

Cyber Operate by Deloitte Switzerland

Deloitte's Cyber Operate solutions provide end-to-end cyber capabilities tailored to meet our clients' unique needs—empowering their businesses to stay secure, resilient, and cost-efficient in today's dynamic threat landscape

Enhance Your Security Posture

With today's fast-evolving cyber threat landscape, leading businesses invest heavily in security resources and technology. Yet many struggle to keep up. Challenges with integrating security tools into existing systems and processes are compounded by a widening cybersecurity skills gap and a high industry turnover rate. This leaves many organizations with a fragmented, inefficient security architecture, which exposes them to elevated security risk, along with surging annual costs just to maintain the program.

In an era of reduced budgets and increased financial scrutiny, security teams now face two competing, daunting objectives: *How do I effectively protect the business, all while lowering my operating costs to meet reduced budget requirements?* Deloitte's Cyber Operate delivery model can help. The delivery model embeds dedicated, highly-skilled cyber resources from Deloitte under your leadership and into the fabric of your existing cyber team, augmenting your team to operate custom-defined segment of your cyber operations, and deliver improved outcomes for your cyber risk program.

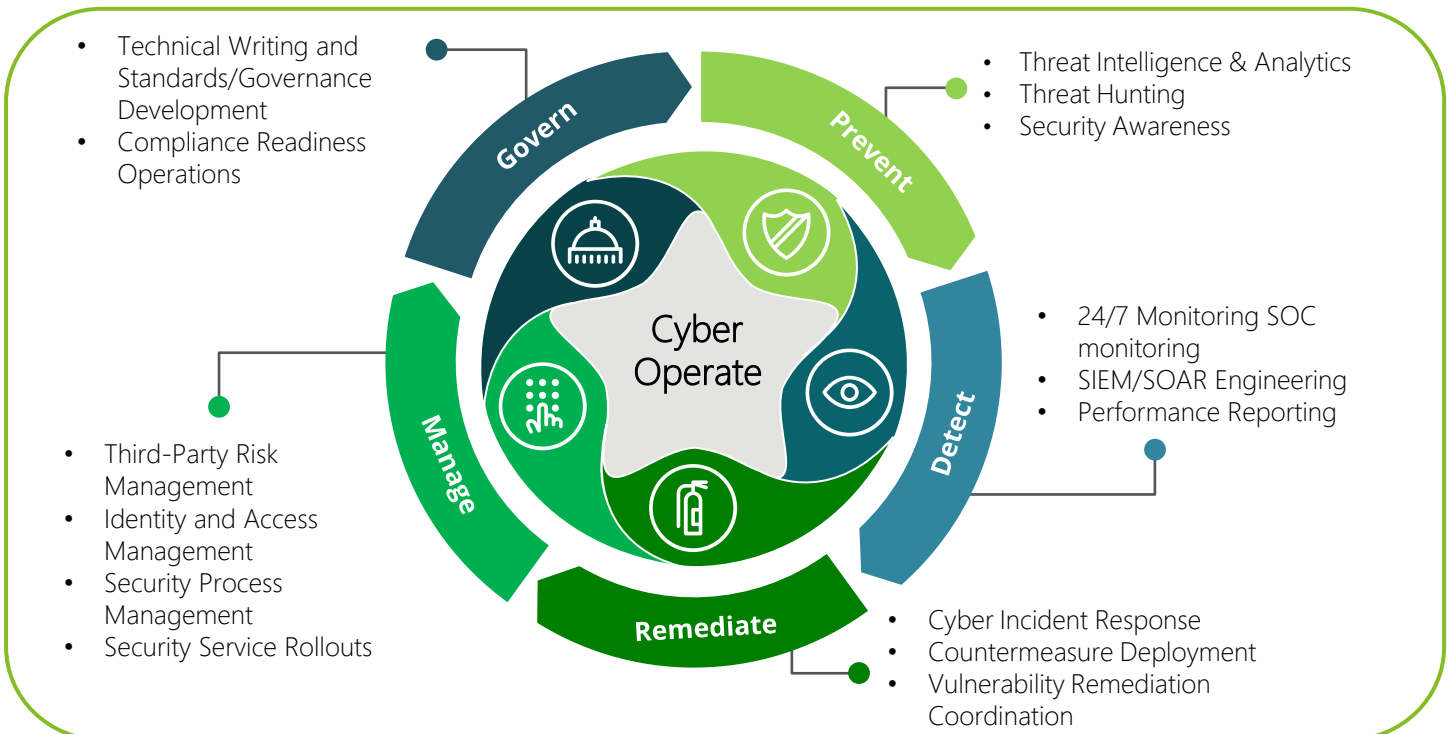

Manage Cyber Talent Risks

Reduce Operational Cost

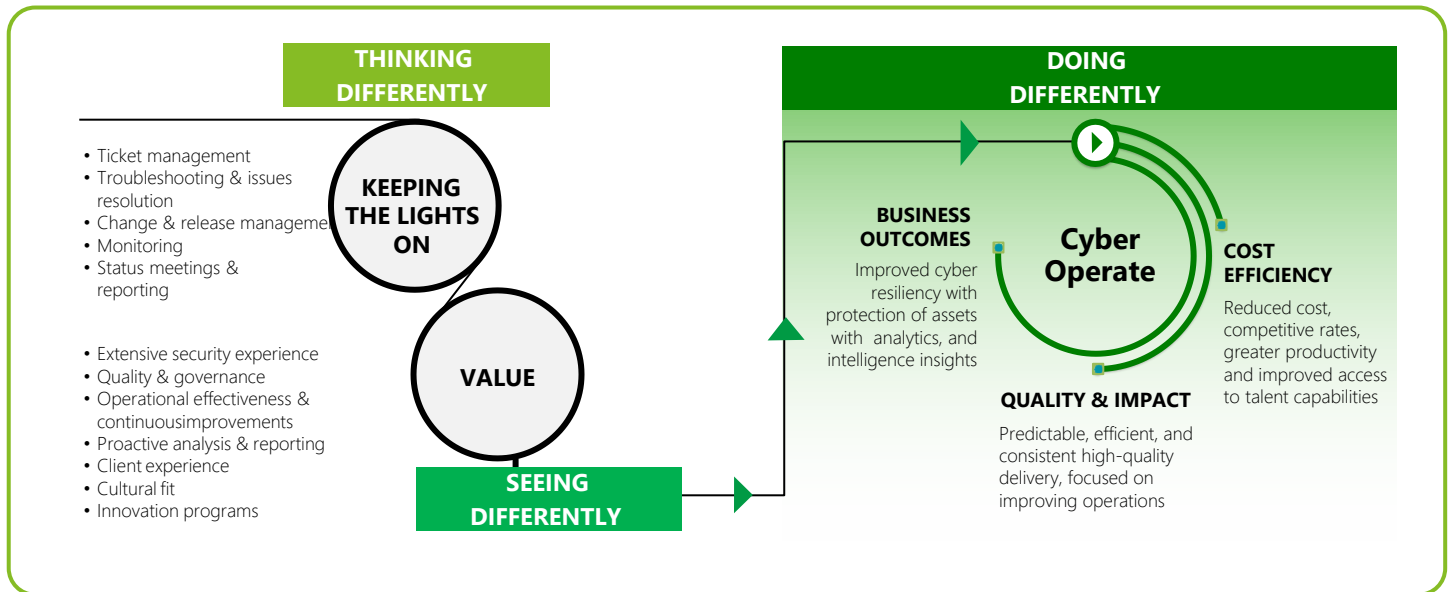

Cyber Operate enhances your security posture, mitigate cyber talent risk and reduce operational costs, while delivering your required security and business outcomes. Continuous innovation is at the heart of our approach, designed to transform your cybersecurity program into a leader among your peers, through the adoption of new technologies, cost leadership, domain experience, defensive strategies and industry knowledge. And with Deloitte responsible for the day-to-day security operations environment, your existing security team now has the time to focus more on strategic objectives.

In conclusion, Cyber Operate offers a solution to address the challenges faced by businesses in the cyber age. By enhancing your security posture, managing cyber talent risk, and optimizing security operations costs, organizations can safeguard against cyber threats, thrive in the digital landscape, and pave the way for a more secure, efficient, and resilient future.

How can Cyber Operate help you address everyday challenges?

Cyber Operate not only delivers consistent service level performance with your security operations, but also fosters a culture of adding value through innovation, continuously seeking opportunities for improvement across many operational areas. This dual approach leads to better business outcomes, enhancing the effectiveness of your security program while decreasing your costs.

Key benefits:

- 
Cost optimization
 Deloitte helps you manage your costs and augment value by leveraging our industry experience, accelerators and skilled resources through continuous process improvements, enhanced productivity and innovations.
- 
Mature cyber capabilities
 Deloitte provides customizable, end-to-end operate services, around the clock across many cyber domains to strengthen and transform existing capabilities.
- 
Skilled workforce availability
 Deloitte provides specialized talent of 5000+ professionals with in-depth knowledge across many cyber domains, driving continuous innovation and improvements.
- 
Adaptive technology approach
 Deloitte continuously evolves your cybersecurity program by continuous adoption of new technologies, cost leadership, defensive strategies to position you as a leader over your peers.
- 
Vigilant regulatory surveillance
 Deloitte enables maintenance of regulatory compliance through risk-based controls that proactively adhere to change set forth by in-scope regulatory agencies, laws or authority groups.

"How can I reduce operational cost without reducing the effectiveness of my security posture?"

"Are we effectively addressing security risk for an organization of our size and industry?"

"How can I reduce talent risk to recruit and retain essential, specialized security professionals?"

"Is my cyber program performing at the desired level of maturity of my industry peers?"

"Are we innovating to proactively defend against and stay ahead of evolving threats?"
