

Integrated and ESG Reporting
Advisory & Assurance

Introduction

We provide a range of end to end solutions to support your ESG reporting and assurance requirements. Our team of ESG experts has worked with over 300 companies and organisations on their ESG and Integrated Reporting journeys across multiple sectors.

Implementation

- Adopting ESG reporting standards & Integrated Reporting
- Reporting strategy development
- Pre-IPO readiness

Improve & Enhance

- Reporting refresh
- Process & controls enhancement
- Content development & enhancement

Automation

- Workiva connected reporting
- Implement & support solutions

Audit & Assurance

- Audit readiness
- ISAE 3000 assurance on external reporting
- Green Bond & sustainability linked finance assurance

Implementation

We provide guidance on developing a reporting strategy around your core business strategy including materiality assessments, KPI determination and linking aligned with internal / external reporting objectives. We perform a gap analysis between your current reporting and local regulatory and/or global standards, the Integrated Reporting Framework, and global best practices. Based on the results of this analysis, recommendations and a roadmap for implementation are formulated and supported by our advisory team.

Improve and Enhance

Through our reporting refresh solution, we analyse your current internal and external reporting against your reporting objectives, relevant frameworks, and global best practices. The results of this analysis are formulated into a program to streamline and enhance your reporting including developing an improved reporting structure and content. We will also walk through your reporting processes and controls and provide recommendations to enhance and streamline these capabilities.

Report Automation

Once your reporting strategy, structure, processes, controls, and content are well defined we will work with you to platform this blueprint onto the Workiva (or similar) connected reporting platform to automate and enhance your last mile external and internal reporting in a seamless, collaborative, automated and well-controlled ecosystem.

Audit and Assurance

We will work with you in developing a robust and risk-based combined assurance approach to your external / internal reporting processes including assessment of governance, oversight, controls, and internal assurance. We can complement your internal combined assurance with independent ISAE 3000 limited/reasonable external assurance on your Integrated and/or ESG Reports. Furthermore, we can provide assurance over specific subject matters such as Green Bonds, Sustainable Financing instruments, and Responsible Sourcing disclosures.
