Introduction

Dear clients and colleagues,

The Deloitte Asia Pacific Centre for Regulatory Strategy is pleased to share with you the key regulatory updates from the Asia Pacific (AP) region for Q4 2025. The end of the calendar year saw the release of an increased volume of regulatory guidance compared to previous quarters, focusing primarily on governance and technology.

Governance, strategic, and reputational risk featured most prominently in AP regulatory guidance during Q4 2025. In India, regulators advanced a package of governance reforms aimed at strengthening oversight and transparency. This included tightening the minimum information expected for audit committee and shareholder consideration relating to the approval of third party transactions. It also included further streamlining the related party transaction framework through updated disclosure and definition requirements. These changes covered, for example, refinements to key management personnel definitions and enhancements to the disclosure requirements within company annual reports. The Monetary Authority of Singapore (MAS) similarly proposed revisions to its related party transaction rules for banks. In Indonesia, new requirements similarly pushed financial institutions to revisit and refresh governance and risk management frameworks so they are better tailored to the specific risk profiles of their businesses. Overall, regulators in the region are continuing to adapt their regulatory requirements for governance to enable financial services firms to become more resilient to the ever-changing risk landscape.

Data and technology continued to be at the forefront of AP regulators' focus this quarter. Regulatory releases relating to Artificial Intelligence (AI) and digital assets have been a persistent feature of 2025 with this quarter being no exception. In Australia, guidance clarified how existing financial services laws and regulations apply to digital assets. In practice, firms issuing, or facilitating transactions in products such as stablecoins and tokenised securities will likely need to obtain a licence and comply with associated conduct and disclosure obligations. At the same time the authorities also introduced new measures to promote innovation, including class relief for intermediaries involved in the secondary distribution of certain stablecoins and wrapped tokens. In Indonesia, updates to the digital-asset rulebook strengthened and expanded the framework for cryptocurrency markets by widening the roles and obligations of trading platforms and participants, and introduced clearer requirements for derivatives tied to digital financial assets.

Malaysia proposed a regulated framework for tokenised assets covering governance, safeguards, trading and custody, AML/CFT, and resilience to support market integrity. Hong Kong authorities published a report from the second phase of the 'e-HKD' central bank digital currency (CBDC) pilot programme, setting out key observations, challenges and next steps for potential adoption. The findings were accompanied by an updated view of future priorities, including an initial focus on exploring wholesale use cases rather than retail deployment to the general public. The continued growth of digital assets and the ongoing debate around CBDC remains a priority across AP, with regulators seeking to balance innovation with consumer protection while managing the unique risks these technologies introduce. On AI, MAS is consulting on a set of proposed AI risk management guidelines that lays out guidance on AI risk oversight, AI risk management systems, policies and procedures as well as AI life cycle controls, capabilities and capacities.

Financial risk saw an uptick in regulatory focus this quarter as regulators look to shore up financial services firms' internal controls. In New Zealand, authorities issued a public consultation on reforms to the standards under the Deposit Takers Act (DTA). The consultation seeks feedback on draft requirements covering issues such as liquidity and lending regulatory standards as well as the design of the Depositor Compensation Scheme (DCS) ahead of legislation being finalised and brought into force. In Malaysia, draft guidelines proposed a new standardised method for financial services firms to measure counterparty credit risk. The draft guidelines seek to enhance financial risk management controls in line with Basel III standards. Additionally, the Australian authorities released a report highlighting potential vulnerabilities driven by geopolitical risks, high levels of household debt and increasing interconnectedness within the financial system. These developments highlight a broader supervisory focus on financial risk expectations across the region as market and credit conditions evolve, reinforcing the need for robust controls and ongoing enhancements of risk management practices.

For queries or more information on these updates or other regulatory topics, please get in touch.

Best regards,
The ACRS Co-leads

1	ASIC	ASIC Flags Risks in Offshore Outsourcing After Review Identifies Governance Gaps	<p>On 10 October 2025, the Australian Securities and Investments Commission (ASIC) called upon financial services entities to strengthen their governance and risk management practices following a review that identified weaknesses in the use of offshore service providers (OSPs).</p> <p>The regulator's review into the use of OSPs by financial advice licensees and responsible entities of registered managed investment schemes revealed significant variability in the quality of risk management arrangements, with some entities failing to have proper frameworks in place.</p> <p>ASIC reiterates that Australian financial services (AFS) licensees remain fully responsible for their compliance, even when outsourcing offshore and warns it will monitor the governance and risk management of financial services entities and continue to hold entities accountable for failing to have the right processes in place to protect consumers' and investors' interests.</p> <p>ASIC Flags Risks in Offshore Outsourcing After Review Identifies Governance Gaps</p>	-
2	ASIC	ASIC Sends Clear Message to Super Trustees Amid Glaring Retirement Communications Gap	<p>On 14 October 2025, ASIC urged superannuation trustees to enhance retirement communications after a review revealed that trustees use a one size fits all retirement communications approach, missing opportunities to better engage and support members during retirement.</p> <p>ASIC's call to action for trustees includes:</p> <ul style="list-style-type: none"> • Focus on informing members about retirement, rather than prioritising product promotion and member retention • Develop retirement communications that are tailored to member needs; • Better tailor retirement communications to the diverse needs and preferences of member groups approaching and in retirement; • Ensure retirement communications are accessible to culturally and linguistically diverse members and those with disabilities; • Adequately resource governance structures to execute the retirement income strategy and communications strategy with appropriate oversight; and • Strengthen oversight of external service providers to ensure quality and compliance in retirement communications. <p>ASIC encourages trustees to consider these calls to action to identify and address blind spots in their retirement communications.</p> <p>ASIC Sends Clear Message to Super Trustees Amid Glaring Retirement Communications Gap – ASIC</p> <p>REP 818 From Superficial to Super Engaged: Better Practices for Trustee Retirement Communications ASIC</p>	-

3	APRA	APRA proposes more accessible pathway to IRB accreditation for banks	<p>On 23 October 2025, APRA released a consultation proposing a simpler and more transparent pathway for banks to gain accreditation to use the internal ratings-based (IRB) approach to calculating credit risk-weighted assets.</p> <p>While most banks use the standardised approach, six large banks are currently approved to use IRB, which can slightly reduce capital requirements but requires advanced and resource-intensive risk management. In response to interest from medium-sized banks, and commitments made under the CFR and ACCC review into small and medium-sized banks, APRA is seeking to make IRB accreditation more accessible without lowering prudential standards.</p> <p>The proposed changes aim to improve flexibility and clarity in the accreditation process, supporting mid-sized banks to better compete with larger banks, particularly in home lending.</p> <p>APRA proposes more accessible pathway to IRB accreditation for banks APRA</p>	
4	ASIC	Updated ASIC guidance supports digital asset innovation and boosts investor protection	<p>On 29 October 2025, ASIC has issued guidance, clarifying how existing financial services laws apply to digital assets, improving investor protections and providing greater regulatory certainty for firms, alongside transitional support ahead of proposed law reforms.</p> <p>Under updated guidance, ASIC considers products such as stablecoins, wrapped tokens, tokenised securities and digital asset wallets to be financial products, meaning many providers must hold an Australian financial services license.</p> <p>To support transition, ASIC has announced a sector-wide no-action position until 30 June 2026 and proposed regulatory relief for certain stablecoin and wrapped token distributors, as well as limited relief for digital asset custodians.</p> <p>ASIC also released a summary of feedback from Consultation Paper 381, which informed the updated guidance and transitional measures, and confirmed it will continue to take action against egregious misconduct.</p> <p>25-250MR Updated ASIC guidance supports digital asset innovation and boosts investor protection ASIC</p>	No-action position until 30 June 2026
5	APRA	APRA to Consult on Targeted Changes to CPS 230 for Non-Traditional Service Providers	<p>On 31 October 2025, the Australian Prudential Regulatory Authority (APRA) announced its intention to consult on targeted amendments to contractual obligations with Non-Traditional Service Providers (NTSPs) as part of CPS 230 Operational Risk Management.</p> <p>NTSPs providers such as stock exchanges, payment schemes or clearing and settlement facilities are often market-mandated, and their arrangements often lack formal contracts or rely on standardised, non-negotiable terms. The proposed amendments aim to clarify expectations around contract uplift and service level monitoring, reducing regulatory burden while maintaining resilience in the financial system.</p> <p>APRA will conduct an accelerated policy process, including a one-month consultation period, with targeted changes expected to be finalised before July 2026.</p> <p>APRA to Consult on Targeted Changes to CPS 230 for Non-Traditional Service Providers - APRA</p>	-

#	Issuing Authority	Title	Regulatory Update	Key Dates
6	ASIC	A Roadmap for Capital Markets to Grow Our Economy	<p>On 5 November 2025, ASIC released its roadmap aimed at strengthening and modernising Australia's public and private markets to ensure they remain strong, efficient and globally competitive.</p> <p>In its new report "Advancing Australia's Evolving Capital Markets" (REP 823), ASIC presents its roadmap designed to unlock opportunities and address emerging risks in Australia's public and private markets by focusing on embracing new capital flows and technologies, adapting to the changing needs of investors, and simplifying access to business and growth capital.</p> <p>A Roadmap for Capital Markets to Grow Our Economy - ASIC</p> <p>REP 823 Advancing Australia's evolving capital markets: Discussion paper response report - ASIC</p>	-
7	ASIC	ASIC issues new regulatory guide for exchange-traded product issuers	<p>On 7 November 2025, ASIC has released a new regulatory guide, as part of its regulatory simplification program (RG 282), consolidating guidance on the regulation of exchange-traded products (ETPs), including exchange-traded funds (ETFs).</p> <p>RG 282 incorporates INFO 230 and brings together existing guidance, ASIC reports and industry practices, outlining:</p> <ul style="list-style-type: none"> • General obligations for ETP issuers, including AFS licensing and modified design and distribution obligations; • Market operator rules governing ETP admission and quotation, such as portfolio disclosure, product naming, and liquidity and market-making arrangements; and • Obligations on market operators that admit ETPs. <p>The guide follows targeted industry consultation and reflects strong support for a single, consolidated source of guidance. Its release responds to the rapid growth of the ETP market - Australian ETF funds under management reached \$200 billion in 2024 - and aims to support regulatory compliance, market integrity and consumer protection.</p> <p>ASIC issues new regulatory guide for exchange-traded product issuers ASIC</p>	
8	ASIC	ASIC Announces 2026 Enforcement Priorities	<p>On 13 November 2025, ASIC unveiled its new enforcement priorities for 2026, designed to protect consumers from financial harm and uphold the integrity of Australia's financial markets.</p> <p>New enforcement priorities for 2026 include:</p> <ul style="list-style-type: none"> • Misleading pricing practices impacting the cost of living for Australians; • Poor private credit practices; • Financial reporting misconduct, including failure to lodge financial reports; and • Claims and complaint handling failures by insurers. <p>The regulator emphasises its commitment to stronger enforcement, noting record penalties and increased investigations over the past year. The new priorities, along with ASIC's enduring priorities, aim to maintain transparency, accountability, and confidence in Australia's financial system.</p> <p>ASIC Announces 2026 Enforcement Priorities - ASIC, ASIC Enforcement Priorities - ASIC</p>	-

9	APRA	APRA Publishes New Report on Financial System Risks	<p>On 20 November 2025, APRA released its first System Risk Outlook Report outlining the regulator's assessment of risks and vulnerabilities facing the Australian financial system.</p> <p>Key insights from the first publication include:</p> <ul style="list-style-type: none">• Risks to the Australian financial system from overseas are heightened, with the geopolitical environment expected to remain volatile for some time;• APRA is closely monitoring domestic vulnerabilities, particularly in the housing market, including high household debt; and• Increasing interconnectedness of the financial system has elevated the potential of shocks in one sector to have system-wide impacts. <p>The new report, to be published twice a year, will aim to enhance transparency on APRA's perspectives on domestic and international risk environments that shape the regulator's priorities.</p> <p>The full report is available on APRA's website.</p> <p>APRA Publishes New Report on Financial System Risks - APRA</p> <p>System Risk Outlook - November 2025 - APRA</p>	-
10	Department of Industry, Science and Resources	Australia Launches National AI Plan to Capture Opportunities, Share Benefits and Keep Australians Safe	<p>On 2 December 2025, the Department of Industry, Science and Resources launched the National AI Plan, aimed at fostering an environment for investment, innovation, and adoption to enhance Australia's capabilities in AI technology.</p> <p>The National AI Plan will establish the AI Safety Institute (AISI), whose role will be to monitor, test and share information on emerging AI capabilities, risks and harms. The AISI will support regulators in maintaining safety measures, laws and regulatory frameworks that keep pace with technological change.</p> <p>The Government reiterates that if further regulation is necessary to address bad actors or broader harms, it will not hesitate to intervene.</p> <p>Australia Launches National AI Plan to Capture Opportunities, Share Benefits and Keep Australians Safe - Department of Industry, Science and Resources</p> <p>National AI Plan - Department of Industry, Science and Resources</p>	-

#	Issuing Authority	Title	Regulatory Update	Key Dates
11	APRA	APRA Consults on Formalising a Three-Tiered Approach to Proportionality in Banking Prudential Framework	<p>On 5 December 2025, APRA released a consultation to formalise a three-tiered proportionality approach in its banking prudential framework.</p> <p>Aiming to enhance competition and reduce regulatory burden. The proposed tiers include:</p> <ul style="list-style-type: none"> • Most Significant Financial Institutions (MSFIs) – banks with over \$300 billion in assets; • Significant Financial Institutions (SFIs) – banks with assets above \$30 billion; and • Non-SFIs – all remaining banks, which will receive more time to comply with new requirements. <p>The proposal also includes consideration for banks that may move between tiers, with APRA proposing a transition period of at least twelve months for banks to comply with higher prudential requirements should they move to a higher tier.</p> <p>Additionally, the regulator will consider introducing a possible fourth tier for the smallest banks and explore whether additional proportionality may be appropriate in the superannuation and insurance sectors.</p> <p>APRA Consults on Formalising a Three-Tiered Approach to Proportionality in Banking Prudential Framework - APRA</p>	Consultation closes: 27 February 2026
12	ASIC	ASIC issues catalogue of key legal obligations for private credit funds	<p>On 9 December 2025, ASIC released a catalogue summarising key legal obligations and regulatory guidance to help operators of retail and wholesale private credit funds in Australia identify and comply with existing requirements. It is also relevant to the broader funds management sector.</p> <p>Flagged in ASIC's recent capital markets roadmap, the catalogue complements newly issued principles that provide a benchmark for firms to urgently review and uplift their practices, with the aim of strengthening trust and integrity in the private credit sector.</p> <p>ASIC plans to refresh regulatory guidance in 2026–2027 to reflect private credit surveillance findings, current risks and to provide clearer guidance for wholesale funds. Earlier this year, ASIC had already called on the industry to lift standards following expert observations and surveillance indicating poorer practices, noting that well-run private credit can complement the banking system and support innovation, jobs and growth.</p> <p>ASIC issues catalogue of key legal obligations for private credit funds ASIC</p>	-
13	ASIC	ASIC finalizes new exemptions to support digital asset innovation	<p>On 9 December 2025, ASIC announced new measures to promote innovation and growth in Australia's digital assets and payments sectors, including class relief for intermediaries involved in the secondary distribution of certain stablecoins and wrapped tokens.</p> <p>The relief builds on previous stablecoin measures by exempting intermediaries from the need to hold separate Australian financial services, market, or clearing and settlement facility licences when providing services in relation to eligible stablecoins or wrapped tokens. ASIC has also provided relief to permit providers to hold digital assets that are financial products in omnibus accounts, subject to robust record-keeping and reconciliation arrangements.</p> <p>ASIC finalises new exemptions to support digital asset innovation ASIC</p>	-

3	NFRA	NFRA Publicly Solicits opinions on the Rules on Management of Licenses of Banking and Insurance Institutions (For Consultation)	<p>On 30 October 2025, the NFRA publicly solicited opinions on the "Rules on Management of Licenses of Banking and Insurance Institutions (Draft for Comments)."</p> <p>Key points include:</p> <ul style="list-style-type: none"> The measures aim to standardise and strengthen the management of banking and insurance institution licences, promoting the operation of these institutions in accordance with the law and revising them as a draft open for public comments; The measures adhere to principles of financial franchising and licensed operation, focusing on standardising licence management for banking and insurance institutions and aiming to optimise work procedures; and They consolidate the main responsibility for licence management and improve the overall level of licence administration, refining supervision measures and punishment standards for licence-related violations while strengthening daily supervision and management. <p>NFRA Publicly Solicits opinions on the Rules on Management of Licenses of Banking and Insurance Institutions (For Consultation) - NFRA</p>	Deadline for public comments: 30 November 2025
4	NFRA	NFRA Issues Rules on Asset Management Trusts (For Consultation)	<p>On 31 October 2025, the NFRA publicly solicited opinions on the "NFRA Issues Rules on Asset Management Trusts (Draft for Comments)."</p> <p>The main points included in the draft are as follows:</p> <ul style="list-style-type: none"> The first is to clarify product positioning. Asset management trusts ("trust products") are positioned as private asset management products based on trust legal relationships; they adhere to the principle of "seller due diligence, where the buyer is at his own risk; seller defaults and compensates in accordance with the law," and are open to qualified investors with the ability to identify and bear risks; The second is to strengthen the management of the whole process. There will be strict management of the establishment and sales of trust products, standardising key links; management of the duration of trust products will be strengthened, the use of trust funds will be strictly regulated, and risk management and net value management will be enhanced; trust companies will also have strengthened information disclosure obligations; the maturity and liquidation of trust products will be standardised; The third is strict sales management. The management requirements for key sales areas and links, such as trust documents, risk statements, investor commitments, and risk assessments, will be clarified; investor suitability management will be strengthened; and the sales behaviour of trust companies and agency sales agencies will be regulated; efforts will be made to guide and enhance investors' risk awareness of trust product investments; Fourth, investment management will be strengthened. The requirements for trust products to invest in various underlying assets will be clarified; the rules for portfolio investment will be refined; related party transactions will be standardised; and channel business and capital pool business will be strictly prohibited; penetrating management of investments in other asset management products will be strengthened, and transparency will be improved; and Fifth, risk management and information disclosure will be strengthened. Comprehensive risk management requirements will be reinforced, and the management of operational risks, credit risks, and liquidity risks will be enhanced; information disclosure behaviour and content will be standardised, and the quality of information disclosure will be improved. <p>NFRA Issues Rules on Asset Management Trusts (For Consultation) - NFRA</p>	Deadline for public comments: 1 December 2025

1	HKMA	HKMA and HKSTP Launch IADS Developer Hackathon to Foster Bank-Fintech Collaboration	<p>On 2 October 2025, the Hong Kong Monetary Authority (HKMA), in collaboration with the Hong Kong Science and Technology Parks Corporation (HKSTP), launched the Interbank Account Data Sharing (IADS) Developer Hackathon. This initiative marks the beginning of a multi-month innovation journey aimed at fostering collaboration between the banking industry and fintech firms to transform banking services through secure, customer-consented data sharing under the Interbank Account Data Sharing (IADS) initiative.</p> <p>Key details include:</p> <ul style="list-style-type: none"> The hackathon runs from October 2025 to March 2026, bringing together participants to create innovative, secure solutions leveraging the IADS for digital transformation in Hong Kong's banking sector; Participants will focus on developing use cases for retail, corporate, and SME customer segments, with mentorship provided by banking professionals; and Finalists will showcase their solutions at the IADS Developer Conference in March 2026, with winning teams potentially accessing business expansion support, investor engagement, and marketing opportunities through HKSTP and partner organisations. <p>HKMA and HKSTP Launch IADS Developer Hackathon to Foster Bank-Fintech Collaboration – HKMA</p>	-
2	HKMA	HKMA Announces Second Cohort of GenA.I. Sandbox to Advance Responsible A.I. Innovation	<p>On 15 October 2025, the HKMA, in collaboration with the Hong Kong Cyberport Management Company Limited (Cyberport), announced the second cohort of the Generative Artificial Intelligence (GenA.I.) Sandbox. This initiative builds on the first cohort and signifies a shift towards the secure and reliable implementation of A.I. rather than just experimentation.</p> <p>Key details include:</p> <ul style="list-style-type: none"> A total of 27 use cases from 20 banks and 14 technology partners have been selected from over 60 proposals; Submissions were prioritised based on innovation, technical complexity, and potential value to the industry; A defining theme of this cohort is proactive A.I. governance, featuring "A.I. vs. A.I." strategies, such as using A.I. to conduct automated quality checks on A.I.-generated outputs to enhance accuracy and consistency at scale; and The Sandbox will also serve as a testing ground for advanced defence mechanisms against deepfake-related fraud, with participants conducting adversarial simulations to fortify their systems against sophisticated digital fraud. <p>HKMA Announces Second Cohort of GenA.I. Sandbox to Advance Responsible A.I. Innovation - HKMA</p>	-

3	HKMA	HKMA Completes e-HKD Pilot Programme and Outlines Future Direction of e-HKD	<p>On 28 October 2025, the HKMA published the “e-HKD Pilot Programme Phase 2 Report,” outlining key findings from 11 industry pilot groups and its latest policy stance regarding the e-HKD. Since 2017, the HKMA has been exploring a central bank digital currency (CBDC) known as e-HKD, using distributed ledger technology (DLT) as its foundation. Phase 2 focused on evaluating the commercial viability and scalability of the e-HKD in various retail scenarios, comparing it with tokenised deposits to assess its distinctive value.</p> <p>The pilots explored innovative use cases across three main themes: settlement of tokenised assets, programmability, and offline payments. Results demonstrated that both e-HKD and tokenised deposits can facilitate cost-efficient, programmable, and resilient transactions. Public perception indicated high trust in both options, supported by Hong Kong's stable banking system and robust consumer protection.</p> <p>The HKMA determined that the immediate priority for the e-HKD should be on wholesale payments rather than retail use cases, focusing on supporting the tokenisation ecosystem and cross-border payments. Moving forward, the HKMA aims to establish a solid policy, legal, and technical foundation for potential future uses of the e-HKD, with preparatory work expected to be completed by the first half of 2026. Additionally, as a key outcome of the e-HKD Industry Forum, the HKMA will publish common token standards to facilitate the scaled adoption of programmability in digital money, laying the groundwork for future adoption of the e-HKD for individuals and corporates in Hong Kong.</p> <p>HKMA Completes e-HKD Pilot Programme and Outlines Future Direction of e-HKD - HKMA</p>	-
4	SFC	SFC Supports REIT Market Growth with New Dedicated Channel and Streamlined Authorisation Process	<p>On 13 October 2025, the Securities and Futures Commission (SFC) launched the REIT Channel to support the growth of Hong Kong's real estate investment trust (REIT) market by facilitating the authorisation of new REITs for public offerings. This dedicated, one-stop channel allows both local and global REIT applicants to consult the SFC confidentially, improving the efficiency of their listing preparations.</p> <p>In addition, the SFC has streamlined the authorisation process and documentary requirements for REITs, aligning with the latest updates under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (SEHK) and current market practices. The SFC expects that under normal circumstances, a new REIT authorisation application will be decided within four weeks from submission.</p> <p>To further assist existing SFC-authorized REITs, a circular has been issued to REIT managers outlining additional streamlined documentary requirements for secondary offerings. These measures aim to enhance the REIT market in Hong Kong and foster its development.</p> <p>SFC Supports REIT Market Growth with New Dedicated Channel and Streamlined Authorisation Process - SFC</p> <p>Circular to Management Companies of SFC-Authorised Real Estate Investment Trusts - Streamlined Documentary Requirements for Secondary Offerings</p>	-

5	SFC	SFC Proposes to Enhance Hong Kong's Retail Fund Code to Bolster Global Competitiveness	<p>On 22 October 2025, the SFC launched a three-month consultation on proposed amendments to the Code on Unit Trusts and Mutual Funds (UT Code). The aim is to align Hong Kong's regulatory regime for SFC-authorized funds with the latest international regulatory standards and to broaden product offerings for investors.</p> <p>Key revisions to the UT Code include allowing an alternative approach for managing derivative investments in retail funds, updating requirements for fund liquidity risk management, and enhancing the requirements for money market funds. Once implemented, these proposals are expected to not only promote growth in the fund market but also strengthen the resilience of Hong Kong's asset management sector, bolstering its global competitiveness.</p> <p>SFC Proposes to Enhance Hong Kong's Retail Fund Code to Bolster Global Competitiveness – SFC</p> <p>Consultation Paper on Proposed Amendments to the Code on Unit Trusts and Mutual Funds_SFC</p>	Deadline for public comments: 21 January 2026
6	SFC	SFC Issues New Guidance for Licensed Virtual Asset Trading Platforms to Tap Global Liquidity and Diversify Offerings	<p>On 3 November 2025, the SFC issued new guidance for licensed virtual asset trading platforms (VATPs) to enhance global liquidity and diversify their offerings.</p> <p>The SFC allows VATPs to combine orders with affiliated overseas trading platforms in a shared order book, marking progress under Pillar A (Access) of the ASPIRe roadmap. This initiative aims to attract global platforms and liquidity providers, enhancing market liquidity and competitive pricing for Hong Kong investors while ensuring robust safeguards against additional risks. The SFC will also explore the possibility of enabling licensed brokers to direct client orders to regulated overseas liquidity pools within the same group.</p> <p>Additionally, the SFC permits platform operators to trade virtual assets without a 12-month track record for professional investors and to offer Hong Kong Monetary Authority-licensed stablecoins, as well as to distribute tokenised securities and digital asset-related investment products. Furthermore, associated entities may provide custody services for virtual assets or tokenised securities not traded on their platforms.</p> <p>SFC Issues New Guidance for Licensed Virtual Asset Trading Platforms to Tap Global Liquidity and Diversify Offerings - SFC</p>	-
7	HKMA	Statement of Commitment to FX Global Code	<p>On 6 November 2025, the HKMA issued a renewed Statement of Commitment to the FX Global Code, reaffirming its dedication to adhering to the Code while acting as a market participant in the foreign exchange (FX) market. This renewal follows the publication of the December 2024 version of the Code by the Global Foreign Exchange Committee (GFXC).</p> <p>The FX Global Code comprises a set of global principles of good practice in the FX market, designed to provide common guidelines that promote the integrity and effective functioning of the wholesale FX market. Developed through a collaboration between central banks and market participants from various jurisdictions, including Hong Kong, the Code was first published in May 2017 and subsequently updated in July 2021 and December 2024. The HKMA initially issued its Statement of Commitment in May 2018 and renewed it in July 2022, showcasing its ongoing adherence to the Code.</p> <p>Statement of Commitment to FX Global Code – HKMA</p> <p>FX Global Code – Global Foreign Exchange Committee</p>	-

8	HKMA	HKMA Announces the New Phase of Project Ensemble to Support Real-Value Transactions in Tokenised Deposits and Digital Assets	<p>On 3 November 2025, the HKMA announced the launch of EnsembleTX, marking the commencement of the pilot phase of Project Ensemble. This initiative represents a significant advancement in facilitating real-value transactions involving tokenised deposits and digital assets within a controlled pilot environment.</p> <p>EnsembleTX builds on the successful outcomes from the Ensemble Sandbox experimentation, which began in August 2024 and allowed industry pioneers to test comprehensive end-to-end use cases for settling digital asset transactions using experimental tokenised deposits. In this new pilot phase, the HKMA, participating banks, and other industry pioneers aim to achieve faster, more transparent, and efficient settlement of real-value tokenised transactions. The initial focus will be on enabling market participants to utilise tokenised deposits in tokenised money market fund transactions and to manage liquidity and treasury needs in real-time.</p> <p>The EnsembleTX pilot will operate throughout 2026, with interbank settlement of tokenised deposit transactions initially facilitated via the HKD Real Time Gross Settlement (RTGS) system. The pilot environment will be progressively upgraded to support settlement in tokenised Central Bank Money (CeBM) on a 24/7 basis, contributing to the ongoing development of Hong Kong's broader tokenisation ecosystem.</p> <p>HKMA Announces the New Phase of Project Ensemble to Support Real-Value Transactions in Tokenised Deposits and Digital Assets - HKMA</p>	-
9	HKMA	Report on Unlocking the Potential of Sustainable Debt	<p>On 18 November 2025, the HKMA and the Dubai Financial Services Authority (DFSA) published a research report titled "Scaling Sustainable Debt in Emerging Markets".</p> <p>The report highlights significant growth potential for labelled sustainable debt markets in the Middle East and North Africa (MENA) and emerging Asia Pacific (APAC). Many issuers are currently financing sustainable projects with unlabelled instruments, and government support could help offset labelling costs and facilitate market entry. Encouraging greater corporate issuance and diversifying labels and structures are also identified as avenues for growth.</p> <p>Report on Unlocking the Potential of Sustainable Debt - HKMA</p>	-
10	SFC	SFC Unveils Enhancements to Facilitate Client Interaction Under Cross-Boundary Wealth Management Connect	<p>On 13 November 2025, the SFC announced new enhancements to the Cross-boundary Wealth Management Connect Pilot Scheme (Cross-boundary WMC) to improve communication between participating licensed corporations (Participating LCs) and their clients.</p> <p>Key arrangements outlined in a circular include:</p> <ul style="list-style-type: none"> • Participating LCs can obtain one-off written consent from Southbound Scheme clients, valid for up to one year, allowing them to provide tailored product information without clients being physically present in Hong Kong; • Upon client request, Mainland partner brokers within the same corporate groups as Participating LCs can facilitate online three-party dialogues, enabling clearer communication about product information; • With one-off written consent, Participating LCs can share research reports on individual investment products prepared by their Partner Brokers; and • These arrangements will also apply to the Northbound Scheme. <p>SFC Unveils Enhancements to Facilitate Client Interaction Under Cross-Boundary Wealth Management Connect - SFC</p>

11	SFC	SFC Further Streamlines Measures for Authorised EU-Regulated Retail Funds to Implement Changes Efficiently	<p>On 28 November 2025, the SFC announced a series of streamlined post-authorisation measures for UCITS funds, aimed at facilitating efficient compliance with home jurisdiction regulations.</p> <p>Key updates include:</p> <ul style="list-style-type: none"> The SFC will no longer require UCITS funds to seek prior approval for changes to depositories and investment delegates supervised by the fund's home regulator; Approval is not needed for material changes in investment objectives, policies, and restrictions that comply with home jurisdiction requirements; and The SFC is aligning its notification requirements with those of the fund's home jurisdiction. <p>These measures are expected to reduce the number of scheme change applications submitted by UCITS funds for SFC approval by approximately 50%. This decision follows a review and engagement with market participants, reflecting the SFC's recognition of the robust investor protection offered by UCITS funds, aligning with Hong Kong's standards.</p> <p>SFC Further Streamlines Measures for Authorised EU-Regulated Retail Funds to Implement Changes Efficiently - SFC</p>	Effective 28 November 2025
12	HKMA	Industry Consultation Regarding Valuation in Resolution	<p>On 10 December 2025, the HKMA issued two draft Codes of Practice for public consultation detailing their approach to valuation in resolution under the <i>Financial Institutions (Resolution) Ordinance</i> (FIRO).</p> <p>The first proposed Code of Practice, 'The HKMA's Approach to Valuation in Resolution' (VIR-1), outlines the valuations required under the FIRO. It includes the methodologies and required output within the valuation process.</p> <p>The second, 'Resolution Planning - Valuation in Resolution Capabilities (VIR-2)', offers recommendations on the capabilities and structures an AI should establish to facilitate prompt and effective valuation, along with the HKMA's strategy for implementation.</p> <p>The HKMA's Approach to Valuation in Resolution (Consultation) - HKMA</p> <p>Resolution Planning - Valuation in Resolution Capabilities (Consultation) - HKMA</p>	Deadline for public comments: 13 February 2026
13	HKMA	HKMA, CEDB and IPD launch IP Financing Sandbox	<p>On 22 December 2025, the HKMA, together with the Commerce and Economic Development Bureau (CEDB) and the Intellectual Property Department (IPD), launched the Intellectual Property (IP) Financing Sandbox.</p> <p>The Sandbox is designed to help pilot sectors use IP assets, such as patents, trademarks and copyrights, for financing. It provides a collaborative, risk-controlled environment for banks, IP valuation firms, legal practitioners and other professionals to test end-to-end IP-backed financing arrangements under the guidance of HKMA, CEDB and IPD.</p> <p>The initiative aims to build banks' practical experience in serving innovative, IP-rich but asset-light SMEs. Three major banks have joined as inaugural participants and have already engaged clients from the biotechnology, electronics and technology sectors for pilot IP financing trials.</p> <p>Hong Kong Monetary Authority - HKMA, CEDB and IPD launch IP Financing Sandbox</p>	-

5	SEBI	Reserve Bank of India issues Consolidated Master Directions	<p>On 28 November 2025, the RBI announced a major regulatory consolidation initiative aimed at streamlining and rationalising the extensive volume of directions, circulars, and guidelines issued over the years. This initiative is designed to reduce compliance burdens and improve the ease of doing business for all Regulated Entities (REs).</p> <p>Key changes include:</p> <ul style="list-style-type: none"> Existing instructions have been merged and reorganised into entity-wise consolidated master directions (MDs); Legacy directions and circulars covering similar subject matter have been repealed where new consolidated MDs are issued; This exercise addresses overlapping, scattered, and unrepealed instructions that previously created compliance ambiguity; A significant shift introduced is that all new or amended regulatory norms will now be issued as "Directions" instead of "Circulars"; this change aims to enhance regulatory clarity and improve accessibility for each category of regulated entities, thereby reducing overall compliance costs; The RBI has issued consolidated Master Directions for Non-Banking Financial Companies (NBFCs), replacing earlier Master Directions and circulars that have been repealed upon the issuance of the new framework. <p>Reserve Bank of India issues Consolidated Master Directions - RBI</p>	-
6	SEBI	Reclassification of Real Estate Investment Trusts (REITs) as equity related instruments for facilitating enhanced participation by Mutual Funds and Specialized Investment Funds (SIFs)	<p>On 28 November 2025, SEBI notified amendments to the SEBI (Mutual Funds) Regulations, 1996 (Gazette notification no. SEBI/LAD-NRO/GN/2025/272), reclassifying Real Estate Investment Trusts (REITs) as equity-related instruments to facilitate greater participation by Mutual Funds and Specialized Investment Funds (SIFs).</p> <p>Key measures, effective January 1, 2026, include:</p> <ul style="list-style-type: none"> Investments by Mutual Funds and SIFs in REITs will be treated as investments in equity-related instruments. Infrastructure Investment Trusts (InvITs) will continue to be classified as hybrid instruments; Existing REIT investments held by debt schemes of Mutual Funds and SIF strategies as of 31 December 2025, will be grandfathered. Asset Management Companies (AMCs) are, however, encouraged to divest REITs from debt schemes over time, considering market conditions, liquidity and investor interests; AMFI must include REITs in its scrip classification list by market capitalisation, in line with paragraph 2.7 of the Master Circular for Mutual Funds dated 27 June 2024; AMCs must issue addenda to update scheme documents; these changes will not be treated as a fundamental attribute change; and REITs may be included in equity indices only after a six-month period, i.e. from 1 July 2026. <p>The circular is issued under Section 11(1) of the SEBI Act, 1992 and Regulation 2(1)(ja) of the SEBI (Mutual Funds) Regulations, 1996, to protect investors and promote the development and regulation of the securities market.</p> <p>SEBI Reclassification of Real Estate Investment Trusts (REITs) as equity related instruments for facilitating enhanced participation by Mutual Funds and Specialized Investment Funds (SIFs)</p>	Effective 1 January 2026

7	FMA	Certification requirement for Compliance Officers of Managers of AIFs	<p>On 28 October 2025, the FMA announced a 'no action' approach for certain Climate Reporting Entities (CREs) affected by forthcoming climate reporting law changes, which will take effect on 1 November 2025.</p> <p>Under this approach, affected CREs with lodgement dates in the 2025/2026 reporting period will not be subject to FMA enforcement for failing to prepare or lodge climate statements, or for other Part 7A FMC Act obligations. CREs with 30 June 2025 balance dates must still lodge climate statements by 31 October 2025.</p> <p>The relief is automatic (no application needed) and reflects the intent of proposed legislative changes and the desire to avoid unnecessary compliance costs.</p> <p>Entities affected by climate reporting changes granted "no action" relief - Financial Markets Authority</p>	No action approach will take effect on 1 November 2025
8	RBNZ	Reserve Bank confirms changes to LVR restrictions	<p>On 1 December 2025, the RBNZ has confirmed that the loan-to-value ratio (LVR) restrictions on new residential mortgage lending will be eased, reflecting the Reserve Bank's view that recently introduced debt-to-income (DTI) restrictions allow LVRs to be less restrictive on average. These changes will take effect starting 1 December 2025.</p> <p>The changes are:</p> <ul style="list-style-type: none"> • Owner-occupiers: The share of new lending with LVR > 80% will be allowed up to 25% (from 20%); • For investors, the share of new lending with LVR > 70% will be allowed up to 10% (from 5%); and • RBNZ will continue to monitor housing-related risks, and the new Financial Policy Committee will review LVR settings at least annually and adjust them if risks become elevated. <p>Reserve Bank confirms changes to LVR restrictions - Reserve Bank of New Zealand - Te Pūtea Matua</p>	Effective 1 December 2025
9	FMA	FMA issues revised educational information sheet on insider trading	<p>On 19 November 2025, the FMA published a revised educational information sheet on insider trading, replacing its August report.</p> <p>Reflecting industry feedback after FMA inquiries into two institutional investors' trading, the FMA has taken an educative (not enforcement) approach, added clearer context and risk-mitigation strategies, and dropped the earlier term "shadow insider trading" to avoid confusion.</p> <p>The revision supports stronger practice while not deterring legitimate market activity, and is issued under the FMA's mandate to promote confident and informed participation in New Zealand's financial markets.</p> <p>FMA issues revised educational information sheet on insider trading Financial Markets Authority</p>	-

10	RBNZ	Reserve Bank announces outcome of Capital Review	<p>On 17 December 2025, the RBNZ announced a modernised capital framework for deposit takers, following a Board-commissioned review completed in March.</p> <p>The new package:</p> <ul style="list-style-type: none"> • Eases common equity requirements by about \$5 billion across the system, reflecting a recalibrated risk appetite that takes into account the new Financial Policy Remit, the Depositor Compensation Scheme, and more intensive supervision, enforcement, and resolution tools; • Introduces more granular risk weights, simplifies capital instruments, and brings the 'big four' banks' instruments closer to Australian settings, with further refinements to the risk weights consulted on in August; and • Is intended to be simple, strong, proportionate and efficient, lowering overall funding costs for deposit takers and, in turn, supporting increased lending and lower rates. Smaller and mid-sized institutions are expected to benefit proportionately more, aiding competition. <p>The review drew on over 40 submissions and independent external advice, leading to material changes to some proposed risk weights. The new, internationally calibrated settings move New Zealand closer to Australia while reflecting New Zealand's higher risk profile. An accelerated implementation will start in early 2026, with full implementation under the Deposit Takers Act by 2028, alongside continued refinements to risk weights and the new resolution framework.</p> <p>Reserve Bank announces outcome of Capital Review - Reserve Bank of New Zealand - Te Pūtea Matua</p>	-

1	MAS	Guidelines on Licensing for Payment Service Providers [PS-G01]	<p>On 8 Oct 2025, the Monetary Authority of Singapore (MAS) released the revised <i>Guidelines on Licensing for Payment Service Providers</i> [PS-G01]. This guideline applies to Standard Payment Institutions, Major Payment Institutions, and Money-changing Licensees.</p> <p>Further guidance has been provided on the information required in licence applications regarding the Shareholding Chart. The updated guidance introduces illustrative examples and computation methodologies to clearly determine the presence of a 20% controller and the application of the associate definition as stipulated under the Payment Services Act (PS Act). These scenario-based examples clarify how direct and indirect interests in shares, as well as control over voting rights, may result in entities within complex ownership chains being classified as controllers for regulatory purposes</p> <p>Guidelines on Licensing for Payment Service Providers [PS-G01] (w.e.f 8 October 2025)</p>	Effective 8 October 2025
2	MAS	Notice 637 Risk Based Capital Adequacy Requirements for Banks Incorporated in Singapore	<p>On 9 Oct 2025, the MAS released the revised Notice 637 Risk Based Capital Adequacy Requirements for Banks Incorporated in Singapore. This notice applies to all locally-incorporated banks. It sets out the capital adequacy ratio and leverage ratio requirements, calculation methodologies, internal capital adequacy assessment processes, and public disclosure requirements.</p> <p>The amendments include:</p> <ul style="list-style-type: none"> • Introduction of definitions for "accredited investor", "institutional investor", and "retail investor in Singapore", defining the latter as someone not falling into the first two categories; • Restrictions on Sales to Retail Investors: Prohibits the inclusion of new Additional Tier 1 (AT1) and Tier 2 capital instruments in regulatory capital if the issuing bank sells them to retail investors in Singapore. This includes sales via intermediaries where the agreement must prevent onward sales to retail investors. If any part of an issue is sold to retail investors by the bank, the entire issue is disqualified. However, instruments already included as AT1 or Tier 2 capital before 1 January 2026 are grandfathered; • Revised IRRBB Calculation: Updates the methodology (effective 31 Dec 2025) for calculating standardised interest rate shocks for Interest Rate Risk in the Banking Book (IRRBB) for currencies not listed in Table 10C-1, aligning with revised Basel Committee (BCBS) standards. This involves using average historical rates (2000-2023), applying new baseline global shock parameters, and specified floors/caps. Table 10C-1 containing shocks for specified currencies is also updated; • Capital Buffer Denominator Clarification: Clarifies that the denominator for calculating the Capital Conservation Buffer and the Countercyclical Buffer is the bank's total Risk-Weighted Assets (RWA), explicitly defined as the sum of Credit RWA, Market RWA, and Operational RWA; and • Synthetic Securitisations: Refines the conditions for recognising the credit risk mitigation (CRM) effects of synthetic securitisations. It adds a requirement for banks retaining exposures exceeding 20% of the total RWA of all securitisation exposures to obtain prior MAS approval before recognising CRM effects, even if significant credit risk has been transferred. <p>Notice 637 Risk Based Capital Adequacy Requirements for Banks Incorporated in Singapore</p>	<p>Effective 1 January 2026</p> <p>Annex 10C effective 31 December 2025</p>

3	MAS	Revised Notice 133 on Valuation and Capital Framework for Insurers and Notice FHC-N133 on Valuation and Capital Framework for Designated Financial Holding Companies (Licensed Insurer)	<p>On 9 October 2025, the MAS released their response to the feedback received on the proposed inclusion of additional criteria for Additional Tier 1 (AT1) and Tier 2 capital instruments for insurers.</p> <p>The circular announces MAS's decision to proceed with the proposal to recognise a capital instrument as AT1 or Tier 2 Capital under the Risk-Based Capital 2 (RBC 2) framework only if the instrument is sold exclusively to a person who is not a retail investor in Singapore. This restriction is effective from 1 January 2026. Separately, MAS confirms that, after considering industry feedback, it has decided not to include point of non-viability features in the AT1 and Tier 2 capital instruments within the RBC 2 framework at this juncture.</p> <p>To implement these changes, MAS updated Notice 133 on Valuation and Capital Framework for Insurers and Notice FHC-N133 on Valuation and Capital Framework for Designated Financial Holding Companies (Licensed Insurer) on 8 December 2025.</p> <p>ID 12/25 Response to Consultation Paper on Proposed Inclusion of Additional Criteria for Additional Tier 1 and Tier 2 Capital Instruments for Insurers</p> <p>Consultation Paper on Proposed Equity Counter-Cyclical Adjustment and Inclusion of Additional Criteria for Additional Tier 1 and Tier 2 Capital Instruments for Insurers</p> <p>Notice 133 Valuation and Capital Framework for Insurers</p> <p>ID 15/25 Update to Notice 133 and Notice FHC-N133 on Additional Criteria for Additional Tier 1 and Tier 2 Capital Instruments for Insurers</p> <p>Notice FHC-N133 on Valuation and Capital Framework for Designated Financial Holding Companies (Licensed Insurer)</p>	Effective 1 January 2026
4	MAS	Consultation Paper on Proposed Amendments to Related Party Transaction Requirements for Banks	<p>On 14 October 2025, the MAS released a Consultation Paper on proposed changes to its requirements on banks' transactions with related parties. This paper is aimed at enhancing the oversight of Related Party Transactions (RPTs), addressing conflicts of interest risks, and aligning the framework with international best practices, including the updated Core Principles for Effective Banking Supervision issued by the Basel Committee on Banking Supervision (BCBS). The proposed changes involve rationalising the RPT requirements currently set out across MAS Notices 643, 643A, and 656.</p> <p>The Consultation Paper proposes three main areas of change to the RPT framework for banks.</p> <ul style="list-style-type: none"> • Updating the definition of related parties to include persons who can exert influence over executive officers and directors, as well as indirect controllers (and their affiliates) to capture broader influence over the bank; • Refining the scope of intragroup transactions currently excluded from RPT governance requirements under MAS Notice 643; and • Incorporating existing related party group exposure limits from MAS Notice 656 into MAS Notice 643, and imposing exposure limits on additional related party groups within Notice 643. The MAS will be reviewing RPT requirements for merchant banks separately, taking reference from this revised framework for banks. <p>Consultation Paper on Proposed Amendments to Related Party Transaction Requirements for Banks</p>	Closing date: 14 November 2025

5	MAS	Consultation Paper on Measures to Enhance Investor Recourse Avenues in Market Misconduct Cases	<p>On 24 October 2025, the MAS published a consultation paper seeking feedback on proposals to enhance investors' ability to seek civil compensation for losses suffered from market misconduct under the Securities and Futures Act (SFA). The proposals are aimed at strengthening investor protection and confidence by addressing existing friction points, such as the difficulty retail investors face in self-organising and securing funding for legal action.</p> <p>The paper sets out three key pillars of enhancement: Facilitating self-organisation by introducing a mechanism for an independent party to be appointed as a designated representative to coordinate and bring action on behalf of affected investors; Providing access to funding by establishing a grant scheme to co-fund meritorious investor actions and defray costs; and Reducing legal barriers to civil action by simplifying and extending the scope of the "piggyback claim" provision (Section 236 SFA). Key refinements to the piggyback claim include allowing it to reference a wider range of enforcement outcomes (such as consent orders), easing investors' proof of reliance in misstatement cases, and removing existing statutory caps on compensation amounts. MAS intends these enhancements to complement its public enforcement actions and seeks to balance investor recourse with appropriate safeguards against frivolous claims.</p> <p>Consultation Paper on Measures to Enhance Investor Recourse Avenues in Market Misconduct Cases</p> <p>MAS Consults On Measures To Enhance Investors' Ability To Seek Civil Compensation For Losses Suffered Due To Market Misconduct</p>	Closing date: 31 December 2025
6	MAS	ID 13/25 Response to Consultation Paper on Proposed Capital Treatment for Structured Products and Infrastructure Investments for Insurers	<p>On 28 October 2025, the MAS released a response to the Consultation Paper on Proposed Capital Treatment for Structured Products and Infrastructure Investments for Insurers.</p> <p>MAS thanked respondents for their feedback and confirmed that the finalised capital treatment for structured products and infrastructure investments will be reflected in a revised MAS Notice 133 and is expected to take effect from 31 March 2026. MAS also acknowledged that not all qualifying criteria can be met fully for some infrastructure projects. Consequently, MAS is collaborating with stakeholders on a pilot program aimed at facilitating insurers' investments into sustainable infrastructure projects, subject to a risk-appropriate level of capital charges and necessary safeguards such as investment caps. This pilot is intended to build insurers' knowledge and experience in these assets, with further details to be shared with the industry shortly.</p> <p>ID 13/25 Response to Consultation Paper on Proposed Capital Treatment for Structured Products and Infrastructure Investments for Insurers</p> <p>Consultation Paper on Capital Treatment for Structured Products and Infrastructure Investments for Insurers</p>	-

7	MAS	MAS Launches BLOOM Initiative to Extend Settlement Capabilities	<p>On 16 October 2025, the MAS announced a new initiative, BLOOM (Borderless, Liquid, Open, Online, Multi-currency), designed to expand the settlement capabilities offered by financial institutions. This initiative builds directly on the foundational work and insights derived from Project Orchid trials, which explored use cases for a digital Singapore dollar and the necessary supporting infrastructure.</p> <p>BLOOM is a collaborative effort with the financial industry focused on enabling settlement using tokenised bank liabilities and well-regulated stablecoins, with a goal of managing risks through standardised approaches. The initiative will cover multiple G10 and Asian currencies, support both domestic and cross-border payments, and facilitate wholesale use cases like corporate treasury management and trade finance. Initial areas of industry collaboration within BLOOM include coordinating networks for the distribution and clearing of settlement assets, enhancing compliance checks through programmable controls, and exploring agentic payments using AI agents to automate transactions. MAS welcomed initial members like DBS, Circle, Ant International, and Coinbase, inviting further participation to advance the initiative's objective of enhancing digital asset capabilities and catalysing the next wave of financial innovation.</p> <p>MAS Launches BLOOM Initiative to Extend Settlement Capabilities</p>	-
8	NCCS, MTI, Enterprise Singapore, MAS	Launch of Government Initiatives to Support the Development of High-Integrity Carbon Markets	<p>On 28 October 2025, the National Climate Change Secretariat (NCCS), Ministry of Trade and Industry (MTI), Enterprise Singapore (EnterpriseSG), and the MAS announced joint initiatives to support the development of high-integrity carbon markets. These measures aim to address current constraints, such as weak demand and underdeveloped market infrastructure, to channel capital towards global climate action and the net-zero transition.</p> <p>The initiatives are focused on increasing demand, growing the project pipeline, and strengthening market capabilities. To guide corporate action, NCCS, MTI, and EnterpriseSG jointly published Voluntary Carbon Market (VCM) guidance on how companies can credibly use carbon credits as part of their decarbonisation plans. Additionally, EnterpriseSG is in discussions with leading Asian corporates to establish an industry-led buyers' coalition to align and aggregate demand for high-quality carbon credits. Crucially, MAS introduced a new Financial Sector Carbon Market Development Grant, setting aside S\$15 million over three years (until 2028) from the Financial Sector Development Fund. This grant will support financial institutions in building carbon market capabilities, such as financing and trading teams, and catalysing innovative financing solutions by defraying upfront costs associated with transaction structuring and risk management.</p> <p>Launch of Government Initiatives to Support the Development of High-Integrity Carbon Markets</p>	-

9	ABS	Banks to launch enhanced safeguards from 15 October 2025 to better protect accounts from being emptied by scammers	<p>Starting on 15 October 2025, Singapore’s major retail banks will introduce enhanced fraud surveillance on all digital transactions to protect customers from scams that quickly drain accounts. The safeguard applies to current and savings accounts, including joint accounts, with balances of at least S\$50,000 and is triggered when more than half of an account’s balance is transferred within 24 hours.</p> <p>When suspicious activity is detected, transactions may be held for a 24-hour cooling period or rejected immediately, and customers will be notified through their banking platforms. They can cancel held transactions, verify urgent payments with their banks, or re-initiate rejected legitimate transfers. Recurring standing instructions, GIRO payments, and bill payments to recognised organisations are exempted. The new safeguard builds on existing anti-fraud frameworks, and while it may delay some legitimate transactions, it aims to prevent major scam losses. ABS and MAS highlighted that the measure strengthens consumer protection but reminded customers to remain vigilant and avoid sharing personal or banking details.</p> <p>Banks to launch enhanced safeguards from 15 Oct 2025 to better protect accounts_29 Sep 2025</p>	-
10	MAS	Consultation Paper on Proposed Guidelines on Artificial Intelligence Risk Management for Financial Institutions	<p>On 13 November 2025, the MAS issued a consultation paper proposing Guidelines on Artificial Intelligence (AI) Risk Management to set out supervisory expectations on the responsible use of AI by all MAS-regulated financial institutions (FIs).</p> <p>The proposed Guidelines apply sector-wide and are intended to be proportionate, with expectations calibrated to the size, nature and risk profile of an FI’s activities and AI use cases, including generative AI and emerging AI agents.</p> <p>MAS sets expectations in three main areas:</p> <ul style="list-style-type: none">• Board and senior management oversight of AI risk management, including establishing firm-wide frameworks, governance structures, policies and risk culture;• AI risk management systems, policies and procedures, such as clear identification of AI use across the firm, maintaining accurate AI inventories and conducting risk-materiality assessments that consider impact, complexity and reliance; and• Lifecycle controls, capabilities and capacity, covering data management, fairness, transparency and explainability, human oversight, third-party risk, evaluation and testing, monitoring and change management, with controls applied commensurate with the assessed materiality of each AI use. <p>MAS notes that the Guidelines build on its 2024 thematic review of banks’ AI use and industry engagements, and emphasises that they are designed to support responsible innovation by FIs that implement appropriate safeguards against key AI-related risks.</p> <p>MAS Guidelines for Artificial Intelligence (AI) Risk Management</p> <p>Consultation Paper on Proposed Guidelines on Artificial Intelligence Risk Management for Financial Institutions</p>	Closing date: 31 January 2026

11	MAX and SGX RegCo	Consultation Paper on Consolidation of Listing Suitability and Prospectus Review Functions	<p>On 29 October 2025, the MAS issued a consultation paper proposing to consolidate prospectus and listing review functions under Singapore Exchange Regulation (SGX RegCo) to streamline the SGX Mainboard listing process.</p> <p>Under the proposed approach, prospective issuers will engage only with SGX RegCo, instead of separately with MAS for prospectus review and with SGX RegCo for listing suitability. SGX RegCo will remain responsible for admitting quality issuers and ensuring that issuers disclose relevant and material information, while MAS will continue to work with SGX RegCo on market surveillance and enforcement, including investigating and taking action against breaches of prospectus disclosure requirements under the Securities and Futures Act.</p> <p>The consolidation is part of a broader, pro-enterprise equities market package recommended by the Equities Market Review Group, and complements earlier consultations on streamlining prospectus requirements and moving towards a more disclosure-based regime, as well as related measures to enhance investor recourse and support companies in unlocking shareholder value. In parallel, SGX RegCo is consulting on listing rule amendments needed to operationalise the consolidation.</p> <p>Consultation Paper on Consolidation of Listing Suitability and Prospectus Review Functions MAS Proposes to Consolidate Listing Review Functions under SGX RegCo to Streamline the Listing Process</p>	Closing date: 29 November 2025
12	MAS	Review Group Completes Equities Market Review, Unveils SGX-Nasdaq Dual Listing Bridge, S\$30 million "Value Unlock" Package, and Second Batch of EQDP Asset Managers	<p>On 19 November 2025, the MAS announced the completion of the Equities Market Review Group's work and its final report, together with a package of measures to enhance the competitiveness and connectivity of Singapore's equities market. Key measures include a dual listing bridge between SGX and Nasdaq to provide a harmonised pathway for Asian growth companies (market capitalisation of at least S\$2 billion, with an Asian nexus and global ambitions) to raise capital in both North America and Asia using a single set of offering documents built on prospectus disclosures comparable to U.S. standards, with the new board targeted for launch around mid-2026. MAS and SGX will also roll out a S\$30 million "Value Unlock" programme funded by the FSDF to help listed companies sharpen focus on shareholder value through grants to build capabilities in corporate strategy, capital optimisation and investor relations, enhanced communication via toolkits, outreach, media engagement and research under GEMS, and peer-learning communities such as the SID Chairpersons' Guild.</p> <p>To deepen investor participation and liquidity, MAS will appoint a second batch of six EQDP managers—Amova, AR Capital, BlackRock, Eastspring, Lion Global and Manulife IM—with S\$2.85 billion in placements, bringing total EQDP allocations to S\$3.95 billion across nine managers, whose strategies can also support IPO cornerstone investments. Additional trading and market-structure enhancements include incentives to strengthen market-making in new and small-/mid-cap counters, modernisation of the post-trade custody model by facilitating wider use of broker custody accounts while retaining the option of CDP direct accounts for retail investors, and a reduction in board lot size for securities above S\$10 from 100 to 10 units to lower entry costs and broaden participation. MAS will establish an Equity Market Implementation Committee, co-chaired by MAS Managing Director Chia Der Jiun and SGX CEO Loh Boon Chye, to drive implementation of these measures and sustain momentum in building a pro-enterprise, disclosure-based yet well-governed equities market.</p> <p>Review Group Completes Equities Market Review, Unveils SGX-Nasdaq Dual Listing Bridge, S\$30 million "Value Unlock" Package, and Second Batch of EQDP Asset Managers</p>	-

13	MAS, ABS, Global Finance & Technology Network (GFTN) and Constellar	"Creating the Future of Finance: A Journey of Innovation and Collaboration" - Remarks by Mr Chia Der Jiun, Managing Director, Monetary Authority of Singapore, at the Singapore FinTech Festival 2025 on 13 November 2025	<p>On 13 November 2025, MAS Managing Director Chia Der Jiun announced a series of AI-related initiatives at SFF 2025. MAS will launch BuildFin.ai, bringing together technology providers and research institutes to work with financial institutions (FIs) on complex, common AI problem statements. The first problem statement is a voice-to-text AI model for the financial industry, led by A*STAR in partnership with FIs, to transcribe conversations in Singlish and a mix of commonly spoken languages and dialects, pooling data to develop a better model.</p> <p>MAS is also supporting FIs earlier in their AI journey through PathFin.ai, a collaborative platform that curates industry-validated AI solutions and best practices; participation has grown from 20 FIs at launch in July 2025 to over 100 participants. In addition, MAS will publish for consultation the Guidelines on AI Risk Management, setting out principles-based expectations for identifying and controlling AI risks across the AI lifecycle, complemented by an industry-developed AI Risk Management Executive Handbook under Project MindForge, which will later be followed by a more detailed good-practice document. MAS is also working with the Institute of Banking and Finance, guided by a Gen AI Jobs Transformation Map, to equip finance professionals with the skills needed for AI adoption, as part of its four-pronged approach: anchoring leading capabilities, broadening adoption, building strong AI governance and upskilling an AI-ready workforce.</p> <p>On tokenisation, Mr Chia highlighted MAS' work to scale asset-backed tokens (tokenised financial assets) through standardisation, safe settlement assets and institutional-grade networks. Under the Global Layer One initiative, MAS has developed and made available common principles, standards and templates to promote network interoperability, and has launched the GL1 Market Infrastructure Toolkit, which network operators and FIs can use to assess whether a blockchain network is consistent with internationally recognised regulatory principles such as the PFMI and market practices such as the Digital Asset Securities Control Principles (DAS CP). The toolkit comprises 108 controls derived from these principles. As part of MAS' exploration of settlement assets, Mr Chia announced that DBS, OCBC and UOB have successfully conducted interbank overnight lending transactions using the first live trial issuance of Singapore dollar wholesale Central Bank Digital Currency (CBDC) for settlement, on which MAS will build by trialling the issuance of tokenised MAS Bills to Primary Dealers settled with CBDC.</p> <p>MAS has also published a Guide on the Tokenisation of Capital Markets Products, using case studies to clarify the regulatory treatment of tokenised capital markets products and set out guidance on applicable disclosures, with updates to follow as tokenised activities develop.</p> <p>These initiatives underscore MAS' focus on enabling responsible adoption of AI and tokenisation through common infrastructure, clear regulatory guidance and strong governance, against the backdrop of SFF 2025, which concluded on 14 November 2025 with more than 70,000 participants from 142 countries, over 900 speakers and about 300 sessions. Collectively, they aim to position Singapore's financial sector to harness emerging technologies safely and effectively over the next decade.</p> <p>"Creating the Future of Finance: A Journey of Innovation and Collaboration" - Remarks by Mr Chia Der Jiun, Managing Director, Monetary Authority of Singapore, at the Singapore FinTech Festival 2025 on 13 November 2025</p> <p>Singapore FinTech Festival 2025 Wraps up 10th Edition, Framing the Technology Blueprint for the Future of Finance</p>

14	MAS	Guide on the Tokenisation of Capital Markets Products	<p>On 14 November 2025, the Monetary Authority of Singapore (MAS) updated and re-issued its 2017/2020 “Guide on Digital Token Offerings” as the “Guide on the Tokenisation of Capital Markets Products”.</p> <p>The Guide provides general, technology-neutral guidance on how securities law under the Securities and Futures Act 2001 (SFA) and Financial Advisers Act 2001 (FAA) applies to issuances and offerings of capital markets products (CMPs) in tokenised form, and entities that facilitate activities in relation to such tokenised CMPs across the capital markets value chain. MAS emphasises the principle of “same activity, same risk, same regulatory outcome”, focusing on the economic substance of digital tokens and associated arrangements rather than their labels or technology, and clarifies that further updates may be issued as tokenisation practices evolve.</p> <p>The Guide explains when a digital token will be regarded as a CMP under the SFA, and sets out how Part 13 SFA prospectus and CIS authorisation/recognition requirements, complex product distribution safeguards, licensing under the SFA/FAA, and AML/CFT obligations apply to tokenised CMPs. It includes detailed expectations on disclosures specific to tokenised CMPs (for example, DLT architecture, smart contracts governance, ownership recording, custody and key management, and tokenisation-specific technology, operational, legal/regulatory and custody risks). It also clarifies extra-territorial application of the SFA/FAA, how MAS’ regulatory sandbox may be used for innovative tokenisation activities, and provides extensive case studies (shares, debentures, CIS, derivatives, and non-CMP tokens), together with “critical questions” and an enquiry checklist to guide market participants on when they should approach MAS with legal opinions for bespoke tokenisation structures.</p> <p>Guide on the Tokenisation of Capital Markets Products project-guardian-operationalising-tokenised-funds.pdf guardian-fixed-income-framework-v1_1.pdf</p>	
15	BoE, MAS, Bank of Thailand	Bank of England, Monetary Authority of Singapore and Bank of Thailand to Explore Synchronised FX Settlement Across Borders	<p>On 13 November 2025, the Bank of England, the MAS and the Bank of Thailand announced a collaboration to explore synchronised foreign exchange (FX) settlement mechanisms for cross-border transactions.</p> <p>Building on insights from Project Meridian FX, the collaboration will use simulated versions of the participating central banks’ Real Time Gross Settlement Systems (“RTGS systems”) and distributed-ledger-based settlement environments to test interoperability between systems and more complex multilateral use cases involving different settlement infrastructures. The experiments aim to enable atomic, real-time FX Payment-versus-Payment (PvP) settlement across jurisdictions with differing infrastructures, time zones and regulatory frameworks, thereby providing a new, secure and efficient FX settlement channel and supporting cross-border Delivery-versus-Payment (DvP) use cases. The three central banks highlight that the initiative reflects their shared commitment to advancing financial market infrastructures that enhance cross-border interoperability for tokenised transactions, and will inform their future design of wholesale settlement infrastructures and synchronisation solutions.</p> <p>Bank of England, Monetary Authority of Singapore and Bank of Thailand to Explore Synchronised FX Settlement Across Borders</p>

16	MAS	Thematic review of Financial Institutions' recruitment and onboarding training of representatives	<p>On 04 December 2025, the MAS published an information paper outlining the standards expected of financial institutions (FIs) when assessing the fitness and propriety of their appointed representatives for regulated activities.</p> <p>This paper is based on findings from a thematic review conducted between 2024 and 2025 on four FIs regulated under the Financial Advisers Act (FAA), which examined their controls, policies, and procedures for representative recruitment and onboarding training. While FIs generally had frameworks in place, MAS identified deficiencies in several key areas, including inadequate monitoring and supervision of representatives with adverse information due to poorly designed oversight arrangements and ineffective control implementation. Other weaknesses included insufficient assessments of representatives' conflicts-of-interest and financial soundness, deficient oversight of third-party product training, poor oversight of assistants hired by representatives, and inadequate supervision of outsourced activities.</p> <p>The information paper details MAS' supervisory expectations, good practices, and observed weaknesses across these areas: onboarding of representatives, monitoring of representatives with adverse information, onboarding training, and other areas such as the hiring of assistants by representatives and outsourced activities.</p> <p>Thematic review of Financial Institutions' recruitment and onboarding training of representatives</p>	
17	MAS	FAQs on Licensing and Business Conduct (Other than for Fund Management Companies)	<p>On 11 December 2025, MAS issued the revised "FAQs on Licensing and Business Conduct (Other than for Fund Management Companies)" under the <i>Securities and Futures Act</i>, updating Q14A and its Annex to clarify the licensing implications for intermediaries that connect fundraising companies with investors.</p> <p>The revised Q14A and Annex make clear that intermediaries facilitating fundraising may require a Capital Markets Services (CMS) licence not only for dealing in capital markets products but also for fund management, where their business model involves managing a portfolio of securities for investors. The Annex is expanded to confirm that offers relying on prospectus exemptions (including small offers under section 272A, private placements under section 272B and offers to accredited investors and other relevant persons under section 275(1)) can still trigger licensing, and that activities such as due diligence, pooling of investor funds, use of SPVs and portfolio management may amount to regulated activities. MAS has also introduced illustrative examples contrasting a Telegram-based investment syndicate (likely licensable) with a pure networking/education club (not likely licensable).</p> <p>FAQs on Licensing and Business Conduct (Other than for Fund Management Companies)</p>

3	FSC Taiwan	Draft Amendments to Articles 2, 6, and 13 of the Regulations Governing the Repurchase of Shares by Listed and OTC-Listed Companies	<p>On 3 November 2025, FSC Taiwan announced draft amendments to Articles 2, 6, and 13 of the Regulations Governing the Repurchase of Shares by Listed and OTC-Listed Companies.</p> <p>Key points of the amendment include:</p> <ul style="list-style-type: none"> To promote energy conservation, carbon reduction, and improve reporting efficiency, the amendments state that listed and OTC-listed companies shall complete the reporting and announcement procedures for share repurchases by uploading required documents and inputting announcement information via the Market Observation Post System (MOPS), eliminating the need for written submissions; relevant provisions requiring physical binding of documents and allowing exemptions from newspaper publication are deleted; in line with the amendment to Article 28-2, Paragraph 4 of the Securities and Exchange Act, the reporting period for share repurchase status is extended from three years to five years; and To provide listed and OTC-listed companies adequate transitional time to adapt to the electronic reporting system, the amended Articles 2 and 6 shall take effect on 1 May 2026. <p>Draft Amendments to Articles 2, 6, and 13 of the Regulations Governing the Repurchase of Shares by Listed and OTC-Listed Companies – FSC Taiwan</p>	Effective 1 May 2026
4	FSC Taiwan	RWA Tokenization Task Force Completes Technical Feasibility Validation – the FSC’s Next Phase Focuses on Regulatory Adaptation	<p>On 4 November 2025, FSC Taiwan announced that the Real World Asset (RWA) Tokenization Task Force had completed its technical feasibility validation, marking a shift in focus toward regulatory adaptation and market implementation.</p> <p>Established in June 2024 with the Central Bank, TDCC and nine financial institutions, the task force confirmed through proof-of-concept testing that the tokenization of domestic bonds, foreign bonds and funds is technically feasible. The validation demonstrated potential benefits including faster settlement, near-24-hour trading, automated payments, lower investment thresholds and improved operational and supervisory efficiency.</p> <p>The FSC noted that challenges remain, particularly around market efficiency at scale, regulatory consistency and the evolving roles of market participants. As a next phase, the FSC will prioritise regulatory adaptation, the planning of an RWA token trading platform, and international connectivity, working with industry, infrastructure providers and international counterparts to move from feasibility toward practical implementation.</p>	-

5	FSC Taiwan	Amendments to Articles 7, 10-1, and 23 of the "Regulations Governing Information to be Published in Annual Reports of Public Companies."	<p>On 7 November 2025, FSC Taiwan announced amendments to Articles 7, 10-1, and 23 of the "Regulations Governing Information to be Published in Annual Reports of Public Companies."</p> <p>Key points of the amendment include:</p> <ul style="list-style-type: none"> Companies meeting certain criteria must include a dedicated section in their annual reports presenting board-approved sustainability-related financial information, aligned with the IFRS Sustainability Disclosure Standards; (Article 7) Sustainability-related financial information must adhere to FSC-recognized IFRS sustainability standards; (Article 10-1) Important IFRS disclosure requirements are incorporated into the rules; After adoption, current climate-related disclosure forms will no longer apply; Scope 1 and 2 GHG emissions must obtain independent third-party assurance; The FSC may approve alternative methods and set separate timelines for Scope 3 disclosures; and After adopting IFRS sustainability standards, annual reports must be filed together with financial statements; if the full report is not ready, companies may first submit the sustainability-related financial information section. (Article 23). <p>Amendments to Articles 7, 10-1, and 23 of the "Regulations Governing Information to be Published in Annual Reports of Public Companies." – FSC Taiwan</p>	-
6	FSC Taiwan	FSC Releases Guidelines for Inclusive Digital Financial Services to Address Public Needs and Refine Service Details	<p>On 27 November 2025, the Financial Supervisory Commission (FSC) released the <i>Guidelines for Inclusive Digital Financial Services</i> to promote a diverse, fair, inclusive and accessible digital financial ecosystem and strengthen public trust in digital finance.</p> <p>The Guidelines provide administrative guidance for digital financial service providers, focusing on three areas: people-centric service design, fairness and accessibility, and ongoing monitoring and improvement. They encourage providers to understand diverse user needs, design intuitive and accessible services, ensure clear communication and disclosures, and progressively enhance website accessibility.</p> <p>The FSC also emphasised the importance of avoiding discrimination, expanding access for elderly users, persons with disabilities and less digitally experienced customers, and continuously refining services through feedback, evaluation and technological innovation. The Guidelines aim to balance security and convenience while supporting broader adoption of digital financial services.</p>	-

The Deloitte Centre for Regulatory Strategy is a source of critical insights and advice, designed to assist the world's largest financial institutions manage the strategic and aggregate impact of regional and international regulatory policy. With regional hubs in Asia Pacific, the Americas and EMEA, the Centre combines the strength of Deloitte's network of experienced risk, regulatory, and industry professionals — including a deep roster of former regulators, industry specialists, and business advisers — with a rich understanding of the impact of regulations on business models and strategy.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organisation"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte is a leading global provider of audit and assurance, consulting, financial advisory, risk advisory, tax and related services. Our global network of member firms and related entities in more than 150 countries and territories (collectively, the "Deloitte organisation") serves four out of five Fortune Global 500® companies. Learn how Deloitte's approximately 415,000 people make an impact that matters at www.deloitte.com.

Deloitte Asia Pacific Limited is a company limited by guarantee and a member firm of DTTL. Members of Deloitte Asia Pacific Limited and their related entities, each of which are separate and independent legal entities, provide services from more than 100 cities across the region, including Auckland, Bangkok, Beijing, Bengaluru, Hanoi, Hong Kong, Jakarta, Kuala Lumpur, Manila, Melbourne, Mumbai, New Delhi, Osaka, Seoul, Shanghai, Singapore, Sydney, Taipei and Tokyo.

This communication contains general information only, and none of DTTL, or the Deloitte organisation is, by means of this communication, rendering professional advice or services. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser. No representations, warranties or undertakings (express or implied) are given as to the accuracy or completeness of the information in this communication, and none of DTTL, its member firms, related entities, employees or agents shall be liable or responsible for any loss or damage whatsoever arising directly or indirectly in connection with any person relying on this communication. DTTL and each of its member firms, and their related entities, are legally separate and independent entities.

Liability limited by a scheme approved under Professional Standards Legislation.

Member of Deloitte Asia Pacific Limited and the Deloitte organisation.
