

Job summary

As an Analyst in the Operations & Industry Solutions team, you will assist clients from various industries in designing and implementing operational strategies. This involves redesigning core processes, restructuring organisations, and executing major technology-enabled programs

Responsibilities

- Research and Data Analysis: Collect and analyse data to identify business challenges and opportunities for improvement.
- Client Interaction: Participate in client meetings to gather requirements, present findings, and update on project progress
- Team Collaboration: Work as part of a team and collaborate with other consulting disciplines to deliver multidisciplinary solutions for our clients.

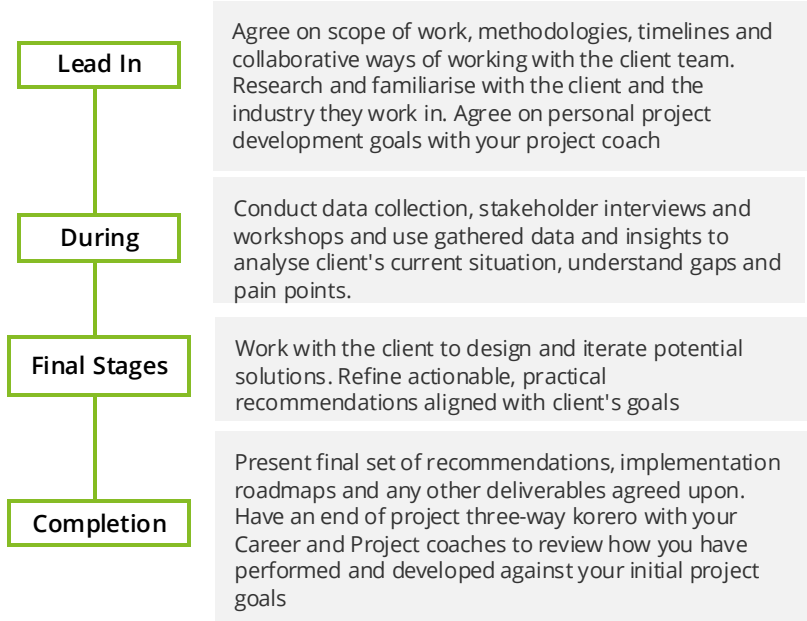

How the team works

- Operations & Industry Solutions works in the following areas:
- Operations Excellence – We advise, design, and deploy solutions to maximise operational efficiencies and deliver better outcomes.
 - Enterprise Model Design & Transformation Integration – We help clients make the shift towards agility by focusing on customers and front line empowerment.
 - Strategic Cost Transformation - We help identify, size and realise cost base improvements.
 - Digital Operation - We work alongside technical teams to build capabilities and solutions that help organisations harness emerging trends in digitisation, connectivity, customer experience and analytics. Work in both public and private sector. Procurement and supply chain.

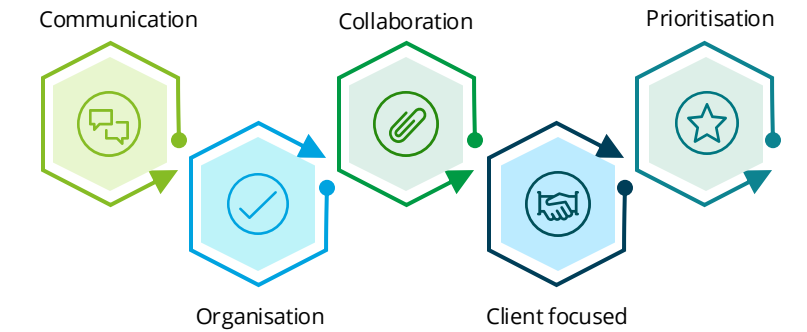

How we invest in you

We prioritise your professional growth by offering weekly learning and monthly training opportunities, ensuring you continuously hone your consulting, industry-specific, and technical skills.

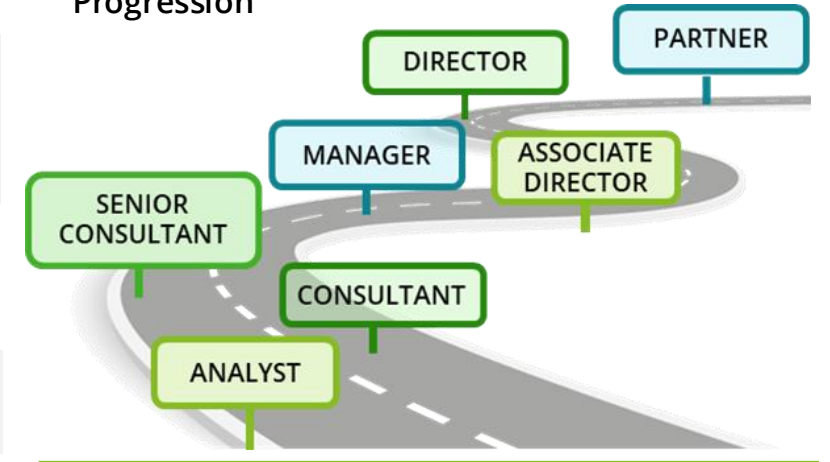

Project overview

Competencies
