Islamic financial advisory services Business Process Solutions in the Middle East

The Shari'ah governance, risk and compliance are fundamentally key practice aspects of the success and operational excellence in the Islamic finance industry. Implementing Shari'ah governance have become a mandatory requirement for Institutions offering Islamic Financial Services (IIFSs), which is aimed at enhancing Shari'ah compliance practices and providing confidence to industry stakeholders.

Institutions offering Islamic Financial Services (IIFSs) today are facing a rapidly-evolving landscape from regulatory changes, continued advances in fintech, and the adoption of more sophisticated approaches by regulators and central banks. As a result, IIFSs need confidence that they have the appropriate mix of in-house and external resources to manage essential operational processes with efficiency, flexibility, transparency, and control.

Deloitte has developed innovative Shari'ah advisory offerings that have been designed carefully to address the current and emerging issues of the Islamic finance industry.
