

Cyber Incident Response Team (CIRT)

Cyber Incident Response

Organizations are facing several incidents on a daily basis. Not all of them are critical, but all of them must be analysed and remediated. CIRT service will ensure end-to-end management of cyber security incident in your environment on daily basis.

Key benefits

END-TO-END PROCESS TO MANAGE CYBER INCIDENTS

When cyber incidents are becoming more and more complex, there is no single party who could resolve incidents alone. The modern effective incident response requires coordination, and our service is designed to take end-to-end responsibility to run the process.

ADVANCED INCIDENT RESPONSE

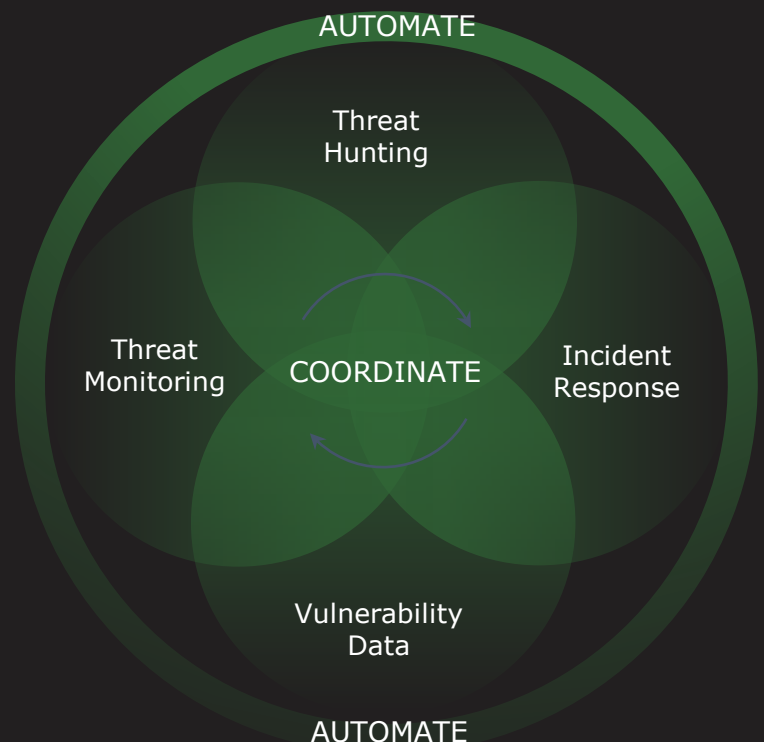

Our incident responders work as part of your team. This allows them to have the best possible business and context information, which is needed while responding to modern threats.

ACCESS TO VARIETY OF SKILL PROFILES

While our service provides dedicated or designated responders for you, you will also have access to Deloitte’s global pool of experts via the service. This allows you have point-in-time skills as needed.

Deloitte’s Cyber Incident Response Team service is designed to ensure end-to-end management of cyber security incidents on a daily basis. Incident responders are working as part your team and they are utilizing the available capabilities of your current environment.

Cyber Incident Response Team (CIRT)

Our incident responders can combine the threat and vulnerability information monitoring, threat hunting, and incident response to single loop; they manage incidents by coordinating the required activities between different stakeholders and remediating the incidents using existing tools and processes and develop the automation.

We provide flexible and cost-effective methods to have the right skills at the right place at the right time. This allows you to decide what are the right talents you want to keep in-house and which areas you want to outsource.

In addition, when you are using our designated resources, they have experience from multiple environments which will bring wider threat landscape knowledge also to your organization.
