

Deloitte Cyber Awareness Training

Training of employees to protect
the company against cybercrime

Companies are under constant attack from IT criminals

Phishing mails, ransomware, hacking data theft have become a part of our everyday lives and something we have to deal with.

The new EU legislation also requires that employees are trained, informed and taught the relatively simple rules, which can minimize the risk of compromising an organization's IT systems and loss of information assets.

Employee training in a new way

Employee training in a new way Deloitte Cyber Awareness Training is effective employee training, which makes it simple and easy to learn about information security in an exciting way. The training consists of an e-learning portal and a series of focus elements in the form of a pixi book on information security, posters, stickers and much more. The company decides which focus elements to include in the training in order to create awareness. We provide a design ready for press, so that you can print, press or put together your own focus elements.

Cost-saving

Cyber Awareness Training is cost-saving to the company. The employees do not have to gather to receive training. They can train when it fits into their program and when they have access to the awareness portal from their computers, smartphones or tablets 24 hours a day. The awareness portal is cloud-based, and training takes place via a browser. Thus, no investments in hardware and software are required to get started.

Simple and effective

Cyber Awareness Training has no Power-Point slides and long complicated questionnaires - but an intuitive e-learning portal with videos and tests, where everyone can participate. The training is divided into small video clips of 2-3 minutes each and a subsequent test, so that the employees can

train when it fits into their program.

It's all about motivation

When the employees have completed the training and all of the tests, they will receive a diploma. This documents their recently acquired knowledge of IT security. In addition, they may also use what they have learned personally. This creates motivation and awareness.

Get ready for the new EU general data protection regulation (GDPR)

The new EU general data protection regulation enters into force in May 2018. This requires i.a. that employees enhance their competences within information security. Cyber Awareness Training helps enhance the competence of all employees in an easy and efficient way, so that the company already now can prepare for the new general data protection regulation and document that its employees have received training.

Follow the employees' development

Cyber Awareness Training has an administration module just as easy to use as the training. Here you can put together and arrange training, create and shut down users and follow the progress in the program. You can divide the employees into groups by the use of tags and get specific statistics on the groups. In the module, you can also choose language for the individual employees.

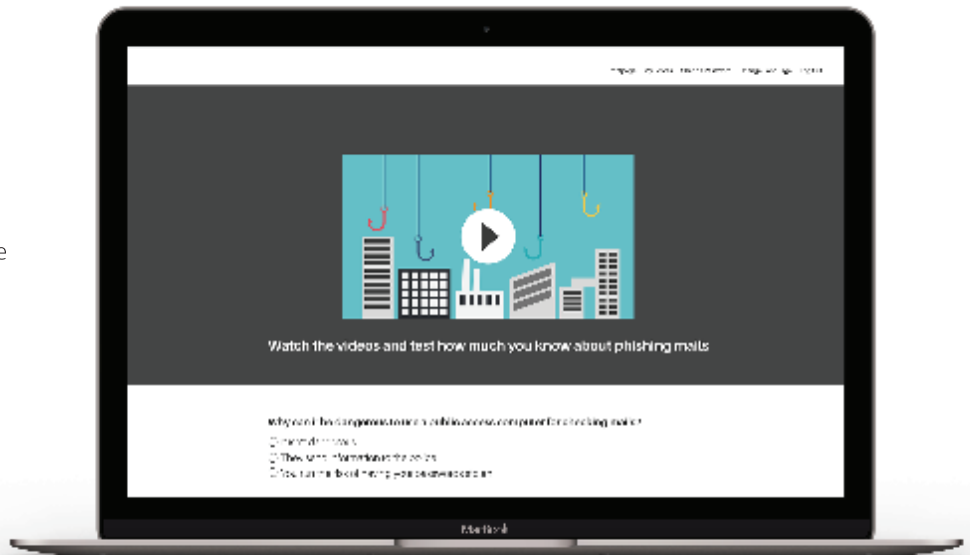

Learning across borders

The awareness portal is offered in multiple languages, so that learning can take place across national borders. The employees are created with the language chosen by the company, but can subsequently switch to a different language by themselves. This provides extra flexibility and makes it easy for the employee of make his/her own choices.

Developed by specialists

Cyber Awareness Training has been developed in cooperation with specialists in the field of IT security, communications and marketing. This produces the best result.

We develop the training continuously The threat picture of IT security is constantly changing. Therefore, we continuously adapt the Cyber Awareness Training with new training videos and tests, so that the employees will be kept updated. The themes are i.a.: "At work", "Social Engineering", "Mobile devices", "Phishing mails", "safe surfing", "Passwords", "Social media", etc.

Deloitte Cyber Awareness Training is effective employee training, which makes it simple and easy to learn about IT security in an exciting way.

Training videos

Inspirational training videos about IT security at a level, where everyone can participate. 2-3 minutes' duration

Tests

An intuitive test after each training video, which shows that the employees have understood the message

Diploma

A proof that the employees have reached the goal and implemented training in IT security

Creative marketing kit

consisting of files ready for press for i.a. posters, mouse pads, roll-ups, mugs, etc. The only limit is your imagination

Administration module

Manage yourself when to send out the videos to the employees

Statistics

Get an overview and statistics of momentum in your campaign

You will get access to your own e-learning portal as well as a marketing kit in the form of files ready for press for i.a. posters, roll-ups, pixi books, stickers, etc.
