

Health equity matters for everyone	Embedding a Tiriti-dynamic health system	Implementing a population health approach	Ensuring a sustainable health service delivery system
------------------------------------	--	---	---

People and whānau at the heart of health | Ko te pūtake o te ngākau hauora, ko te whānau, ko te tangata

- Valuing the voices of consumers and whānau actions
- Developing an inclusive leadership and culture
- Strengthening workforce whānau
- Strengthening the use of health insights and intelligence

Priority populations | Ngā taupori matua

- Māori health
- Pacific health
- Tāngata whaikaha | Disabled people

Priorities for improving health outcomes and equity | Ngā whakaarotau ki te mana taurite me te whakapiki i ngā putanga hua hauora

Better health in our communities

- Develop healthy public policies locally and regionally
- Working with Mental Health and Wellbeing Commission Locality Plans to improve mental wellbeing & reduce harm from alcohol and drugs
- Engage Ministry of Housing and Urban Development, Kainga Ora and Ministry Social Development on options to ensure people with mental illness and addiction problems can access sustainable housing
- Make the healthy choices the easy choice
- Accelerate implementation of Every Life Matters (Suicide Prevention Action Plan) 2019-2024.

Maternity and early years

- Work with Lead Maternity Carers (LMC) and Well Child Tamariki Ora on more flexible and responsive care
- Design and commission Te Ao Māori and Pacific whānau-centred maternity and early-years services
- Redesign community-based oral health services for Māori whānau and Pacific aiga
- Increased access and national consistency for oral surgery for children
- Provide education and resources to providers aligned with Enabling Good Lives strategy

People living with chronic health conditions (diabetes, heart disease, respiratory conditions, stroke and gout)

- Implement seamless and nationally-consistent clinical pathways with specialist teams integrated with primary and community care providers
- Identify and support Māori and Pacific NGOs to work with whānau with chronic conditions to support self-management

People with Cancer

- Develop targeted approaches for breast, cervical and bowel screening for Māori and Pacific
- Develop new joined-up pathways for rapid diagnosis of suspected cancers beginning in primary care
- Expedite radiotherapy satellite sites for linear accelerator services
- Implement national pathways to access transport and accommodation

People living with mental health distress, illness and addictions

- Nationally consistent approach to the integration of specialist community mental health and addiction teams, NGOs, primary and community care.
- Design and expand Te Ao Māori mental health service solutions
- Provide timely access for people experiencing acute mental distress, developing solutions with communities and the police
- HUD, MSD and Kainga Ora collaboration on transitioning people from inpatient units to community

A unified, smarter, sustainable and equity-led health system | He punaha oranga paiheretia, koi, toitū, a, mana orite

Rural healthcare

- Engage Ministry for Primary Industries to support embedding 'rural proofing' into service design
- Expand digital health and telehealth

Transition to transformation

- Implement the locality model with locality partnerships and provider networks
- Establish nationally consistent strategic networks
- Develop whole of system pathways for prevention, self-care, community and primary care, and in-hospital settings
- Ensure quality and safety is reflected in performance monitoring and delivery
- Excellent co-commissioning practice with Te Aka Whai Ora and sustainable NGO commissioning

Outbreak response and managing Covid-19

- Monitor variants of concern
- Integrate response activity into wider pandemic planning and processes
- Develop national curriculum and training for existing and growing staff

Networked hospital and specialist service delivery

- Implement Reset and Restore Planned Care Plan to balance demand across sites
- Develop and implement surge plans that utilise regional and community care capacity
- Develop regional and national production plans to drive equitable, planned care
- Implement regional equity accountability measures, to hold specialist and hospital services responsible for equitable outcomes.
- Develop regional, patient-led booking and scheduling tools
- Build a sustainable commissioning relationship with the private hospital
- Integrated primary and community care within localities
- Introduce new funding & accountability for primary & community care providers
- Addressing barriers to access and unmet need
- Strengthen management of unscheduled care (e.g. hospital treatments in community, telehealth)
- Pursue alternatives to hospital stays

An enhanced national public health system

Focussed on:

- Health promotion
- Protection
- Preventative interventions
- Health assessment and surveillance

Strengthening our system enablers

- National consistency in data, digital capability
- Deliver capital projects, a National Asset Management Strategy and Capital Investment Plan
- Climate sustainability and response plan, emissions targets and performance indicators for national, regional and local levels
- Implement HIRA, a national electronic health record
- Design standards for health facilities
- Identify actions to achieve a 25% reduction of category -1 and 2 emissions by 2025
- Scale and adapt population health digital services
- National procurement and supply chain function
- Interoperability of data and digital systems and digital access to primary care
