

Still struggling with manual reports, countless source files and time-consuming reporting? | Let explore manual reporting automation

DELOITTE IS HERE TO HELP – THIS IS HOW:

- **Assess Selected Manual Reporting Process:** we analyze selected manual reporting process of the client to understand data used, process followed and output needed

- **Set Up Automated Reporting in Deloitte Tools:** in Deloitte reporting tools we set up automated preparation process of the client selected report, which includes establishing a consistent, standardized data collection format & process, report preparation process, output checking and submission to client

- **Data Control Checks Implementation:** automated data quality controls and detection of errors is set up, confirmed by the client and tested for proper future reporting

- **Automated Reporting Go Life:** based on the agreed regularity and timeline we get data from client and prepare regular reports fast, efficiently with automated data validation and error detection.

KEY BENEFITS:

- **Save Time:** automated processes reduce the time you spend on manual report preparation
- **Increase Accuracy:** standardized data collection and automated checks ensure your reports are accurate and reliable
- **Enhance Security:** your data is handled securely at every step
- **Boost Efficiency:** regular, automatic report generation frees up your time for more important tasks

Do not worry about manual reporting anymore
