Deloitte.

Actuarial Modelling Centre (AMC)

The Deloitte Actuarial Modelling Centre (AMC) is our centre of excellence for actuarial modelling, data warehousing and business intelligence solutions. The AMC formalises the Deloitte approach to actuarial modelling where we are recognised as a market leader.

What does AMC do?

- Specialist resources to support modelling needs
- Outsourcing and offshore modelling services
- Data management and processing services
- Developing target operating models
- Business Intelligence Solutions
- Training/Onboarding of BAU resources

Delivery models

Onshore models – leverage local modellers with local market insights and knowledge

Offshore models – leverage the wider AMC pool of resources with very competitive rates vs day rate contractors

Blended models – very attractive for larger projects which require local engagement but benefits from offshore rates

The results

Solutions which can be tailored to once-off projects or long-term modelling support.

Flexibility to increase or decrease your modelling resources as required with a trusted partner.

Reduced time spent sourcing and onboarding contractors. Our global network allows us access to an experienced and skilled workforce.

Utilising offshore resources ensures competitive price points.
