Deloitte.

Prompt Engineering for Sustainability Reporting
Unlock the power of Artificial Intelligence (AI) for your next sustainability report

This one-of-a-kind training blends the art of **Prompt Engineering with the science of Sustainability Reporting** (SR). Over 2.5 days, participants will learn how to build AI prompts and apply them to produce framework-aligned sustainability disclosures—faster, smarter, and with greater impact.

Who should attend

- Sustainability / ESG managers & officers
- Corporate communications & reporting teams
- Compliance & regulatory affairs professionals
- Business leaders driving ESG transformation

Learning outcome

By the end of this programme, you'll be able to:

- Craft precise AI prompts for research, data analysis, and content creation.
- Understand and apply major sustainability reporting frameworks.
- Use AI to accelerate the SR drafting process.
- Produce a framework-aligned SR draft ready for refinement.

Your 3-in-1 advantage

1. **World-class prompt engineering training**
   Led by a distinguished corporate trainer with two decades of experience in education and training, and over five years at the forefront of AI-driven content creation and data analysis. creation and data analysis.

2. **Hands-on sustainability reporting expertise**
   Delivered by consultants with deep knowledge of sustainability frameworks like Global Reporting Initiative (GRI), International Sustainability Standards Board (ISSB), Sustainability Accounting Standards Board (SASB) and local regulations, backed by years of real-world sustainability reporting experience.

3. **Optional post-training report review**
   Expert review by our consultants of your company's Sustainability Report (SR) draft.

Training modules

Prompt Engineering for Professionals
- AI & generative models: capabilities & ethics
- Core & advanced prompt techniques
- Thinking/Reasoning Models
- Context Engineering
- Role prompting, zero-shot & few-shot strategies
- Hands-on exercises for SR-related tasks
- Agent Models

Sustainability Reporting Essentials
- SR purpose & audience
- Overview of GRI, ISSB, SASB
- Materiality assessment basics
- Data collection & validation
- Report structuring and drafting
- Where AI fits into SR

Capstone Project
- Build targeted prompts for SR
- Draft selected SR sections using AI
- Team presentations & trainer feedback
- Guidance for post-training application

Post-Training support (Optional)
- Detailed SR compliance review
- Recommendations for improvement & assurance readiness
- Ongoing advisory on ESG disclosures

Why join this training now?
- Save weeks of work by streamlining SR drafting with AI.
- Stay ahead of regulations with up-to-date knowledge of global frameworks.
- Boost your reporting confidence through practical, hands-on application.
