#Evolve Analytics Academy

Overview

Risk Advisory Africa – Deloitte Analytics

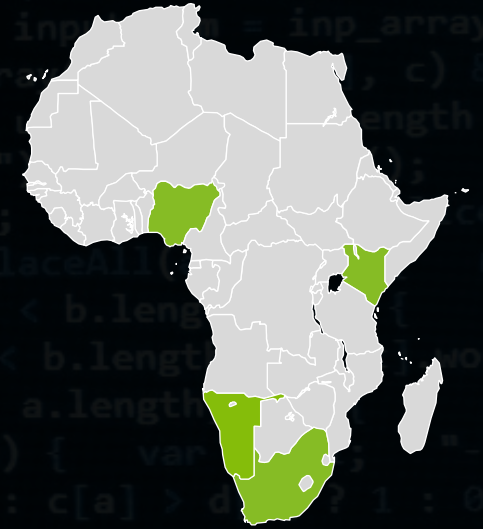

Deloitte Analytics – Risk Advisory, currently has a staff compliment of over 120+ data and analytics professionals across SA, Namibia, East and West Africa.

We work with some of the continent's most well-known brands and companies, currently servicing over 50+ clients in South Africa alone.

We assist clients to maximise performance of internal business operations by identifying, predicting, resolving and mitigating imminent threats to enhance the value of these operations and developing customised solutions.

We industrialise analytics at the core transforming the way business delivers and preserves value.

Risk Advisory South Africa – Analytics

Insights Driven Organisation

How can data improve strategic decision-making, and what relevant answers can I provide?

Descriptive Insights

Creating insights through understanding the business problem and solving it using data in any system, environment or legislation.

Cognitive Advantage

Leveraging advanced technologies like Ai, Machine Learning and Automation to generate value for our clients.

Data Management

The management and protection of our client's most valuable asset - Data.

Information Delivery

Deploying modern Analytics solutions in the Cloud, on premise or as a hybrid of both.

#Evolve Analytics Academy
