Case for change: internal controls & S/4
benefits

Introduction

Stay on top of risk along your S/4HANA journey – kickoff

SAP's **next-generation** business suite, **S/4HANA**, delivers technical & functional **innovations** representing great **opportunities** but also **risks** in terms of **digital transformation**.

Deloitte Risk Advisory NSE presents a dedicated **webinar series**:
“Stay on top of risk along your S/4HANA journey”.

The **first webinar** of the series aims to provide you an overview of the **compliance** and **control optimisation opportunities** that an **S/4HANA implementation** represents.

Up next

Licensing optimisation

Introduction – internal control optimisation

S/4HANA represents a solid **opportunity** for companies to **simplify, standardize and modernize** their **business processes**. However, the changes induced by such **digital transformation** can also **unbridle new risks!**

Adopting **faster, more digital business processes**, require equally **transformative risk and control** strategies.

Your journey to transform the **internal control function** into a true **strategic business partner** starts today.

And migration to **S/4HANA** is actually the **perfect timing** to consider **control framework transformation**.

Go to www.menti.com and use the code 3416 4511

Where is your organization on the S/4 implementation/upgrade journey?

- Not started
- In progress
- Complete

SAP S/4HANA: At the core of SAP's digital transformation

What is S/4HANA and the HANA ecosystem

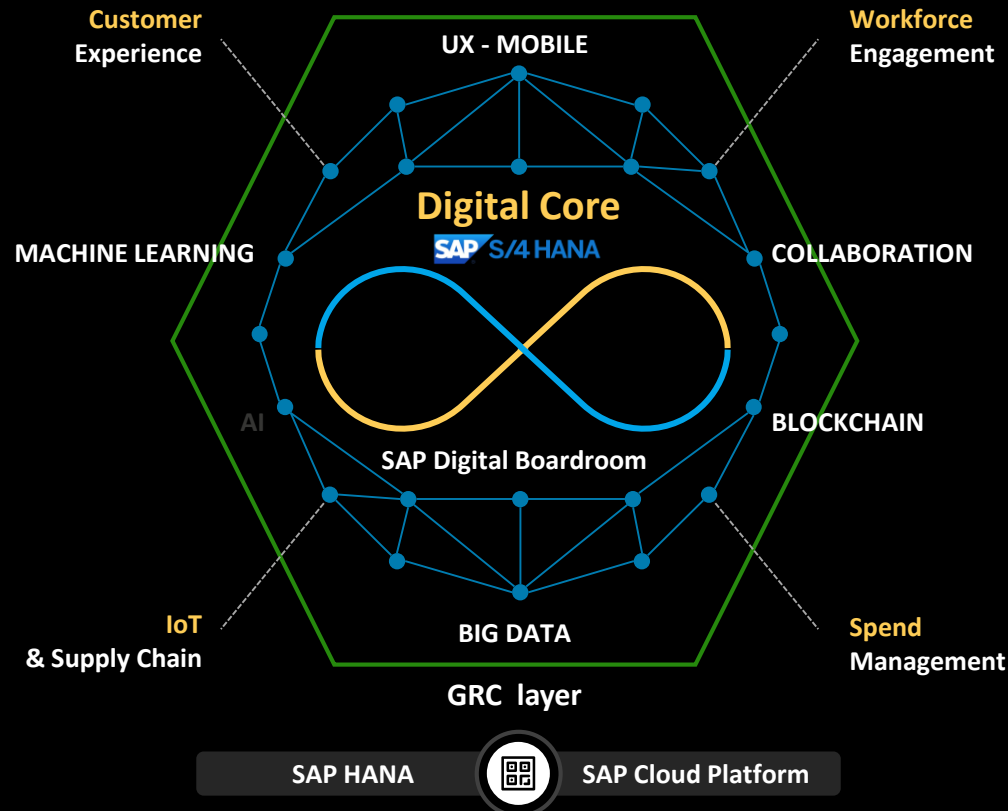

- Digital Core – Simpler and Faster
- Cloud
- Innovation Platform

Why is this relevant

S/4 HANA 'upgrades' are often driven based on a 'Finance-first' approach, as business transformations and not IT implementation

SAP Hybris (v)

SAP Leonardo

SAP Fiori
SAP SuccessFactors
SAP Fieldglass

SAP Ariba
SAP Fieldglass
CONCUR

Characterised by simplification, massively increased efficiency, and compelling features as collaboration, planning and simulation options in many conventional transactions

Moves away from the transactional system that records data to an environment that gives end users active decision support in real-time, based on data from both internal/external sources

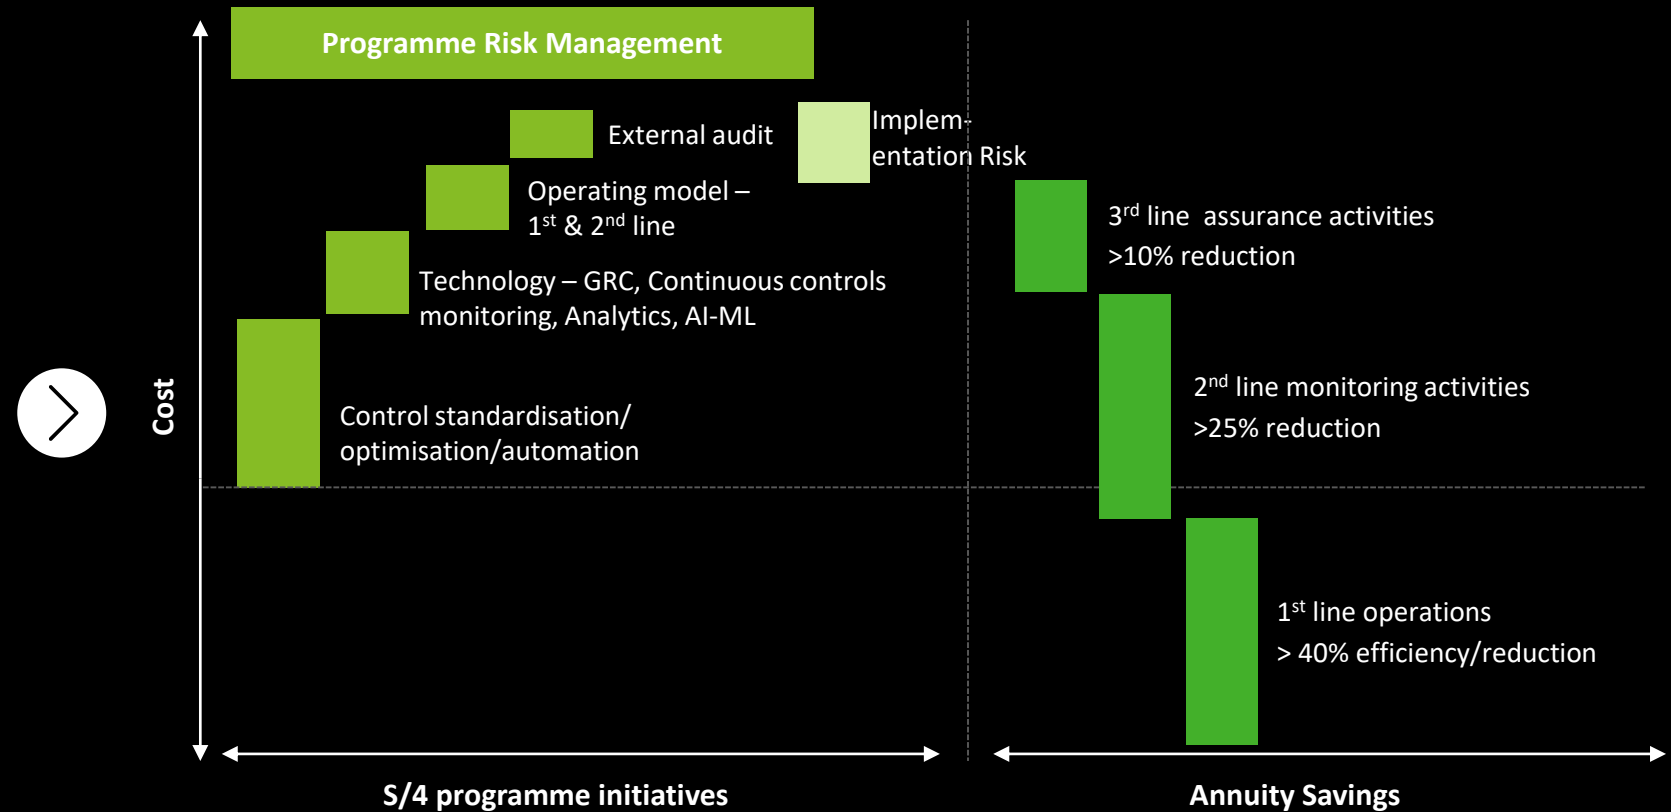

The entire value chain is digitised, including the Digital Core that serves as the foundation for business innovation and optimisation

Case for change: internal controls & S/4 benefits

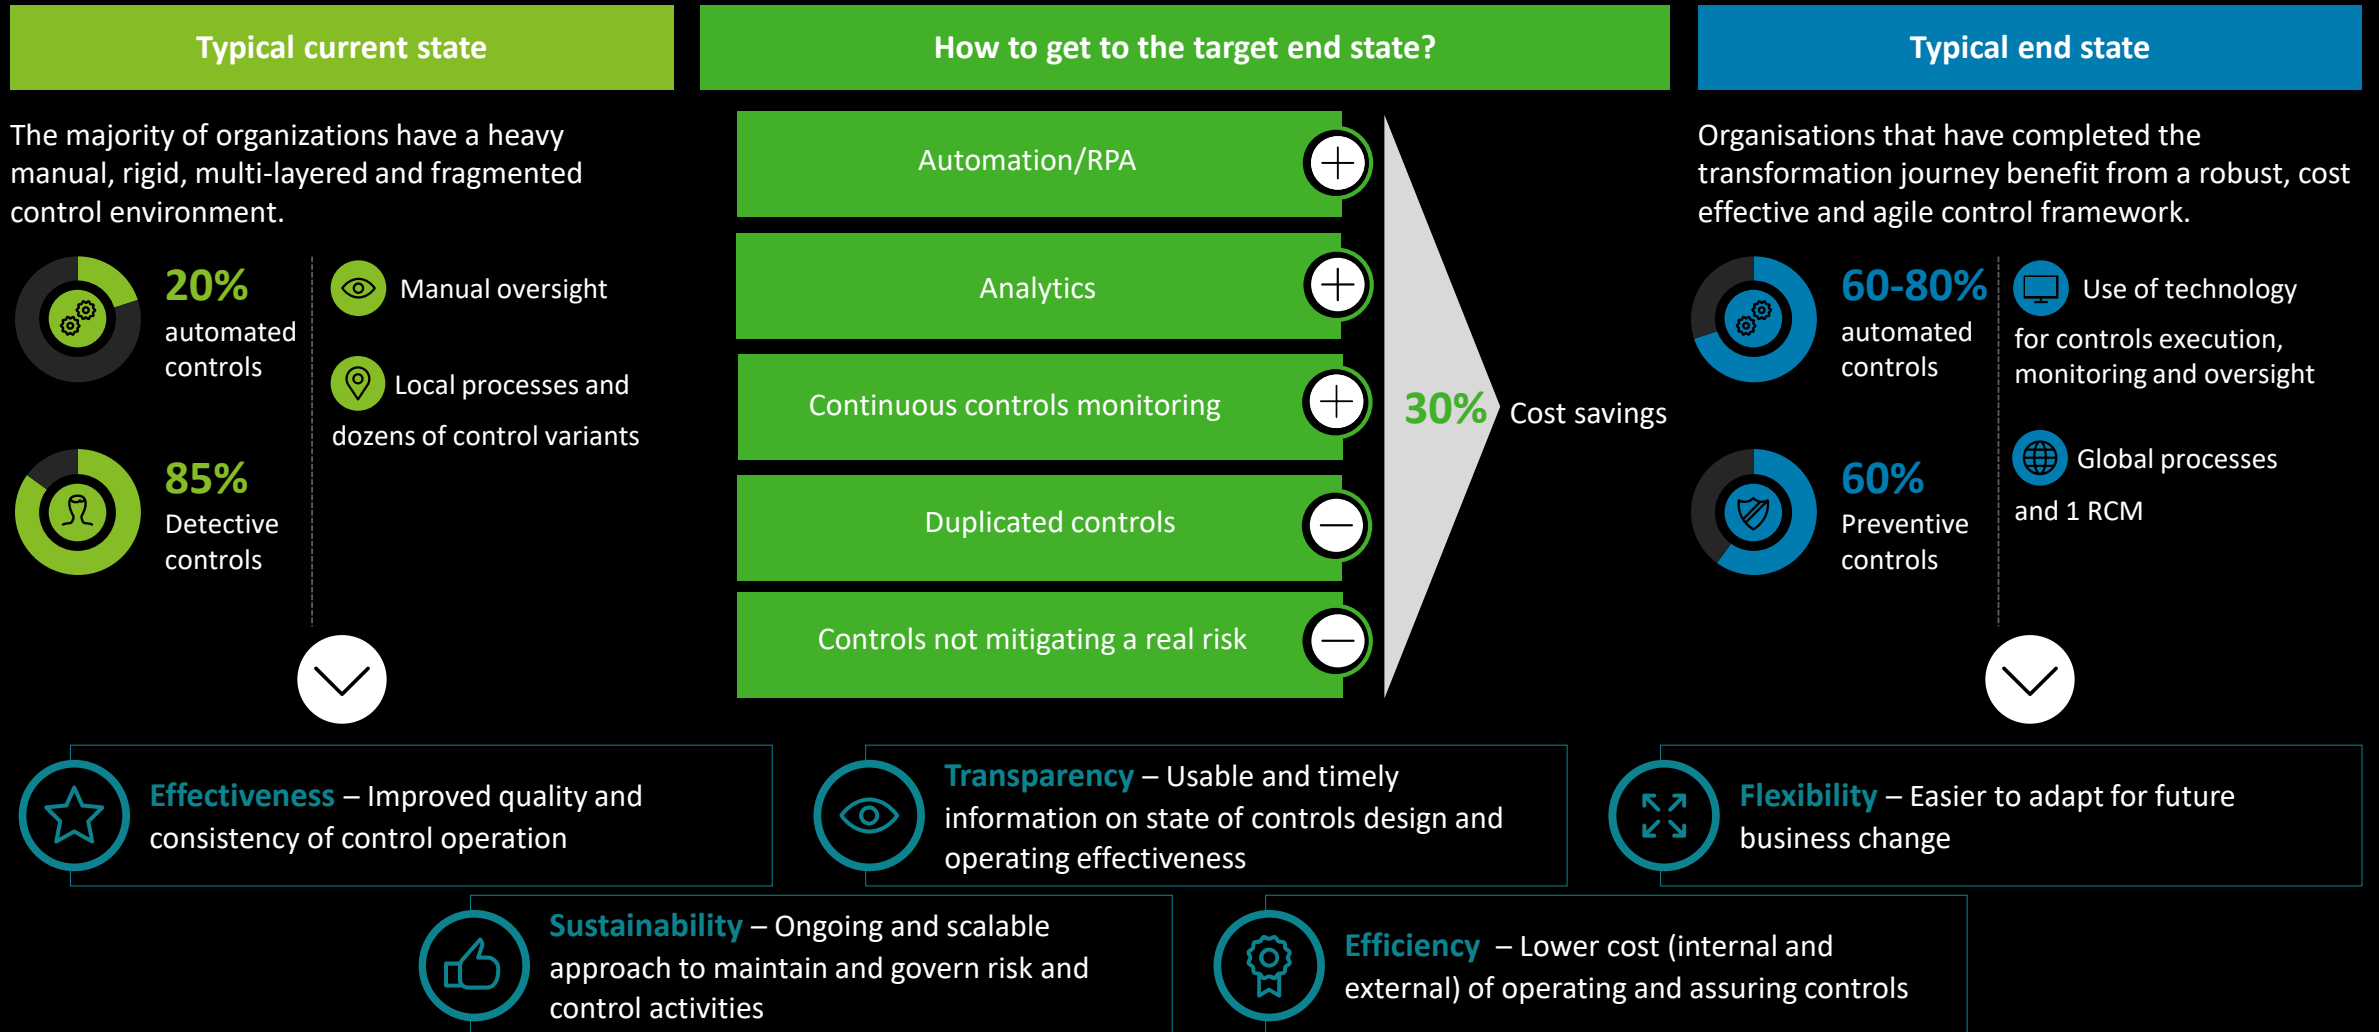

1. Case for change: internal controls & S/4 benefits

- 1. Improved controls quality and effectiveness. Managed regulatory compliance
- 2. Increased line of sight of risk exposures- real time
- 3. Significant opportunity for FTE savings. Reduced cost of implementation
- 4. Less burden on the business. Reduced complexity
- 5. Managed transition/ transformation risk

The business case – Eliminate, Automate, Streamline, Simplify. Addressing Risk → Enhanced Controls, Operational Discipline
Generate ongoing savings and reduce Total Cost of Controls – up to 20-30% annual savings in current cost of compliance and controls

1. Case for change: internal controls & S/4 benefits

Go to www.menti.com and use the code 3416 4511

How automated are your organization's internal controls?

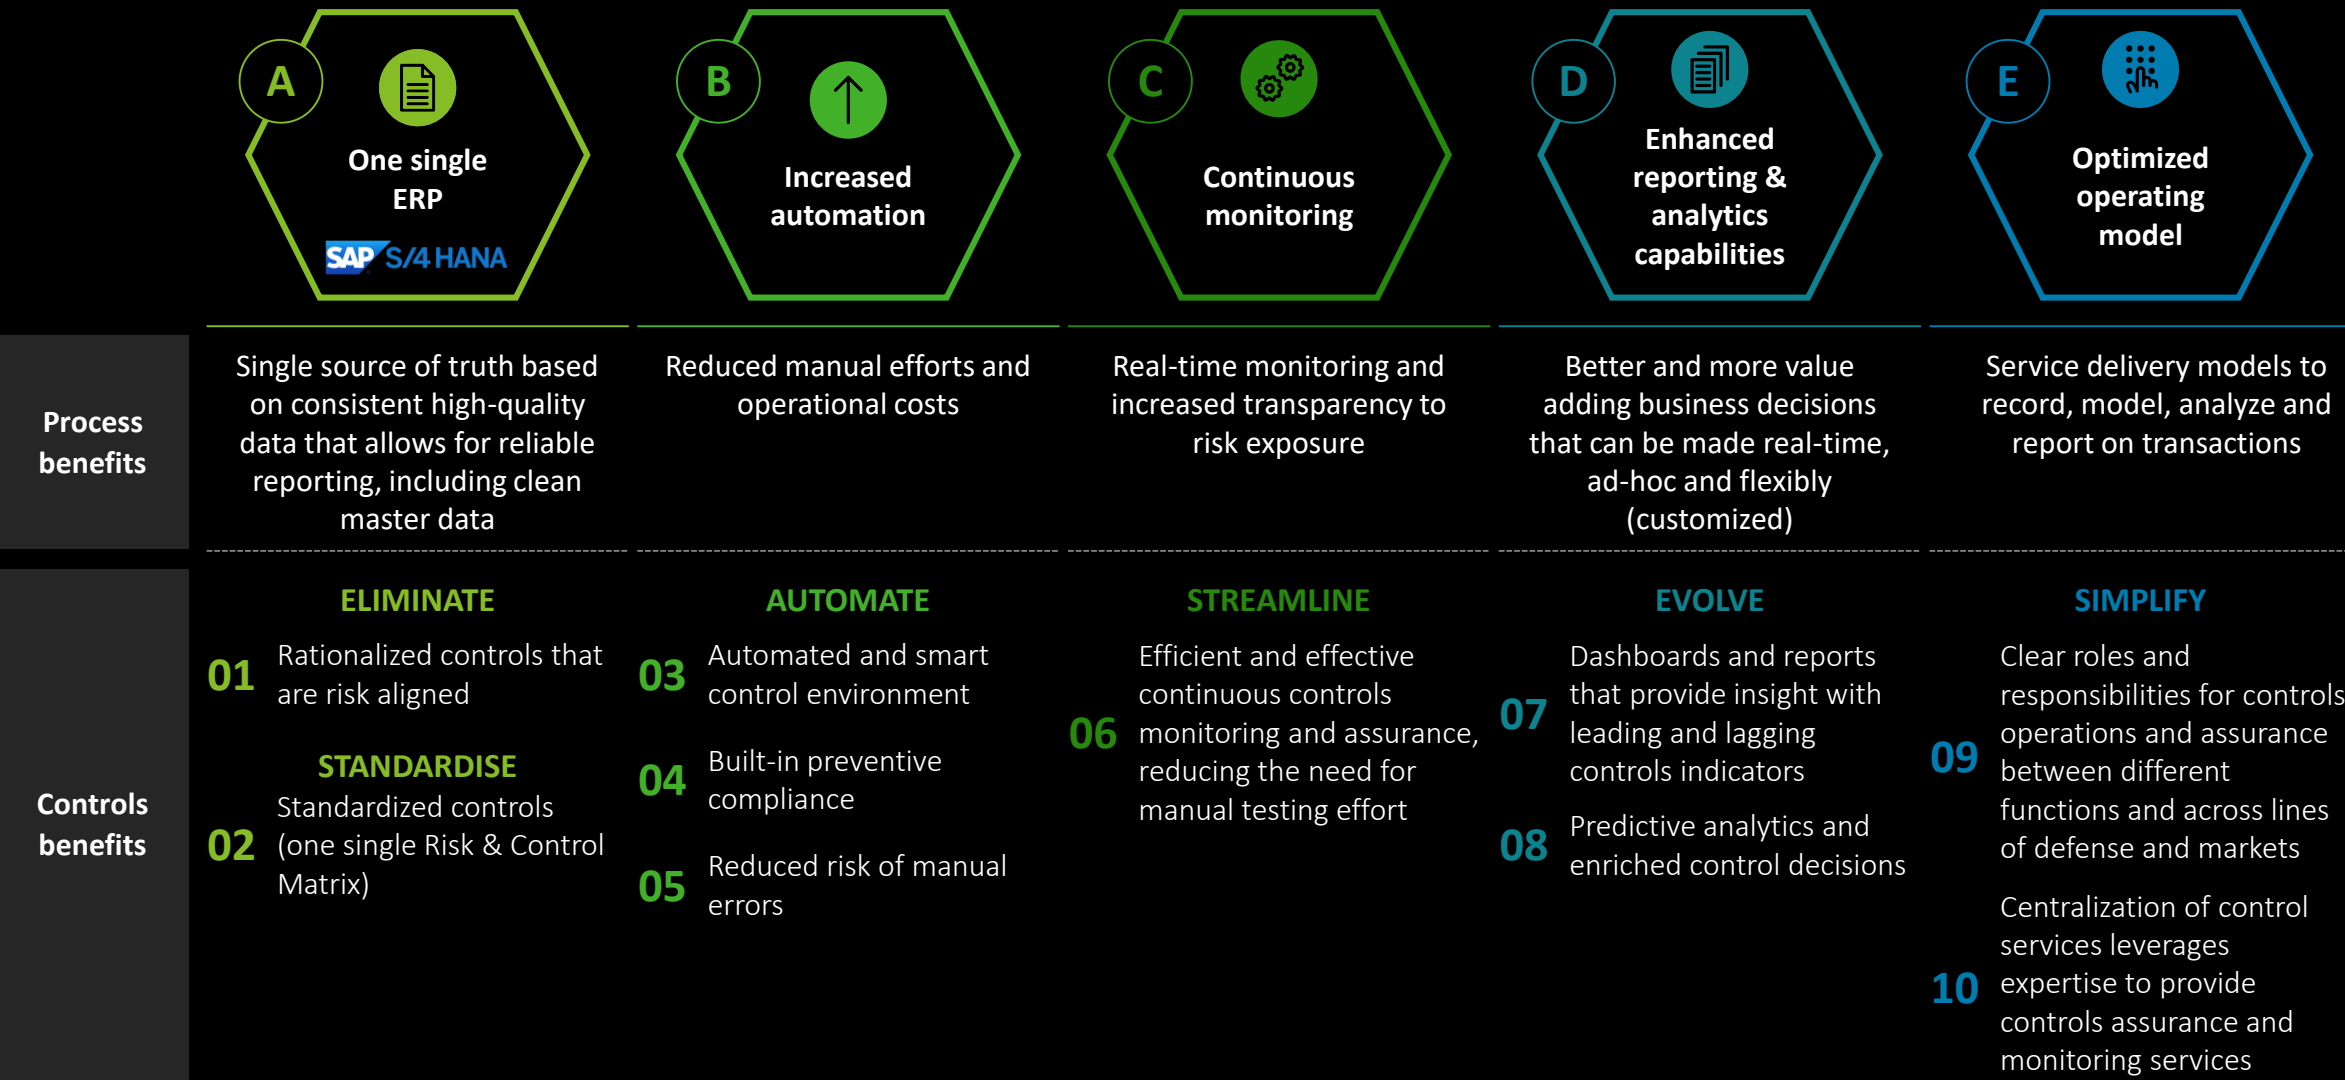

- 0-20% Automated
- 21-40% Automated
- 41-60% Automated
- 60+% Automated

How S/4 functionalities can be leveraged to optimize and enhance internal controls

Levers to optimize and enhance internal controls

Go to www.menti.com and use the code 3416 4511

Where do you see the key opportunities for improvement?

(1-5 scale – Low to High)

- 1. Optimize controls framework
- 2. Increase controls automation
- 3. Improve controls monitoring and reporting
- 4. Embed controls (ownership, accountability, training)
- 5. Streamline controls operating model (3LoD, org structure etc)

Embed controls as part of the S4 design and implementation from the outset

Prepare	Explore	Realise – Build	Realise – Test	Deploy	Run
Plan and prepare for the project	Approach & Solution Design	Implement Solution	Test and validate the solution	Deploy the solution	Support system and close the project
Key Tasks to Deliver “Embedded controls”					
<ul style="list-style-type: none"> Set the vision for controls and compliance Requirements identification Develop Controls, Access, Data, Security and Privacy Approach Define solution features and tech roadmap 	<ul style="list-style-type: none"> Design S4 controls Identify best functional-technical solution GRC tool architecture and configuration requirements Develop organisational, functional & technical specifications 	<ul style="list-style-type: none"> Design/rationalise controls, as appropriate Design and build roles (business, IT & SoD ruleset) GRC tool settings/configuration Develop Go/No-Go Criteria and Deployment Plan Validate with stakeholders (E.g., external auditors) 	<ul style="list-style-type: none"> Validate controls, roles and GRC design Support UAT planning and testing scenarios Develop Service Delivery Transition Plan Analyse SoD and remediate/mitigate 	<ul style="list-style-type: none"> Support User Acceptance Test (UAT – final adjustments) Training and awareness Conduct Deployment Go/No-Go Execute GRC production deployment 	<ul style="list-style-type: none"> Post go live support – controls, GRC and roles Handover Close Project

Addressing the new IT, compliance and business risks originating from an S/4 implementation

Go to www.menti.com and use the code 3416 4511

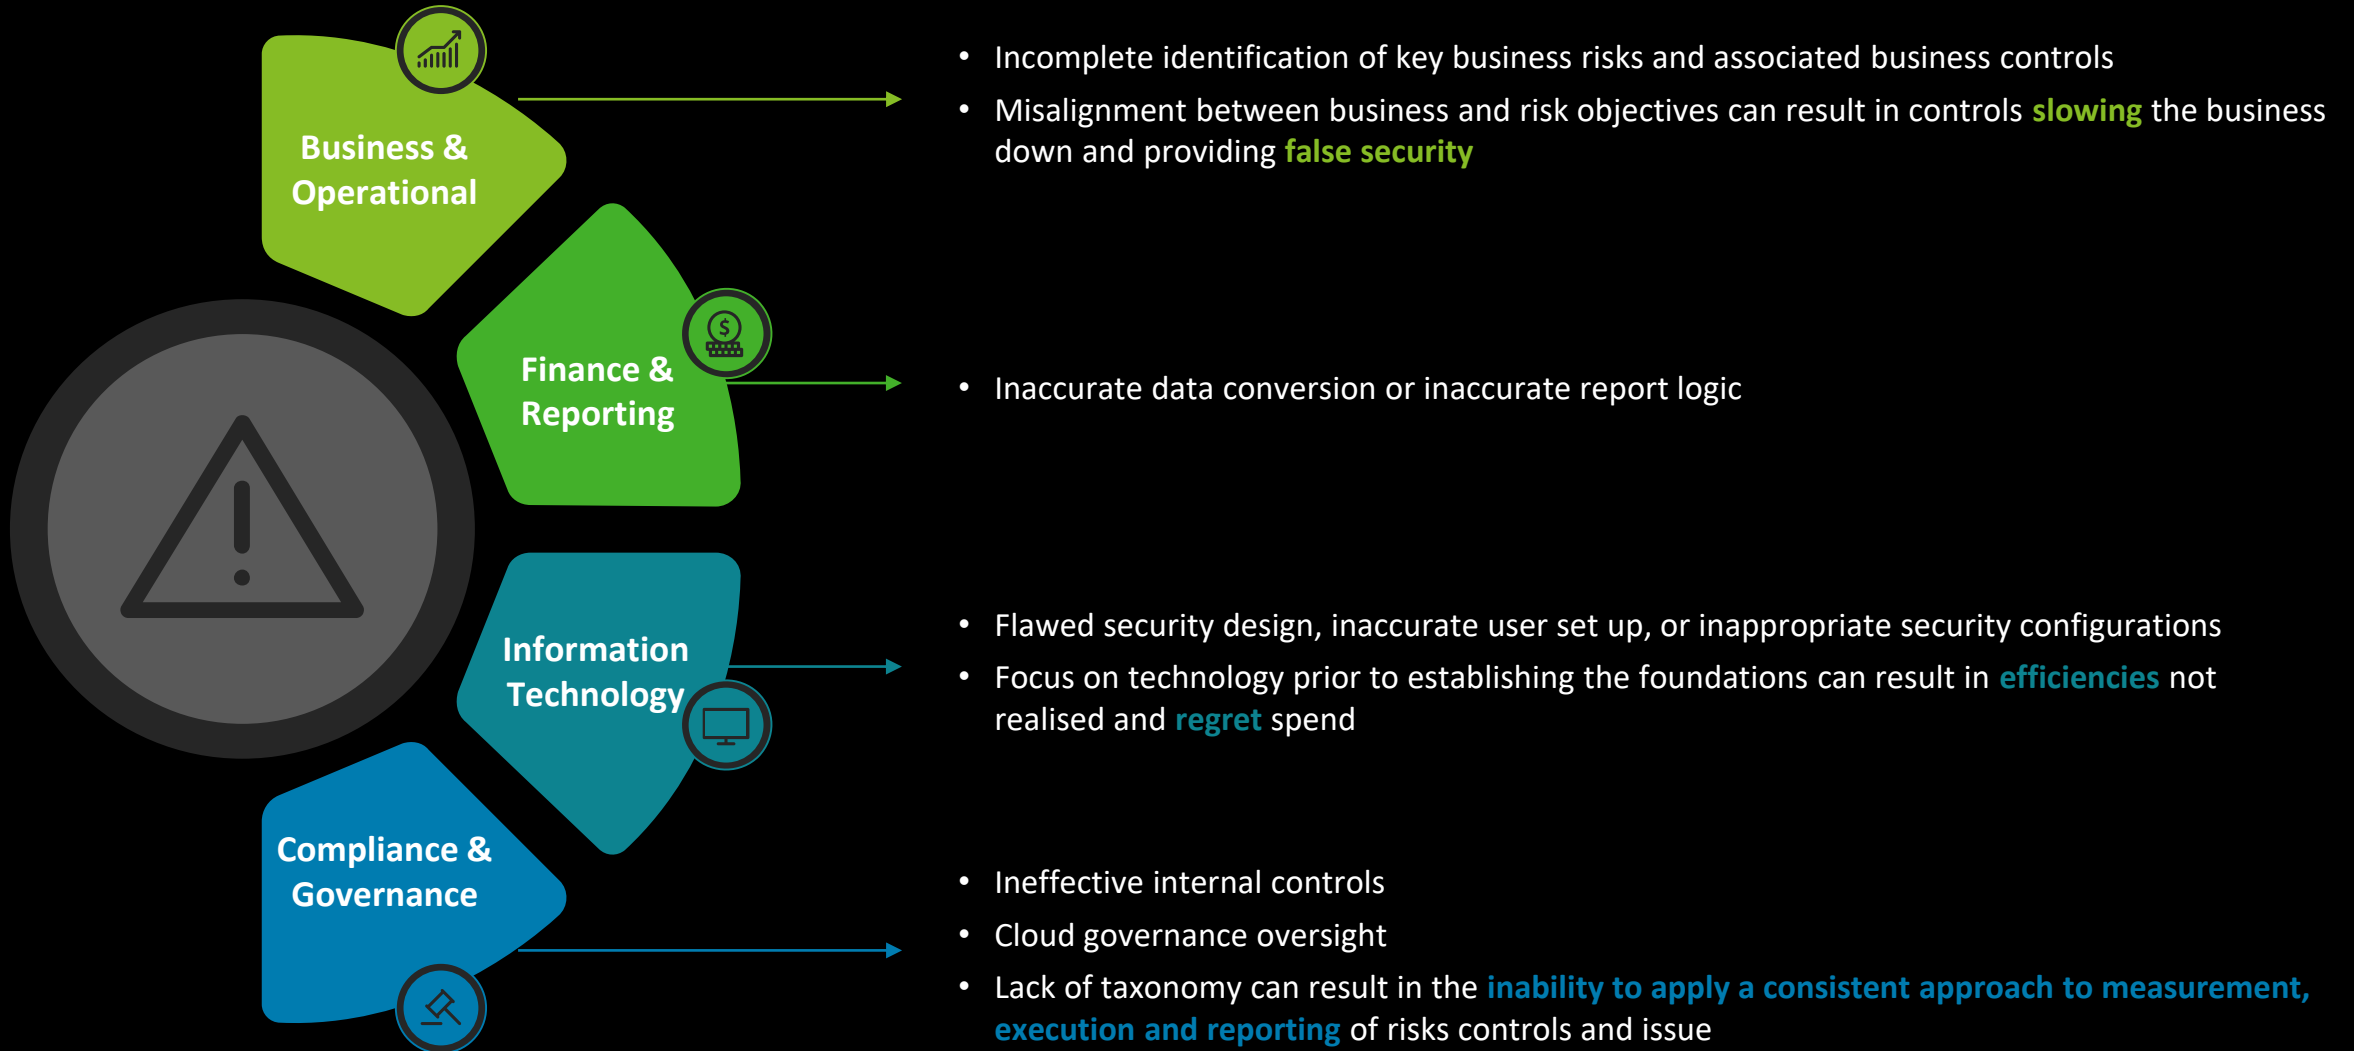

If you are implementing or have implemented/
upgraded to S/4HANA, is internal controls
transformation part of this journey?

- Yes
- Partial, but only a lift and shift from legacy
- No
- Not yet, thinking about it

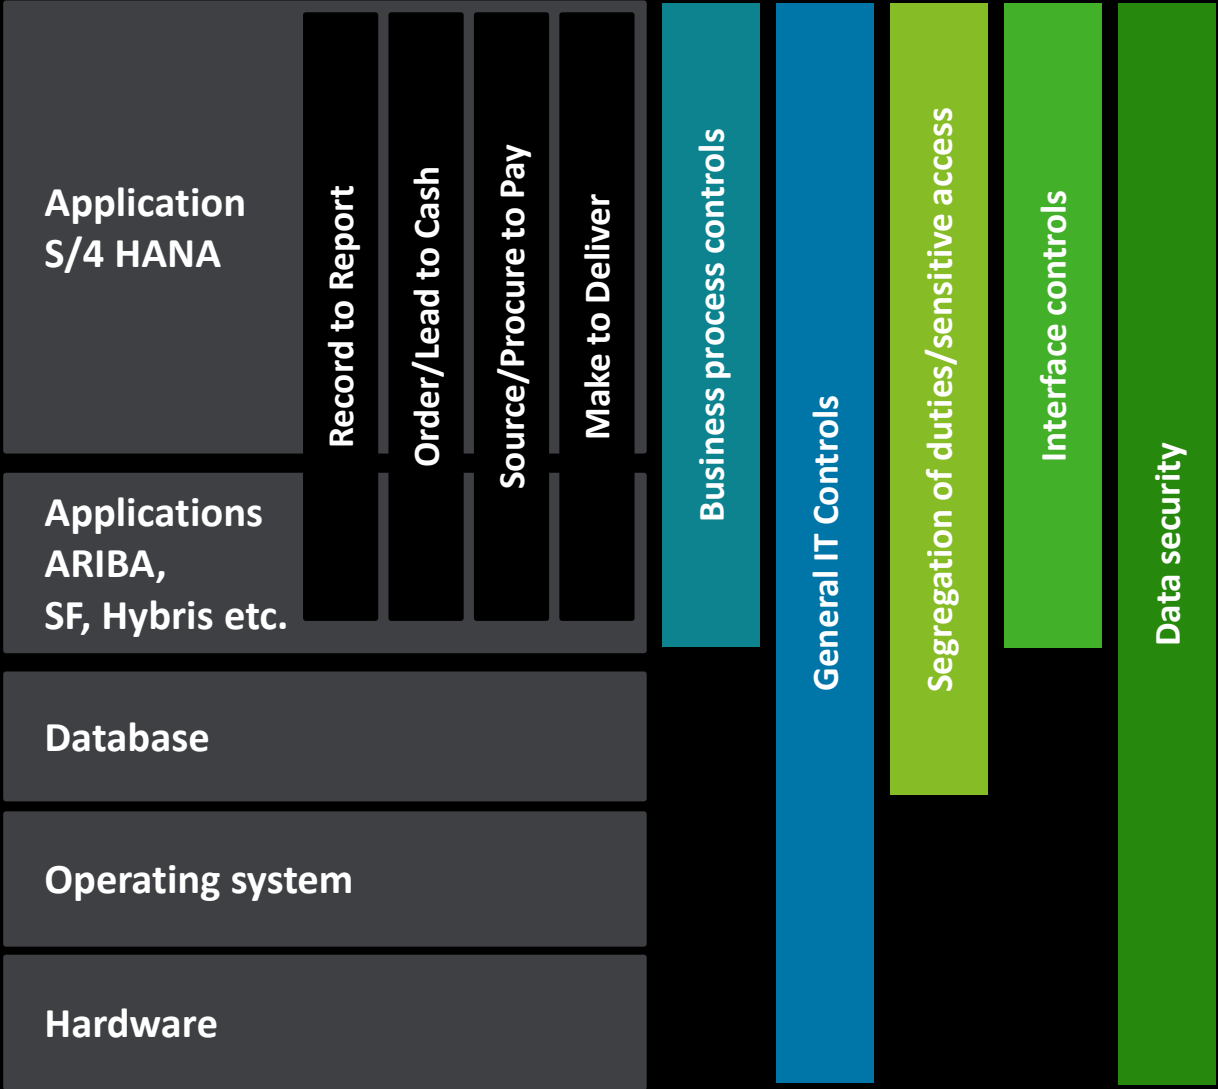

SAP S/4 HANA Risk Landscape

S4 main areas of risks related to Internal Control

S/4HANA – areas of risk and control impact

SAP S/4HANA, Dive into Internal Controls

S4/HANA Impact to IT Control Considerations

- Develop risk framework for data security considering the SaaS and cloud/on-premise model being adopted, including approach to monitoring for external threats

Expand IT controls and test procedures to include new applications like:

- HANA DB,
- System Landscape Transformation (SLT)
- Fiori (Gateway)

- Update and enhance risks to include S4/HANA functionality
- Enhance SoD ruleset to include cross system risks for Fiori

- Expand Interface controls and test procedures to include middleware applications like System Landscape Transformation (SLT) and Data Services.

SAP S/4 HANA Risk Landscape

While Security *of* the cloud is the provider's responsibility; Security *in* the cloud is the enterprise's responsibility.

Inadequate controls
responsibility and integration
with the existing enterprise

Incomplete configuration of
security

Monitoring for external threats,
identity theft, digital information
forgery, cloud service breach

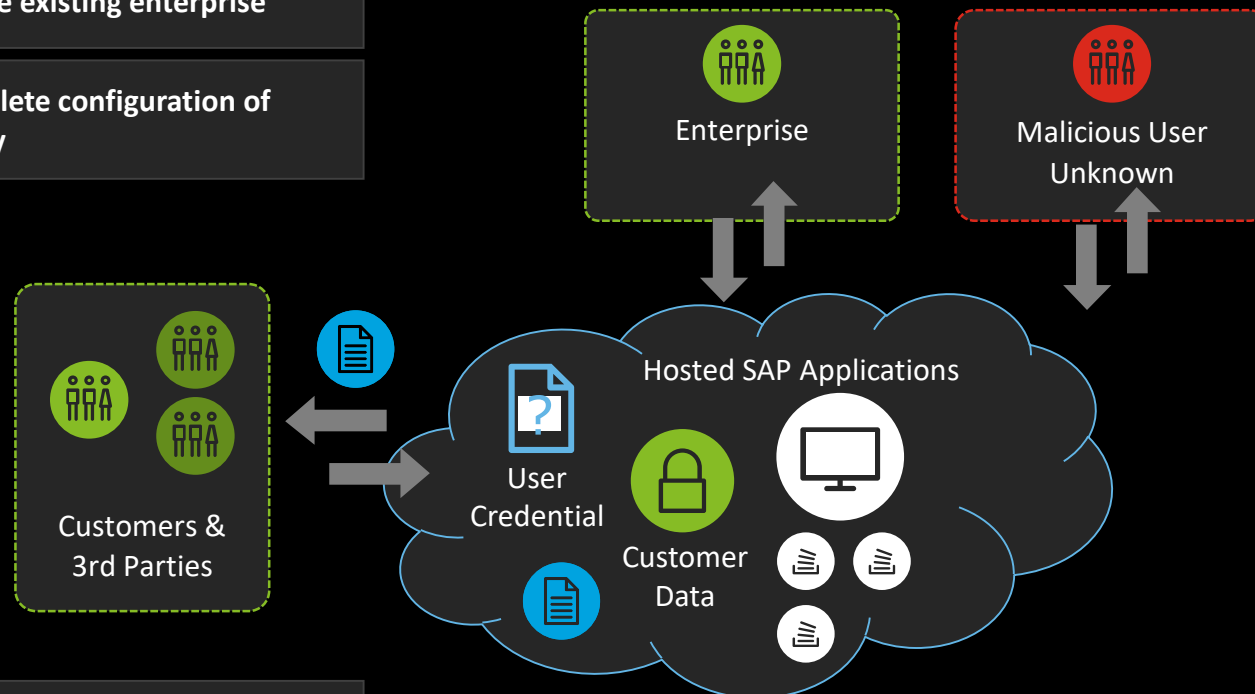

Adopt a **broad framework** to effectively
identify and
manage risks.

A **customized,**
organization-specific
cloud risk framework
should be developed to
evaluate cloud vendors.

Responsibility for sensitive data
collected over the internet

- PII (Protection of personal Identifiable Information)
- PHI (Protected Health Information)
- IP (Internet Protocol)

Requirements for regulatory
compliance, legal, and privacy to
keep up with (SOX, GDPR, etc.)

Go to www.menti.com and use the code 3416 4511

Are you using any GRC tools linked to your SAP environment?

- No
- Yes, but could be improved
- Yes

Questions

Key takeaways

Key take aways

01

The implementation of S4HANA is a great driver to achieve **increased control efficiencies**

S/4HANA in combination with GRC, Continuous Monitoring and Analytics constitute the perfect basis for **controls automation**

02

03

Eliminate, evolve, simplify, automate and **save 20-30% on your current cost of compliance and controls**

66

However, to realize benefits from Day 1 and increase the ROI on the technical implementation the only answer is **Controls by Design**

04

About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. Please see www.deloitte.com/about for a more detailed description of DTTL and its member firms.

Deloitte provides audit, tax and legal, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte has in the region of 312,000 professionals, all committed to becoming the standard of excellence.

This publication contains general information only, and none of Deloitte Touche Tohmatsu

Limited, its member firms, or their related entities (collectively, the “Deloitte Network”) is, by means of this publication, rendering professional advice or services. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser. No entity in the Deloitte Network shall be responsible for any loss whatsoever sustained by any person who relies on this publication.
