (2023: nil).
AASB 1060:185	An entity adjusts the amounts recognised in its financial statements, including related disclosures, to reflect adjusting events after the end of the reporting period.
AASB 1060:187	An entity discloses the following for each category of non-adjusting event after the end of the reporting period: <ul style="list-style-type: none"> • The nature of the event • An estimate of its financial effect or a statement that such an estimate cannot be made.
AASB 1060:188	The following are examples of non-adjusting events after the end of the reporting period that would generally result in disclosure. The disclosures will reflect information that becomes known after the end of the reporting period but before the financial statements are authorised for issue: <ul style="list-style-type: none"> • A major business combination • Announcement of a plan to discontinue an operation • Major purchases of assets, classification of assets as held for sale in accordance with AASB 5 <i>Non-current Assets Held for Sale and Discontinued Operations</i>, disposals of assets, or expropriation of major assets by government • The destruction of a major production plant by a fire • Announcement, or commencement of the implementation, of a major restructuring • Issues or repurchases of an entity's debt or equity instruments • Abnormally large changes in asset prices or foreign exchange rates • Changes in tax rates or tax laws enacted or announced that have a significant effect on current and deferred tax assets and liabilities • Entering into significant commitments or contingent liabilities, for example, by issuing significant guarantees • Commencement of a major litigation arising solely out of events that occurred after the end of the reporting period.

Source

41. Subsidiaries

ASIC-CI 2016/785.6(v) In addition to the requirement of AASB 1060, the disclosures below illustrate the requirements of *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785* in respect of the consolidated financial statements.

Details of the Group's material subsidiaries at the end of the reporting period are as follows.

AASB 1060:192

Name of subsidiary	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group	
		30/06/2024	30/06/2023
Subzero Limited	A Land	Nil	100%
Subone Limited	A Land	90%	100%
Subtwo Limited (i)	A Land	45%	45%
Subthree Limited (ii), (iii)	A Land	100%	100%
Subfour Limited	B Land	70%	70%
Subfive Limited	C Land	100%	100%
Subsix Limited	A Land	80%	Nil
Subseven Limited (ii), (iii)	A Land	100%	Nil
C Plus Limited	Australia	90%	90%
Subsidiary A Limited	Australia	90%	90%
Subsidiary B Limited	B Land	85%	85%
Partnership A	C Land	75%	75%
AGAAP Trust	Australia	100%	100%
BJV Limited	Australia	95%	95%

AASB 1060:104(b)

(i) Although the Group holds less than 50% of the ownership interests in Subtwo Limited, the directors have identified that the entity is a subsidiary of the Group (see further discussion at Note 3).

AASB 1060:192

(ii) These companies are members of the tax-consolidated group. Tier 2 Limited is the head entity within the tax-consolidated group.

ASIC-CI 2016/785 s.6(v)(ii)

(iii) These wholly-owned subsidiaries have entered into a deed of cross guarantee with Tier 2 Limited pursuant to *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785* and are relieved from the requirement to prepare and lodge an audited financial report. Subseven Limited became a party to the deed of cross guarantee on [date] 2024.

AASB 1060:192

AASB 1060 requires the entity to disclose the relationships between a parent and its subsidiaries irrespective of whether there have been related party transactions. For the purposes of these illustrative disclosures, the example above shows information about the entity's own subsidiaries and the members of the tax-consolidated group. The level of detail to be disclosed is not specified in AASB 1060.

In addition, the entity discloses the name of its parent and, if different, the ultimate controlling party. This is illustrated in Note 38.

Details required for entities relying on *ASIC Corporations Instrument 2016/785*

ASIC-CI 2016/785

ASIC Corporations (Wholly-owned Companies) Instrument 2016/785 requires the following information in respect of parties to the deed of cross guarantee at the end of the financial year:

- Details (including dates) of parties to the deed of cross guarantee which, during or since the financial year have been added by an assumption deed, removed by a revocation deed or which are the subject of a notice of disposal (as required under the instrument)
- Details (including dates and reasons) of any entities which obtained relief under the instrument or ASIC Class Order 98/1418 at the end of the immediately preceding financial year, but which were ineligible for relief in respect of the relevant financial year.

Source

41. Subsidiaries (continued)**Additional disclosures**

The entity discloses:

AASB 1060:104(c)

- Any difference in the reporting date of the financial statements of the parent and its subsidiaries used in the preparation of the consolidated financial statements

AASB 1060:104(d)

- The nature and extent of any significant restrictions (for example resulting from borrowing arrangements or regulatory requirements) on the ability of subsidiaries to transfer funds to the parent in the form of cash dividends or to repay loans.

Consolidated income statement, consolidated statement of financial position and movements in consolidated retained earnings of entities party to the deed of cross guarantee

ASIC-CI 2016/785.6(v)

The disclosures below are required in consolidated financial statements of the 'holding entity' which include entities which are not members of the 'closed group' or which are not parties to the deed of cross guarantee (for the purposes of the Corporations Instrument).

For instance, these disclosures would be required where the holding entity for the purposes of the Corporations Instrument has subsidiaries that are not parties to the deed of cross guarantee (as is the case in these illustrative disclosures).

ASIC-CI 2016/785
s.6(v)

The consolidated income statement and consolidated statement of financial position of the entities which are parties to the deed of cross guarantee are:

	30/06/2024	30/06/2023
	\$'000	\$'000

Requirements for additional consolidation information

ASIC Corporations (Wholly-owned Companies) Instrument 2016/785 requires the holding entity to include 'additional consolidation information' in each of the following circumstances:

- Where the consolidated financial statements cover entities which are not members of the 'closed group', additional consolidation information in respect of the 'closed group'
- Where the consolidated financial statements cover entities which are not parties to the deed of cross guarantee, additional consolidation information in respect of the consolidation of the holding entity and those entities which are parties to the deed of cross guarantee and controlled by the holding entity
- If there are parties to the deed of cross guarantee (other than a trustee or alternative trustee that is not a 'group entity' within the meaning of the deed) which are not controlled by the holding entity, additional consolidated information in respect of those parties (either individually or in aggregate).

The additional consolidation information presented to comply with the requirements of *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785* includes:

- A statement of comprehensive income setting out the information specified by paragraphs 82 to 87 of AASB 101 *Presentation of Financial Statements*
- Opening and closing retained earnings, dividends provided for or paid and transfers to and from reserves
- A statement of financial position complying with paragraphs 54 to 60 of AASB 101.

In addition, elimination of all transactions between entities for which information is included in the additional consolidation information is required.

Note: The information disclosed in this illustrative note conforms with the presentation requirements in AASB 1060, so that the basis of presentation of the information is consistent with the remainder of the illustrative disclosures in these model financial statements, rather than AASB 101 'Presentation of Financial Statements' which is referred to in Corporations Instrument 2016/785. However, should the Corporations Instrument remain unamended, entities should consider the disclosures in accordance with the requirements with the Corporations Instrument.

Sources.295(3)(a)
Reg2M.3.01**42. Parent entity information**

Where an entity prepares consolidated financial statements in accordance with s.295(2)(b) of the *Corporations Act 2001*, the *Corporations Regulations 2001* prescribe additional information that must be disclosed in the notes to the financial statements.

As these model financial statements includes consolidated information in accordance with AASB 1060, the parent entity disclosures are required for entities preparing financial reports under Part 2M.3 of the *Corporations Act 2001*.

AASB 1060:95

Accounting policy information

The accounting policy information of the parent entity, which has been applied in determining the financial information shown below, are the same as those applied in the consolidated financial statements except as set out below. See Note 46. *Accounting policies* for a summary of the material accounting information relating to the Group.

AASB 1060:105(b)

Investments in subsidiaries, associates and joint ventures

Investments in subsidiaries, associates and joint ventures are accounted for at cost.

Int 1052:8

Tax consolidation

Int 1052 Tax Consolidation Accounting requires the current and deferred taxes arising in a tax-consolidated group to be allocated to the members of the group when they issue separate financial statements.

Int 1052:9

The following methods are examples of acceptable allocation methods:

- A “stand-alone taxpayer” approach for each entity, as if it continued to be a taxable entity in its own right
- A “separate taxpayer within group” approach for each entity, on the basis that the entity is subject to tax as part of the tax-consolidated group. This method requires adjustments for transactions and events occurring within the tax-consolidated group that do not give rise to a tax consequence for the group or that have a different tax consequence at the level of the group
- A ‘group allocation’ approach, under which the current and deferred tax amounts for the tax-consolidated group are allocated among each entity in the group (subject to certain limitations in paragraph 10).

More information about tax consolidation accounting can be found in the *Australian financial reporting guide*, available at www.deloitte.com/au/models.

The disclosures below illustrate the three acceptable tax allocation methods in Int 1052:9 and assume the parent entity is the head entity in the tax consolidated group and that a tax funding arrangement exists and mirrors the tax allocation method used under Interpretation 1052. Where the tax funding arrangement does not mirror the tax allocation method, the disclosures should be amended as relevant to the entity's specific circumstances.

Int 1052:16

The company and its wholly-owned Australian resident entities are members of a tax-consolidated group under Australian tax law. The company is the head entity within the tax-consolidated group.

Source

42. Parent entity information (continued)

Accounting policies (continued)

Tax consolidation (continued)

Where the 'stand-alone taxpayer' approach is adopted, the following accounting policy wording may be adopted:

Amounts payable or receivable under the tax-funding arrangement between the company and the entities in the tax consolidated group are determined using a 'stand-alone taxpayer' approach to determine the tax contribution amounts payable or receivable by each member of the tax-consolidated group. Transactions within the group are notionally considered a transaction with an external party in each entity and the tax is accounted in the same manner as if the transaction were with a party external to the group. The same basis is used for tax allocation within the tax-consolidated group.

Where the 'separate taxpayer within group' approach is adopted, the following accounting policy wording may be adopted:

AASB 1060:192
AASB 1060:198

Amounts payable or receivable under the tax-funding arrangement between the company and the entities in the tax consolidated group are determined using a 'separate taxpayer within group' approach to determine the tax contribution amounts payable or receivable by each member of the tax-consolidated group. This approach results in the tax effect of transactions being recognised in the legal entity where that transaction occurred but does not tax effect transactions that have no tax consequences to the group. The same basis is used for tax allocation within the tax-consolidated group.

Where the 'group allocation' approach is adopted, the following accounting policy wording may be adopted:

Amounts payable or receivable under the tax-funding arrangement between the company and the entities in the tax consolidated group are determined using a 'group allocation' approach (specified in the tax funding arrangement) to determine the tax contribution amounts payable or receivable by each member of the tax-consolidated group. The same basis is used for tax allocation within the tax-consolidated group.

The tax funding arrangement requires a notional current and deferred tax calculation for each entity as if it were a taxpayer in its own right, except that unrealised profits, distributions made and received and capital gains and losses and similar items arising on transactions within the tax-consolidated group are treated as having no tax consequence *[amend as applicable]*.

Disclosures required in the notes to the consolidated financial statementss.295(2), (3),
Reg2M.3.01

- (1) Where consolidated financial statements are required by the accounting standards, the regulations require the notes to the financial statements of the consolidated entity to disclose:
 - (a) Current assets of the parent entity
 - (b) Total assets of the parent entity
 - (c) Current liabilities of the parent entity
 - (d) Total liabilities of the parent entity
 - (e) Shareholders' equity in the parent entity separately showing issued capital and each reserve
 - (f) Profit or loss of the parent entity
 - (g) Total comprehensive income of the parent company
 - (h) Details of any guarantees entered into by the parent entity in relation to the debts of its subsidiaries
 - (i) Details of any contingent liabilities of the parent entity
 - (j) Details of any contractual commitments by the parent entity for the acquisition of property, plant or equipment
 - (k) Comparative information for the previous period for each of paragraphs (a) to (j)
- (2) The disclosures in subregulation (1) must be calculated in accordance with accounting standards in force in the financial year to which the disclosure relates
- (3) In the regulation, "parent entity" means a company, registered scheme or disclosing entity that is required by the accounting standards to prepare financial statements in relation to a consolidated entity.

43. Authorisation of the financial statements

AASB 1060:186

The financial statements were approved by the board of directors and authorised for issue on 14 October 2024.

*The auditor of Tier 2 Limited is Deloitte Touche Tohmatsu.

These line items are provided by way of example only. The disclosures should provide sufficient detail of the amounts paid or payable to the auditor for each non-audit service.

Source

44. Remuneration of auditors (continued)**Suggested disclosures**

In November 2020, the Federal Parliamentary Joint Committee on Corporations and Financial Services released *Regulation of Auditing in Australia: Final Report* (available at parlinfo.aph.gov.au). Included in this final report is a recommendation to introduce defined categories and associated fee disclosure requirements in relation to audit and non-audit services. This recommendation was directed primarily at the Financial Reporting Council (FRC).

In the meantime, we encourage entities to provide transparent and expanded disclosures in their financial reports at 30 June 2024. Potential categories of disclosure may include:

- Fees to group auditor for auditing the statutory financial report of the parent covering the Group and auditing the statutory financial reports of any controlled entities (including joint operations)
- Fees for assurance services that are required by legislation to be provided by the auditor (e.g. for certain reporting to APRA, Queensland Building & Construction Commission reports, AFSL Form FS 71)
- Fees for other assurance and agreed-upon procedures under other legislation or contractual arrangements (e.g. assurance on revenue information under a royalty agreement, comfort letters or agreed-upon procedures on other reports) when there is discretion as to whether the service is provided by the auditor or another firm
- Fees for other services (e.g. tax compliance).

Additional guidance

AASB 1054:11

The nature and amount of each category of other services provided by a network firm of the auditor of a parent entity shall be disclosed in the notes to the financial statements.

Remuneration of international associates of Deloitte Touche Tohmatsu Australia are disclosed under 'Fees to Deloitte and related network firm'.

'Network firm' is defined in APES 110 *Code of Ethics for Professional Accountants* as 'a Firm or entity that belongs to a Network'.

Firm is defined in APES 110 as:

- A sole practitioner, partnership, corporation or other entity of professional accountants
- An entity that controls such parties through ownership, management or other means
- An entity controlled by such parties through ownership, management or other means, or
- An Auditor-General's office or department.

'Network' is defined in APES 110 as:

'A larger structure:

- (a) That is aimed at co-operation, and
- (b) That is clearly aimed at profit or cost sharing or shares common ownership, control or management, common quality control policies and procedures, common business strategy, the use of a common brand-name, or a significant part of professional resources.'

The definition of 'Network' is to be read in the context of the guidance provided in paragraphs 400.50 A1 to 400.54 A1 of APES 110.

Source

45. Disclosure requirements specific to public sector entities

The following are disclosure requirements specific to public sector entities as required under AASB 1060. Entities should consider the level of detail necessary to satisfy the disclosure objective and how much emphasis to place on each of the various requirements.

Contributions

AASB 1060:215

A government department shall disclose liabilities that were assumed during the reporting period by the government or other entity.

Restructure of administrative arrangements

AASB 1060:216-218

When activities are transferred as a consequence of a restructure of administrative arrangements, a government controlled not-for-profit transferee entity shall disclose the expenses and income attributable to the transferred activities for the reporting period, showing separately those expenses and items of income recognised by the transferor during the reporting period. If disclosure of this information would be impracticable, that fact shall be disclosed, together with an explanation of why this is the case.

For each material transfer, the assets and liabilities transferred as a consequence of a restructure of administrative arrangements during the reporting period shall be disclosed by class, and the counterparty transferor/transferee entity shall be identified. With respect to transfers that are individually immaterial, the assets and liabilities transferred shall be disclosed on an aggregate basis.

Administrative items

AASB 1060:219-220

A government department shall disclose the following in its complete set of financial statements in relation to activities administered by the government department:

- Administered income, showing separately each major class of income
- Administered expenses, showing separately each major class of expense
- Administered assets, showing separately each major class of asset
- Administered liabilities, showing separately each major class of liability.

Details of the broad categories of recipients and the amounts transferred to those recipients shall be disclosed in the government department's complete set of financial statements.

Source

45. Disclosure requirements specific to public sector entities (continued)

Budgetary reporting

AASB 1060:222

Where an entity applies AASB 1055 *Budgetary Reporting* and its budgeted:

- Statement of financial position
- Statement of profit or loss and other comprehensive income
- Statement of changes in equity, or
- Statement of cash flows

reflecting controlled items is presented to parliament and is separately identified as relating to that entity, the entity shall disclose for the reporting period:

- The original budgeted financial statement presented to parliament, presented and classified on a basis that is consistent with the presentation and classification adopted in the corresponding financial statement prepared in accordance with Australian Accounting Standards
- Explanation of major variances between the actual amounts presented in the financial statements and the corresponding original budget amounts.

AASB 1060:223

Where an entity within the General Government Sector (GGs)'s budgeted financial information reflecting major classes of administered income and expenses, or major classes of administered assets and liabilities, is presented to parliament and is separately identified as relating to that entity, the entity shall disclose for the reporting period:

- That original budgeted financial information presented to parliament, presented and classified on a basis that is consistent with the presentation and classification adopted for the corresponding information about administered items disclosed in accordance with AASB 1050 *Administered Items*
- Explanations of major variances between the actual amounts disclosed in the financial statements in accordance with AASB 1050 and the corresponding original budget amounts.

AASB 1060:224

Comparative budgetary information in respect of the previous period need not be disclosed.

AASB 1060:225

When disclosing budgetary information under paragraphs 222–224, an entity shall comply with the requirements in AASB 1055 *Budgetary Reporting*.

Non-contractual income arising from statutory requirements

AASB 1060:230

An entity shall disclose income arising from statutory requirements (such as taxes, rates and fines) recognised during the period, disaggregated into categories that reflect how the nature and amount of income (and the resultant cash flows) are affected by economic factors.

An entity shall consider disclosing information about assets and liabilities recognised at the reporting date in accordance with AASB 1058 *Income of Not-for-Profit Entities*, including the amounts of:

- Receivables that are not a financial asset as defined in AASB 132 (e.g. income tax receivable from a taxpayer)
 - Interest income recognised in relation to such receivables during the period
 - Impairment losses recognised in relation to such receivables during the period
- Financial liabilities relating to
 - prepaid taxes or rates for which the taxable event has yet to occur,
 - future period(s) to which those taxes or rates relate.

Source

45. Disclosure requirements specific to public sector entities (continued)

Non-contractual income arising from statutory requirements (continued)

AASB 1060:231

Other information that may be appropriate for an entity to disclose includes, for each class of taxation income that the entity cannot measure reliably during the period in which the taxable event occurs (see paragraphs B28–B31 of AASB 1058):

- Information about the nature of the tax
- The reason(s) why that income cannot be measured reliably

When that uncertainty might be resolved.

Compliance with parliamentary appropriations and other related authorities for expenditure

AASB 1060:239

An entity shall disclose:

- A summary of the recurrent, capital or other major categories of amounts authorised for expenditure (including parliamentary appropriations), disclosing separately:
 - The original amounts appropriated
 - The total of any supplementary amounts appropriated and amounts authorised other than by way of appropriation (e.g. by the Treasurer, other Minister or other legislative authority)
- The expenditures in respect of each of the items disclosed in (a) above

The reasons for any material variances between the amounts appropriated or otherwise authorised and the resulting associated expenditures, and any financial consequences for the entity of unauthorised expenditure.

AASB 1060:240

For the purposes of resource allocation decisions, including assessments of accountability, AASB 1058 requires that users of financial statements of government departments and other public sector entities that obtain part or all of their spending authority for the period from a parliamentary appropriation be provided with information about the amounts appropriated or otherwise authorised for the entity's use, and whether the entity's expenditures were as authorised.

This information may be based on acquittal processes applied by an entity. When spending limits imposed by parliamentary appropriation or other authorisation have not been complied with, information regarding the amount of, and reasons for, the non-compliance is relevant for assessing the performance of management, the likely consequences of non-compliance, and the ability of the entity to continue to provide services at a similar or different level in the future.

AASB 1060:241

Broad summaries of the major categories of appropriations and associated expenditures, rather than detailed reporting of appropriations for each activity or output, is sufficient for most users of such an entity's financial statements. Determining the level of detail and the structure of the summarised information is a matter of judgement. To develop effective disclosures, entities also subject to AASB 1055 might consider the variance disclosure requirements in that Standard at the same time.

Source

AASB 1060:242

45. Disclosure requirements specific to public sector entities (continued)

Service concession arrangements: grantors that are public sector entities

The objective of the disclosure requirements is for a public sector grantor to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of assets, liabilities, revenue and cash flows arising from service concession arrangements. To achieve this, an entity shall consider disclosing qualitative and quantitative information about its service concession arrangements, including the following:

- A description of the arrangements
- Significant terms of the arrangements that may affect the amount, timing and uncertainty of future cash flows (e.g. the period of the arrangement, re-pricing dates and the basis upon which re-pricing or renegotiation is determined)
- The nature and extent (e.g. quantity, time period, or amount, as appropriate) of:
 - Rights to receive specified services from the operator
 - The carrying amount of service concession assets as at the end of the reporting period, including separate disclosure for existing assets of the grantor reclassified as service concession assets during the reporting period
 - Rights to receive specified assets at the end of an arrangement
 - Renewal and termination options
 - Other rights and obligations (e.g. major overhaul of service concession assets)
 - Obligations to provide the operator with access to service concession assets or other revenue-generating assets
- Changes in arrangements occurring during the reporting period.

AASB 1060:243

The above disclosures provided by an entity are provided individually for each material service concession arrangement or in aggregate for service concession arrangements involving services of a similar nature, in addition to disclosures required by the sections of AASB 1060 covering Property, Plant and Equipment and Investment Property at Cost and Intangible Assets other than Goodwill. Service concession assets of a similar nature may form a subset of a class of assets disclosed in accordance with these sections or may be included in more than one class of assets disclosed in accordance with these sections.

For example, for the purposes of the section covering Property, Plant and Equipment and Investment Property at Cost, a toll bridge may be included in the same class as other bridges, and for the purposes of paragraph 242 of AASB 1060 may be included with service concession assets reported in aggregate as toll roads.

Source

AASB 1060:95

46. Accounting policies

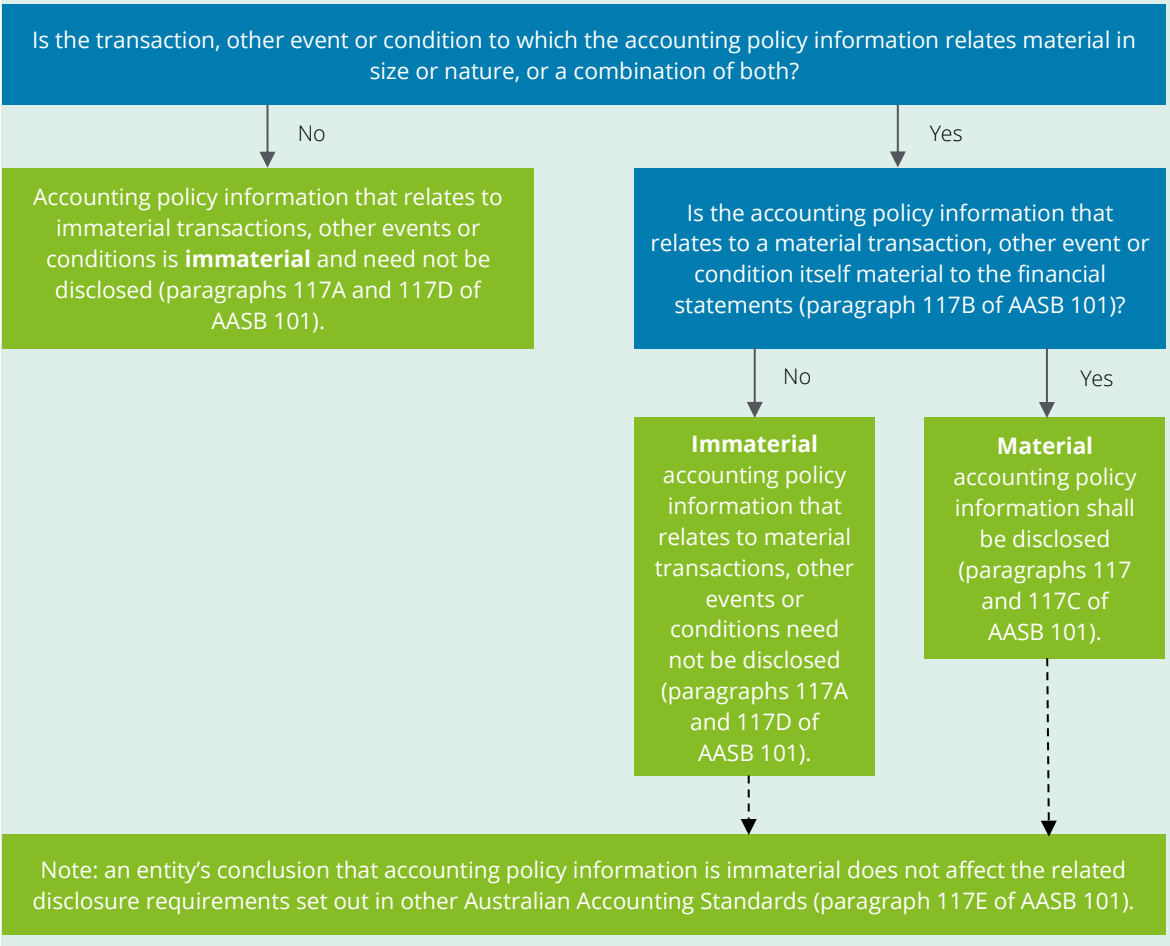

As discussed in *Accounting policy disclosure changes* on page 53, effective for annual reporting periods beginning on or after 1 January 2023, entities are required to disclose material accounting policy information (as opposed to significant accounting policies). Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity.

Additional guidance

The decision tree provided in AASB Practice Statement 2 *Making Materiality Judgements* may be helpful in determining whether accounting policy information is material:

AASB PS 2:88C

Source

AASB 101:117B

46. Accounting policies (continued)

The information in this note is presented as a series of illustrative examples in various situations, and so does not cover all possibilities or situations. When developing material accounting policy disclosures, entities should focus on material, entity-specific information that users of the financial statements need to understand other material information in the financial statements.

Furthermore, material accounting policy information will often arise where an accounting policy relates to an area for which an entity is required to make significant judgements or assumptions in applying an accounting policy, and the entity has disclosed those judgements or assumptions as is required by Australian Accounting Standards. These judgements and assumptions are not fully illustrated in this note (see also Note 3. Judgements and key sources of estimation uncertainty on page 65).

AASB 101:117B(b)

Example accounting policy choices

The following illustrations are quoted by way of examples only, and do not necessarily represent the only treatment which may be appropriate for the item concerned and does not cover all items that should be considered for inclusion as material accounting policy information. However, as these examples represent choices available under Australian Accounting Standards, AASB 101 *Presentation of Financial Statements* notes that such choices might be expected to be material accounting policy information (if the choice relates to material balances or amounts in the financial statements).

For example, an entity may elect, in accordance with the recognition and measurement requirements of Australian Accounting Standards and the presentation and disclosure requirements of AASB 1060 *General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities*, to:

AASB 9:4.1.4

- Make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured at fair value through profit or loss to present subsequent changes in fair value in other comprehensive income

AASB 9:3.1.2

- Recognise financial assets on settlement date or on trade date

AASB 112:78

- Present exchange differences on deferred foreign tax liabilities or assets recognised in the statement of profit or loss and other comprehensive income as deferred tax expense (income)

AASB 116:30, 31

- Measure property, plant and equipment after initial recognition under either the cost basis or revaluation (fair value) basis

AASB 138:74, 75

- Measure intangible assets after initial recognition under either the cost basis or revaluation (fair value) basis, where conditions for doing so are met

AASB 140:6

- Measure investment property under either the cost model or the fair value model

AASB 120:23

- Account for government grants in the form of a non-monetary asset at a nominal amount

AASB 120:24

- Present government grants related to assets as a deduction from the carrying amount of the asset

AASB 120:27

- Deduct government grants received and recognised in the statement of profit or loss and other comprehensive income in reporting the related expense

46. Accounting policies (continued)

Basis of accounting

AASB 1060:91(a)
AASB 1060:95(a)

The financial statements have been prepared on the basis of historical cost, except for certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair values of the consideration given in exchange for goods and services.

AASB 1060:31(d)

For the purpose of the financial statements, the results and financial position of the Group are expressed in Australian dollars ('\$'), which is the functional currency of the Company and the presentation currency for the financial statements.

AASB 1060:95

The material accounting policies are set out below.

Basis of consolidation

AASB 1060:104(a)

Examples where this is likely to be material accounting policy information

- There is a large group with complex interrelationships between entities
- The group has changed its ownership interest in a material subsidiary (including retaining a controlling interest or triggering a loss of control event)
- There are non-controlling interests or puts over non-controlling interests
- There are equity transactions involving entities in the group (e.g. options)
- Significant judgement was required to determine whether particular entities are controlled
- Interests in subsidiaries have been reduced so that control is lost, particularly if a retained interest is accounted for using the equity method

Tips

- Accounting policy information about consolidation would not be included in separate financial statements
- If the entity is an investment entity, information about consolidation would generally not be relevant, unless the entity has material consolidated subsidiaries whose main purpose and activities are to provide services that relate to the investment entity's investment activities

Parent entity information accounting policy

- The accounting policy applied by the parent (Tier 2 Limited) for accounting for its equity accounted investments (i.e. joint ventures and associates) in its separate accounts is disclosed in note 42. Parent entity information

Example policy

The financial statements incorporate the financial statements of all controlled entities for the period during which they are controlled. Note 2 explains the significant judgements made in the control assessment in relation to [Subtwo Limited].

When included (if material)

Consolidated financial statements are prepared, particularly if significant judgements arose in determining subsidiaries

Non-controlling interests arising on the acquisition of [Subsix Limited] during the year have been measured at [the present ownership interests' proportionate share in the recognised amounts arising from the business combination in which [Subsix Limited] was acquired / fair value].

Non-controlling interests arose in a business combination during the current or comparative periods

Source

46. Accounting policies (continued)

Basis of consolidation (continued)

Example policy

When included (if material)

The non-controlling interest arising on acquisition of <i>[Entity name]</i> , which was accounted for as an asset acquisition rather than a business combination, was initially measured at the fair value of the non-controlling interest.	<i>The entity formed or acquired a partly-owned entity that was accounted for as an asset acquisition</i>
Profit and loss and other comprehensive income components are attributed between the members of the Company and the non-controlling interest, even where this has resulted in non-controlling interests having a deficit balance.	<i>Non-controlling interests exist</i>
During the year, the Group increased its interest in <i>[Entity name]</i> from ___ % to ___ % and retained control of the entity. This transaction was accounted for as an equity transaction as an adjustment to non-controlling interests, with the difference between the amount paid for the additional interest and the adjustment to non-controlling interests being recognised directly in equity in the <i>[describe equity component]</i> .	<i>The entity has increased its interest in a previously controlled entity</i>
During the year, the Group disposed of its interest in <i>[Entity name]</i> . The difference between (i) the aggregate of the fair value of the consideration received (\$ ___) and the retained interest (\$ ___) and (ii) the carrying amounts of the subsidiary's net assets <i>[less the non-controlling interests]</i> has been recognised as a <i>[gain/loss]</i> in profit or loss. In addition, amounts previously recognised in other comprehensive income in relation to the subsidiary have been reclassified to profit or loss or transferred to another category of equity.	<i>The entity has disposed of a non-controlling interest during the period</i>

Revenue recognition

Examples where this is likely to be material accounting policy information

- Revenue would be a material balance for most entities and accordingly, accounting policy information would usually be expected to be material

Tips

- Accounting policy information about revenue is best presented together with other information about revenue, as illustrated in these model financial statements (see Note 4. Revenue on page 70)
- Revenue accounting policies often involve the use significant judgements and estimates. For example, judgement is needed in determining an appropriate accounting policy to measure progress toward satisfaction of a performance obligation. The judgements and estimates made in determining an accounting policy should be explained in detail with the policy
- Material accounting policy information about complex revenue arrangements should be explained in entity-specific terms.

Source

46. Accounting policies (continued)

Business combinations

Examples where this is likely to be material accounting policy information

- There have been material business combinations during the year or comparative year
- Material contingent consideration arrangements are in place in respect of past business combinations
- Business combinations involving entities under common control have occurred

Tips

- Policy information about business combinations would only be material accounting policy information in separate financial statements where a direct acquisition of net assets has occurred
- Specific disclosures may be needed if:
 - Business combinations are achieved in stages
 - Business combinations are incomplete by the end of the reporting period in which the combination occurs
 - The optional 'concentration test' was applied in accounting for the business combination
 - Business combinations are combinations under common control.

Example policy

During the year, the Group acquired [SubSix Pty Limited] and [SubSeven Limited]. These acquisitions were business combinations that were accounted for using the acquisition method. This method involves measuring, with limited exceptions, the consideration transferred [(including contingent consideration)], [previously held interests,] identifiable assets acquired and liabilities assumed at their fair values at the acquisition date. Acquisition related costs are recognised in profit or loss as incurred. [The fair value adjustment related to previously held interests in [Entity name] are recognised in profit and loss.]

When included (if material)

A business combination has occurred during the current or comparative periods

Goodwill arose from the business combinations, measured as the excess of [the aggregate] consideration transferred, [non-controlling interests in the acquired entities], [the fair value of previously held interests in the acquired entities] over the acquisition date net assets of the acquired entity.

Goodwill arose in current or comparative period business combinations

In relation to the acquisition of [Entity name], the [aggregate of] consideration transferred, [non-controlling interests in the acquired entities], [the fair value of previously held interests in the acquired entities] was less than the acquisition date net assets of the acquired entity. This excess was recognised in profit or loss as part of accounting for the business combination.

A bargain purchase arose in the current or comparative period business combination

Source

46. Accounting policies (continued)**Business combinations (continued)****Example policy****When included (if material)**

Contingent consideration arising from a business combination is initially measured and subsequently measured at fair value with changes recognised in profit and loss. *[However, in relation to the acquisition of [Entity name], contingent consideration has been classified as equity and is not subsequently remeasured.]*

Contingent consideration arrangements are in place in relation to past business combinations

AASB 3:AusCF11

In respect of AusCF entities, to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the *Framework for the Preparation and Presentation of Financial Statements* (as identified in AASB 1048 *Interpretation of Standards AusCF1*) at the acquisition date.

AASB 3:21B

The *Conceptual Framework for Financial Reporting* defines a liability as 'a present obligation of the entity to transfer an economic resource as a result of past events'. For a provision or contingent liability that would be within the scope of AASB 137, the acquirer shall apply paragraphs 15–22 of AASB 137 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of Interpretation 21, the acquirer shall apply Interpretation 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

AASB 3:AusCF21B

Notwithstanding paragraph 21B, in respect of AusCF entities, the *Framework for the Preparation and Presentation of Financial Statements* (as identified in AASB 1048 *Interpretation of Standards*) defines a liability as 'a present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits'. For a provision or contingent liability that would be within the scope of AASB 137, the acquirer shall apply paragraphs 15–22 of AASB 137 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of Interpretation 21, the acquirer shall apply Interpretation 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

Source

46. Accounting policies (continued)

Impairment of goodwill

Examples where this is likely to be material accounting policy information

- A business combination during the year has resulted in a material addition to goodwill
- Goodwill has been impaired during the current or comparative period
- There is a disposal of a cash-generating unit to which goodwill has been allocated

Tips

- May include further disclosures if the Group reorganises its reporting structure in a way that changes the composition of one or more CGUs to which goodwill has been allocated.

Example policy

Goodwill is not amortised. The Group has allocated goodwill to cash-generating units or group of cash-generating units and tests the goodwill for impairment at least annually. Where the recoverable amount is less than the carrying amount of cash-generating unit, the impairment loss is recognised by first reducing goodwill (which is never reversed) and allocating any remaining impairment to other assets that are part of the cash-generating unit.

When included (if material)

The entity has goodwill

Equity method

AASB 1060:125(a)
AASB 1060:129(a)

Examples where this is likely to be material accounting policy information

- There are material equity method investments in the current year and/or comparative year
- There have been acquisitions of equity method investments during the year or comparative year
- An ownership interest in an equity method investment is reduced but the entity continues to use the equity method
- An equity accounted investment ceases to be an equity accounted for investment

Tips

- If the investment qualifies for exemption from equity method in accordance with AASB 128:16 update the wording below accordingly

Parent entity information accounting policy

The accounting policy applied by the parent (Tier 2 Limited) for accounting for its equity accounted investments (i.e. joint ventures and associates) in its separate financial statements are disclosed in note 42. Parent entity information.

Example policy

The Group accounts for its investments in *[associates / joint ventures]* using the equity method.

When included (if material)

The entity has investments in associates and/or joint ventures that are accounted for using the equity method

Source

46. Accounting policies (continued)**Equity method (continued)****Example policy****When included (if material)**

The Group accounts for its investment in *[associate/joint venture]* *[Entity name]*, at fair value through profit or loss.

The entity has investments in associates and/or joint ventures that are accounted for at fair value through profit or loss in accordance with AASB 128 paragraphs 18 and 19

During the year, the Group acquired *[Entity name]*. This is an acquisition of *[an associate / a joint venture]* accounted for using the equity method. This method involves initially recognising the investment at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the *[associate / joint venture]*.

Acquisition of an equity accounted for investment occurred during the current or comparative periods

[When the Group's share of losses exceeds the Group's interest in that [associate / joint venture] (which includes any long-term interests that, in substance, form part of the Group's net investment in the [associate / joint venture]), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the [associate / joint venture]].

The group's share of losses exceeds the carrying amount of the investment

The Group reduced its ownership interest in *[associate / joint venture]* *[Entity name]* during the year. The Group continues to use the equity method. The Group reclassified to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest.*

A reduction in an ownership interest of an equity accounted investment occurred during the current or comparative periods

**Reclassified to profit or loss if the gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.*

The Group discontinued the use of the equity method from *[date]* for *[associate / joint venture]* *[Entity name]* when it ceased to be *[an associate / a joint venture]*. On this date the Group measured the retained interest at fair value which is regarded as its fair value on initial recognition in accordance with AASB 9 *Financial Instruments*.

An equity accounted investment is classified as held for sale investment during the current or comparative periods or ceases to be an equity accounted investment during the current or comparative periods and an interest in the former equity accounted investment was retained.

Source

46. Accounting policies (continued)

Interests in joint operations

Examples where this is likely to be material accounting policy information

- There have been acquisitions of joint operations during the year or comparative year
- Material sales or contributions of assets to a joint operation
- Material purchases of assets from a joint operation.

Example policy

During the year, the Group acquired [Entity name]. This is an acquisition of a joint operation which the Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the Accounting Standards applicable to the particular assets, liabilities, revenues and expenses.

When included (if material)

An acquisition of a joint operation occurred during the current or comparative periods

AASB 11:B34

[Entity name in the group] [describe the nature of the transaction/s between the group entity and its joint operation such as the sale or contribution of assets] to [it's joint operation / joint operation name] in which [entity name in the group] is a joint operator. The gains and losses resulting from these transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

Transactions (such as the as the sale or contribution of assets) occurred between an entity in the group and its joint operation(s)

AASB 11:B36

[Entity name in the group] [describe the nature of the transaction/s between the group entity and its joint operation such as purchases assets] from [it's joint operation / joint operation name] in which [entity name in the group] is a joint operator. The Group [does not recognise its share of the gains and losses from these transactions until it resells those assets to a third party / explain policy].

Transactions (such as the purchase of assets) occurred between an entity in the group and its joint operation(s)

Leases

Examples where this is likely to be material accounting policy information

- The entity's right-of-use assets are material
- The majority of a material fixed assets balance represents leased assets
- Significant change in level of leased assets has occurred
- Material sale and leasebacks have occurred
- The entity is an intermediate entity in sublease transactions

Tips

- Lease accounting requires significant judgements and assumptions to be made. However, it does not necessarily mean that the accounting policy is material. Entities would need to consider separately whether they should include accounting policy disclosures for their activities as lessee and lessor.

Source

46. Accounting policies (continued)**Leases (continued)****The Group as lessee****Example policy****When included (if material)**

The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee [except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a [straight-line basis over the term of the lease / describe another systematic basis if it is more representative of the time pattern in which economic benefits from the leased assets are consumed].

The Group is a lessee (include the policy choice election and related discussion on short-term and low value leases only where these leases are in place and are material)

The Group has elected to apply the revaluation model to right-of-use assets relating to [class of property, plant and equipment to which the Group applies the revaluation model in AASB 116 'Property, Plant and Equipment].

The entity has elected to apply the revaluation model in AASB 116 to all right-of-use assets that relate to a class (or classes) of property, plant and equipment

The Group has applied an available practical expedient, [to leases for __ class of underlying asset], to not separate lease and non-lease components and treat them as a single lease component. These arrangements comprise approximately __ % of the Group's lease arrangements (by value).

The practical expedient in AASB 16 has been applied and has a material impact on amounts recognised

During the year, the group remeasured the lease liability (with adjustments to the related right-of-use asset) to reflect [changes to lease terms of individual lease / changes in indexes and rates / modifications to leases that were not accounted for as separate leases].

Changes in lease terms, changes in payments or modifications have occurred and have materially increased or decreased the lease liability

The Group as lessor**Example policy****When included (if material)**

The Group is a lessor under lease agreements involving its [investment properties and/or certain equipment provided to retailers]. These leases are classified as [operating or finance leases respectively].

The Group is a lessor

In addition, the Group is an intermediate sub-lessor in respect of [describe asset, e.g. certain investment properties]. This lease has been classified as a [finance lease as the lease terms of the sublease are such that the Group transfers to the lessee substantially all the risks and rewards of the head leased right-of-use asset (e.g. terms of head lease and sublease are identical)

The group is the intermediate lessor in a sublease arrangement

Or

operating lease as the terms of the sublease are such that the Group retains substantially all the risks and rewards of the head leased right-of-use asset].

Source

46. Accounting policies (continued)**Leases (continued)****Sale and leaseback transactions****Example policy**

During the year, the Group legally sold [Asset X] to a third party, and simultaneously entered into a lease over the asset for ___ years. The Group as the seller/lessee assessed that control of the underlying asset passed to the customer (buyer/lessor) and therefore the transaction was a sale and recognised a [gain/loss] only on those rights transferred to buyer-lessor. [The lease arrangement contains variable lease payments which have been taken into account in the lease payment and revised leased payments when determining the amount of the [gain/loss] recognised.]

When included (if material)

Sale and leaseback transactions have occurred

Leases at significantly below-market terms and conditions (concessionary leases) (not-for-profit entities and public sector entities)

For concessionary leases, the Group has decided to make use of the option in AASB 16 to measure the right-of-use assets at cost on initial recognition. The Group has also made the necessary disclosures in note 31 for each material concessionary lease as required by AASB 16:Aus59.1-2.

The Group has also decided to apply AASB 16 to treat right-of-use assets arising under concessionary leases as a separate class of right-of-use assets to right-of-use assets arising under other leases for the purposes of AASB 16.

AASB 1060:112

Financial instruments**Examples where this is likely to be material accounting policy information**

- There is a change in policy during the period
- The entity entered into material financial instrument transactions during the year or comparative year, or has material financial instruments on the statement of financial position
- The entity has elected to classify equity instruments at fair value through other comprehensive income
- The entity has derivative financial instruments, hedging arrangements, compound financial instruments, embedded derivatives or debt instruments measured at fair value through other comprehensive income

Tips

- Information about the measurement basis (or bases) for financial instruments used in preparing the financial statements is expected to be material accounting policy information (AASB 1060:112).

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Example policy**

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables which are initially measured at the transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities *[(other than financial assets and financial liabilities at fair value through profit or loss)]* are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. *[Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.]*

When included (if material)

Most entities would require this accounting policy, but it should be edited to exclude items that are not applicable

Financial assets**Example policy**

All regular way purchases or sales of financial assets are recognised and derecognised on a *[trade date basis / settlement date basis]*.

When included (if material)

For financial assets where relevant (for instance, this disclosure would not be required for trade receivables)

The majority of the Group's debt instruments are subsequently measured at amortised cost.

Debt instruments meet the requirements to be classified at amortised cost in AASB 9:4.1.2

However, certain debt instruments are subsequently measured at fair value through other comprehensive income (FVTOCI) where they are held as part of the Group's business model to both collect contractual cash flows and sell financial assets, and the debt instruments represent cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments are measured at FVTOCI in accordance with AASB 9:4.1.2A.

Other financial assets are subsequently measured at fair value through profit or loss (FVTPL) *[with the exception of the Group's interest in certain equity instruments for which gains/losses arising from movements in fair value are recognised in other comprehensive income and dividends are recognised in profit or loss] [and] [the Group's investment in redeemable preference shares which are measured at fair value through other comprehensive income (FVTOCI) (see below)]*.

Other instruments are in place

[The redeemable cumulative preference shares] held by the Group are classified as FVTOCI. The instruments are initially measured at fair value plus transaction costs and subsequent changes in fair value are recognised in profit and loss to the extent they would have arisen if the redeemable cumulative preference shares were measured at amortised cost. All other movements are recognised in other comprehensive income in the *[investments revaluation reserve / name other reserve]* and will be reclassified to profit and loss when the instruments are derecognised.

The entity has debt instruments at FVTOCI

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Impairment of financial assets**

Although some of the disclosures below are derived from disclosure requirements under AASB 7 *Financial Instruments: Disclosures*, they may represent material accounting policy information in Tier 2 financial reports depending on the entity's circumstances.

Example policy

The Group recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, trade receivables and contract assets, as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- An actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating
- Significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost
- Existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations
- An actual or expected significant deterioration in the operating results of the debtor
- Significant increases in credit risk on other financial instruments of the same debtor.

An actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

When included (if material)

Most entities would include this policy. More detail may be required (such as the examples in the paragraphs that follow)

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)*****Impairment of financial assets (continued)*****Example policy*****When included (if material)***

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- When there is a breach of financial covenants by the debtor; or
- Information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group).

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- Significant financial difficulty of the issuer or the borrower
- A breach of contract, such as a default or past due event
- The lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation, or
- The disappearance of an active market for that financial asset because of financial difficulties.

The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

The measurement of expected credit losses is a function of the probability of default, loss given default and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Financial liabilities and equity****Example policy****When included (if material)**

Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Equity instruments have been issued during the current or comparative periods

Repurchase of the Group's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments

Equity instrument have been repurchased during the current or comparative periods

The component parts of convertible loan notes issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements. The financial liability component is measured on an amortised cost basis using the effective interest rate method. The conversion option is classified as equity and is not remeasured. The conversion option remains in equity until the conversion option is exercised, in which case the balance recognised in equity will be transferred to *[other equity [describe]]*. Where the conversion option remains unexercised at the maturity date of the convertible loan note, the balance recognised in equity will be transferred to *[retained earnings/other equity [describe]]*.

Convertible notes are on issue

[The majority of] financial liabilities are measured subsequently at amortised cost using the effective interest rate method. [However, financial liabilities are classified as at FVTPL when the financial liability is [contingent consideration of an acquirer in a business combination / held for trading / designated as at FVTPL]. Such financial liabilities are subsequently measured at fair value with gains or losses recognised in profit or loss [except, in the case of financial liabilities designated at FVTPL, the change in fair value attributable to changes in credit risk of the liability is recognised in other comprehensive income]].

Most entities would include this policy

Financial guarantee contract liabilities are measured initially at their fair values and, if not designated as at FVTPL and do not arise from a transfer of an asset, are measured subsequently at the higher of:

Financial guarantee contract liabilities are in place

- The amount of the loss allowance determined in accordance with AASB 9 (see financial assets above)
- The amount recognised initially less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Derivative financial instruments****Example policy**

The Group enters into a variety of derivative financial instruments to manage its exposure to *[interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and cross currency swaps]*. Derivatives are initially recognised at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately *[unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship]*.

When included (if material)

Derivative financial instruments are in place

Embedded derivatives

Embedded in the Group's borrowings from [Bank] is a call option allowing the Group to call the borrowings at any time, but would have to redeem the borrowings at a fixed amount of \$ __. The call option] is an embedded derivative which is treated as separate derivative as it meets the definition of a derivative, its risks and characteristics are not closely related to the *[borrowings]* and the *[borrowings]* are not measured at FVTPL.

Embedded derivatives are in place

Hedge accounting**Example policy**

The Group designates certain derivatives as hedging instruments in respect of *[foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations]*. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

When included (if material)

The entity applies hedge accounting

The Group designates the full change in the fair value of a forward contract (i.e. including the forward elements) as the hedging instrument for all of its hedging relationships involving forward contracts.

The Group designates only the intrinsic value of option contracts as a hedged item, i.e. excluding the time value of the option. The changes in the fair value of the aligned time value of the option are recognised in other comprehensive income and accumulated in the cost of hedging reserve. If the hedged item is transaction-related, the time value is reclassified to profit or loss when the hedged item affects profit or loss. If the hedged item is time-period related, then the amount accumulated in the cost of hedging reserve is reclassified to profit or loss on a rational basis – the Group applies *[straight-line amortisation]*.

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Hedge accounting (continued)***Fair value hedges***Example policy****When included (if material)**

The fair value change on qualifying hedging instruments is recognised in profit or loss *[except when the hedging instrument hedges an equity instrument designated at FVTOCI in which case it is recognised in other comprehensive income]*.

Fair value hedges are in place

The carrying amount of a hedged item not already measured at fair value is adjusted for the fair value change attributable to the hedged risk with a corresponding entry in profit or loss. *[For debt instruments measured at FVTOCI, the carrying amount is not adjusted as it is already at fair value, but the hedging gain or loss is recognised in profit or loss instead of other comprehensive income.] [When the hedged item is an equity instrument designated at FVTOCI, the hedging gain or loss remains in other comprehensive income to match that of the hedging instrument.]*

Where hedging gains or losses are recognised in profit or loss, they are recognised *[in the same line as the hedged item]*.

Cash flow hedges

The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve, limited to the cumulative change in fair value of the hedged item from inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss and is included in the 'other gains and losses' line item.

Cash flow hedges are in place

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are removed from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Source

AASB 1060:112

46. Accounting policies (continued)**Financial instruments (continued)****Hedge accounting (continued)***Hedges of net investment in foreign operations***Example policy**

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of a hedge of a net investment is recognised in other comprehensive income and accumulated under the heading of *[foreign currency translation reserve / name other reserve]*. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss and is included in the *[other gains and losses]* line item in profit or loss.

Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal of the foreign operation.

When included (if material)

Hedges of net investments are in place

Non-current assets held for sale**Examples where this is likely to be material accounting policy information**

- The entity has material non-current assets held for sale.

Example policy

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

When included (if material)

The entity has assets classified as held for sale

Source

46. Accounting policies (continued)**Foreign currencies and operations****Examples where this is likely to be material accounting policy information**

- The entity has material foreign currency transactions or foreign operations
- The entity has disposed of a foreign operation during the current or comparative periods.

Example policy

In preparing the financial statements, transactions in currencies other than the Group's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions *[(using monthly exchange rate averages / state other policy)]*.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are generally recognised in profit or loss in the period in which they arise. *[Where material foreign currency gains or losses are recognised outside of profit or loss, provide details, e.g. in relation to capitalisation of borrowing costs into qualifying assets, hedging foreign currency risks or related to a net investment in foreign operation.]*

Net exchange differences arising on the translation of foreign operations into the presentation currency of the Group are recognised in other comprehensive income. Exchange differences relating to a disposed foreign operation are reclassified to profit or loss on disposal.

When included (if material)

Material foreign currency transactions or balances exist

The entity has foreign operations

Source

46. Accounting policies (continued)

Borrowing costs

 **Examples where this is likely to be material accounting policy information**

- Material borrowing costs have been capitalised into qualifying assets

Tips

- Not-for-profit public sector entities have an accounting policy choice on whether to capitalise borrowing costs into qualifying assets, and these entities should include information about their chosen accounting policy, as it is likely to be material accounting policy information.

AASB 123:Aus8.1

Example policy	When included (if material)
Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.	<i>Borrowing costs have been capitalised into qualifying assets</i>

AASB 1060:163

The entity, as a not-for-profit public sector entity, has elected under AASB 123 <i>Borrowing Costs</i> , not to capitalise borrowing costs into qualifying assets.	<i>The entity is a not-for-profit entity that has chosen not to capitalise borrowing costs into qualifying assets. (Where the election is to capitalise, the policy should instead be based on the wording above)</i>
---	---

AASB 1060:160(d)

Government grants

 **Examples where this is likely to be material accounting policy information**

- The entity has received a material level of government grants during the current or comparative periods
- The entity has received government grants related to assets in the past and a material level of unamortised grant remains in the statement of financial position

Tips

- Given the choice available in how government grants related to assets are presented, entities with material levels of such grants should include accounting policy information about their choice of presentation
- Where the entity receives government support in the form of investment tax credits (e.g. the Australian research and development regime), the entity may have an accounting policy choice in whether to treat such credits as a government grant or an income tax. In this case, the entity should explain the accounting policy used to account for such credits.

Source

AASB 1060:160(d)

46. Accounting policies (continued)**Government grants (continued)****Example policy**

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as *[deferred revenue in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets / as a reduction in the carrying amount of the related asset, which is then recognised as a reduced depreciation expense]*.

When included (if material)

The entity has received government grants related to asset

Retirement and termination benefits costs**Examples where this is likely to be material accounting policy information**

- The entity participates in defined benefit retirement benefit plans
- The entity has provided material termination benefits in the current or comparative periods.

Example policy

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each annual reporting period. The retirement benefit obligation recognised in the consolidated statement of financial position represents the deficit or surplus in the Group's defined benefit plans.

When included (if material)

The entity participates in defined benefit retirement benefit plans

[The Trust Deed for [XYZ plan] provides Tier 2 Limited with an unconditional right to a refund of surplus assets assuming the full settlement of plan liabilities in the event of a plan wind-up. Furthermore, in the ordinary course of business the Trustee has no rights to unilaterally wind up, or otherwise augment the benefits due to members of, the plan. Based on these rights, any net surplus in the plan is recognised in full.]

The entity has an entitlement to refunds from the plan for any surplus

During 2024, the Group offered voluntary redundancies to employees in the *[XYZ division]*. A liability for the termination benefits was recognised *[when the Group could no longer withdraw the offer / when the Group recognised the related restructure costs]*.

The entity has provided termination benefits during the current or comparative periods

Source

46. Accounting policies (continued)**Short-term and long-term employee benefits****Examples where this is likely to be material accounting policy information**

- The entity has material non-standard employee benefits (e.g. sabbatical leave, additional leave arrangements, maternity leave arrangements in addition to legal requirements)

Tips

- In the majority of cases, accounting policy information about short-term and long-term employee benefits is unlikely to be material
- However, where material non-standard employee benefits are in place, information about those arrangements and how they are accounted for may be useful to users.

Taxation**Examples where this is likely to be material accounting policy information**

- The entity is subject to, or expected to be subject to, Pillar Two income taxes
- There are uncertain tax positions
- There has been a change in tax status of the entity or its operations
- A tax-consolidated group or multiple entry consolidated group has been formed
- The entity expects to dispose of operations in a tax-consolidated group and has formed a policy on how to account for 'outside basis differences' in relation to those operations
- A new tax has been substantively enacted and will apply to the entity
- Material investment properties exist
- Material amounts of current and deferred tax are recognised outside of profit or loss

Tips

- In the current period, the entity may have changed its accounting policy in relation to the initial recognition of an asset or liability in a transaction which at the time of the transaction, gives rise to equal taxable and deductible temporary differences (e.g. right-of-use assets and lease liabilities and decommissioning, restoration and similar liabilities and the corresponding amounts recognised as part of the cost of the asset). This change in accounting policy may trigger a requirement for the disclosure of material accounting policy information. However, where information about the change in accounting policy has been provided elsewhere in the financial statements, this would be sufficient to meet these requirements
- An entity that is subject to, or expected to be subject to, Pillar Two income taxes should note that the mandatory exception from the recognition and disclosure of deferred taxes arising from Pillar Two taxes has been applied.

Example policy

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Group supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

When included (if material)

The Group has uncertain tax positions

Source

46. Accounting policies (continued)**Taxation (continued)****Example policy****When included (if material)**

Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. However, deferred taxes arising from OECD Pillar Two taxes have not been recognised.

Deferred tax balances exist

The Group has recognised a net deferred tax asset in respect of its Australian operations of \$ ___ (2023: \$ ___). This balance comprises the tax effect of tax losses, deductible temporary differences arising in respect of Australian assets and liabilities, net of taxable temporary differences. The directors have assessed the net deferred tax asset amount recognised *[based on taxable profit forecasts based on the Group's budget for the next financial year and forecasts for the following four years, which have been approved by the directors. The directors believe this is the longest period that accurate forecasts of taxable profits can be made due to the cyclical nature of the Group's businesses.]*

Net deferred tax assets have been recognised and significant judgement was required in determining the amount of such assets recognised

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The directors reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption is not rebutted and deferred taxes related to the Group's investment properties reflect the expected tax consequences of selling the investment properties.

The entity has investment properties

During the year, the Group formed a tax-consolidated group. The head company in the tax-consolidated group is Tier 2 Limited. As a result of the formation of the tax-consolidated group, the tax bases of the other entities in the tax-consolidated group were 'reset' in accordance with tax law. As a result, the deferred taxes associated with the Group's assets and liabilities were remeasured and a *[gain]* recognised in income tax expense *[, other comprehensive income or directly in equity as appropriate].*

The Group has formed a tax-consolidated group during the period. This wording can also be adapted where an entity joins a tax-consolidated group

Source

46. Accounting policies (continued)

Goods and services tax

Examples where this is likely to be material accounting policy information

- There are material GST amounts receivable or payable.

Example policy

Amounts in the financial statements are generally recognised net of the amount of goods and services tax (GST), except where GST incurred is not recoverable from the taxation authority. However, receivables and payables are recognised and cash flows including in the statement of cash flows are recognised on a gross basis (i.e. inclusive of GST).

When included (if material)

There are material GST amounts receivable or payable

Property, plant and equipment

Examples where this is likely to be material accounting policy information

- Material property, plant and equipment exists

Tips

- Entities have a choice in whether to subsequently measure property, plant and equipment under the cost model or the revaluation model. As this is an accounting policy choice, this is likely to be material accounting policy information. However, this accounting policy choice can be communicated in the description of property, plant and equipment in the relevant note, rather than necessarily being subject to the presentation of a separate accounting policy
- Entities also need to disclose information in relation to property, plant and equipment required by AASB 1060 where it is considered material, e.g. useful lives or depreciation rates. This information is sometimes included in accounting policy notes.

Example policy

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluation increments and decrements are generally recognised in other comprehensive income.

When included (if material)

The revaluation model is elected under AASB 116

Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs.

Capital work in progress exists

Plant and equipment is stated at cost less accumulated depreciation and accumulated impairment losses.

The cost model under is elected under AASB 116

Depreciation is recognised using [the straight-line method / reducing balance method / describe]

Material property, plant and equipment balances exist"

AASB 1060:134(a)

AASB 1060:134(b)

Source

46. Accounting policies (continued)

Investment property

Examples where this is likely to be material accounting policy information

- Material investment properties are held
- The fair value of certain investment properties cannot be reliability measured
- Material transfers to or from property, plant and equipment have occurred on a change in use of property

Tips

- Entities have a choice in whether to subsequently measure investment properties under the fair value model or cost model. As this is an accounting policy choice, this is likely to be material accounting policy information. However, this accounting policy choice can be communicated in the description of investment property in the relevant note, rather than necessarily being subject to the presentation of a separate accounting policy.

Example policy

Investment property (including property under construction) is measured initially at cost, including transaction costs and is subsequently measured at fair value. Gains or loss arising from changes in fair value are recognised in profit or loss.

When included (if material)

Investment property exists

[However, in respect of [describe the property, e.g. a property under construction], the directors have determined that the fair value of the property cannot be reliably measured [on a continuing basis – provide reasons / until construction is complete or near complete and a reliable measure of fair value can be determined]

The entity has investment property for which the fair value cannot be reliably measured

Land under roads

An entity which applied AASB 1051 *Land Under Roads* shall disclose material accounting policy information for land under roads acquired before the end of the first reporting period ending on or after 31 December 2007, in each reporting period to which AASB 1051 is applied.

AASB 1060:221

Intangible assets

Examples where this is likely to be material accounting policy information

- Material intangible assets exist
- The entity undertakes research and development activities

Tips

- Entities also need to disclose information in relation to intangible asset required by AASB 1060 where it is considered material, e.g. amortisation rates. This information is sometimes included in accounting policy notes.

Source

46. Accounting policies (continued)**Intangible assets (continued)****Example policy****When included (if material)**

[Capitalised development, patents and licences] have finite useful lives are carried at cost less accumulated amortisation and accumulated impairment losses. [The cost of intangible assets acquired in a business combination is the fair value of the intangible asset at the acquisition date.] Amortisation is recognised on [a straight-line basis / describe basis] over their estimated useful lives.

Intangibles with finite lives exist

[[Describe the intangible asset(s)] have been assessed as having indefinite useful lives and are not amortised. This assessment was made on the basis that [describe reasons for concluding the intangible assets have indefinite useful lives]

Intangibles with indefinite useful lives exist

[[Capitalised development] arises from the development phase of internal research and development activities and expenditure is capitalised only if it meets criteria including demonstrated technical feasibility and the availability of adequate technical, financial and other resources to complete the development and use the or sell the intangible asset. Other research and development expenditure is recognised in profit or loss.]

The entity undertakes research and development activities

Impairment of non-financial assets**Examples where this is likely to be material accounting policy information**

- The entity has goodwill and/or intangible assets with indefinite useful lives or which are not yet available for use
- There have been indicators of impairment or reversals of impairment during the period
- An impairment loss, or reversal of an impairment loss, has been recognised during the period
- Restructures have occurred and goodwill has been reallocated to the cash generating units affected

Tips

- The amount of mandatory information required by AASB 1060 in relation to impairment is substantially less than required in Tier 1 financial statements. Accordingly, when developing material accounting policy information disclosures, entities complying with Australian Accounting Standards – Simplified Disclosures may wish to consider the disclosure requirements of AASB 136 *Impairment of Assets* when determining matters to include in accounting policy disclosures. The examples below illustrate this approach
- When providing accounting policy information about impairment, an entity should consider the connectivity of information, particularly in relation to climate and other sustainability matters. For instance, if information provided in the directors' report or elsewhere discusses emission reduction targets, the accounting policy information could explain how those targets have impacted the assumptions, cash flows and other information used in testing for impairment.

Source

46. Accounting policies (continued)**Impairment of non-financial assets (continued)****Example policy****When included (if material)**

During the year, the Group carried out a review of the recoverable amount of its *[describe, e.g. manufacturing plant and the related equipment]*. The operation was tested for impairment because *[the performance of the operations in the cash generating unit have been worse than expected / describe the impairment indicator(s)]*.

The entity has undertaken an impairment test on a cash-generating unit that does not contain goodwill or intangible assets with indefinite useful lives or which are not yet available for use

The review led to the recognition of an impairment loss of \$ ___, which has been recognised in profit or loss. The Group also estimated the fair value less costs of disposal of the *[describe the business]*, which is based on the recent market prices of assets with similar age and obsolescence. The fair value less costs of disposal is less than the value in use and hence the recoverable amount of the relevant assets has been determined on the basis of their value in use. The *[manufacturing plant and the related equipment]* were impaired to their recoverable amount based on value in use of \$ ___, which is their carrying value at year end.

The discount rate used in measuring value in use was ___ %. No impairment assessment was performed in 2023 as there was no indication of impairment.

The Group undertook an impairment test of cash-generating units to which goodwill has been allocated, being *[describe the cash-generating unit to which goodwill has been allocated – or if more than one, the units, which case the information below could be repeated for each such unit]*.

Goodwill exists

The recoverable amount of the *[cash-generating unit description]* was determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period and a discount rate of ___ % (2023: ___ %) calculated *[describe the method used to determine the discount rate]*. Key assumptions used in the calculation included *[forecast sales growth rate, operating profits and a steady growth rate]* determined by the directors based on past performance and expectations of market development.

The recoverable amount exceeds the carrying amount of *[describe the cash-generating unit]* by *[a significant margin / or if the headroom is not significant, provide more analysis so that users can determine the likelihood of impairment losses in future periods]*.

Inventories

Examples where this is likely to be material accounting policy information

- Inventories are material
- Inventories are measured at net realisable value (such as agricultural and forest products, agricultural produce after harvest, minerals and mineral products)
- The entity is a commodity broker-trader that measures inventories at fair value less costs to sell

Tips

- AASB 1060 requires an entity to identify material accounting policy information in relation to inventory, including the cost formula used (AASB 1060:123(a)). This information can be communicated in the description of inventories in the relevant note rather than necessarily being subject to the presentation of a separate accounting policy
- Not-for-profit entities are required to disclose the basis on which any loss of service potential of inventories held for distribution is assessed, or the bases when more than one basis is used (AASB 1060:124). See note 4. *Revenue - Donated inventories* on page 74 for an illustrative disclosure.

Example policy

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the *[weighted average cost method / describe method]*.

When included (if material)

Inventories exist

AASB 1060:112

Fair value measurements

Tips

- Accounting policy information about fair value measurements based on the requirements of Australian Accounting Standards is unlikely to be material. However, information about how fair value measurements have been determined, including key assumptions and methods used is likely to be material accounting policy information. This information would be provided as part of the disclosures about fair value in the relevant notes (see for example Note 11 on page 82).

Source

46. Accounting policies (continued)

Provisions

Examples where this is likely to be material accounting policy information

- The Group has material provisions in the current reporting period (initially recognised in the current or prior reporting periods)

Tips

- For each class of provision, AASB 1060:153(b) requires *a brief description of the nature of the obligation and the expected amount and timing of any resulting payments*. The example policies below include descriptions of the Group's provisions which could be disclosed in the relevant note instead.

Example policy

The Group recognises a provision for *[list the class of provisions]* at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

The Group measures its provisions using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When included (if material)

Provisions recognised in the current or comparative reporting period

Restructurings

The Group recognised a restructuring provision *[describe e.g. when the Group developed a detailed formal plan for the restructuring and had raised a valid expectation in those affected that it would carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it]*. The measurement of this restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

A restructuring provision has been recognised in the current or comparative reporting period

Warranties

Provisions for the expected cost of warranty obligations *[describe what creates the warranty obligation e.g. under local sale of goods legislation]* are recognised *[timing e.g. at the date of sale of the relevant products]*, at *[measurement e.g. the directors' best estimate of the expenditure required to settle the Group's obligation]*.

A warranty provision has been recognised in the current or comparative reporting periods

Onerous contracts

The Group has *[describe the contract/s]* under which the unavoidable costs of meeting *[describe the obligations]* under the contract exceed the economic benefits expected to be received under it. The present obligation arising under *[this/these]* onerous contract[s] is recognised and measured as a provision.

An onerous contract provision has been recognised in the current or comparative reporting periods

Source

46. Accounting policies (continued)**Provisions (continued)****Example policy****When included (if material)****Restoration provisions**

The Group is required to [nature of the restoration obligation e.g. restore leased plant assets to their original condition, as required by the terms and conditions of the lease] and recognised/[recognises] a restoration provision when it incurred/[incurs] the obligation which is [timing e.g. either at the commencement date or as a consequence of having used the underlying asset during a particular period of the lease]. This restoration provision is measured at [measurement e.g. the directors' best estimate of the expenditure that would be required to restore the assets. Estimates are regularly reviewed and adjusted as appropriate for new circumstances].

Restoration provisions has been recognised in the current or comparative reporting periods

Contingent liabilities acquired in a business combination

Contingent liabilities acquired in a business combination are initially measured at fair value at the date of acquisition. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with AASB 137 Provisions, Contingent Liabilities and Contingent Assets and the amount initially recognised less cumulative amortisation recognised in accordance with AASB 15 Revenue from Contracts with Customers.

Contingent liabilities have been acquired in a business combination recognised in the current or comparative reporting periods

Share-based payment**Examples where this is likely to be material accounting policy information**

- Material share-based payments are in place
- The entity is a member of a broader group and employees of the entity receive share-based payment awards in a parent entity
- Share-based payment arrangements arise in connection with a business combination
- Modifications to existing share-based payment arrangements have resulted in material acceleration of the expense.

Example policy**When included (if material)**

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments excludes the effect of non-market-based vesting conditions and is expensed on a straight-line basis over the vesting period, based on the Group's estimate of the number of equity instruments that will eventually vest.

The entity has equity settled share-based payments with employees and others providing similar services

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the Group obtains the goods or the counterparty renders the service.

The entity enters into share-based payments with parties other than employees and others providing similar services

AASB 1060:167

Source

46. Accounting policies (continued)**Share-based payment (continued)****Example policy****When included (if material)**

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At each reporting date until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

Cash-settled share-based payments are in place

As part of the acquisition of *[Entity name]*, the share-based payment awards held by the employees of an acquiree (acquiree awards) were replaced by the Company's share-based payment awards (replacement awards).

Share-based payment awards have been replaced in a business combination

[The allocation of the value of the replacement awards between consideration for the business combination and post-combination remuneration costs was determined based on a market-based measure of the acquiree's awards and replacement awards and the original and revised vesting periods.]

OR

[Because the acquiree awards expired as a consequence of the business combination and the Group replaced those awards when it did not have an obligation to do so, the replacement awards were measured at their market-based measure and all of that amount was recognised as remuneration cost for post-combination service (i.e. expensed in profit or loss.)]

[Under a share-based payment scheme in place in the broader group, [Ultimate controlling entity name] has granted share options to employees of the Group in respect of those employee's service to the Group. The Group does not have an obligation to settle the share-based payment transactions and accordingly, the Group has treated these arrangements as equity-settled share-based payment arrangements.]

The entity's employees receive share-based payment awards from a parent.

[Under recharge arrangements in place between the Group and [Ultimate controlling entity name], the Group is obliged to pay an amount to the parent based on the value of the share-based awards upon settlement of the award by the parent. The Group recognises this obligation on exercise of the award by the employee and treats the obligation as an equity distribution to the parent.]

A recharge agreement exists in respect of share-based payments awards from the parent

AASB 1060:114

46. Accounting policies (continued)

Supplier financing arrangements

An entity may enter into arrangements under which a 'factor' (typically, a financial institution) pays a supplier on its behalf, with the entity (i.e. the purchaser) then reimbursing the factor. Such arrangements may be referred to as, for example, 'supplier financing', 'reverse factoring' or 'structured payable arrangements'. When such arrangements are material, clear disclosure should be provided of the following:

- The approach to the presentation of significant supplier financing arrangements and, in accordance with AASB 1060:96, the judgements made in applying that policy
- How supplier financing transactions have been reflected in the statement of cash flows
- The carrying amount of the liabilities in question and the line item(s) in which they are presented.

Factoring of receivables

When an entity enters into arrangements for factoring of receivables where they are not fully derecognised, it is important that the policy adopted for the treatment of cash flows arising is clearly explained and that any non-cash financing transactions are disclosed in accordance with AASB 1060:86. In particular, an explanation of whether the cash flows received on the receivables are treated as operating inflows with associated financing outflows that are deemed to repay the financing liability that was recognised when the receivables were transferred.

Consolidated entity disclosure statement

As at 30 June 2024

A consolidated entity disclosure statement is only required to be included in the financial report of public companies (listed and unlisted). As Tier 2 Limited is an unlisted public company, the statement has been included. Proprietary companies and other entities are not required to include this statement.

Below is an illustrative disclosure of a consolidated entity disclosure statement required.

Entity name	Entity type	Body corporates		Tax residency	
		Place formed or incorporated	% of share capital held	Australian or foreign	Foreign jurisdiction
Tier 2 Limited	Body corporate	Australia	N/A	Australian (iv)	N/A
Subone Limited (i)	Body corporate	Australia	90%	Australian	N/A
Subtwo Limited (i)	Body corporate	Australia	85%	Australian	N/A

Making the statement when consolidated financial statements are not prepared

Where a public company is not required to prepare consolidated financial statements, a consolidated entity disclosure statement is not required, but a statement that the entity is not required to prepare consolidated financial statements is required (rather than including information about each subsidiary). This statement is the consolidated entity disclosure statement for such a company.

Below example wording where s.295(3A)(b) applies.

Consolidated entity disclosure statement as at 30 June 2024

Subsection 295(3A)(a) of the *Corporations Act 2001* does not apply to *[Entity name/the company]* as *[Entity name/the company]* is not required to prepare consolidated financial statements by Australian Accounting Standards.

More information about the statement

More information on the on the consolidated entity disclosure statement is provided in [Clarity publication](#) *New consolidated entity disclosure statement*.
