#### Global minimum tax: Top-up tax levied on low-taxed operations

Understanding the implications of the new Global Minimum Tax ("GloBE") rules, including the Qualified Domestic Minimum Top-up Tax ("QDMTT"), is essential for automotive industry players. Coming into effect in 2024 for Central European jurisdictions, this informative article covers the requirements for multinational and domestic groups with significant revenues, detailing how sector-specific tax incentives and local taxes influence the effective tax rate (ETR). Learn about strategies for mitigating potential top-up tax obligations, the benefits of the Substance-Based Income Exclusion (SBIE), and the temporary transitional safe harbour relief available for easing compliance.

#### 2025 Global Automotive Consumer Study

Get ready for an insightful journey into the evolving world of automotive consumer behavior with our "2025 Global Automotive Consumer Study." This comprehensive study highlights how consumers' preferences and expectations are transforming the automotive landscape across major global markets. Discover why electric vehicle (EV) adoption is facing new challenges, how software-defined vehicles are reshaping the industry, and why brand loyalty is becoming crucial as new competitors emerge. Amidst rising vehicle costs and supply chain disruptions, we'll explore the growing interest in mobility-as-a-service (MaaS) and autonomous vehicles. Learn about regional trends in vehicle electrification, connectivity preferences, and the shift towards MaaS solutions. Dive deeper into these findings by accessing our interactive dashboard and stay ahead of the curve in the dynamic automotive market.
