NVIDIA & Deloitte
solving tomorrow's challenges by accelerating AI innovation

NVIDIA and Deloitte Help Our Clients Disrupt with AI

NVIDIA. | Deloitte.

LEADERSHIP

"Enterprises everywhere are looking to generative AI to transform their business. We are deepening our strategic alliance with Deloitte by combining NVIDIA's generative AI technologies with their extensive industry expertise and service offerings, which will provide enterprises a faster route to adoption."

Jensen Huang, Founder and CEO of NVIDIA

WHY WE'RE GREAT TOGETHER

Deloitte and NVIDIA can help you seize opportunities only enabled through an accelerated AI platform. Our alliance allows us to help organizations access market-leading accelerated computing power and create deep learning models that can deliver new capabilities, value, and a competitive advantage.

DELOITTE DIFFERENCE

#1 Consistently recognized as a global market leader in AI

10K Dedicated professionals for AI services WW

1K NVIDIA trained practitioners

Deloitte Center for AI Computing
dedicated to accelerating co-innovation with clients

PRIVELEGED PARTNERSHIP

Deloitte named Consulting Partner of the Year
3 consecutive years

NVIDIA powers...
8 of the top 10 and **2/3 of the top 500 supercomputers in the world**

Deloitte AI COE - develop AI strategy and Center of Excellence creating immediate developments to shift market position

NVIDIA supported solution design - ideate AI solutions with client to ensure optimal output based on AI platform

INDUSTRY SOLUTIONS

HEALTHCARE
Clinical Surveillance
Operational Surveillance
Next Gen Electronic Health Records

LIFE SCIENCES
AI-driven tool to transform Structure Based Drug Discovery

AUTOMOTIVE
Synthetic Data   Replay
Data Pipeline   Cyber
High Performance   Op Scale-up

MARKET SOLUTIONS

QUARTZ AI™ SUITE POWERED BY NVIDIA

Generative AI
Large Language Models on Nemo Megatron

Compass AI™
Route optimization on CuOpt

Frontline AI™
Avatar and digital Agent on TOKKIO

Cyber Security AI*
Cyber security on Morpheus

UNLIMITED REALITY™
Enterprise Sim with Omniverse

DGX CLOUD & MSP
Hybrid HPC Platform

Become an AI-Fueled Organization
Deloitte Quartz AI™ Suite powered by NVIDIA

Game-changing AI capabilities are enabling deeper insights that can unlock greater business value.
Using the NVIDIA accelerated AI platform, Deloitte is innovating with clients to build next-generation AI solutions that open new frontiers in the marketplace and enhance business streams so your enterprise can thrive.

Deloitte's comprehensive capabilities for scaling AI and Analytics

Full-stack service	Large talent pool	Industry leadership	Strategy and insights

- Deep Learning
- Insights & Visualization
- Advanced Analytics
- ML Models
- ML Deployment
- MLOps

Market Solutions and Services

- Generative AI Practice
- Enterprise Simulation
- Unlimited Reality
- Autonomous Vehicles
- Deloitte Center for AI Compute
- DGX Managed Services

Quartz AI™ Suite

Generative AI
Enhance user experience by leveraging LLMs that produce content based on user prompts

Compass AI™
Optimize service routes and increase how many customers you can serve

Frontline AI™
Advance automated user engagements through avatars and digital agents

Cyber Security AI
Augment your security practice with AI-driven threat response and detection

NVIDIA Accelerated AI Computing Platform and Software

NVIDIA | Deloitte.

Accelerate Move from Concept to Scale

Align and Integrate AI Across the Business

Create a Culture of Trust Around AI

Achieve High Performance for AI/ML

Minimize Risk Related to AI Rollouts

Deloitte Expands Strategic Alliance with NVIDIA to Unlock Value of Generative AI Across Enterprise Software Platforms
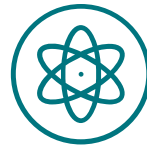

Activating and accelerating AI has never been so easy

The Deloitte and NVIDIA Alliance helps organizations access market-leading accelerated computing power and create deep learning models that can deliver new capabilities, value, and competitive advantage.

Preferred partnership

Deloitte is **NVIDIA's Consulting Partner of the Yea**r for the 3rd consecutive time, empowering priority client access to industry-focused services, IP innovation, and leading commercial terms.

Full-stack service

Offerings include data management, MLOps, and platform administration and optimization services.

Large talent pool

Deloitte has a scaled practice of **AI and data** professionals more than **10,000 strong**.

Industry leadership

Deloitte has deep industry expertise to focus AI on the right challenges with meaningful, measurable results.

Strategy and insights

Deloitte's approach helps organizations envision ways AI can generate value, transform the tech architecture, evolve the workforce, and create trust.

Accelerate AI innovation with NVIDIA and Deloitte

With the AI capabilities of NVIDIA paired with Deloitte's unrivaled domain and industry expertise, we are setting the standard in the market on how to imagine a new customer experience and unparalleled operational efficiency.
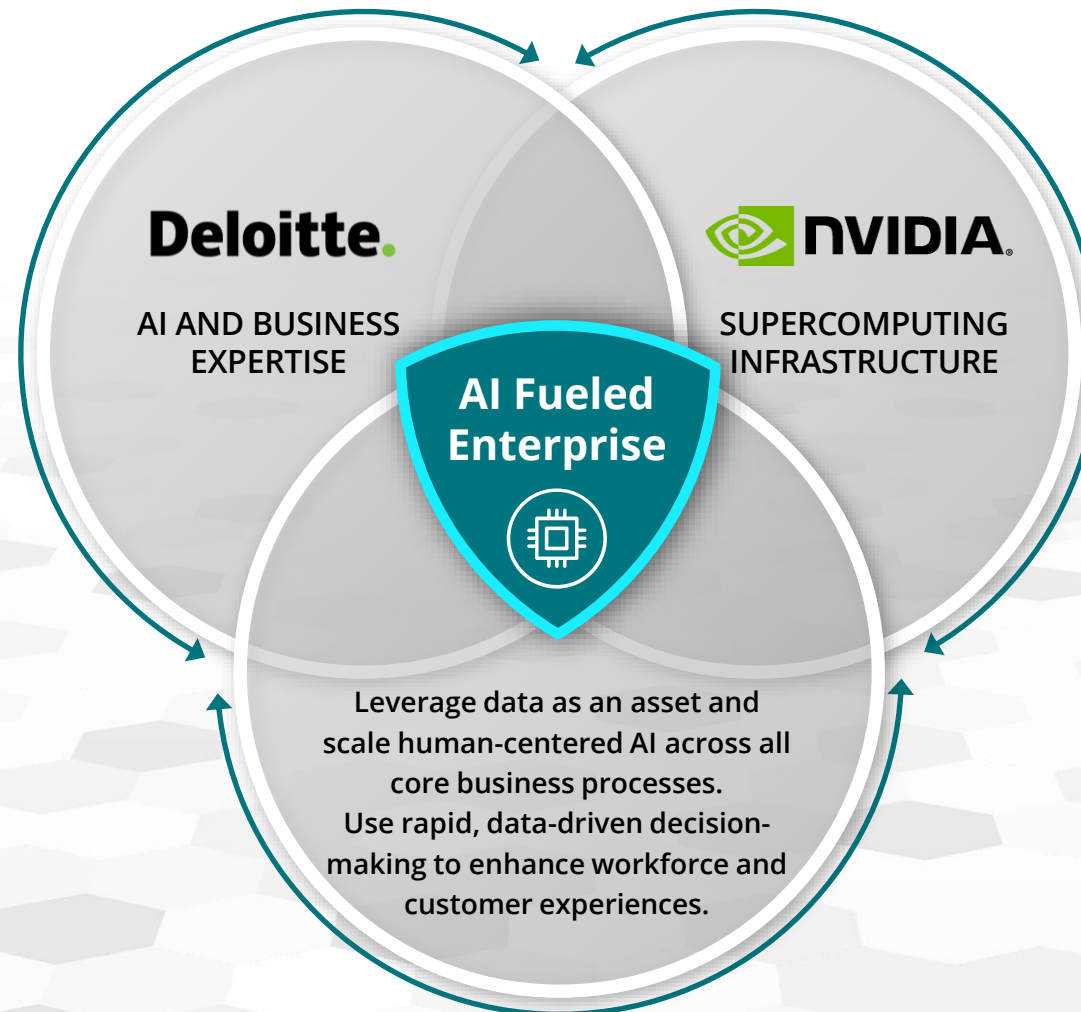

- **Business and Strategy Expertise:** Sector and domain expertise with **an account and insight-led strategy** that drives large scale business transformation.

- **AI Talent and Scale:** Breadth and depth of industry expertise in the application of AI and data science. **2,000+ data scientist practitioners with 250+ NVIDIA GPU-certified** and growing

- **Intellectual Property** The **Deloitte Center for AI Computing** underpinned by Trustworthy AI Framework and assets across domain, industry, ML Models

Deloitte.

AI AND BUSINESS EXPERTISE

NVIDIA.

SUPERCOMPUTING INFRASTRUCTURE

AI Fueled Enterprise

Leverage data as an asset and scale human-centered AI across all core business processes. Use rapid, data-driven decision-making to enhance workforce and customer experiences.

- **Platform**: **AI Hardware and Supercomputing infrastructure**

- **Expertise:** **GPU, Omniverse,** DGX and NVAI Enterprise. NVIDIA is the leader in full stack AI solutions from systems, cards, AI software, and AI skills.

- **Solution Accelerators**: Pre-trained **ML Models and Scripts** and a vast Industry Solutions Catalogue

- **Market position**: Leading market solutions for today's emerging challenges. **Strong AI brand power** to align with longstanding leadership of Deloitte.

Industry Applications

Financial back office of the future

Deloitte and NVIDIA have automated and enhanced critical financial services processes, such as fraud detection, payment processing, cash reconciliation, underwriting, and claims management, to alleviate labor-intensive work with fewer errors. Our solutions have also enhanced chatbots and interactive voice response systems with AI applications to improve the quality of automated customer interactions.
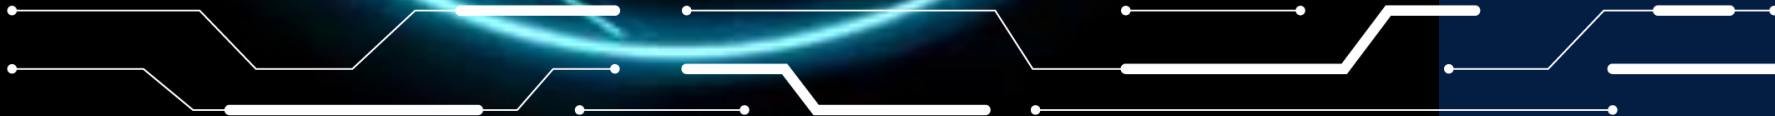

Insurance claims processing and validation

Deloitte and NVIDIA help insurance firms drive faster and more effective claim decisions by using AI to automate the claims settlement process without compromising the security that various levels of authentication provide. Insurance companies can drastically cut down the number of fraudulent claims and provide loyal customers with fast claims support.

Autonomous vehicles

Autonomous vehicles are transforming a purely physical experience into one that is becoming an always-on extension of people's lives, complete with an ever-expanding set of user experiences. Deloitte and NVIDIA have fused software design and advanced connectivity to bring autonomous operation of both goods and people to reality.

Virtual drug discovery

Deloitte and NVIDIA have enabled and accelerated the creation of new prescription drugs. A virtual lab combines AI, quantum physics, and cloud computing with a molecule database to create a Digital Twin for simulating the activity of potential new drugs.

Software-defined smart grid

Utilities and energy providers can rapidly process information to inform decisions on the energy grid. Deloitte and NVIDIA offer AI deep-learning systems to stream, collect, and analyze data akin to human analysis but faster.
