# ESG Data Collection Essentials for Sustainability Reporting

## Turn sustainability data into insights that drive impact

This one-day workshop equips participants with practical skills to **simplify ESG data collection** and **visualisation using Power BI**. Learn to leverage ready-to-use templates featuring SGX's 27 core ESG metrics to turn raw data into impactful sustainability dashboards and present performance with confidence.
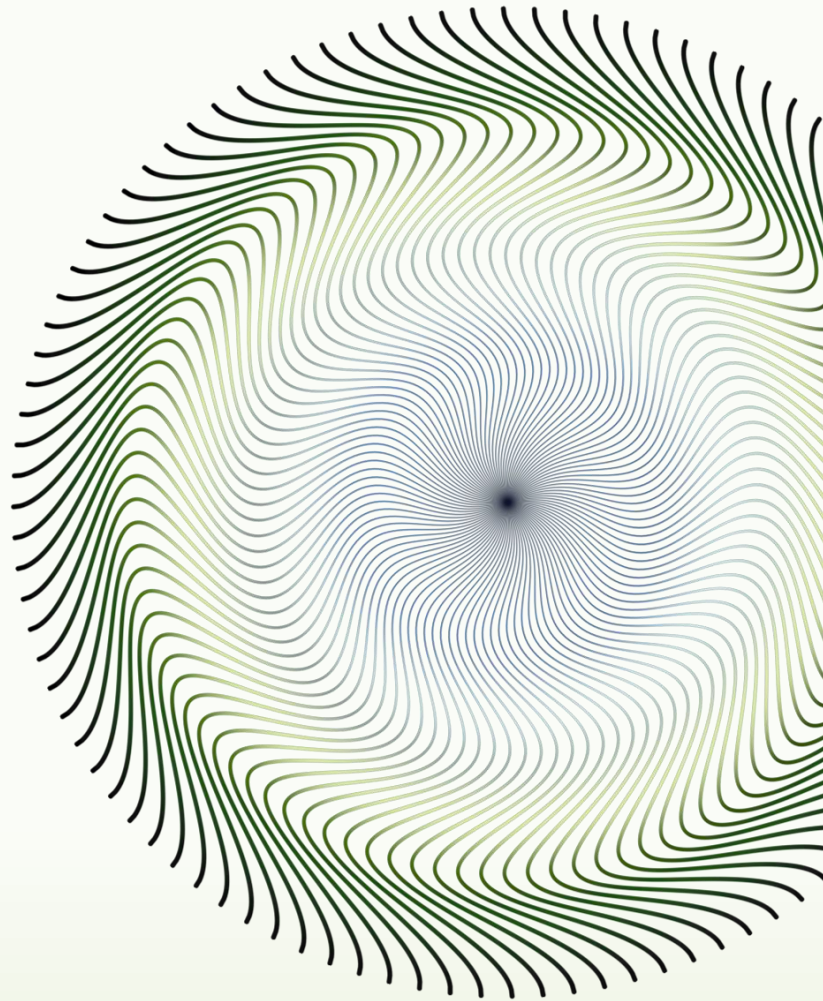

## Who should attend

- Sustainability / ESG managers & officers
- Corporate communications & reporting teams
- Compliance & regulatory affairs professionals
- Business leaders driving ESG transformation

## Learning outcome

By the end of this programme, you'll be able to:

- Understand and apply major sustainability reporting frameworks.
- Walk away with a ready-to-use ESG data collection template and the know-how to gather and manage sustainability data with confidence.
- Apply Power BI to convert collected data into clear, impactful visualisations.

## Your 3-in-1 advantage

**1. Ready-to-use data collection and Power BI templates**
Walk away with a Power BI template featuring SGX's 27 core ESG metrics that enables participants to streamline data collection with a pre-built script to automatically transform data into Power BI dashboards, making data collection simpler and dashboard creation effortless.

**2. Hands-on sustainability reporting expertise**
Delivered by consultants with deep knowledge of frameworks like Global Reporting Initiative (GRI), International Sustainability Standards Board (ISSB), Sustainability Accounting Standards Board (SASB) and local regulations - plus years of real-world SR development experience.

**3. Complimentary consultation (optional)**
Engage with our consultants for a complimentary 30-minute consultation to help you kickstart your sustainability reporting journey. Learn how to get started and explore the available grants to support your inaugural sustainability report.

# Training modules

### Sustainability reporting essentials

- SR purpose & audience
- Overview of GRI, ISSB, SASB
- Materiality assessment basics
- Data collection & validation
- Report structuring and drafting

### Data collection and Power BI template walk through

Learn to manage sustainability data using our pre-developed template featuring SGX's 27 core ESG metrics and transform it into a Power BI dashboard.

### Capstone project

- Apply learning by inputting raw data into the data collection template
- Transform data into an interactive Power BI dashboard
