The information in this publication is current as of 30 October 2026 and entities should ensure any developments occurring from this date to the date of authorising the financial statements are appropriately considered. This publication is updated annually (for December half-year reporting periods) and the latest edition can be found at www.deloitte.com/au/models.

Key considerations for 31 December 2026 half-year reports

This section provides pertinent information for corporate reporting for half-year reporting 31 December 2026, including what's new for the current reporting season, a summary of new and revised pronouncements and reporting deadlines.

In this section

Key corporate reporting considerations for 31 December 2026 half-years 6

New and revised pronouncements 7

- **Financial reporting pronouncements effective for the first-time at 31 December 2026** 7
- **Impacts of adopting new and revised pronouncements** 8
- **Pronouncements not yet effective** 9
- **ASIC regulatory simplification** 10

Reporting deadlines 11

- **Listed entities other than mining and oil and gas exploration entities and ASX AQUA market issuers** 11
- **Listed mining and oil and gas exploration entities** 12
- **ASX AQUA market issuers** 12
- **Unlisted entities** 12

Key corporate reporting considerations for 31 December 2026

Climate reporting

For Group 1 entities June 2027 is the second year of mandatory climate-related reporting and the first year in which Scope 3 greenhouse gas emissions disclosures are required. Group 2 entities should be preparing for first-time reporting from June 2027 year ends. Although climate reporting is only required on an annual basis, entities preparing half-year reports should ensure connectivity between financial and climate disclosures and take care to avoid greenwashing.

Transparent reporting in the current economic environment

Current economic conditions and global trade challenges require a wide-ranging response in financial reporting in areas such as impairment, provisions, expected credit losses, contract modifications and liquidity risk management.

Persistent inflation and rising interest rates, as well as global uncertainties, including imposition of import or export tariffs, fuel supply disruptions and price volatility may affect financial reporting in various ways. Entities should evaluate how these factors affect their financial reports, ensuring they reflect economic realities and associated risks and disclose key judgements and uncertainties.

ASIC surveillance activities and focus areas

ASIC announced focus areas for the 2026-2027 financial year, which include enduring and specific items. In addition, ASIC issued a report with findings from 2025-2026 financial reporting and audit surveillance.

New financial reporting standards

New requirements apply in half -year financial statements for the first time:

- New illustrative examples for **disclosures of uncertainties** related to impairment testing and measurement of provisions.
- Amended accounting and disclosure requirements for power purchase agreements and other **contracts referencing nature-dependent electricity**
- Amended requirements for **classification and measurement of financial instruments**, including derecognition of financial liabilities settled through electronic payment systems and classification of financial assets with contingent or non-recourse features
- Updated references to **ASIC Corporations Instruments**, including two new consolidated Corporations Instruments, that brought together many reliefs related to financial and sustainability and auditing matters.

Pillar Two

The agreed 'side by side' changes to Pillar Two are not yet enacted in Australia and so cannot be reflected in current tax calculations for financial reporting purposes. Disclosure may be required where the expected impact is material.

Implementation of AASB 18

AASB 18 *Presentation and Disclosure in Financial Statements* is effective from annual periods beginning on or after 1 January 2027 and it requires comparative information to be restated. Entities should now be well advanced in preparing for implementation, including considering necessary changes to systems and processes and how financial performance is communicated externally.

Financial report preparers should consider their own specific circumstances when preparing their half-year reports and ensure they fully consider all the requirements discussed in section A of the 31 December 2026 *Tier 1 models and reporting considerations* publication. Entities may find the information in the Deloitte *Australian financial reporting guide* useful which provides a roadmap to financial reporting requirements and the differential reporting framework in Australia. These publications are available at www.deloitte.com/au/models.

New and revised pronouncements

Financial reporting pronouncements effective for the first-time at 31 December 2026

The table below summarises the amended financial reporting requirements that must be applied for the first time for half-years ending 31 December 2026.

See section *New and amended Accounting Standards that are effective for the current period* in note 2 (starting on page 51) for illustrative disclosures.

Pronouncement	Change
Applicable to all half-year financial statements	
AASB 9/AASB 7	Classification and measurement of financial instruments (AASB 2024-2)
AASB 9/AASB 7	Contracts referencing nature-dependent electricity (AASB 2025-1)
AASB 1/AASB 7/AASB 9/ AASB 10/AASB 107	Annual improvements volume 11 (AASB 2024-3)
AASB 136/AASB 137	Disclosures about uncertainties in the financial statements (AASB 2026-1)
Applicable to half-year financial statements of Tier 2 entities	
AASB 1060	Classification and measurement of financial instruments: Tier 2 disclosures (AASB 2025-2)
AASB 1060	Contracts referencing nature-dependent electricity: Tier 2 disclosures (AASB 2025-3)
Applicable to half-year financial statements of public sector entities	
AASB 17/AASB 1050	Insurance contracts in the public sector (AASB 2022-8 and AASB 2022-9)

In addition to new pronouncements, entities should also consider the impacts of recent IFRS Interpretations Committee agenda decisions on the financial statements. Agenda decisions and tentative agenda decisions are available at www.ifrs.org.

Impacts of adopting new and revised pronouncements

Applying new and revised pronouncements for the first time can result in direct changes in recognition, measurement, presentation and disclosure requirements. In addition, there can be consequential impacts on financial reports through the transitional provisions of the pronouncement and the existing requirements of other Australian Accounting Standards.

The table below outlines some of the areas where these consequential impacts should be considered:

Area	Consideration
Disclosures about changes in accounting policies	AASB 134 *Interim Financial Reporting* requires changes in accounting policies that will be applied for the next annual financial statements be implemented in half-year financial statements (AASB 134:28). A change in accounting policy (other than one for which the transition provisions are specified by a new Australian Accounting Standard (see below)) is to be applied retrospectively unless impracticable in which case the change in accounting policy should be applied prospectively from the earliest date practicable. Include a description of the nature and effect of a change in an accounting policy since the most recent annual financial statements (AASB 134:16A(a)). Detailed disclosure requirements required in annual financial statements (for a change in accounting policy) do not directly apply in half-year financial statements. However, entities should use judgement to ensure disclosures meet AASB 134 requirements and investor expectations.
Impact of transitional provisions	The general requirement (in AASB 108) to apply changes in accounting policies retrospectively does not apply to the extent an individual pronouncement has specific transitional provisions.
Earnings per share (EPS)	Comparative earnings per share information for interim financial statements must be updated for a change in accounting policy (unless specified otherwise by a new Standard). Detailed disclosure requirements required in annual financial statements for accounting policy changes do not directly apply in half-year financial statements. However, entities should use judgement to ensure disclosures meet AASB 134 requirements and investor expectations
Third statement of financial position	There is no requirement in AASB 134 for an entity to present a third statement of financial position where an accounting policy has changed. In rare circumstances an entity may wish to provide a third statement where a change in accounting policy is material and the additional disclosure assists in users understanding the change.

Pronouncements not yet effective

AASB 134 does not require disclosure of new accounting standards and interpretations that are not yet effective. However, considering ASIC's expectations in the past that reporters consider the impact of major new accounting requirements that are not yet effective, entities should consider disclosing the impact of major new accounting requirements with the requirements of AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* (paragraphs 30 – 31).

AASB 18 *Presentation and Disclosure in Financial Statements*

In June 2024 the AASB issued a new presentation and disclosure standard, AASB 18 *Presentation and Disclosure in Financial Statements* which replaces AASB 101 *Presentation of Financial Statements.* AASB 18 seeks to introduce enhanced requirements for the presentation of financial statements, focusing on information in the statement of profit or loss, with limited amendments in AASB 107 *Statement of Cash Flows*. Key features include:

- Requiring new defined subtotals ('operating profit' and 'profit before financing and income taxes') and categories (operating, investing and financing) in the statement of profit or loss
- New disclosures about management-defined performance measures (MPMs), limited to subtotals of income and expenses
- Enhanced guidance on the grouping of information (aggregation and disaggregation), including guidance on whether information should be presented in the primary financial statements or disclosed in the notes, and disclosures about items labelled as 'other'.

Whilst not effective until reporting periods beginning on or after 1 January 2027 (Tier 1 for-profit entities) and 1 January 2028 (not-for-profit and superannuation entities) early adoption may be attractive for entities seeking to improve the quality of their financial reporting. However, we recommend Tier 2 entities defer adoption of AASB 18 in interim (and full year) reports pending the finalisation of the AASB's post-implementation review of AASB 1060 *General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities.* For more information, see AASB 18 *Presentation and Disclosure in Financial Statements* on page 55 (in Note 2).

AASB 18 application to interim periods beginning on or after 1 January 2027

For for-profit Tier 1 entities, AASB 18 is applicable in interim financial reports prepared for interim periods beginning on or after 1 January 2027. For example, interim financial reports for the half-year ending 30 June 2027 would be required to comply with the revised presentation and disclosure requirements of AASB 18. Due to consequential amendments to AASB 134, this would include the new format of the statement of profit or loss, presentation of items in the statement of cash flows, guidance on aggregation and disaggregation and information about management-defined performance measures.

This model financial report does not illustrate the revised AASB 18 related requirements in interim financial reports. For-profit Tier 1 entities preparing interim financial reports for interim periods beginning on or after 1 January 2027 should refer to the publications below for further guidance and illustrative disclosures.

iGAAP in Focus *Financial reporting: Preparing for the application of IFRS 18*

Illustrative financial statements *for the year ended 31 December 2027 which demonstrate the initial application of IFRS 18*

AASB 20 *Regulatory Assets and Regulatory Liabilities*

Introduces a new accounting model for entities affected by rate regulation, including in sectors such as utilities and energy. The Standard is designed to better align recognition of an entity's total allowed compensation with the period in which the related goods or services are provided. It also includes detailed requirements on recognition, measurement, presentation and disclosure.

Regulatory assets are defined as enforceable present rights to add an amount to future rates. Regulatory liabilities are defined as enforceable present obligations to deduct an amount from future rates.

An entity is required to recognise all regulatory assets and all regulatory liabilities existing at the end of the reporting period. If there is existence uncertainty, an entity is required to recognise a regulatory asset or regulatory liability if it is more likely than not that it exists. The recognition of some regulatory assets and regulatory liabilities is subject to specified conditions being met.

Regulatory assets and regulatory liabilities are measured on initial recognition based on all estimated future cash flows arising from a regulatory asset or regulatory liability, discounted using the regulatory interest rate. For the subsequent measurement, an entity updates the estimates of future cash flows and continues to use the regulatory interest rate as the discount rate, unless the regulatory agreement changes the regulatory interest rate.

The standard is effective for annual reporting periods beginning on or after 1 January 2029.

ASIC regulatory simplification

On 16 September 2026 ASIC released two Corporations Instruments, bringing together many reliefs related to financial and sustainability and auditing matters.

Together, *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* and *ASIC Corporations (Auditing) Instrument 2026/469* consolidate 17 reporting and auditing relief instruments covering financial and sustainability reporting and auditing requirements. ASIC's consolidated reporting and audit instruments resource details instruments that were consolidated and not included into consolidated instruments.

With certain exceptions, the consolidated instruments are immediately effective and repeal previous instruments. Therefore, entities relying on the relief under the superseded instruments should ensure they refer to the new instruments going forward. Importantly, under transitional provisions in the new instrument, the existing rounding instrument will continue to apply to financial years and half-years ending before 1 January 2027. This means that full and half year reports at 31 December 2026 can continue to refer to *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183*. However, financial reports for periods ending after 31 December 2026 will need to refer to the new consolidated instrument.

In addition, on 28 September 2026, ASIC released *ASIC Corporations (Wholly-owned Companies) Instrument 2026/533* (ASIC-CI 2026/533). The instrument extends the relief for wholly-owned entities that meet the relevant conditions from the requirements to prepare financial reports, have those reports audited and provide those reports to members. Conditions include being party to a deed of cross guarantee with its holding company and other group entities, and where the holding company lodges consolidated financial statements for the group. The new instrument replaces *ASIC Corporations (Wholly-owned Companies) Instrument 2016/785* (ASIC-CI 2016/785), as that instrument was due to sunset on 1 October 2026. ASIC-CI 2026/533 adopts transitional measures which means the new instrument applies to financial years ending on or after 1 January 2027. ASIC-CI 2016/785 will continue to apply (despite its repeal) to a financial year ending before 1 January 2027. This means that reports for financial years and half-years ending on 31 December 2026 will continue to refer to the ASIC-CI 2016/785.

Reporting deadlines

Deadlines applicable for 31 December 2026 and 30 June 2027 half-year reports

The following tables summarise the reporting deadlines under the Corporations Act and, where relevant, the ASX Listing Rules and ASX Operating Rules for half-year reporting periods ending 31 December 2026 and 30 June 2027. These reporting deadlines will be applicable to the majority of entities; however, care should be taken to ensure that the dates noted below are the appropriate dates for the entity in question.

Listed entities

Listed entities other than mining and oil and gas exploration entities and ASX AQUA market issuers

Source	Requirement	Deadline	Date applicable for 31 December 2026 reporting periods[1]	Date applicable for 30 June 2027 reporting periods
ASX 4.2A.3, ASX 4.2B	Lodgement of Appendix 4D with the ASX	As soon as available and no later than when half-year reports are lodged with ASIC, and no later than 2 months after the half-year end	26 February 2027[2]	31 August 2027
ASX 4.2A.1, ASX 4.2B	Lodgement of the audited or reviewed Corporations Act half-year report with the ASX	As soon as available and no later than when half-year reports are lodged with ASIC, and no later than 2 months after the half-year	26 February 2027[4]	31 August 2027
s.320	Lodgement of the Corporations Act half-year report with ASIC	Not required[3] (Part 9 of ASIC-CI 2026/468)	n/a	n/a

[1] Where a deadline arises under the ASX Listing Rules and that deadline falls on a Saturday, Sunday or public holiday, ASX Listing Rule 19.5 requires the deadline to be met by the preceding business day.

[2] 28 February 2027 (which is 2 months after the 31 December 2026 reporting period) is a Sunday. Accordingly, the ASX deadline will be met on the preceding business day i.e. 26 February 2027. (See footnote 1)

[3] Although there is a requirement to lodge the half-year report with both ASIC and the ASX, Part 9 of ASIC-CI 2026/468 (available at www.legislation.gov.au) allows entities listed on the ASX to lodge the reports electronically with the relevant market operator without also having to separately lodge the reports with ASIC.

Listed mining and oil and gas exploration entities

Source	Requirement	Deadline	Date applicable for 31 December 2026 reporting periods[4]	Date applicable for 30 June 2027 reporting periods[4]
ASX 4.2A.3, ASX 4.2B	Lodgement of Appendix 4D with the ASX	Not required[5]	n/a	n/a
ASX 4.2A.1, ASX 4.2B	Lodgement of the audited or reviewed Corporations Act half-year report with the ASX	As soon as available and no later than when half-year reports are lodged with ASIC, and no later than 75 days after half-year	16 March 2027	13 September 2027
s.320	Lodgement of the Corporations Act half-year report with ASIC	Not required[6] (Part 9 ASIC-CI 2026/468)	n/a	n/a

ASX AQUA market issuers

Source	Requirement	Deadline	Date applicable for 31 December 2026 reporting periods[4]	Date applicable for 30 June 2027 reporting periods[4]
ASX Operating Rules Schedule 10A.4.1(k), ASX Operating Rules Procedures 10A.4.1	Lodgement of the audited or reviewed Corporations Act half-year report with the ASX	As soon as available and no later than when half-year reports are lodged with ASIC, and no later than 75 days after half-year[7]	16 March 2027	13 September 2027
s.320	Lodgement of the Corporations Act half-year report with ASIC	75 days after half-year	16 March 2027	13 September 2027

ASX Limited publishes annual market announcements reporting calendars on its website for listed entities. At the time of finalisation of this document (30 October 2026), the 2027 reporting calendar had not been published by the ASX. The calendar for the 2027 year is expected to be made available on the ASX website in due course.

Unlisted entities

Source	Requirement	Deadline	Date applicable for 31 December 2026 reporting periods[8]	Date applicable for 30 June 2027 reporting periods[8]
s.320	Lodgement of the Corporations Act half-year report with ASIC	75 days after half-year	16 March 2027	13 September 2027

[4] Where a deadline under the Corporations Act falls on a Saturday, Sunday or public holiday, section 36(2) of the *Acts Interpretations Act 1901* permits the deadline to be met on the next day that is not a Saturday, Sunday or public holiday.
[5] In accordance with ASX Listing Rule 4.2A.3, mining exploration entities or oil and gas exploration entities are not required to provide the information set out in Appendix 4D.
[6] Although there is a requirement to lodge the half-year report with both ASIC and the ASX, Part 9 of ASIC-CI 2026/468 (available at www.legislation.gov.au) allows entities listed on the ASX to lodge the reports electronically with the relevant market operator without also having to separately lodge the reports with ASIC.
[7] The deadline for lodgement of the half-year report for issuers whose securities are traded on the ASX AQUA market is 75 days after the end of the accounting period, as under ASX Operation Rules Schedule 10A.4.1, the reporting obligations for such issuers are linked to the reporting obligations under the Corporations Act and ASX Operating Rules Procedure 10A.4.1 requires documents to be lodged with the ASX at the same time as they are lodged with ASIC (or in the case of certain foreign ETFs, the timeline for the relevant overseas regulatory authority).
[8] Where a deadline under the Corporations Act falls on a Saturday, Sunday or public holiday, section 36(2) of the Acts Interpretations Act 1901 permits the deadline to be met on the next day that is not a Saturday, Sunday or public holiday.

GAAP Holdings (Australia) Interim Limited half-year report

This section contains the half-year report and the various reports required under the Corporations Act and ASX Listing Rules.

About the model half-year report

This model half-year report can be used as a guide in achieving best practice outcomes in Tier 1 and Tier 2 half-year financial reporting.

Purpose and basis of preparation

This model half-year report has been developed by Deloitte Touche Tohmatsu to assist users with the preparation of **half-year reports** for a **consolidated entity** in accordance with:

- Provisions of the *Corporations Act 2001*
- Australian Accounting Standard AASB 134 *Interim Financial Reporting*
- Other requirements and guidelines current as at the date of issue, including the ASX Listing Rules of ASX Limited and Australian Securities and Investments Commission (ASIC) Class Orders/Corporations Instruments, Regulatory Guides and Media Releases.

Where appropriate, this model half-year report also adopts the classification criteria and other guidance contained in AASB 101 *Presentation of Financial Statements*.

About GAAP Holdings (Australia) Interim Limited

GAAP Holdings (Australia) Interim Limited is a **listed for-profit disclosing entity** and is assumed to have presented financial statements in accordance with Australian Accounting Standards for a number of years. Therefore, it is **not a first-time adopter** of Australian Accounting Standards. AASB 1 *First-time Adoption of Australian Accounting Standards* includes additional disclosure requirements for interim periods covered by an entity's first Australian-Accounting-Standards financial statements – these are not illustrated in this publication.

The interim financial report illustrates the **presentation of a set of condensed financial statements**, as envisaged by AASB 134:8. If a complete set of financial statements is published in the interim financial report, the form and content of those statements should conform to the requirements of AASB 101 *Presentation of Financial Statements* for a complete set of financial statements.

GAAP Holdings (Australia) Interim Limited's year end is 30 June 2027. Accordingly, it is preparing a half-year report for the half-year ending 31 December 2026.

The emphasis in AASB 134 *Interim Financial Reporting* is to explain the events and transactions that are significant to an understanding of the changes in financial position and performance of the entity since the end of the last annual reporting period (AASB 134:15). The illustrative disclosures included in these model financial statements provide examples of how these disclosures can be included in half-year financial reports for various common situations. Each entity will need to disclose information relevant to their particular facts and circumstances to meet the requirements of AASB 134.

Tier 1 and Tier 2 reports

The model half-year report includes disclosures that apply to Tier 1 and Tier 2 general purpose financial statements.

Entities reporting under Tier 2 (Simplified Disclosures)

Under Australian Accounting Standards – Simplified Disclosures, entities comply with AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities*, which prescribes disclosure requirements in **annual** general purpose financial statements. AASB 1060 does not address presentation of interim financial reports (AASB 134 *Interim Financial Reporting*), segment information (AASB 8 *Operating Segments*) and earnings per share (AASB 133 *Earnings per Share*) (AASB 1060:33). AASB 1060 requires entities preparing **half-year** general purpose financial statements to apply the relevant Standards in preparing and presenting information (i.e. AASB 134 and other relevant Standards).

More information about the Australian differential framework can be found in The *Australian financial reporting guide*, available at www.deloitte.com/au/models.

Source references

References to the relevant requirements are provided in the left-hand column of each page of the model financial report. Where doubt exists as to the appropriate treatment, examination of the source of the disclosure requirement is recommended.

In some cases, additional references to other pronouncements are provided that are not mandatory in half-year financial reports, but which may provide a useful basis in developing disclosures in half-year financial statements in accordance with the requirements of AASB 134. These source references are provided in parentheses.

Limitations

This model half-year report is not designed to meet specific needs of specialised industries and not-for-profit and public sector entities. Rather, it is intended to meet the needs of most entities in complying with the half-year reporting requirements of the *Corporations Act 2001*. Enquiries regarding specialised industries (e.g. life insurance companies, credit unions, etc.) should be directed to an industry specialist at your nearest Deloitte Touche Tohmatsu office.

This model half-year report does not, and cannot be expected to, cover all situations that may be encountered in practice. Knowledge of the disclosure provisions of the *Corporations Act 2001*, Australian Accounting Standards and Interpretations are prerequisites for the preparation of financial reports.

This publication is an illustration only and does not represent the only way an entity's reporting obligations may be met. We strongly encourage preparers of financial statements to ensure that disclosures made in their half-year reports are relevant, practical and useful.

The information in this document is current as of 30 October 2026. Entities should ensure any developments occurring after this date are appropriately considered.

Appendix 4D

Appendix 4D, Item 1	**Current reporting period**	Half-year ended 31 December 2026
Appendix 4D, Item 1	**Prior corresponding period**	Half-year ended 31 December 2025

Results for announcement to the market

Appendix 4D, Item 2, Footnote

The information below required by Appendix 4D, Items 2.1-2.6 must be placed at the beginning of the report. The other information required by Appendix 4D may be presented in whatever way is the most clear and helpful to users, e.g. combined with the body of the report, combined with notes to the accounts, or set out separately.

Key information

			% Change		$'000
Appendix 4D, Item 2.1	Total revenue from ordinary activities	*[Up/down]*	___ %	to	*[Amount]*
Appendix 4D, Item 2.2	Profit (loss) from ordinary activities after tax attributable to members	*[Up/down]*	___ %	to	*[Amount]*
Appendix 4D, Item 2.3	Net profit (loss) for the period attributable to members	*[Up/down]*	___ %	to	*[Amount]*

Appendix 4D, Item 5

Details relating to dividends

		Amount per share	Franking[(1)]	Total amount $'000
Appendix 4D, Item 2.4	Final dividend paid on 14 September 2026 (prior year)	___ cents	___ %	*[Amount]*
Appendix 4D, Item 2.4	Interim dividend declared on 10 February 2027[(2)]	___ cents	___ %	*[Amount]*

Appendix 4D, Item 2.5 Record date for determining entitlements to dividends: 17 February 2027

Appendix 4D, Item 2.6 (1) All dividends are fully franked at a 30% tax rate.

Appendix 4D, Item 5 (2) The interim dividend is payable on 12 March 2027 and is not recognised as a liability as at 31 December 2026.

Appendix 4D, Item 2.4 If no dividends have been paid or proposed, the entity is required to make a statement that it is not proposed to pay dividends.

Additional information

Appendix 4D, Item 2.6 An entity is required to provide a brief explanation of any figures provided in relation to Items 2.1 to 2.4 necessary to enable the figures to be understood.

For example, an entity may include the following information:

- Abnormal items of income and expense during the period or corresponding period
- Details of discontinued operations
- Additional line items or subtotals explaining the composition of amounts.

Additional requirements for dividends and distributions

Appendix 4D, Item 5

Item 5 of Appendix 4D requires the disclosure of details of individual and total dividends or distributions and dividend or distribution payments. The details must include the date on which each dividend or distribution is payable, and (if known) the amount per security of foreign sourced dividend or distribution.

Dividend or distribution reinvestment plans

Appendix 4D, Item 6

The entity is required to provide details of any dividend or distribution reinvestment plans in operation and the last date for receipt of an election notice for participation in any dividend or distribution reinvestment plan.

Net tangible assets per share

	31/12/2026	30/06/2026*
Appendix 4D, Item 3 Net tangible assets per share	____ cents	____ cents

* The information for 30 June 2026 has been restated for the *[describe the change in accounting policy or error]* as explained in note 2 to the attached half-year financial statements.

Calculation of net tangible assets per share

Appendix 4D does not provide explicit guidance on how net tangible assets are calculated, although that term is used in many places in the ASX Listing Rules in addition to Appendix 4D. The following information may be used as guidance:

- Chapter 19 of the ASX Listing Rules provides a definition of 'net tangible asset backing' for the purposes of disclosure by listed investment entities under ASX Listing Rules 4.10.2 and 4.12
- The ASX Clear (Futures) Operating Rules provides a definition of net tangible assets (in Part 1) for the purposes of those rules. The definition references 'excluded assets' which explains intangible assets (within the meaning of AASB 138 *Intangible Assets*, including goodwill) and deferred tax assets are excluded from net tangible assets for the purposes of those rules
- The ASX *Introduction to Investment Products* publication explains that net tangible assets of listed investment companies and trusts is the assets of the entity less any liabilities and intangible assets.

It is understood that the ASX will accept a lease right-of-use asset being classified as tangible or intangible following the character of the underlying asset. So, for example, a lease right-of-use asset associated with a lease of plant and equipment would be classified as tangible for the purposes of the net tangible assets per share calculation.

Where judgement is applied in determining the net tangible assets per share, additional explanation may be required.

Entities over which control has been gained or lost during the period

Appendix 4D, Item 4

Details provided must include the following:

- Name of the entity
- The date of the gain or loss of control
- Where material to an understanding of the report – the contribution of such entities to the reporting entity's profit from ordinary activities during the period and the profit or loss of such entities during the whole of the previous corresponding period.

Source

Details of associates and joint ventures

Appendix 4D, Item 7

Details to be provided include:

- Name of the associate or joint venture
- Details of the reporting entity's percentage holding in each of these entities
- Where material to an understanding of the report – aggregated share of profits (losses) of these entities, details of contributions to net profit for each of these entities
- Comparative figures for each of these disclosures for the previous corresponding period.

Foreign entities

Appendix 4D, Item 8

Foreign entities are required to disclose which set of accounting standards is used in compiling the report (e.g. IFRS Accounting Standards).

Information about audit or review

Appendix 4D, Item 9

If the accounts contain an independent audit report or review that is subject to a modified opinion, emphasis of matter or other matter paragraph, a description of the modified opinion, emphasis of matter or other matter paragraph.

In practice, some entities choose to provide information about the audit or review even where the report is unqualified (consistent with the requirements for preliminary final reports under Appendix 4E for full-years). The following example is the type of wording commonly used in these cases:

"This Appendix 4D is based on the attached half-year financial report which has been reviewed by the Group's auditors, Deloitte Touche Tohmatsu. A copy of Deloitte's unqualified review report can be found on page 29."

GAAP Holdings (Australia) Interim Limited

ACN 123 456 789

Half-year report for the half-year ended
31 December 2026

Directors' report

Source

ASIC-CI 2026/468 Section 12

The following information (required by s.306) may be transferred to a document attached to the directors' report and half-year financial report where a clear cross reference to the pages containing the excluded information exists and certain conditions are satisfied:

- A review of the entity's operations during the half-year and the results of those operations
- The name of each person who has been a director (of the disclosing entity) at any time during or since the end of the half-year and the period for which they were a director.

Information transferred to the half-year financial report will be subject to audit or review.

s.1308(7)

Where the directors' report contains information in addition to that required by the *Corporations Act 2001*, the information will be regarded as part of the directors' report for the purposes of s.1308 'False or misleading statements'.

The directors submit herewith the financial report of GAAP Holdings (Australia) Interim Limited and its subsidiaries (the Group) for the half-year ended 31 December 2026. In order to comply with the provisions of the *Corporations Act 2001*, the directors report as follows:

Directors

s.306(1)(b)

The names of the directors of the company during or since the end of the half-year are:

Mr C.J. Chambers	Mr B.M. Stavrinidis
Mr P.H. Taylor	Mr W.K. Flinders
Ms F.R. Ridley	Ms L.A. Lochert
Mr A.K. Black	Ms S.M. Saunders

s.306(1)(b)

The above named directors held office during and since the end of the half-year except for:

- Mr W.K. Flinders – resigned 20 July 2026
- Ms S.M. Saunders – appointed 3 August 2026
- Ms L.A. Lochert – appointed 27 July 2026 and resigned 4 December 2026

Source

Review of operations

s.306(1)(a) The directors' report must contain a review of the entity's[9] operations during the half-year and the results of those operations. The *Corporations Act 2001* contains no guidance on the contents of this review.

ASX-GN10 In preparing this disclosure, entities may wish to refer to:

- ASX Guidance Note 10 *Review of Operations and Activities: Listing Rule 4.10.17*
- The G100's *Guide to Review of Operations and Financial Condition*[10], providing guidance on the form and content of the entity's review of operations and the results of those operations, including specific guidance on items which might be appropriately included in such a review
- ASIC Regulatory Guide 247 *Effective disclosure in an operating and financial review* (RG 247) which it is designed to provide guidance on preparing an operating and financial review (OFR) in the directors' report of a listed entity required in an entity's annual report (under s.299A of the Corporations Act).

ASX Guidance Note 10 *Review of Operations and Activities: Listing Rule 4.10.17 and G100's Guide to Review of Operations and Financial Condition*

ASX-GN10 It is recommended that the review should provide users, being shareholders, prospective investors and other interested stakeholders, an understanding of the entity by providing short and long-term analysis of the business as seen through the eyes of the directors. As such, the review should aim to meet the information needs of users of financial reports relating to the current reporting period and also provide them with a basis for forming a view as to likely future performance in the context of the strategies of the entity for achieving long-term value creation and known trends in performance. This requires that the review contains a discussion of the operations of the period, including an explanation of unusual or infrequent events and transactions, and an analysis of the opportunities and risks facing the entity, together with the planned approach to managing those opportunities and risks.

ASX-GN10 Given this context, preparers of annual reports are encouraged to provide the following disclosures which are recommended to be included and updated in half-year reports:

- An overview of the entity and its strategy
- A review of operations, considering both short and longer-term value creation in the context of the entity's strategy
- Information on investments made to enhance future value creating potential
- A review of the entity's financial condition
- An overview of risk management and governance practices.

This is aimed at anchoring the review in a strategic context of how the entity is aiming to enhance shareholder value, both in the short and long term. This includes discussion of both financial and non-financial elements of performance, including analysis using relevant financial and non-financial key performance indicators. The latter may include sustainability related indicators.

[9] If the entity is required (by the accounting standards) to prepare consolidated financial statements, the review must cover the consolidated entity.
[10] The G100's *Guide to Review of Operations and Financial Condition* is an attachment to ASX Guidance Note 10 *Review of Operations and Activities: Listing Rule 4.10.17*.

Source

Review of operations (continued)

ASX Guidance Note 10 *Review of Operations and Activities: Listing Rule 4.10.17 and G100's Guide to Review of Operations and Financial Condition* (continued)

The recommended contents of the review include:

- Entity overview and strategy
    - Explaining the objectives of the entity and how they are to be achieved
    - Including a discussion and analysis of key financial and non-financial performance indicators used by management in their assessment of the entity and its performance (including relevant sustainability performance indicators)
    - Discussing the main factors and influences that may have a major effect on future results (including potential longer-term effects), whether or not they were significant in the period under review. This may include discussion of market opportunities and risks; competitive advantage; changes in market share or position; economic factors; key customer and other relationships; employee skills and training; environmental, occupational health and safety aspects; significant legal issues; and innovation and technological developments
- Review of operations
    - Discussing the main activities of the entity, including significant features of operating performance for the period under review. It should cover all aspects of operations, focussing on the entity as a whole 'through the eyes of the directors'. It should not be boilerplate, and should cover significant aspects of the entity's performance in the period, financial and non-financial. Consideration should be given to unusual or infrequent events or transactions, including material acquisitions or disposals, major sources of revenues and expenses, and changes in factors which affect the results to enable users to assess the significance of the ongoing and core activities of the entity to identify the sustainability of performance over the longer-term
        - Providing the overall return attributable to shareholders in terms of dividends and increases in shareholders' funds, including a commentary on the comparison between the results of the financial year and dividends, both in total and in per share terms, and indicating the directors' overall distribution policy
- Providing information on investments made for future performance, including capital expenditure and other expenditure enhancing future performance potential. This may include marketing and advertising spend to enhance brand loyalty and reputation; staff training and development programmes; quality improvement and health and safety programs; customer relationship management; and expansion of production capacity
- Review of financial conditions
    - Capital structure of the entity including capital funding and treasury policies and objectives
    - Cash from operations and other sources of capital
    - Discussion of the liquidity and funding at the end of the period under review, including restrictions on funds transfer, covenants entered into and the maturity profile of borrowings
    - Discussing the resources available to the entity not reflected in the statement of financial position, for example mineral reserves, key intellectual property (e.g. databases or specific entity competences); market-position; employee competences or resources / skills and their role in creating longer-term value
    - Impact of legislation and other external requirements having a material effect on the financial condition in the reporting period or expected to have a material effect on the financial condition in future periods
- Risk management and corporate governance practices, including management of both financial and non-financial risks.

Source

Review of operations (continued)

ASIC Regulatory Guide 247 *Effective disclosure in an operating and financial review*

Preparing an operating and financial review

An OFR should:

- Contain information about an entity's operations and financial position, discuss the impact of relevant events throughout the reporting period and provide an overview of business strategies and prospects
- Present a narrative and analysis about the entity's results and financial position
- Contain information that shareholders would reasonably require to make an informed assessment of the entity's operations, financial position and business strategies and prospects for future financial years.

Operations and financial position

Information about an entity's operations involves an explanation of the underlying drivers of its results, and of key developments in the reporting period. In this regard, RG 247 outlines that the OFR should:

- Explain the underlying drivers of its results and key developments in the reporting period, and discuss significant factors affecting the entity's results
- Explain the entity's business model and its effect on the entity's operations
- Discuss the results of the key operating segments and major components of the overall result
- Often involve a consideration of the underlying drivers of, and reasons for, the financial position of the entity, and include discussion of exposures not recognised in the financial statements
- Consider ASIC's guidance in RG 230 *Disclosing non-IFRS financial information* (see page 25).

Business strategies and prospects for future financial years

Information on business strategies and prospects for future financial years should focus on what may affect the future financial performance and position of the entity. RG 247 outlines that the OFR should describe:

- The overall business strategies relevant to the entity's future financial position and performance
- The entity's prospects in terms of future financial performance and financial outcomes.

If an entity intends to rely on the unreasonable prejudice exemption in s.299A(3) to omit information, the basis for relying on the exemption needs to be carefully evaluated and established.

Material business risks

RG 247 notes that it is likely to be misleading to discuss prospects for future financial years without referring to the material business risks that could adversely affect the achievement of the financial prospects described for those years:

- ASIC considers 'material business risks' to mean the most significant areas of uncertainty or exposure, at a whole-of-entity level, that could have an adverse impact on the achievement of the financial performance or outcomes disclosed in the OFR. Equally, it may be appropriate to disclose factors that could materially improve the financial prospects disclosed
- An OFR should (1) only include a discussion of the risks that could affect the entity's achievement of the financial prospects disclosed, taking into account the nature and business of the entity and its business strategy, and (2) not contain an exhaustive list of generic risks that might potentially affect a large number of entities
- An OFR should include a discussion of environmental, social and governance risks where those risks could affect the entity's achievement of its financial performance or outcomes disclosed, taking into account the nature and business of the entity and its business strategy.

Source

Review of operations (continued)

ASIC Regulatory Guide 247 *Effective disclosure in an operating and financial review* (continued)

Presenting the narrative and analysis

Directors and preparers of an OFR should present the narrative and analysis in a way that maximises its usefulness to shareholders. RG 247 notes that a matter of good practice, an OFR should present information in a single section and in a manner that is:

- Complimentary to and consistent with the annual financial report
- Balanced and unambiguous
- Clear, concise and effective.

ASIC Regulatory Guide 280 *Sustainability reporting*

Sustainability-related financial information in the OFR

ASIC-RG 280.122

The objective of the OFR requirements is to provide members with an overarching narrative and analysis that supplements the financial report and, where required, the sustainability report to the extent required to satisfy s.299A. It assists members in understanding the operations, financial position, business strategies and prospects of an entity.

ASIC-RG 280.123
s.299A(1)

Listed entities must disclose sustainability-related financial information, including climate-related financial information, if it would be reasonably required by members in making an informed assessment of the entity's operations, financial position, business strategies and prospects for future financial years.

ASIC-RG 280.124

When disclosing sustainability-related financial information in the OFR entities are encouraged to adopt relevant definitions from AASB S1 and AASB S2 where those terms are used in the OFR and apply the principles for disclosing useful sustainability-related financial information from those standards when disclosing sustainability-related financial information in the OFR.

ASIC-REP 809:76

The extent to which it is appropriate to include sustainability-related information in the OFR and the level of detail that should be included, depends on the nature of the entity's business and other relevant circumstances. Where climate-related financial disclosures are included in the OFR to satisfy s.299A requirements, these should be contextualised within the overarching summary of the entity's operations, financial position, and business strategies and prospects for future financial years.

Source
ASIC-RG 230

Non-IFRS financial information

If the directors consider it appropriate to include non-IFRS financial information in the operating and financial review (OFR), the directors' report or another document in the annual report, the guidelines in Section D of ASIC Regulatory Guide 230 *Disclosing non-IFRS financial information* should be followed to assist in reducing the risk of non-IFRS financial information being misleading[11].

Important considerations include that:

- IFRS financial information should be given equal or greater prominence compared to non-IFRS financial information, in particular IFRS profit
- Non-IFRS information should:
  - Be explained and reconciled to IFRS financial information
  - Be calculated consistently from period to period
  - Be unbiased and not used to remove 'bad news'.

Entities should refer to the complete document when preparing their reports as it provides detailed guidance for presenting non-IFRS financial information.

A clear statement should be made about whether the non-IFRS information has been audited or reviewed in accordance with Australian Auditing Standards.

Auditor's independence declaration

s.306(1A)

The auditor's independence declaration is included on page 27 of the half-year report.

ASIC-CI 2026/468 Section 12

The auditor's declaration under s.307C in relation to the audit or review for the half-year may be transferred from the directors' report into a document which is included with the directors' report and the half-year financial report. The auditor's independence declaration may not be transferred to the half-year financial report. The directors' report must include a prominent cross-reference to the page(s) containing the auditor's declaration.

True and fair view

s.306(2)

If the half-year financial report includes additional information in the notes to the condensed consolidated financial statements necessary to give a true and fair view of the financial performance and position of the disclosing entity (including the consolidated entity), the directors' report must also:

- Set out the directors' reasons for forming the opinion that the inclusion of that additional information was necessary to give a true and fair view required by s.305
- Specify where that information can be found in the half-year financial report.

ASIC-CI 2026/468 Section 12

This additional information may not be transferred to the half-year financial report.

[11] Non-IFRS financial information is financial information presented other than in accordance with all relevant Australian Accounting Standards.

Rounding off of amounts

Updates to ASIC's rounding instrument

The illustrative wordings below have been updated to reflect the issue of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* applicable to full and half-year reports at 31 December 2026 and Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applicable to financial reports for periods ending after 31 December 2026. See *ASIC regulatory simplification* on page 10 for additional information.

ASIC-CI 2026/183 Section 7(2)(f)
ASIC-CI 2026/468 Section 10(2)(f)

If the company is an entity to which Section 7 of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* or Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applies and consequently the amounts in the directors' report and the financial statements are rounded, that fact must be disclosed in the financial statements or the directors' report.

Where the conditions of the relevant Corporations Instrument are met, entities may round to the nearest dollar, nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars, depending upon the total assets of the entity. The appropriate rounding should be included in the disclosure below:

ASIC-CI 2026/183

The company is an entity to which section 7 of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* applies and in accordance with that Corporations Instrument amounts in this directors' report are rounded off to the nearest *[dollar / thousand dollars / hundred thousand dollars/ million dollars]*, unless otherwise required.

ASIC-CI 2026/468 Section 10(2)(f)

[Applicable to financial reports for periods ending after 31 December 2026]

The company is an entity to which Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applies and in accordance with that section amounts in the directors' report are rounded off to the nearest *[dollar / thousand dollars / hundred thousand dollars / million dollars],* unless otherwise required.

ASIC-CI 2026/183
ASIC-CI 2026/468

Where the Corporations Instrument is applied, certain amounts in the financial statements are required to be rounded to differing levels of precision. It is important to ensure these amounts are shown using the correct level of precision and column headings and narrative information uses the correct level of rounding as required by the Corporations Instrument.

s.306(3)(a)

Signed in accordance with a resolution of directors made pursuant to s.306(3) of the *Corporations Act 2001*.

The Board of Directors
GAAP Holdings (Australia) Interim Limited
167 Admin Ave
Sydney NSW 2000

15 March 2027

Dear Board Members,

Auditor's independence declaration to GAAP Holdings (Australia) Interim Limited

s.306(1A), s.307C, ASIC-CI 2026/468 Section 12

In accordance with section 307C of the *Corporations Act 2001*, I am pleased to provide the following declaration of independence to the directors of GAAP Holdings (Australia) Interim Limited.

As lead audit partner for the review of the half-year financial report of GAAP Holdings (Australia) Interim Limited for the half-year ended 31 December 2026, I declare that to the best of my knowledge and belief, there have been no contraventions of:

(i) the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and

(ii) any applicable code of professional conduct in relation to the review.

Yours faithfully

DELOITTE TOUCHE TOHMATSU

s.307C(1), (3)

If an audit firm, audit company or individual auditor conducts an audit or review of the financial report for the half-year[12], the individual or lead auditor must give the directors of the company, registered scheme, registrable superannuation entity[13] or disclosing entity a written declaration that, to the best of the individual or lead auditor's knowledge and belief, there have been:

- No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit or review
- No contraventions of any applicable code of professional conduct in relation to the audit or review.

Alternatively, if contraventions have occurred, the auditor is required to set out those contraventions in a written declaration that, and include a statement in the declaration that to the best of the individual or lead auditor's knowledge and belief, those contraventions are the only contraventions of:

- The auditor independence requirements of the *Corporations Act 2001* in relation to the audit or review, or
- Any applicable code of professional conduct in relation to the audit or review.

s.307C(5)(a)

The auditor's independence declaration must be given when the auditor's report is given to the directors of the company, registered scheme, registrable superannuation entity or disclosing entity (other than when the conditions in s.307(5A) are satisfied – see below) and must be signed by the person making the declaration.

s.307C(5A)

A declaration under s.307C(1) or s.307C(3) in relation to a financial report for a half-year satisfies the conditions in this subsection if:

- The declaration is given to the directors of the company, registered scheme, registrable superannuation entity or disclosing entity before the directors pass a resolution under s.306(3) in relation to the directors' report for the half-year
- A director signs the directors' report within 7 days after the declaration is given to the directors
- The auditor's report on the financial report is made within 7 days after the directors' report is signed
- The auditor's report includes either of the following statements:
    - A statement to the effect that the declaration would be in the same terms if it had been given to the directors at the time the auditor's report was made
    - A statement to the effect that circumstances have changed since the declaration was given to the directors, and setting out how the declaration would differ if it had been given to the directors at the time the auditor's report was made.

s.307C(5B)

An individual auditor or lead auditor is not required to give a declaration under s.307C(1) and s.307C(3) in respect of a contravention if:

- The contravention was a contravention by a person of s.324CE(2) or s.324CG(2) (strict liability contravention of specific independence requirements by individual auditor or audit firm), or s.324CF(2) (contravention of independence requirements by members of audit firms)
- The person does not commit an offence because of s.324CE(4), s.324CF(4) or s.324CG(4) (quality control system defence).

[12] Section 307C of the Corporations Act also includes requirements for the auditor to make a written declaration in relation to the audit or review of the sustainability report. There is no requirement under the Corporations Act for the preparation of a sustainability report for half-year periods and accordingly, the requirements noted in this section exclude reference to the sustainability report.
[13] Registrable superannuation entities are not required to prepare a financial report for a half-year.

Independent auditor's report

Source

An independent auditor's report is prepared by the auditor in accordance with the Australian Auditing Standards. This publication does not include a model auditor's report.

Duty to report

Where the half-year financial report is subject to review

s.309(4) An auditor who reviews the financial report for a half-year must report to members on whether the auditor became aware of any matter in the course of the review that makes the auditor believe that the financial report does not comply with Division 2 of Part 2M.3 of the *Corporations Act 2001*, i.e.:

- Section 302 (disclosing entity must prepare half-year financial report and directors' report)
- Section 303 (contents of half-year report)
- Section 304 (compliance with accounting standards and regulations)
- Section 305 (true and fair view)
- Section 306 (half-year directors' report).

s.309(5) The review report must:

- Describe any matter the auditor became aware of in the course of the review that makes the auditor believe that the financial report does not comply with Division 2 of Part 2M.3 of the *Corporations Act 2001* (i.e. the provisions dealing with the half-year financial report and directors' report)
- Say why that matter makes the auditor believe the financial report does not comply with Division 2.

Where the half-year financial report is subject to audit

s.309(1) An auditor who audits the financial report for a half-year must report to members on whether the auditor is of the opinion that the financial report is in accordance with this Act, including:

- Section 304 (compliance with accounting standards)
- Section 305 (true and fair view).

If not of that opinion, the auditor's report must say why.

s.309(2) If the auditor is of the opinion that the financial report does not comply with an accounting standard, the auditor's report must, to the extent that it is practicable to do so, quantify the effect that non-compliance has on the financial report. If it is not practicable to quantify the effect fully, the report must say why.

s.309(3), s.307(b)-(d) The auditor's report must describe:

- Any defect or irregularity in the financial report
- Any deficiency, failure or shortcoming in respect of the following matters:
  - Whether the auditor has been given all information, explanation and assistance necessary for the conduct of the audit
  - Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept financial records sufficient to enable a financial report to be prepared and audited
  - Whether the company, registered scheme, registrable superannuation entity or disclosing entity has kept other records and registers as required by the *Corporations Act 2001*.

Directors' declaration

The directors declare that, in the directors' opinion:

s.303(4)(d)

(a) the attached consolidated financial statements and notes are in accordance with the *Corporations Act 2001*, including:

(i) giving a true and fair view of the consolidated entity's financial position as at 31 December 2026 and its performance for the half-year ended on that date; and

(ii) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001;* and

s.303(4)(c)

(b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

s.303(5)

Signed in accordance with a resolution of the directors made pursuant to s.303(5) of the *Corporations Act 2001*.

Profit/(loss) for the period from discontinued operation	14		
Profit/(loss) for the period			

[14] AASB 101:82(ba) requires impairment losses (including reversals of impairment losses or impairment gains) to be presented on the face of the statement of profit or loss. These impairment losses may arise from operating activities or from investing/financing activities. Therefore, when presenting a sub-total for operating profit it will be more meaningful to split the impairment losses into those which arise from operating activities, for example from trade and other receivables above operating profit, and those which arise from investing/financing activities, for example from debt securities, below operating profit.

Notes to the consolidated financial statements

Source

1. General information

Statement of compliance

AASB 134:19 The half-year financial statements are general purpose financial statements prepared in accordance with the *Corporations Act 2001* and AASB 134 *Interim Financial Reporting*. Compliance with AASB 134 ensures compliance with IFRS Accounting Standard IAS 34 *Interim Financial Reporting*. The half-year financial statements do not include notes of the type normally included in annual financial statements and should be read in conjunction with the most recent annual financial report.

Basis of preparation

The condensed consolidated financial statements have been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.

AASB 134:16A(a) The accounting policies and methods of computation adopted in the preparation of the half-year financial statements are consistent with those adopted and disclosed in the company's annual financial report for the financial year ended 30 June 2026 except as discussed in note 2 *Adoption of new and revised Australian Accounting Standards.* The accounting policies are consistent with Australian Accounting Standards and with IFRS Accounting Standards.

Source

1. General information (continued)

Rounding off of amounts

Updates to ASIC's rounding instrument

The illustrative wordings below have been updated to reflect the issue of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* applicable to full and half-year reports at 31 December 2026 and Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applicable to financial reports for periods ending after 31 December 2026. See *ASIC regulatory simplification* on page 10 for additional information.

ASIC-CI 2026/183 Section 7(2)(f)
ASIC-CI 2026/468 Section 10

If the company is an entity to which section 7 of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* or Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applies and consequently the amounts in the directors' report and the financial statements are rounded, that fact must be disclosed in the financial statements or the directors' report.

Where the conditions of the relevant Corporations Instrument are met, entities may round to the nearest dollar, nearest thousand dollars, nearest hundred thousand dollars, or to the nearest million dollars, depending upon the total assets of the entity. The appropriate rounding should be included in the disclosure below:

ASIC-CI 2026/183

The company is an entity to which section 7 of *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2026/183* applies and in accordance with that section amounts in the half-year financial report are rounded off to the nearest *[dollar / thousand dollars / hundred thousand dollars / million dollars]*, unless otherwise required.

ASIC-CI 2026/468 Section 10

[Applicable to financial reports for periods ending after 31 December 2026]

The company is an entity to which Part 2, Section 10 of *ASIC Corporations (Annual and Half-year Reporting) Instrument 2026/468* applies and in accordance with that section amounts in the half-year financial report are rounded off to the nearest *[dollar / thousand dollars / hundred thousand dollars/ million dollars],* unless otherwise required.

ASIC-CI 2026/183
ASIC-CI 2026/468, Section 10

Where the Corporations Instrument is applied, certain amounts in the financial statements are required to be rounded to differing levels of precision. It is important to ensure these amounts are shown using the correct level of precision and column headings and narrative information uses the correct level of rounding as required by the Corporations Instrument.

Source

2. Adoption of new and revised Australian Accounting Standards

Change in accounting policy

AASB 134:16A(a) Where accounting policy or methods of computation changes have been made since the most recent annual financial statements, the half-year financial report is required to include a description of the nature and effect of the change.

AASB 134:43 A change in accounting policy, other than one for which the transition is specified by a new Australian Accounting Standard, is reflected by:

- Restating the financial statements of the comparable half-year period of any prior annual reporting periods that will be restated in the annual financial statements in accordance with AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors*, or
- When it is impracticable to determine the cumulative effect at the beginning of the annual reporting period of applying a new accounting policy to all prior periods, adjusting the financial statements of the comparable half-year period of any prior annual reporting periods to apply the new accounting policy prospectively from the earliest date practicable.

AASB 134:44 That is, any change in accounting policy is applied either retrospectively or, if that is not practicable, prospectively, from no later than the beginning of the annual reporting period.

The detailed disclosure requirements of AASB 108 *Accounting Policies, Changes in Accounting Estimates and Errors* in respect of changes in accounting policy or of a new or amended standard itself in respect of transition do not apply unless specifically added to AASB 134 by means of a consequential amendment. However, judgement will be required to determine the appropriate disclosures necessary to satisfy the requirements of AASB 134 as well as investor expectations of information on changes in, for example, reported profits.

The appropriate level of disclosure will differ depending on the extent and nature of the changes resulting from changes in accounting policy or from the application of each new or amended standard and any additional requirements on the disclosure of changes in accounting policies or on the presentation of comparative information applied by relevant regulators should also be considered.

In assessing the necessary disclosures in the condensed half-year financial statements, entities should consider the need to provide information on, for example:

- The new accounting policies applied
- The transitional method adopted and any choices provided by the new or amended standard
- The key judgements and estimates applied
- The quantitative effects
- Presentation and restatement of comparative information.

Whilst the requirements of AASB 101 *Presentation of Financial Statements* on key judgements and sources of estimation uncertainty do not apply to condensed half-year financial statements, an indication of the judgements taken and estimates made in applying complex new requirements should be considered if necessary to help a user of the condensed half-year financial statements understand the entity's application of a new standard.

In addition, whilst not directly applicable to condensed half-year financial statements, the transitional disclosures required in annual financial statements might be referred to in considering whether any more specific quantitative disclosures should be provided.[16]

[16] Source - commentary on *Change in accounting policy*: iGAAP Chapter A32 *Interim financial reporting* Section 4.4-1 *Disclosure of information in condensed interim financial statements regarding new or amended accounting standards adopted in the current financial year*. 2. Adoption of new and revised Australian Accounting Standards (continued)

New and amended Accounting Standards that are effective for the current period

(AASB 101:31) There is no requirement to present a full listing of mandatorily effective standards. Disclosures should only include Accounting Standards, amendments to Accounting Standards and other pronouncements that:

- Are mandatorily effective for the current period
- Are applicable to the entity's circumstances or might have an effect on future periods
- Have a material impact on the entity, or where the information disclosed is material.

AASB 134:16A(a)
(AASB 108:28(a), (b), (c), (d)) The Group has adopted all the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are relevant to its operations and effective for an accounting period that begins on or after 1 July 2026.

Set out below are the new and revised Standards *[and Interpretations]* effective for the current half-year that are relevant to the Group:

AASB 108:28(a) **AASB 2025-1 *Amendments to Australian Accounting Standards – Contracts Referencing Nature-dependent Electricity***

AASB 134:16A(a) In the current period, the group has applied AASB 2025-1 *Amendments to Australian Accounting Standards – Contracts Referencing Nature-dependent Electricity* (the 'nature-dependent electricity amendments') for the first time.

(AASB 108:28(c)) The amendments are as follows:

- The own use requirements in AASB 9 *Financial Instruments* are amended to include the factors an entity is required to consider when applying AASB 9:2.4 to contracts to buy and take delivery of renewable electricity for which the source of production of the electricity is nature-dependent
- The hedge accounting requirements in AASB 9 are amended to permit an entity using a contract for nature-dependent renewable electricity with specified characteristics as a hedging instrument:
    - To designate a variable volume of forecast electricity transactions as the hedged item if specified criteria are met
    - To measure the hedged item using the same volume assumptions as those used for the hedging instrument
- New disclosure requirements were added to AASB 7 *Financial Instruments:* in respect of contracts for nature-dependent electricity with specified characteristics.

The group's nature-dependent electricity contracts

(AASB 7:30A(a)) In February 2023, the group signed an offshore wind energy deal with *[name of the entity]*. The physical PPA has a term of 15 years. The long-term PPA is for 90 per cent of the output of carbon-free energy from the offshore wind farm in *[location]* representing ___ MWh on an annualised basis. This will allow the group's UK operations to operate at or near 70 per cent carbon-free energy on an hourly basis. The contract's terms expose the group to the variability of wind speed and the potential for oversupply if the wind is strong when the group does not need the electricity. As the result of oversupply, the group will have to sell unused electricity as market design does not offer any alternatives and the group has no practical ability to store electricity.

(AASB 7:30A(c)) During the period under the PPA contract the group purchased __ MWh for $___ out of which ___ MWh was unused and sold for $___. The group purchased ___ MWh for $___ to offset sales of unused electricity. Overall, during the period the group was a net purchaser of the electricity.

2. Adoption of new and revised Australian Accounting Standards (continued)

New and amended Accounting Standards that are effective for the current period (continued)

AASB 108:28(a)

AASB 2025-1 *Amendments to Australian Accounting Standards – Contracts Referencing Nature-dependent Electricity* (continued)

The group's nature-dependent electricity contracts (continued)

(AASB 7:30A(b)(ii)) On 31 December 2026, the fixed purchase price of the electricity under the contract is lower than the market price for the electricity. However, the contracted purchase price is expected to be higher than the expected market price (i.e. the forward price) for the electricity throughout the period until maturity of the contract. The group does not consider the contract to be onerous because *[provide a qualitative information on how the entity assessed whether the contract might become onerous, including the assumptions used in the assessment].*

In addition, in August 2026, the group entered in a virtual power purchase agreement (VPPA) contract to manage the power price risk associated with anticipated purchase transactions out to 15 years.

Impact of the initial application of the nature-dependent electricity amendments

Prior to applying the nature-dependent electricity amendments the group accounted for the PPA as a derivative measured at FVTPL because the group concluded that the contract did not meet the own use exception. As at 30 June 2026, the PPA was recognised in the statement of financial position at $____ (financial liability).

Upon application of the nature-dependent electricity amendments, the group has determined that the PPA meets the amended criteria for the own use exception for contracts referencing nature-dependent electricity and, accordingly, the PPA is now accounted for as an executory contract.

(AASB 9:7.2.51) The group has chosen not to restate prior periods. Accordingly, on 1 July 2026, the carrying amount of the derivative instrument recognised in respect of the physical PPA of $____ was derecognised with a corresponding credit recorded in opening retained earnings.

As the VPPA contract was entered into during the current period, there was no impact of that contract on the initial application of the nature-dependent electricity amendments. However, the group has designated the VPPA contract as a cash flow hedge of highly probable purchases as permitted by the amendments (see note 17 for more information).

AASB 108:28(a)

AASB 2024-2 *Amendments to Australian Accounting Standards – Classification and Measurement of Financial Instruments*

AASB 134:16A(a) In the current half-year, the group has applied AASB 2024-2 *Amendments to Australian Accounting Standards – Classification and Measurement of Financial Instruments* for the first time.

AASB 108:28(c) AASB 2024-2 amends AASB 9 to address:

- The derecognition of a financial liability settled through electronic transfer
- The classification of financial assets in respect of:
    - Contractual terms that are consistent with a basic lending arrangement
    - Financial assets with non-recourse features
    - Contractually linked instruments.

Source

2. Adoption of new and revised Australian Accounting Standards (continued)

New and amended Accounting Standards that are effective for the current period (continued)

AASB 108:28(a)

AASB 2024-2 *Amendments to Australian Accounting Standards – Classification and Measurement of Financial Instruments* (continued)

AASB 108:28(c) AASB 2024-2 also amends AASB 7 to:

- Modify the disclosure requirements for investments in equity instruments designated at FVTOCI
- Introduce disclosure requirements for financial instruments that include contractual terms that could change the timing or amount of contractual cash flows on the occurrence (or non-occurrence) of a contingent event.

Impact of the initial application of the amendments

(AASB 9:7.2.49) The group holds green bonds issued by *[name of entity]*. The green bonds are held by the group within a business model whose objective is to collect their contractual cash flows. The group will receive nominal amount of $ ___ million when the bonds mature on *[date]*. The bonds are interest bearing with an initial rate of ___ per cent per annum. The interest rate is adjusted annually by 50 basis points if *[name of entity]* achieves a reduction in carbon emissions by ___ CO2e during the preceding year.

Before the adoption of the AASB 2024-2 amendments, the green bonds were accounted for at FVTPL as part of Investments. The directors of the parent entity have assessed that the possible changes in contractual cash flows due to adjustments to the interest rate range between $ ___ and $ ___ , representing approximately a ___ per cent difference in cash flows. Since, in all contractually possible scenarios, the contractual cash flows on the green bonds would not be significantly different from those on a financial instrument with identical terms but without the contractual feature adjusting the interest rate contingent on reduction in carbon emissions, the group has concluded that the contractual cash flows on green bonds meet the SPPI criteria.

(AASB 9:7.2.48) As permitted under the transition requirements, the group has elected not to restate comparative information. Accordingly, at 1 July 2026, being the date of initial application of the amendments, the group reclassified its investment in green bonds issued by *[name of entity]* from the FVTPL category to the amortised cost category.

As at 30 June 2026		**As at 1 July 2026**	
Measurement category	**Carrying amount $'000**	**Measurement category**	**Carrying amount $'000**
FVTPL		Amortised cost	

The difference of $ ____ between the carrying amount determined immediately before and after application of the amendments was recognised as an adjustment to the opening balance of retained earnings at the date of initial application (1 July 2026).

Source

2. Adoption of new and revised Australian Accounting Standards (continued)

New and amended Accounting Standards that are effective for the current period (continued)

In addition, the Group also applied the following pronouncements for the first time during the current half-year:

Pronouncement	Impact
AASB 2026-1 *Amendments to Australian Accounting Standards – Disclosures about Uncertainties in the Financial Statements*	Amends AASB 136 *Impairment of Assets* and AASB 137 *Provisions, Contingent Liabilities and Contingent Assets* by adding additional illustrative examples to their accompanying guidance which illustrate how an entity applies the requirements of the amended standards to report the effects of uncertainties in its financial statements. The example added to AASB 136 illustrates how an entity discloses information about the key assumptions it uses to determine the recoverable amounts of assets – in this case, assumptions related to the future emission allowance costs – together with the entity's approach to assigning values to those assumptions. The example added to AASB 137 demonstrates how an entity might disclose information about plant decommissioning and site restoration obligations and the uncertainties surrounding them even if their effect on the carrying amount of the entity's plant decommissioning and site-restoration provision is immaterial. These examples are also part of the illustrative examples *Disclosures about Uncertainties in the Financial Statements* issued by the IASB in November 2025.

Other pronouncements

The below mandatorily effective standards for the current period have not been included in the illustrative disclosures above as they are not material, or are not relevant to, the Group:

- AASB 2024-3 *Amendments to Australian Accounting Standards – Annual Improvements Volume 11*
- AASB 2025-2 *Amendments to Australian Accounting Standards – Classification and Measurement of Financial Instruments: Tier 2 Disclosures*
- AASB 2025-3 *Amendments to Australian Accounting Standards – Contracts Referencing Nature-dependent Electricity: Tier 2 Disclosures.*

Source

2. Adoption of new and revised Australian Accounting Standards (continued)

New and revised Australian Accounting Standards and Interpretations on issue but not yet effective

AASB 108.30

Although not strictly required, entities preparing general purpose financial statements should consider whether they should disclose information about significant new Accounting Standards and Interpretations which may have a material impact on the reported financial performance and/or financial position of the entity.

This is particularly relevant where major new Australian Accounting Standards are applicable in future periods (e.g. AASB 18 *Presentation and Disclosure in Financial Statements*) or where a particular amendment is expected to have a material impact on the entity.

AASB 18 *Presentation and Disclosure in Financial Statements*

As noted in section *Pronouncements not yet effective* (page 9), in June 2024 the AASB issued a new presentation and disclosure standard, AASB 18 *Presentation and Disclosure in Financial Statements* which replaces AASB 101 *Presentation of Financial Statements*. AASB 18 seeks to introduce enhanced requirements for the presentation of financial statements, focusing on information in the statement of profit or loss, with limited amendments in AASB 107 *Statement of Cash Flows*. Key features include:

- Requiring new defined subtotals ('operating profit' and 'profit before financing and income taxes') and categories (operating, investing and financing) in the statement of profit or loss
- New disclosures about management-defined performance measures (MPMs), limited to subtotals of income and expenses
- Enhanced guidance on the grouping of information (aggregation and disaggregation), including guidance on whether information should be presented in the primary financial statements or disclosed in the notes, and disclosures about items labelled as 'other'.

Whilst not effective until reporting periods beginning on or after 1 January 2027 (for Tier 1 for-profit entities) and 1 January 2028 (for not-for-profit and superannuation entities), early adoption may be attractive for entities seeking to improve the quality of their financial reporting.

In relation to Tier 2 entities, the AASB issued Invitation to Comment ITC 56 *Post-implementation Review of Tier 2 and the Removal of Special Purpose Financial Statements for Certain For-Profit Private Sector Entities and Further Update of Tier 2*. The Invitation to Comment included consideration of the potential effects of AASB 18 on AASB 1060 *General Purpose Financial Statements – Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities.* In response, in June 2026, the AASB fast-tracked ED 341 *Updating AASB 1060 to Align the Classification and Presentation Requirements with AASB 18*, which closed for comment on 24 August 2026. At the date of finalisation of this publication (30 October 2026), the project is still pending and no final amendments have yet been released. Accordingly, Tier 2 entities choosing to prepare half-year reports may wish to wait for the outcome of the AASB's project before early adopting AASB 18.

2. Adoption of new and revised Australian Accounting Standards (continued)

New and revised Australian Accounting Standards and Interpretations on issue but not yet effective (continued)

AASB 20 *Regulatory Assets and Regulatory Liabilities*

Introduces a new accounting model for entities affected by rate regulation, including in sectors such as utilities and energy. The Standard is designed to better align recognition of an entity's total allowed compensation with the period in which the related goods or services are provided. It also includes detailed requirements on recognition, measurement, presentation and disclosure.

Regulatory assets are defined as enforceable present rights to add an amount to future rates. Regulatory liabilities are defined as enforceable present obligations to deduct an amount from future rates.

An entity is required to recognise all regulatory assets and all regulatory liabilities existing at the end of the reporting period. If there is existence uncertainty, an entity is required to recognise a regulatory asset or regulatory liability if it is more likely than not that it exists. The recognition of some regulatory assets and regulatory liabilities is subject to specified conditions being met.

Regulatory assets and regulatory liabilities are measured on initial recognition based on all estimated future cash flows arising from a regulatory asset or regulatory liability, discounted using the regulatory interest rate. For the subsequent measurement, an entity updates the estimates of future cash flows and continues to use the regulatory interest rate as the discount rate, unless the regulatory agreement changes the regulatory interest rate.

AASB 20 is effective for annual reporting periods beginning on or after 1 January 2029.

For more information see iGAAP in Focus *Financial reporting: IASB issues IFRS 20 Regulatory Assets and Regulatory Liabilities.*

3. Significant changes from the annual financial statements

General requirements

AASB 134:16A

AASB 134 contains specific disclosures that are required in interim financial reports, including:

AASB 134:16A(a)

- A statement that the same accounting policies and methods of computation are followed in the interim financial statements as compared with the most recent annual financial statements or, if those policies or methods have been changed, a description of the nature and effect of the change

AASB 134:16A(c)

- The nature and amount of items affecting assets, liabilities, equity, net income or cash flows that are unusual because of their nature, size or incidence.

The examples below illustrate or explain how these requirements might be met in specific circumstances. Entities should develop disclosures that meet the requirements of AASB 134 and reflect the entity's specific transactions and events.

Ongoing financial reporting considerations in times of uncertainty

Australian businesses are navigating a volatile and uneven business environment, characterised by renewed upward pressure on interest rates, a softening labour market and persistent cost-of-living pressures that continue to influence consumer behaviour. Global uncertainties, including changing tariff settings, volatility of oil and gas prices, geopolitical risks, extreme weather events, cyber threats and supply chain disruptions, may add to inflationary pressures and weigh on business activity, investment and demand.

An important response to these conditions is transparent and entity-specific reporting that enables users to understand how the changing environment has affected the entity, together with the key decisions, judgements and uncertainties involved in preparing the financial report.

Emerging learnings from the first and second waves of mandatory climate reporting reinforce the importance of connectivity across the financial statements, sustainability report and directors' report. As reporting practices continue to develop, entities should focus on presenting a coherent and consistent narrative about their current performance, strategy and outlook across the short, medium and long term. This includes clearly linking climate-related risks and opportunities, financial effects, strategic responses and resource-allocation decisions, and explaining any apparent differences in assumptions or information across the annual report. Over time, these learnings should support more decision-useful reporting as climate-related analysis becomes increasingly embedded in broader strategic and financial planning.

Transparent, entity-specific disclosure is particularly important in areas involving significant judgement or estimation uncertainty. These areas remain subject to close regulatory scrutiny, and entities should ensure their disclosures clearly explain the assumptions, judgements and risks affecting their financial position and performance.

Volatile oil prices, supply risks and tariffs continue to affect global trade, supply chains and investment decisions with potential consequences for economic growth, inflation and exchange rates. Entities should consider how these developments may affect their operations and financial reporting.

For a detailed discussion, see section A2.1 of the *31 December 2026 Tier 1 models and reporting considerations* publication available at www.deloitte.com/au/models.

Source

3. Significant changes from the annual financial statements (continued)

Recent IFRIC agenda decisions

IFRIC has issued a number of agenda decisions which include the below. Entities should consider whether they are impacted by any of the IFRIC agenda decisions and whether they need to change their accounting policies as a result of the agenda decisions but are entitled to 'sufficient time' to do so:

- **Climate-related commitments (IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*) (April 2024):** The agenda decision refers to a fact pattern when an entity, a manufacturer of household products, has publicly stated a net-zero transition commitment by publishing a detailed plan for modification of manufacturing methods in order to reduce its annual greenhouse gas emissions by at least 60% of their current level in the ninth year and to buy carbon credits to offset the remaining emissions after those nine years. The Committee concluded that whether the entity's statement about its commitments to reduce and offset its greenhouse gas emissions creates a constructive obligation to fulfil those commitments depends on the facts of the statement and the circumstances surrounding it. Management would apply judgement to reach a conclusion at each reporting date about whether a valid expectation that the entity will fulfil the commitment is created. If management concludes that its statement creates a constructive obligation:

  - **Day one – Announcement of commitment: No provision is recognised** - The constructive obligation is not a present obligation as a result of a past event, as the obligation for future costs does not exist independently of the entity's future actions to which it committed
  - **During the next nine years: No provision is recognised** - The entity does not have a present obligation arising from a past event until it has emitted the greenhouse gases in year nine and in subsequent years to which it has committed to offset
  - **Year nine and subsequently: Provision is recognised if all criteria are met** - The entity will incur a present obligation to offset the greenhouse gases, only if and when it emits greenhouse gases in year nine and in subsequent years. Consequently, if the entity has not yet settled that obligation and a reliable estimate can be made of the amount of the obligation, the entity recognises a provision.

  The Committee additionally observed that if a provision is recognised, the corresponding amount is recognised as an expense, rather than as an asset, unless it gives rise to – or forms part of the cost of – an item that qualifies for recognition as an asset. Irrespective of whether an entity's commitment to reduce or offset its greenhouse gas emissions results in the recognition of a provision, the actions the entity plans to take to fulfil that commitment could affect the amounts at which it measures its other assets and liabilities and the information it discloses about them, as required by IFRS Accounting Standards

Source

3. Significant changes from the annual financial statements (continued)

Recent IFRIC agenda decisions (continued)

- **Disclosure of revenues and expenses for reportable segments (IFRS 8 *Operating Segments*) (July 2024):** The agenda decision requires the disclosure of the amounts listed in IFRS 8:23 (AASB 8:23) (e.g. revenue, interest revenue and expense, depreciation and amortisation) for each reportable segment when those amounts are included in segment profit or loss reviewed by the chief operating decision maker (CODM) – even if not separately provided or reviewed by the CODM – or if those amounts are regularly provided to the CODM – even if not included in segment profit or loss.

  In addition, it was observed that IFRS 8:23(f) does not require disclosure by reportable segment of each material item of income or expense that is presented separately in the statement of profit or loss or disclosed in the notes in accordance with IAS 1:97 (AASB 101:97). In determining information to be disclosed for each reportable segment, an entity applies judgment and considers the core principle of IFRS 8, which requires an entity to disclose information to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environments in which it operates

- **Guarantees issued on obligations of other entities (April 2025):** The agenda decision addresses a request about how an entity should account for guarantees that it issues. It considers several fact patterns involving the issue of contractual guarantees on obligations of a joint venture, including guarantees to make payments to a bank, a customer, or another third party in the event the joint venture fails to meet its contractual obligations under its service contracts or partnership agreements and fails to make payments when due. The Committee observed that IFRS Accounting Standards do not define "guarantees" and no single accounting standard applies to all guarantees. The Committee further observed that an entity should apply the following steps to determine the appropriate standard:

  - **Financial guarantee – IFRS 9** – Consider whether an issued guarantee is a financial guarantee contract as defined in IFRS 9 *Financial Instruments.* The Committee noted that entities should apply judgement in interpreting the meaning of the term "debt instrument" in the definition of a financial guarantee contract as this term is not defined
  - **Insurance contract – IFRS 17** - If an entity concludes it is not a financial guarantee, the entity considers whether the guarantee is an insurance contract as defined in IFRS 17 *Insurance Contracts*
  - **Other standards -** If an entity concludes it is neither of the above, it considers requirements of other standards, including:
    - IFRS 9 for a loan commitment or a derivative
    - IFRS 15 *Revenue from Contracts with Customers* for a guarantee to a customer
    - IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* if the guarantee gives rise to a provision, contingent liability, or contingent asset

- **Economic benefits from use of a battery under an offtake arrangement (IFRS 16 *Leases*) (April 2026):** The agenda decision considered whether an electricity retailer has the right to obtain substantially all of the economic benefits from the use of a battery under a battery offtake arrangement for the purposes of assessing whether the arrangement contains a lease. The fact pattern involved a battery owner and an electricity retailer participating in a gross pool electricity market, in which only the registered participant can transact with the market operator. As the battery owner is the registered participant, it buys and sells electricity with the market operator at spot prices and passes the resulting cash flows to the retailer, while the retailer pays a fixed amount for access to the battery. These amounts are periodically settled net in cash between the parties. The retailer has the exclusive right to use 100% of the battery's capacity and can instruct when and how much the battery was charged and discharged. The Committee concluded that the battery is used to store, and then release, electricity—and not to produce electricity. Based on that, the economic benefits from use of the battery arise from its storage capability and capacity and the retailer obtains substantially all of those economic benefits

Source

3. Significant changes from the annual financial statements (continued)

Recent IFRIC agenda decisions (continued)

- **Classification of gains and losses on a derivative managing a foreign currency exposure (IFRS 18 *Presentation and Disclosure in Financial Statements*) (April 2026):** The agenda decision considered how an entity applies IFRS 18 to classify gains and losses on a derivative that is used to manage foreign currency risk but is not designated as a hedging instrument. In the fact pattern, a group has a foreign currency-denominated asset and liability that resulted in a net liability exposure. To manage the foreign currency risk of that net exposure, a treasury entity entered into an external forward contract with a third party. The group's risk management policy identified the derivative as managing only the foreign currency risk of the net liability exposure, rather than the gross underlying asset and liability positions. The Committee concluded that gains and losses on the derivative should be classified in the same category as the income and expenses affected by the risk being managed. Because the derivative managed a net liability exposure, the relevant risk affected only the financing category of the statement of profit or loss. The Committee also concluded that classifying the derivative gains and losses in the financing category would not result in a prohibited "grossing up" of gains and losses, as the managed risk affected only a single category. Accordingly, any gain or loss on the derivative would be presented in the financing category

- **Classification of a foreign exchange difference from an intragroup monetary liability (or asset) (IFRS 18 *Presentation and Disclosure in Financial Statements*) (April 2026)**: The agenda decision considered how an entity applies IFRS 18 to classify foreign exchange differences arising on an intragroup monetary loan between entities with different functional currencies. In the fact pattern, the intragroup loan was not part of a net investment in a foreign operation. Although the loan balance and related income and expenses were eliminated on consolidation, the resulting foreign exchange differences remain recognised in the consolidated statement of profit or loss. IFRS 18 requires to 'classify foreign exchange differences included in the statement of profit or loss in the same category as the income and expenses from the items that gave rise to the foreign exchange differences. The Committee observed that the intragroup monetary asset or liability is the item that gives rise to the foreign exchange difference and concluded that IFRS 18 supports two acceptable accounting policies. . An entity may classify the foreign exchange difference:

  - In the operating category as a default category because there are no related income or expenses after elimination (View 1)
  - In the category in which the income and expenses from the intragroup loan would have been presented before elimination (View 2). In applying this view the entity classifies the exchange difference from its perspective (as a consolidated group), which means that the classification might differ from the category in which the subsidiary classified the exchange difference in its standalone accounts.
  - The Committee concluded that both approaches are reasonable applications of IFRS 18 and that entities should apply their chosen policy consistently

Source

3. Significant changes from the annual financial statements (continued)

Recent IFRIC agenda decisions (continued)

- **Assessment of a specified main business activity for the purposes of the separate financial statements of a parent (IFRS 18 *Presentation and Disclosure in Financial Statements*) (April 2026):** The agenda decision considered whether a parent entity, for the purposes of its separate financial statements, has a specified main business activity of investing in unconsolidated subsidiaries. The fact pattern involved a parent whose only substantive activities were holding investments in subsidiaries, making decisions about their management, acquisition and disposal, and distributing returns to shareholders. The parent accounted for its investments in subsidiaries at cost and, for the purposes of the group's consolidated financial statements, had concluded that no specified main business activity existed. The parent does not provide to its shareholders any segmental analysis or use any subtotals to explain its operating performance related to its separate financial statements. The parent also does not use such metrics for internal monitoring purposes. Shareholders are provided segmental analysis and subtotals as indicators of the consolidated group's operating performance. The Committee concluded that the assessment is made from the perspective of the reporting entity preparing the separate financial statements and can differ from the assessment made for the consolidated group. In the circumstances described, the parent's only substantive activity was investing in and managing unconsolidated subsidiaries, which provided sufficient evidence that investing in those subsidiaries was a specified main business activity. Accordingly, in the parent's separate statement of profit or loss, income and expenses arising from the investments accounted for at cost are classified in the operating category, rather than the investing category

- **Scope of the requirements to disclose expenses by nature (April 2026):** The agenda decision considered whether the requirement to disclose operating expenses by nature applies only if certain operating expenses presented by function or if any expense presented by function in the operating category of the statement of profit or loss. The Committee concluded that the requirement to provide additional disclosures by nature of expenses applies when any expense is presented by function in the operating category. It also noted that the disclosed amounts may include costs that have been capitalised as part of an asset rather than recognised as an expense in the current period, and that entities should explain this and identify the related assets when relevant.

Entities that have not reflected the guidance in their prior annual report

AASB 134:16A(a) Where entities first reflect the impacts of IFRIC agenda decisions in the current half-year, entities should provide a description of the nature and effect of the change where material.

AASB 134:43 Further where a change in accounting policy is required, comparative financial information should be retrospectively restated where material.

In addition, information about the change in accounting policy should be provided.

Source

4. Operating segments

Products and services from which reportable segments derive their revenues

AASB 134:16A(g)(v)

Information reported to the Group's Chief Executive (the Chief Operating Decision Maker (CODM)) for the purposes of resource allocation and assessment of segment performance is focused on the category of customer for each type of activity. The principal categories of customer are direct sales to major customers, wholesalers and internet sales. The Group's reportable segments under AASB 8 *Segment Reporting* are therefore as follows:

- Electronic equipment – direct sales customers
- Electronic equipment – wholesale customers
- Electronic equipment – internet customers
- Leisure goods – wholesale customers
- Leisure goods – retail outlets
- Computer software – installation of computer software for specialised business applications
- Construction – construction of residential properties
- Other *[describe]*

The leisure goods segments supply sports shoes and equipment, as well as outdoor play equipment.

The electronic equipment (direct sales) segment includes a number of direct sales operations in various cities within Country A each of which is considered as a separate operating segment by the CODM. For financial statements presentation purposes, these individual operating segments have been aggregated into a single operating segment considering the following factors:

- These operating segments have similar long-term gross profit margins
- The nature of the products and production processes are similar
- The methods used to distribute the products to the customers are the same.
- *[Specify any other factors]*

Two operations ([*describe operations*]) were discontinued with effect from 23 October 2026. The segment information reported on the next pages does not include any amounts for these discontinued operations (see note 14).

Other operations include *[identify other operations and their sources of revenue if any.]*

Information regarding these segments is presented below.

Source

4. Operating segments (continued)

AASB 134:16A(g)(i), (iii) The following is an analysis of the Group's revenue and results by reportable operating segment:

	Revenue		Segment profit	
	Half-year ended		Half-year ended	
	31/12/2026	31/12/2025	31/12/2026	31/12/2025
	$'000	$'000 Restated*	$'000	$'000 Restated*
Continuing operations				
Electronic equipment – direct sales customers				
Electronic equipment – wholesale customers				
Electronic equipment – internet customers				
Leisure goods – wholesale customers				
Leisure goods – retail outlets				
Computer software – installation of computer software for specialised business applications				
Construction – construction of residential properties				
Other *[describe]*				
Total				
Central administration costs				
Share of profits from associates				
Share of profits from joint ventures				
Finance income				
Other gains and losses				
Finance costs				
Other *[describe]*				
AASB 134:16A(g)(vi) Profit before tax				
Discontinued operations				
Profit for the period from discontinued operations				
Income tax expense (continuing and discontinued operations)				
Profit after tax and discontinued operations				

* See note 2 for details regarding the *[change in accounting policy / prior period error]*.

AASB 134:16A(g)(i), (ii) The revenue reported above represents revenue generated from external customers. There were no intersegment sales during the half-year.

AASB 134:16A(g)(v) The accounting policies of the reportable segments are the same as the Group's accounting policies.

Source

4. Operating segments (continued)

AASB 134:16A(g)(v), (vi) Segment profit represents the profit earned by each segment without allocation of the share of profits of associates and joint ventures, central administration costs including directors' salaries, finance income, non-operating gains and losses in respect of financial instruments and finance costs, and income tax expense. This is the measure reported to the Group's Chief Executive for the purpose of resource allocation and assessment of segment performance.

AASB 134:16A(g)(ii) Separate disclosure of intersegment revenues, if included in the measure of segment profit or loss reviewed by the chief operating decision maker or otherwise regularly provided to the chief operating decision maker, is required, if material.

AASB 134:16A(g)(vi) The interim financial report includes a reconciliation of the total of the reportable segments' measures of profit or loss to the entity's profit or loss before tax expense (tax income) and discontinued operations. However, if an entity allocates to reportable segments items such as tax expense (tax income), the entity may reconcile the total of the segments' measures of profit or loss to profit or loss after those items. Material reconciling items shall be separately identified and described in that reconciliation.

In July 2024, the IFRS Interpretations Committee published an agenda decision titled 'Disclosure of Revenues and Expenses for Reportable Segments', which considers the requirement in AASB 8:23(f) to disclose, for each reportable segment, material items of income and expense disclosed in accordance with AASB 101:97.

The key points highlighted in the agenda decision include:

- An entity is required to disclose the specified amounts for each reportable segment when they are:
    - Included in the measure of segment profit or loss reviewed by the chief operating decision maker (CODM), even if they are not separately provided to or reviewed by the CODM, or
    - Regularly provided to the CODM, even if they are not included in the measure of segment profit or loss.
- The material items to be disclosed include, but are not limited to, the items listed in AASB 101:98 (e.g. write-downs of assets, restructuring expenses or gains/losses on disposal)
    - An entity is not required to disclose, by reportable segment, each item of income and expense presented in its statement of profit or loss or disclosed in the notes
    - In determining the information to disclose for each reportable segment, an entity applies judgement and considers:
        - The principles of materiality and aggregation in AASB 101
        - The core principle of AASB 8, which requires an entity to disclose information to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environments in which it operates.

Entities that disclose more than the minimum segment information required by AASB 134, should consider the requirements of the agenda decision which will apply to an entity's annual financial report.

Source

4. Operating segments (continued)

AASB 134:16A(g)(iv) The following is an analysis of the Group's assets and liabilities by reportable operating segment:

	Segment assets		Segment liabilities	
	31/12/2026	30/06/2026	31/12/2026	30/06/2026
	$'000	$'000 Restated*	$'000	$'000 Restated*
Continuing operations				
Electronic equipment – direct sales customers				
Electronic equipment – wholesale customers				
Electronic equipment – internet customers				
Leisure goods – wholesale customers				
Leisure goods – retail outlets				
Computer software – installation of computer software for specialised business applications				
Construction – construction of residential properties				
Other *[describe]*				
Total segment assets and liabilities				
Assets relating to discontinued operations				
Unallocated assets and liabilities				
Consolidated assets and liabilities				

At 30 June 2026, the operating segments included the assets of segments leisure goods – wholesale customers and leisure goods – retail outlets which were sold on 23 October 2026.

Assets used jointly by reportable segments are allocated on the basis of the revenues earned by individual reportable segments.

AASB 134:16A(g)(iv) requires disclosure of a measure of total assets and liabilities for a particular reportable segment if such amounts are regularly provided to the chief operating decision maker and if there has been a material change from the amount disclosed in the last annual financial statements for that reportable segment. If there is material change in the total assets of one or some of the reportable segment(s), the disclosure can be in the form of simply explaining material changes. For example:

During the half-year reporting, the company made investments of $___ to increase the existing operating capacity to manufacture the electronic equipment.

Source

5. Revenue

Overview of requirements

AASB 134:16A(l) AASB 134 requires an entity to disclose a disaggregation of revenue from contracts with customers required by paragraphs 114-115 of AASB 15 *Revenue from Contracts with Customers*.

(AASB 15.114) An entity disaggregates revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

(AASB 15.B78) The extent to which an entity's revenue is disaggregated for the purposes of this disclosure depends on the facts and circumstances that pertain to the entity's contracts with customers.

(AASB 15.B88) When selecting the type of category (or categories) to use to disaggregate revenue, an entity considers how information about the entity's revenue has been presented for other purposes, including all of the following:

- Disclosures presented outside the financial statements (for example, in earnings releases, annual reports or investor presentations)
- Information regularly reviewed by the chief operating decision maker for evaluating the financial performance of operating segments
- Other information that is similar to the types of information identified in (a) and (b) and that is used by the entity or users of the entity's financial statements to evaluate the entity's financial performance or make resource allocation division.

(AASB 15.B89) Examples of categories that might be appropriate include, but are not limited to:

- Type of good or service (for example, major product lines)
- Geographical region (for example, country or region)
- Market or type of customer (for example, government and non-government customers)
- Contract duration (for example, short-term and long-term contracts)
- Timing of transfer of goods or service (for example, revenue from goods or services transferred to customers at a point in time and revenue from goods or services transferred over time)
- Sales channels (for example, goods sold directly to consumers and goods sold through intermediaries).

(AASB 15.115) In addition, an entity discloses sufficient information to enable users of financial statements to understand the relationship between the disclosure of disaggregated revenue and revenue information that is disclosed for each reportable segment, if the entity applies AASB 8 *Operating Segments*.

In the illustrative financial statements the Group has assessed that the disaggregation of revenue by operating segments is appropriate in meeting this disclosure requirement as this is the information regularly reviewed by the chief operating decision maker (CODM) in order to evaluate the financial performance of the entity.

See our Clarity publication *Disaggregated revenue disclosures - The relevance and value of more transparent revenue disclosures* for more information.

Other considerations

AASB 15.113(a) requires revenue recognised from contracts with customers to be disclosed separately from its other sources of revenue (e.g. rental income) unless that amount is presented separately in the statement of comprehensive income in accordance with other Standards. As the Group has no other sources of revenue apart from revenue from contracts with customers this disclosure has not been made in this model half-year report.

Source

5. Revenue (continued)

Disaggregation of revenue

The Group derives its revenue from the transfer of goods and services over time and at a point in time in the following major product lines. The disclosure of revenue by product line is consistent with the revenue information that is disclosed for each reportable segment under AASB 8 *Operating Segments* (see note 4):

		Revenue	
		Half-year ended	
		31/12/2026 $'000	31/12/2025 $'000 Restated*
AASB 134:16A(l)	**External revenue by product line**		
	Electronic equipment – direct sales customers		
	Electronic equipment – wholesaler customers		
	Electronic equipment – internet customers		
	Leisure goods – wholesaler customers		
	Leisure goods – retail outlets		
	Computer software installation		
	Construction		
	Leisure goods – wholesaler customers (toys - discontinued)		
	Leisure goods – retail outlets (toys - discontinued)		
	External revenue by timing of revenue		
	Goods transferred at a point in time		
	Goods transferred over time		
	Services transferred at a point in time		
	Services transferred over time		
(AASB 15.115)	**Shown in the segment note as follows:**		
	Continuing operations		
	Discontinuing operations		

Source

6. Results for the period

Overview of requirements

AASB 134:16A(b)

The notes to the condensed consolidated financial statements include explanatory comments about the seasonality or cyclicality of the half-year operations, if not disclosed elsewhere in the half-year financial report.

AASB 134:16A(c)

The notes to the condensed consolidated financial statements shall disclose, if not disclosed elsewhere in the half-year financial report, the nature and amount of items affecting assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size or incidence.

AASB 134:15B

The following is a list of events and transactions for which disclosures would be required if they are significant (the list is not exhaustive):

- The write-down of inventories to net realisable value and the reversal of such a write-down
- Recognition of a loss from the impairment of financial assets, property, plant and equipment, intangible assets, or other assets, and the reversal of such an impairment loss
- The reversal of any provisions for the costs of restructuring
- Acquisitions and disposals of items of property, plant and equipment
- Commitments for the purchase of property, plant and equipment
- Litigation settlements
- Corrections of prior period errors
- Changes in the business or economic circumstances that affect the fair value of the financial assets and financial liabilities, whether those assets or liabilities are recognised at fair value or amortised cost
- Any loan default or breach of a loan agreement that has not been remedied on or before the reporting date
- Related party transactions
- Transfers between levels of the fair value hierarchy used in measuring the fair value of financial instruments
- Changes in the classification of financial assets as a result of a change in the purpose or use of those assets
- Changes in contingent liabilities or contingent assets.

AASB 134:15C

Individual Australian Accounting Standards provide guidance regarding disclosure requirements for many of the above items listed above. When an event or transaction is significant to an understanding of the changes in an entity's financial position or performance since the last annual reporting period, its interim financial report should provide an explanation of an update to the relevant information included in the financial statements of the last annual reporting period.

Level of detail in explanatory note disclosures

AASB 134 does not specify the level of detail for the disclosures required by AASB 134:15, 15B and 16A as discussed above. The guiding principle is that the interim disclosures should be those that are useful in understanding the changes in financial position and performance of the entity since the last annual reporting period. Detailed disclosures required by other Australian Accounting Standards are not required in an interim financial report that includes condensed financial statements and selected explanatory notes. Therefore, in general, the level of detail in interim note disclosures will be less than the level of detail in annual note disclosures. The following examples illustrate this point.

For example, paragraph 126 of AASB 136 *Impairment of Assets* requires disclosure of impairment losses and reversals for each class of assets. The disclosure of impairment losses and reversals required by AASB 134:15B(b) will generally be made at the entity-wide level in condensed interim financial statements except when a particular impairment or reversal is deemed significant to an understanding of the changes in financial position and performance of the entity since the end of the last annual reporting period.

Source

7. Change in accounting estimates

AASB 134:16A(d) During the half-year the directors reassessed the useful life of certain items of property, plant and equipment, as follows:

Plant and equipment class	Previous estimate of useful lives used in the calculation of depreciation	Revised estimate of useful lives used in the calculation of depreciation
Buildings	50 years	40 to 45 years
Right-of-use assets	5 to 10 years	5 to 7 years
Machinery – high emissions*	8 to 10 years	2 to 5 years

* The useful life of machinery was reassessed following the decision during the period to replace certain high emissions machinery with low emissions machinery over the next five years, in line with the Group's long-term environmental and social goals. In doing so the Group has disaggregate machinery into two classes, identifying *Machinery – high emissions* as an additional class. The useful life of the remaining machinery of 8 to 10 years has not changed.

The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase consolidated depreciation expense in the current half-year by $ ____ . The impact on future half-years (until the end of the assets' useful lives) is expected to be similar.

8. Dividends

AASB 134:16A(f) During the half-year, GAAP Holdings (Australia) Interim Limited made the following dividend payments:

	Half-year ended 31/12/2026		Half-year ended 31/12/2025	
	Cents per share	Total $'000	Cents per share	Total $'000
Fully paid ordinary shares				
Final dividend				

AASB 134:16A(h) On 10 February 2027, the directors declared a fully franked interim dividend of ___ cents per share to the holders of fully paid ordinary shares in respect of the half-year ended 31 December 2026, to be paid to shareholders on 12 March 2027. This dividend has not been included as a liability in these financial statements. The total estimated dividend to be paid is $ ___.

Source

9. Investments in associates

AASB 134:16A(i)

On 25 November 2026, the Group acquired a 30% interest in A Plus Limited, a company incorporated in Australia and engaged in the manufacture of electronic goods. The consideration for the acquisition was $ ___ .

At 30 June 2026, the Group held a 40% interest in K Plus Limited and accounted for the investment as an associate. In December 2026, the Group transferred a 30% interest to a third party for proceeds of $ ___ . The Group has retained the remaining 10% interest, and from the date of selling the 30% interest, recognises the investment as an equity investment at fair value through profit or loss. This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows:

	$'000
Proceeds of disposal	
Add: Fair value of investment retained	
Less: Carrying amount of investment on the date of loss of significant influence	
Gain recognised on disposal of associate interest	

The Group recognised net income tax expense of $ ____ on disposal of the associate interest, and additional deferred tax expense of $ ____ relating to the fair value uplift of the remaining interest.

Source

10. Goodwill

AASB 134:16A(i), (AASB 3:61, B67(d))

Where there has been a business combination during the half-year, the entity is required to disclose the information required by AASB 3 *Business Combinations* in respect of goodwill.

		Half-year ended	
		31/12/2026 $'000	31/12/2025 $'000
	Gross carrying amount		
(AASB 3:B67(d)(i))	Balance at beginning of the period		
(AASB 3:B67(d)(ii))	Additional amounts recognised from business combinations occurring during the period (i) (note 15)		
(AASB 3:B67(d)(iii))	Adjustments resulting from the subsequent recognition of deferred tax assets		
(AASB 3:B67(d)(iv))	Derecognised on disposal of a subsidiary		
(AASB 3:B67(d)(iv))	Reclassified as held for sale		
(AASB 3:B67(d)(vi))	Effects of foreign currency exchange differences		
(AASB 3:B67(d)(vii))	Other [describe]		
(AASB 3:B67(d)(viii))	Balance at end of the period		
	Accumulated impairment losses		
(AASB 3:B67(d)(i))	Balance at beginning of the period		
(AASB 3:B67(d)(v))	Impairment losses for the period		
(AASB 3:B67(d)(iv))	Derecognised on disposal of a subsidiary		
(AASB 3:B67(d)(iv))	Classified as held for sale		
(AASB 3:B67(d)(vi))	Effect of foreign currency exchange differences		
(AASB 3:B67(d)(viii))	Balance at end of the period		
	Net book value		
	At the beginning of the period		
	At the end of the period		

(AASB 3:B67(d)(ii), (iv))

(i) Other than goodwill included in a disposal group that on acquisition met the criteria for classification as held for sale. No such acquisitions were made during the half-year (2025: nil).

Source

11. Issues, repurchases and repayments of debt and equity securities

AASB 134:16A(e)

Issued capital as at 31 December 2026 amounted to $ ____ (___ ordinary shares). There were no movements in the issued capital of the company in either the current or the prior half-years.

[Otherwise, describe or provide additional disclosure as appropriate, for example:]

During the half-year, the company issued ___ ordinary shares for $ ____ on exercise of [no.] share options issued under its executive share option plan. As a result of this share issue, $ ____ was transferred from the equity-settled employee benefits reserve to issued capital. There were no other movements in the ordinary share capital or other issued share capital of the company in the current or prior half-year.

The company issued ____ share options (2025 ____) over ordinary shares under its executive share option plan during the half-year. These share options had a fair value at grant date of $ ____ per share option (2025 $ ____).

Alternative ways to provide this disclosure

AASB 134:16A(e)
AASB 107:44A

AASB 134 requires the disclosure of issues, repurchases and repayments of debt and equity securities. AASB 107 also requires disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. One way to fulfil this disclosure requirement is by providing a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities.

In half-year reports, entities may wish to present the information required by AASB 107 in order to meet the requirements of AASB 134 in respect of debt securities. Additional information about changes in equity securities will need to also be given to meet the requirements of AASB 134.

12. Borrowings

AASB 134:16A(e)

During the half-year, the Group obtained a new short-term bank loan to the amount of $ ____ (June 2026: $ ____). The loan bears interest at variable market rates and is repayable within one year. The proceeds from the loan have been used to meet short-term expenditure needs. Repayments of other bank loans amounting to $____ (June 2026:$____) were made in line with previously disclosed repayment terms.

The Group has one principal non-current bank loan:

A loan of $ ____ (June 2026: $ ____). The loan was taken out on *[date]*. Repayments commenced on *[date]* and will continue until *[date]*. The loan is secured by a floating charge over certain of the Group's trade receivables dated [date], whose carrying value is $ ____ (June 2026: $ ____).

The Group is required to maintain trade receivables that are not past due with carrying value of $ ____ as security for the loan. The loan carried interest at ____ per cent above 3-month Secured Overnight Financing Rate (SOFR).

See note 13. *Trade and other payables* for supplier finance arrangements presented as borrowings.

Source

12. Borrowings (continued)

Covenants

AASB134:15, (15C)
AASB 101:72A, 76ZA

The secured bank loan is subject to a financial covenant which is tested semi-annually on 30 June and 31 December each year. The covenant measures the Group's gearing ratio. The Group has complied with this covenant at 31 December 2026 (and 31 December 2025).

As part of the Group's liquidity risk management framework, the Group's expected compliance with the covenant is monitored on an ongoing basis and based on forecasts at reporting date, the Group expects to remain in compliance with the covenant in the next 12 months.

The Group's other borrowings are not subject to any covenants.

AASB 101:76ZA

If an entity has classified a liability as non-current but the right to defer settlement of that liability is subject to the entity complying with covenants within 12 months after the reporting period, it should disclose information which enables users of financial statements to understand the risk of the liabilities becoming repayable within 12 months after the reporting period, including:

- Information about the covenants (including the nature of the covenants and when the entity is required to comply with them) and the carrying amount of related liabilities
- Facts and circumstances, if any, which indicate that the entity may have difficulties complying with the covenants (e.g. if the entity would be in breach of the covenant if it had been assessed at the end of the reporting period).

Although the requirements are not applicable in AASB 134 *Interim Financial Reporting*, the disclosures should be provided where they are useful in understanding the changes impacting an entity's financial position and performance since the end of the last annual reporting period.

Below is an illustrative example where there is a risk that an entity may not comply with its covenants resulting in the liabilities becoming repayable within twelve months after the reporting period:

The secured bank loan is subject to a financial covenant which is tested semi-annually on 31 March and 30 September each year. The Group has complied with this covenant at 31 December 2026 and 30 June 2026. The covenant measures the Group's gearing ratio. However, the Group's liquidity has been impacted by the decrease in sales of [product A] due to increased competition by [Land A] suppliers. As a result the Group expects it may have difficulties complying with the covenant at 31 March 2027. The Group has entered into negotiations with the lender to obtain a waiver with respect to this expected breach.

13. Trade and other payables

	31/12/2026 $'000	30/06/2026 $'000
Trade payables		
Supplier financing arrangements		
Other trade payables		
Goods and services tax and other statutory liabilities		
Other payables		
Accruals		

AASB 134:16A(j)
(AASB 7.29(a))

The directors consider that the carrying amount of trade payables approximates their fair value.

Supplier finance arrangements

(AASB 107:44F-44H)
(AASB 7:B11F(j))
(AASB 2023-1:BC43)

AASB 107 *Statement of Cash Flows* and AASB 7 *Financial Instruments: Disclosures* requires qualitative and quantitative disclosures about supplier finance arrangements, which include information to enable users to assess the effects on an entity's liabilities and cash flows and an entity's exposure to liquidity risk.

Although these disclosures are not directly required by AASB 134, AASB 134 requires entities to provide explanations of events and transactions significant to users' understanding of changes since the end of the last annual reporting period. Therefore, entities that have supplier finance arrangements should apply judgement and consider if the disclosures are required in their interim financial statements.

See our 31 December 2026 *Tier 1 models and reporting considerations* publication for an illustrative disclosure of the information required in annual reporting periods.

The Group entered into the supplier finance arrangements in the current period, therefore the illustrative disclosure below is designed to allow users to understand the changes in the Group's financial position (and performance) since the end of the last annual reporting period.

AASB 134:16A(c)

The Group entered into the following types of supplier finance arrangements during the current period:

- To ensure easy access to credit for its suppliers and facilitate early settlement the Group has entered into supplier finance arrangements with *[describe for example a group of banks, a specialist financier, the Group's main bank]* that permit the suppliers to obtain payment from *[describe for example a group of banks, a specialist financier, the Group's main bank]* for the amounts billed up to ___ days before the invoice due date subject to a discount of up to ___ per cent. The arrangements permit the banks to early settle invoices of up to $ ___ per month. The discount represents less than the trade discount for early repayment commonly used in the market. The Group repays the banks the full invoice amount on the scheduled payment date as required by the invoice. As the arrangements do not permit the Group to extend finance from the banks by paying them later than the Group would have paid its suppliers, the Group considers amounts payable to the banks should be presented as part of trade and other payables. As at 31 December 2026, ___ per cent of trade payables were amounts owed under these arrangements

- Another type of arrangement, for which the related amounts are presented as part of borrowings, has the following terms and conditions: *[describe the terms and conditions of the arrangements and the basis of the classification as part of borrowings].*

14. Disposal of subsidiaries

AASB 134:16A(i)

(i) Disposal of interest in Sub B Limited

On 5 August 2026, the Group disposed of 20% of its interest in Sub B Limited, reducing its continuing interest to 80%. The proceeds on disposal of $ ___ were received in cash.

The difference between the disposal proceeds and the amount transferred to non-controlling interests of $ ___ has been recognised directly in equity.

AASB 134:16A(i)

(ii) Disposal of interest in Sub A Limited (discontinued operation)

On 23 October 2026, the Group disposed of Sub A Limited, which carried out all of its toy manufacturing operations. The proceeds on disposal of $ ___ was received in cash.

The profit/(loss) for the half-year from the discontinued operation is analysed as follows:

	1/7/2026 - 23/10/2026 $'000	6 months ended 31/12/2025 $'000
Loss of toy manufacturing operations for the half-year		
Gain on disposal of toy manufacturing operations		

The following were the results of the toy business for the half-year:

	1/7/2026 - 23/10/2026 $'000	6 months ended 31/12/2025 $'000
Revenue		
Expenses		
Profit before tax		
Attributable tax expense		
Loss for the period from discontinued operations		
Loss on disposal of discontinued operations		
Attributable tax expense		
Net loss attributable to discontinued operations (attributable to owners of the parent entity)		

Source

14. Disposal of subsidiaries (continued)

AASB 134:16A(i)

(ii) Disposal of interest in Sub A Limited (discontinued operation) (continued)

The net assets of Sub A Limited at the date of disposal were as follows:

	23/10/2026 $'000
Net assets disposed of (excluding goodwill)	
Attributable goodwill	
Gain on disposal	
Total consideration	
Satisfied by cash, and net cash inflow arising on disposal	

A gain of $ ___ was recognised on the disposal of Sub A Limited. No tax charge or credit arose on the transaction.

Source

15. Acquisition of subsidiary

AASB 134:16A(i), (AASB 3:59-63, B64-B67)

About the illustrative disclosures

Where there has been a business combination during or since the end of the half-year, AASB 134:16A(i) requires disclosure of the information required by AASB 3 *Business Combinations* in the half-year financial statements. Illustrative disclosures below are those specified by AASB 3 that are relevant to the business combinations presented. It does not illustrate these additional required disclosures which should also be included if relevant:

- Contingent liabilities
- Equity instruments issued by the acquirer as consideration for the business combination
- Bargain purchase gains
- A business combination achieved in stages.

AASB 134:16A(i), (AASB 3:B65)

Disclosure is made separately for each material business combination. Aggregate disclosures can be made for immaterial business combinations.

AASB 134:16A(i), (AASB 3:B64(a)-(d))

On 13 November 2026, the Group acquired an 80% stake in Sub X Limited, gaining control of the company. Sub X Limited operates in distribution and qualifies as a business under AASB 3 *Business Combinations*. The acquisition aims to significantly enhance the Group's distribution logistics.

(AASB 3:B64(f))

Consideration transferred

	$'000
Cash	
(AASB 3:B64(g)(i)) Contingent consideration arrangement (i)	
Add: Settlement of legal claim against Sub X Limited (ii)	

(AASB 3:B64(g)(ii), (iii))

(i) The contingent consideration requires the Group to pay non-controlling interests an additional $ ___ if Sub X Limited's profit before interest and tax (PBIT) in each of the financial years 2027 and 2028 exceeds $ ___ . No amount is payable if the PBIT target is not met. Sub X Limited's PBIT for the past three years has been $ ___ on average and the directors expect that the specified target will be met. $ ___ represents the estimated fair value of this obligation.

(AASB 3:B64(l))

(ii) Prior to the acquisition of Sub X Limited, the Group was pursuing a legal claim against that company in respect of damage to goods in transit to a customer. Although the Group was confident of recovery, this amount has not previously been recognised as an asset. In line with the requirements of AASB 3, the Group has recognised the effective settlement of this legal claim on the acquisition of Sub X Limited by recognising $ ___ (being the estimated fair value of the claim) as a gain in profit or loss within the 'other income' line item. This has resulted in a corresponding increase in the consideration transferred.

(AASB 3:B64(m))

Acquisition-related costs amounting to $ ___ have been excluded from the consideration transferred and have been recognised as an expense in profit or loss in the half-year, within the 'other expenses' line item.

15. Acquisition of subsidiary (continued)

(AASB 3:B64(i))

Assets acquired and liabilities assumed at the date of acquisition

	$'000
Current assets	
Cash and cash equivalents	
Trade receivables (i)	
Loans (ii)	
Inventories	
Non-current assets	
Plant and equipment	
Right-of-use assets	
Intangible assets	
Current liabilities	
Trade and other payables	
Lease liabilities	
Provisions	
Non-current liabilities	
Lease liabilities	
Provisions	
Deferred tax liabilities	

(AASB 3:B64(h))

(i) Trade receivables acquired with a fair value of $ ___ had gross contractual amounts of $ ___ . The best estimate at acquisition date of the contractual cash flows not expected to be collected is $ ___ .

(AASB 3:B64(h))

(ii) Loans acquired had a fair value of $ ___ and gross contractual amounts receivable of $ ___ . The best estimate at acquisition date of the contractual cash flows not expected to be collected is $ ___ .

(AASB 3:B64(h))

Disclosure must be made, by each major class of receivables (e.g. loans, direct finance leases), of the fair value of the receivables, the gross contractual amounts receivable, and the best estimate at the acquisition date of the contractual cash flows not expected to be collected.

(AASB 3:B67(a))

The initial accounting for the acquisition of Sub X Limited has only been provisionally determined at the end of the half-year. At the end of the half-year, the final valuation report in respect of the plant and equipment acquired had not yet been received. At the date of finalisation of this half-year financial report, the necessary market valuations, tax consolidation adjustments and other calculations had not been finalised and therefore the fair value of the plant and equipment, associated deferred tax liabilities and goodwill noted above have only been provisionally determined based on the directors' best estimate of the likely fair value of the plant and equipment.

Source

15. Acquisition of subsidiary (continued)

Non-controlling interests

(AASB 3:B64(o)) The non-controlling interest (20%) in Sub X Limited recognised at the acquisition date was measured by reference to the fair value of the non-controlling interest and amounted to $ ___ . This fair value was estimated by applying an income approach. The following were the key model inputs used in determining the fair value:

- Assumed discount rate range of 18%
- Assumed long-term sustainable growth rates of 3% - 5%
- Assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interests in Sub X Limited.

Goodwill arising on acquisition

	$'000
Consideration transferred	
Plus: non-controlling interests (at fair value)

15. Acquisition of subsidiary (continued)

Impact of acquisition on the results of the Group

(AASB 3:B64(q)) Included in the profit for the half-year is $ ____ attributable to Sub X Limited. Revenue for the half-year includes $ ____ in respect of Sub X Limited.

Had the acquisition of Sub X Limited been effected at 1 July 2026, the revenue of the Group from continuing operations for the six months ended 31 December 2026 would have been $ ____ , and the profit for the period from continuing operations would have been $ ____ . The directors of the Group consider these 'pro-forma' numbers to represent an approximate measure of the performance of the combined group on a half-yearly basis and to provide a reference point for comparison in future half-years.

In determining the 'pro-forma' revenue and profit of the Group had Sub X Limited been acquired at the beginning of the current half-year, the directors have:

- Calculated depreciation and amortisation of plant and equipment acquired on the basis of the fair values arising in the initial accounting for the business combination rather than the carrying amounts recognised in the pre-acquisition financial statements
- Based borrowing costs on the funding levels, credit ratings and debt/equity position of the Group after the business combination
- Excluded takeover defence costs of Sub X Limited as a pre-acquisition transaction.

16. Key management personnel

AASB 134:15B(j)
AASB 134:16A(c) Remuneration arrangements of key management personnel are disclosed in the annual financial report. In addition, during the half-year, a cash bonus of $ ____ was paid to the CFO, Mr. P.H. Taylor, at the discretion of the directors out of the discretionary bonus pool, for successfully completing the acquisition of Sub X Limited.

Paragraph 16 of AASB 124 *Related Party Disclosures* requires disclosure of key management personnel compensation by category. Such detailed disclosures of the remuneration of key management personnel are not generally required in interim financial reports unless there has been a significant change since the end of the last annual reporting period and disclosure of that change is necessary for an understanding of the interim period. For example, a bonus granted or share options awarded to members of key management personnel during the interim period are likely to be significant to an understanding of the interim period and therefore should be disclosed.

17. Financial instruments

Fair value of financial instruments

AASB 134:15B(h), 16A(j) This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

Classes and categories of financial instruments and their fair values

(AASB 13.93(a), (b), (d), (g), (h)(i), IE65(e))
The following table combines information about:

(AASB 3:B64(f)(iii), B64(g), AASB 3 B67(b))

- Classes of financial instruments based on their nature and characteristics
- The carrying amounts of financial instruments
- Fair values of financial instruments (except financial instruments when carrying amount approximates their fair value)
- Fair value hierarchy levels of financial assets and financial liabilities for which fair value was disclosed.

Fair value hierarchy levels 1 to 3 are based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(AASB 7:25, 29)

17. Financial instruments (continued)

Fair value of financial instruments (continued)

Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

(AASB 13.91) Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship and sensitivity of unobservable inputs to fair value
1) Foreign currency forward contracts and interest rate swaps	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
2) Commodity options	Black-Scholes model. The following variables were taken into consideration: current underlying price of the commodity, options strike price, time until expiration (expressed as a per cent of a year), implied volatility of the commodity and risk-free rate (RFR).	N/A	N/A
3) Virtual power purchase agreement (VPPA) contract	Discounted cash flow. Future cash flows are estimated based on projected baseload power prices, contracted rate and P50 data that projects wind output per month over the contract. Cash flows are discounted at a rate that reflects the credit risk of various counterparties.	Quoted power prices in an active market are available for the first 5 years only, after which the curve is extrapolated. The power curve is also adjusted to match the timing of production (both seasonal and intraday).	The higher the adjustment to the original curve, the higher the fair value. If the curve was adjusted by ___ per cent up/down while all other variables were held constant, the carrying amount would increase/decrease by $___ (June 2026 increase/decrease by $___).
4) Held-for-trading shares	Quoted bid prices in an active market	N/A	N/A
5) Investments in unlisted shares	Income approach. In this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees.	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from ___ to ___ per cent (June 2026 ___ to___ per cent).	The higher the revenue growth rate, the higher the fair value. If the revenue growth was ___ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by $ ___ (June 2026 increase/decrease by $ ___).
		Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from ___ to ___ per cent (June 2026 ___ to___ per cent).	The higher the pre-tax operating margin, the higher the fair value. If the pre-tax operating margin was ___ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by $ ___ (June 2026 increase/decrease by $ ___).
		Weighted average cost of capital, determined using a Capital Asset Pricing Model, from ___ to ___ per cent (June 2026 ___ to___ per cent).	The higher the weighted average cost of capital, the lower the fair value. If the weighted average cost of capital was ___ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by $ ___ (June 2026 increase/decrease by $ ___).
		Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from ___ to ___ per cent (June 2026 ___ to___ per cent).	The higher the discount, the lower the fair value. If the discount was __ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by $ ___ (June 2026 decrease/increase by $ ___).
6) Listed corporate bond and investment in green bond	Quoted bid prices in an active market	N/A	N/A
7) Redeemable cumulative preference notes	Discounted cash flow at a discount rate of ___ per cent (June 2026 ___ per cent) that reflects the Group's current borrowing rate at the end of the reporting period.	N/A	N/A

17. Financial instruments (continued)

Fair value of financial instruments (continued)

Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis (continued)

Financial assets/ financial liabilities	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship and sensitivity of unobservable inputs to fair value
8) Contingent consideration in a business combination	Discounted cash flow method was used to capture the present value of the Group arising from the contingent consideration.	Discount rate of ___ per cent determined using a Capital Asset Pricing Model.	The higher the discount rate, the lower the fair value. If the discount rate was ____ per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by $ ____ (June 2026 decrease/increase by $ ____).
		Probability-adjusted revenues and profits, with a range from $ ____ to $ ____ and a range from $ ____ to $ ____ respectively.	The higher the amounts of revenue and profit, the higher the fair value. If the revenue was ____ per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by $ ____ (June 2026 increase/decrease by $ ____).

(AASB 13.93(c)) There were no transfers between Level 1 and Level 2 during the period.

17. Financial instruments (continued)

Fair value of financial instruments (continued)

Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis (continued)

(AASB 13.93(h)(ii)) For financial assets and financial liabilities that are categorised within the Level 3 fair value hierarchy, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would significantly change the fair value determined, an entity should state that fact and disclose the effect of those changes. The entity should also disclose how the effect of a change to reflect a reasonably possible alternative assumption was calculated.

(AASB 13.93(e)) **Reconciliation of Level 3 fair value measurements of financial instruments**

17. Financial instruments (continued)

Fair value of financial instruments (continued)

Fair value determined using valuation techniques

An entity discloses information that helps users of its financial statements assess both of the following:

(AASB 13.91(a))
- For assets and liabilities that are measured at fair value on a recurring or non-recurring basis in the statement of financial position after initial recognition, the valuation techniques and inputs used to develop those measurements

(AASB 13.91(b))
- For recurring fair value measurements using significant unobservable inputs (Level 3), the effect of the measurements on profit or loss or other comprehensive income for the period.

(AASB 13.93) To meet the objectives in paragraph 91 of AASB 13, an entity discloses:

(AASB 13.93(e))
- For recurring fair value measurements categorised within Level 3 of the fair value hierarchy, a reconciliation from the opening balances to the closing balances, disclosing separately changes during the period attributable to the following:
    - Total gains or losses for the period recognised in profit or loss, and the line item(s) in profit or loss in which those gains or losses are recognised
    - Total gains or losses for the period recognised in other comprehensive income, and the line item(s) in other comprehensive income in which those gains or losses are recognised
    - Purchases, sales, issues and settlements (each of those types of changes disclosed separately)
    - The amounts of any transfers into or out of Level 3 of the fair value hierarchy, the reasons for those transfers and the entity's policy for determining when transfers between levels are deemed to have occurred (see paragraph 95). Transfers into Level 3 shall be disclosed and discussed separately from transfers out of Level 3.

(AASB 13.93(f))
- For recurring fair value measurements categorised within Level 3 of the fair value hierarchy, the amount of the total gains or losses for the period disclosed in accordance with the first point immediately above that is included in profit or loss and is attributable to the change in unrealised gains or losses relating to those assets and liabilities held at the end of the reporting period, and the line item(s) in profit or loss in which those unrealised gains or losses are recognised.

Fair value not reliably determinable

(AASB 7.29[19]) Disclosures of fair value are not required:

(AASB 7:29(a))
- When the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables

(AASB 7:29(d))
- For lease liabilities.

[19] AASB 7:29 paragraphs (b) and (c) have been deleted.

17. Financial instruments (continued)

VPPA contract

About these disclosures

AASB 134:16A(c) AASB 134 requires disclosure of the nature and amount of items affecting assets, liabilities, equity, net income or cash flows that are unusual because of their nature, size or incidence.

The information in this section illustrates additional disclosures in accordance with those requirements where an entity enters into material power purchase arrangements involving nature-dependent electricity during the half-year for the first time. For the purposes of these disclosures, the power purchase arrangements are designated in qualifying hedge relationships in accordance with the amendments introduced by AASB 2025-1 *Amendments to Australian Accounting Standards – Contracts Referencing Nature-dependent Electricity.*

The extent of any disclosure will depend on the facts and circumstances, including the materiality and significance of the power purchase arrangements, and will involve judgement. The illustrative disclosures below are relatively comprehensive but do not include all disclosures that would be included in annual financial statements. For more information on the disclosures required in annual financial reports, refer to our *December 2026 Tier 1 Models and reporting considerations* publication, available at www.deloite.com/au/models.

VPPA contract details

In August 2026, the group entered into a VPPA contract to manage the power price risk associated with anticipated purchase transactions out to 15 years.

The group has designated the VPPA contract as a cash flow hedge of highly probable purchases. Based on the probability assessment, the group has determined that it is highly probable that the amount of the group's forecast electricity purchases will be higher than or equal to the variable nominal amount designated as the hedged item.

The group uses the hypothetical derivative and regression analysis to assess the hedge effectiveness. Based on the group's quantitative assessment, it is expected that the value of the VPPA contract, and the value of the corresponding hedged item will systematically change in opposite directions in response to movements in the underlying electricity prices.

The group has identified two potential sources of hedge ineffectiveness in this hedge relationship. Firstly, structural price differences i.e. the difference in the forecast market prices of the electricity at the time of purchases to meet the electricity demand of the group (reflected in the hedged item) and forecast market prices at the time of delivery by windfarm under the contract referencing nature-dependent electricity that are used to calculate the cash flows for net settlement (reflected in the hedging instrument). Secondly, the effect of the counterparty and the group's own credit risk on the fair value of the VPPA contract, which is not reflected in the fair value of the hedged item.

(AASB 7:23C) (AASB 7:23E) The following tables detail the VPPA contract outstanding at the end of the reporting period, as well as information regarding their related hedged items. The VPPA contract is presented in the line 'derivative financial instruments' within the statement of financial position.

Comparative information is not provided as the VPPA contract was entered into during the current half-year period.

18. Subsequent events

AASB 134:16A(h)

The notes to the condensed consolidated financial statements disclose information about events after the half-year that have not been reflected in the half-year financial statements, if not disclosed elsewhere in the half-year financial report. Further guidance concerning the disclosure of subsequent events is contained in AASB 110 *Events after the Reporting Period*.

19. Investment entities

AASB 134:16A(k)
(AASB 12.9B)

Where the entity has become or ceased to be an investment entity, as defined by AASB 10 *Consolidated Financial Statements*, the notes to the condensed consolidated financial statements make the disclosures required by AASB 12 *Disclosure of Interests in Other Entities*, paragraph 9B, where disclosures have not been reflected in the half-year financial statements, or if not disclosed elsewhere in the half-year financial report.
