

## IBM ILMT – TOOL TRAINING

### Get to know the basics for the IBM License Metric Tool (ILMT).

The Deloitte SAM Academy provides a comprehensive training program for all key activities relating to Software Asset and License Management (SAM). The content of the SAM Academy has evolved from Deloitte's long-term SAM experience in diverse customer projects and covers the entire software lifecycle. We offer impartial guidance and training independent of any software vendor or tool provider.

Find out in this training course the main aspects about the IBM License Metric Tool (ILMT). The licensing model and contractual requirements of the software manufacturer IBM keep companies in motion. However, these licensing models are changing, and in addition to the change, companies have to look at the IBM License Metric Tool (ILMT). The installation is urgently necessary if companies only want to license the sub-capacity of their infrastructure.

#### I. Why ILMT?

- Overview of the sub-capacity licensing of IBM
- Introduction to IBM contract documents
- Requirements of IBM to use the sub-capacity licensing and fulfilment of LMOs

#### II. How does the ILMT tool work?

- Working method of ILMT
- Technology and system requirements
- Handling of hardware and software inventory

#### III. Integration of ILMT in company structures

- ILMT architecture
- Procedural requirement to ensure the fulfillment of requirements of sub-capacity licensing of ILMT
- Usage and expenses

#### IV. Evaluation of the ILMT results

- Types of reports
- Review of the hardware and software inventory
- Classification and integration of ILMT into the existing SAM tool landscape

The training addresses license and asset managers, system administrators and data center managers in companies that use IBM software and would like to optimize the IBM software usage. IBM license experience is required.
