

# Deloitte.

## **DELOITTE PHASE 0: DATA ASSURANCE POWERED BY SYNITI**

## Inform and Transform Your Data Strategy

Deloitte Phase 0: Data Assurance Powered by Syniti is for SAP customers looking for visibility into the state of their data quality and what it means to their business bottom line.

#### **KEY OUTCOMES**

Jumpstart your most important data initiatives with automated analysis of SAP Critical Data Elements (CDE) and identification of cross-domain data business opportunities.

## **AUTOMATED DATA QUALITY INSIGHTS**

#### **Data Relevancy**

Reduce load volumes and costs with technical and functional relevancy scanners.

#### Data Match and Deduplication

Let AI discover the extent and impact of dirty and duplicate data.

#### **Data Cleansing**

Identify defects and prioritize high value projects and quick wins.

#### **BUSINESS UPSIDE IDENTIFICATION**

#### **Process-Specific Insights**

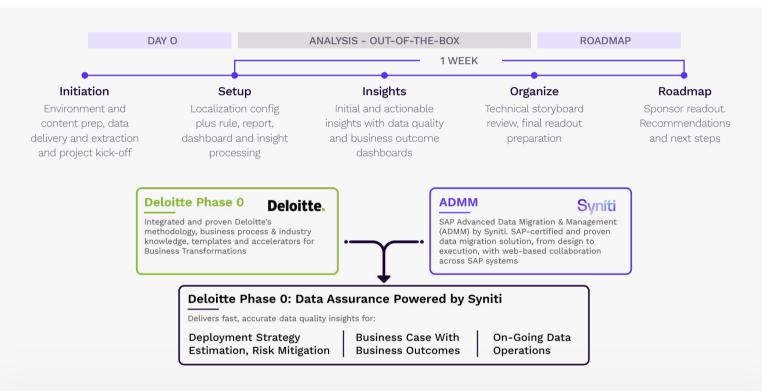

Identify risk and upside in Procureto-Pay, Order-to-Cash, Materials Management and Finance.

#### **Unique Business Outcome Dashboards**

Tie data quality to quantifiable cost

#### **Business Case Support**

Insights into defects, risks and cost saving opportunities.

## **KEY BENEFITS**

You can expect fast, accurate data quality insights and support for a prioritized data quality business case.

## Data Impact Visibility

In-depth answers to the state of your data quality and how it is impacting your most important business processes.

## Cost savings, P&L improvements

Identification of potential cost savings, cash flow, P&L, and process improvements.

## Actionable next steps

Visibility into next steps, remediation priorities, and process impacts.

## Data business case

Recommended downstream "strategic data initiative" roadmap and business case support.

#### PHASE 0: DATA ASSURANCE **USE CASES**

## Ideal for businesses focusing on:

Preparing for an SAP S/4HANA migration Identifying cost reductions, improving business processes Accelerating data governance planning Enhancing analytics performance
