Overview

Anaplan is a cloud planning platform that enables organizations to run planning processes by connecting data, people, and plans across the business.

Anaplan provides a full range of capabilities and use cases, from a single business unit to enterprise-wide needs.

The platform is recognized as one of the most flexible, scalable, and collaborative cloud planning systems available in the market.

Based on our experience, once businesses deploy Anaplan, they quickly realize there are other areas within their business that would benefit greatly from being integrated to Anaplan.

Keeping this in mind, we encourage choosing for a future-proof integration platform based on an integrated platform solution over a point-to-point setup.
