

Oracle ERP Cloud Implementation

Constant innovation to stay ahead

Deloitte delivered Oracle Fusion to a leading global bank to transform its operations, technology and global service companies operate, enabling the global businesses and global functions to make better operational and commercial decisions. The solution was deployed smoothly and on time to 25,000 users in Hong Kong.

The Client

The client is one of the world's largest banking and financial services organizations. Its global businesses serve more than 40 million customers which are range from individual savers and investors to some of the world's biggest companies and governments.

The Needs

Project Fusion was initiated to transform how the bank's operations, technology and global service companies operate, enabling the client's Global Businesses and Global Functions to make better operational and commercial decisions. This was achieved by implementing one global cloud based platform (Oracle ERP Cloud) to deliver standardized global processes across planning, billing, finance, project accounting, procurement and expenses.

The Solution

- Financial Control – implementation of the Fusion general ledger with integrated accounting feeds to the various Hong Kong ledgers.
- Fixed Assets – tangible and intangible asset register for all Hong Kong entities.
- Expenses – employee expense capability, including online approvals, credit card transaction feed and reconciliation.
- Cash Management – auto reconciliation of bank statement to system payment transactions.
- Procurement – end to end procure to pay platform for all 3rd party and intercompany spend, including payment integration, bank reconciliation and supplier network integration.

The impact

Successfully deploy the Oracle Cloud solution on time to over 25,000 users

Integrate and scalable system that will support the client's future growth strategy
