

Job summary

As an Analyst, what is certain is that you will work in a creative, supportive, and agile team who help clients to re-imagine how they might do business and unlock the insight and value buried in the data within their organisations.

Responsibilities

- Help create AI & analytics strategies for clients
- Work with teams to deliver projects that help bring clients platforms and technology into the 21st Century
- Build and work on Cloud platform solutions
- Help advise clients on how to uplift their own Project, Programme, and Portfolio capabilities.

Team

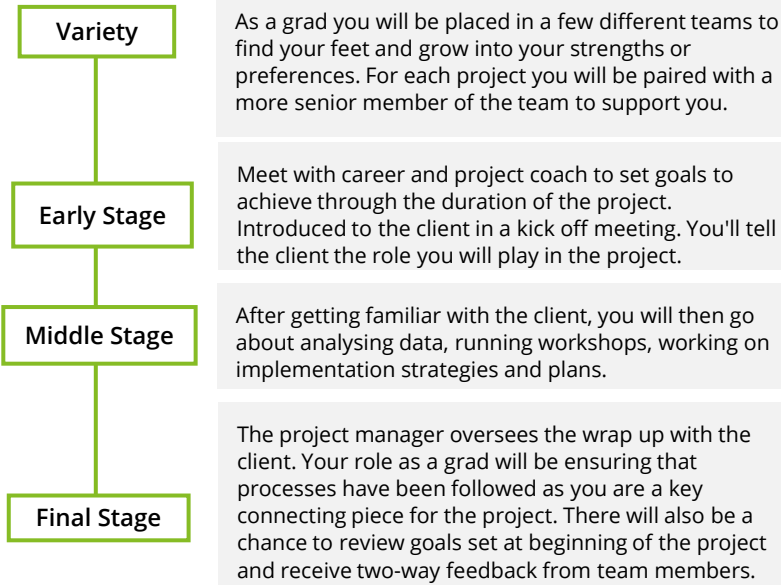

Within our team there are many different roles you can fulfil such as:

- Data Modernisation – design and implement modern data platforms and cloud technology
- AI, Insights and Engagement – design strategies to help organisations become more data-ready, insight-driven or AI driven
- Data Governance and Management – design data management and governance capabilities to deliver high quality insights
- Intelligent Automation – use robotic and cognitive tech to improve workforce productivity
- Operate Services – Operate data and analysis systems, embed talent in organisations and build as-a-service offering.

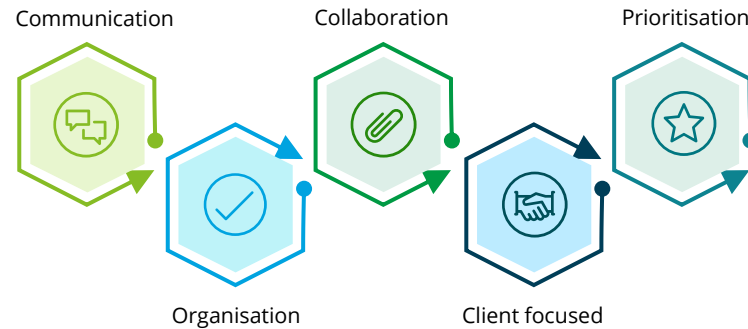

How we invest in you

- An initial 90-day induction plan to learn about the business and clients, along with ongoing support and mentorship
- Personalised Buddy and Coach to show you the ropes and guide your career
- Deloitte pay for ongoing education/study days
