#### ISSB proposes amendments to IFRS S2 on greenhouse gas emissions disclosures

The International Sustainability Standards Board (ISSB) has published Exposure Draft ISSB/ED/2025/1 *Amendments to Greenhouse Gas Emissions Disclosures*. In the ED, the ISSB proposes targeted amendments to IFRS S2 to provide additional relief and clarify existing relief from specific greenhouse gas (GHG) emissions disclosure requirements. Specifically, the ISSB proposes amendments to IFRS S2 to:

- permit entities to exclude Scope 3 Category 15 GHG emissions associated with derivatives, facilitated emissions and insurance-associated emissions from the measurement and disclosure of Scope 3 Category 15 GHG emissions
- provide relief from using the Global Industry Classification Standard (GICS) in some circumstances
- clarify that the existing relief for an entity that is required by a jurisdictional authority
  or exchange on which it is listed to use a method for measuring GHG emissions other
  than the *Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (2004)*(GHG Protocol), is also available when such a requirement applies only to a part of
  the entity
- permit the use of global warming potential (GWP) values that are not from the latest Intergovernmental Panel on Climate Change (IPCC) assessment if an entity, or part of an entity, is required by a jurisdictional authority or exchange on which it is listed to use those GWP values.

The comment period for the ED ends on 27 June 2025.

Please click to access the **guide** on the ACMF website.

The Sustainability Standards Board of Japan (SSBJ) has published a schedule of differences between the ISSB standards and the SSBJ standards. The document demonstrates that both sets of standards are aligned, which has been confirmed by the Japanese Financial Accounting Standards Foundation (FASF) and the ISSB. The SSBJ also published a table of concordance between ISSB standards and SSBJ standards, illustrating whether and, if so, where each paragraph in ISSB standards is incorporated in SSBJ standards. Please click to access the documents via the **press release** on the SSBJ website.

The Australian Accounting Standards Board (AASB) has launched a knowledge hub on AASB S2 *Climate-related disclosures*, which is based on IFRS S2. The hub provides a repository of information to assist in preparing climate-related financial disclosures using AASB S2. Please click to access the **hub** on the AASB website.

The Central Bank of Kenya has released the *Kenya Green Finance Taxonomy* and the *Climate Risk Disclosure Framework*. The *Kenya Green Finance Taxonomy* is expected to guide target institutions on evaluation and classification of their economic activities according to the extent to which the activities support or hinder climate objectives and promote the transition to a low-carbon economy. The *Climate Risk Disclosure Framework* intends to assist commercial banks in collating and disclosing climate-related information in a relevant, useful, consistent and comparable manner. It is aligned with global best practices and standards such as IFRS S2 and the Basel Committee on Banking Supervision principles on climate-related financial risks. Please click to access the **documents** on the Central Bank of Kenya website.
