## Merge, Modernise and Harmonise SAP S4HANA – Sunrise Project Nova

*“Since the migration, all business units have increased visibility of harmonised financial flows to support their decision making. This has helped us prepare for the Sunrise spin off and relisting on the Swiss Stock Market.*

*The Go to market with aligned legacy UPC and Sunrise SCM processes has also been a key element to support our ongoing inter brand migration as we move our UPC customers to the Sunrise main brand to allow them to fully benefit from our latest portfolio.*

*At Sunrise we say dream big, do big. Nova certainly lived up to our brand promise”*

— Gary Davenport,  
Senior Director Big Data, ERP and Monetization

### Quick Stats

- Headquartered in Zurich, Switzerland
- Sunrise provides high-quality mobile, broadband and TV services and drives the three growth engines Consumer Main Brand, Flanker Brands and B2B.
- Sunrise has the largest gigabit coverage in Switzerland, with its own HFC cable network providing 2.5 Gbit/s to more than ~60% of all dwellings and businesses. At the same time, Sunrise delivers fiber-optic connections via partner networks at up to 10 Gbit/s. Last but not least, Sunrise operates an extensive world-class 5G mobile network.
- 2600 Employees (FTE) and CHF ~3 Billion Annual Revenue
- Acquired by Liberty Global and merged with UPC November 2020
- Spin off from Liberty Global and quoted on the Swiss Stock Exchange since 15 November 2024.

### The Issue

The merge of Sunrise and UPC created a need to rapidly combine and modernise the two diverse ERP landscapes.

### The Solution

At the end of 2020, Liberty Global acquired Sunrise and combined it with their existing OpCo UPC. Sunrise engaged Deloitte in a merge, modernisation and migration project to a combined SAP S4HANA landscape hosted on Google Cloud. Deloitte integrated and migrated six legacy systems onto the new platform during the Nova project. Finance, supply chain, commercial, and procurement methods are now standardised across the combined entities; and the IT landscape has been streamlined and is ready for future data and digital initiatives. The platform has already been used to prepare for the Spin Off and SIX listing of Sunrise in November 2024.

### SAP TECHNOLOGIES LEVERAGED

- SAP S4HANA
- SAP PI/XI
- SAP Ariba
- SAP Concur
- SAP BW4HANA
- SAP Group Reporting
- SAP GRC
- SAP Analytics Cloud

### The Impact

-  Harmonised legacy processes with the Nova ways of working.
-  Data and processes harmonised across the merged businesses to release synergies.
-  Simplified system landscape, reduced by half
-  Best-in-class technology underpinned by a single and scalable ERP backbone on cloud
-  At the forefront of Sunrise’s digital modernization initiative and move to the cloud
