

# CBAM Exporter Portal

Our automated solution

**Deloitte.**

Do you export any of the following goods to customers in the EU?

- **Iron and Steel**
- **Cement**
- **Hydrogen**
- **Aluminum**
- **Fertilizers**
- **Electricity**
- **Certain precursors and downstream products**

If yes, your EU customers must report their purchases from you under the **EU Carbon Border Adjustment Mechanism (CBAM)**

As a result, you may receive requests for **complex emissions and manufacturing datasets** from your EU customers.

Our CBAM Exporter Portal supports you with CBAM data requests to ensure an **efficient process** and **EU customer satisfaction**.

## The CBAM Exporter Portal capabilities:

Automatically **collates, prepares and shares CBAM Data Reports** with your EU customers,

Standardized **simplified emissions reporting and communication and process management controls** that enables you to securely provide CBAM data and documentation **to your EU customers**

**Built-in smart questioning** to complete the official CBAM communication template for emission calculations in a simplified manner.

**Multi-language explanation** boxes to guide the user through the CBAM emission calculation methodology.

**Automated direct and indirect emission allocation** to exports made to the EU

**Video and training materials** to **support the automated completion** of the CBAM communication template for emission calculations.

## How it works? The solution:

Can run **stand-alone** or as part of a complete customs management system implementation or **existing ERP system**.

Allows you, as the exporter to **seamlessly provide your emissions data**, and if needed, to **solicit emissions data from your own suppliers**

Allows your EU customer to efficiently **collate, prepare, and report** CBAM data.

**Always up-to-date** with the CBAM reporting model and content (**including any legislative changes**) maintained by Deloitte

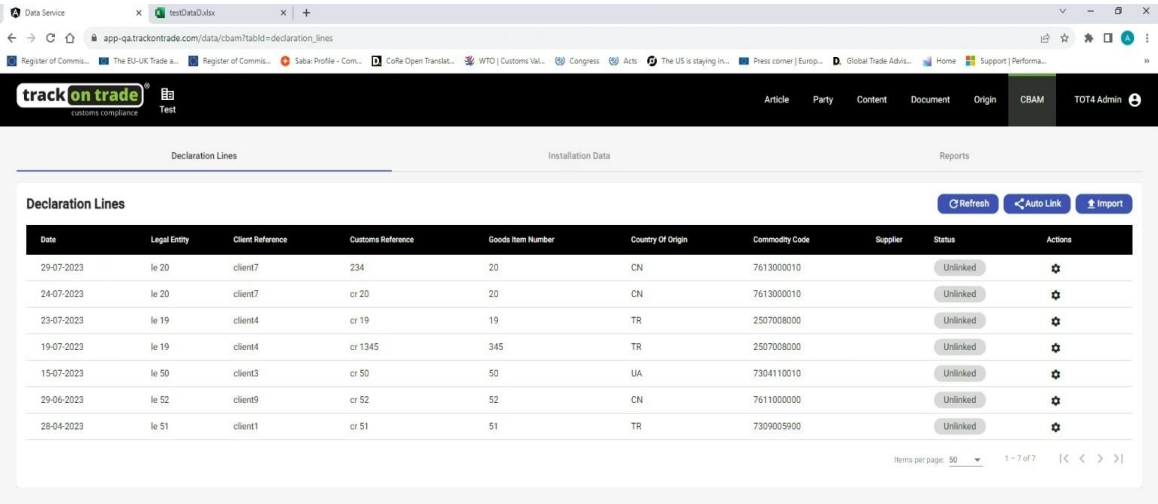

# CBAM Exporter Portal

The CBAM Exporter Portal is based on Deloitte’s **TrackonTrade** software and allows non-EU suppliers and exporters to share essential emissions data with their EU customers in a timely, effective, and secure manner.

The **CBAM Exporter Portal** is a **digital solution** that:

-  Automates and simplifies the reporting of embedded emissions in manufactured goods for non-EU exporters
-  Facilitates data sharing with EU customers by enabling exporters to provide relevant CBAM product-level emission data
-  Assists EU customers to accurately report the embedded emissions contained in imported CBAM goods.

The screenshot shows the 'Declaration Lines' section of the CBAM Exporter Portal. It features a table with columns: Date, Legal Entity, Client Reference, Customs Reference, Goods Item Number, Country Of Origin, Commodity Code, Supplier, Status, and Actions. The table contains 7 rows of data. Above the table are buttons for 'Refresh', 'Auto Link', and 'Import'. Below the table is a pagination bar showing 'Items per page: 50' and '1 - 7 of 7'.

Date	Legal Entity	Client Reference	Customs Reference	Goods Item Number	Country Of Origin	Commodity Code	Supplier	Status	Actions

## Value of the CBAM Exporter Portal to **non-EU exporters**

-  **Simplified reporting** of embedded emissions generated from your manufacturing facilities/installations saving you time and money and enabling you to support your EU customers.
-  **Efficient data processing** through the automatic allocation of emissions data to each of your exports to EU customers
-  **Enhanced competitive advantage** is achieved through the streamlined communication of relevant CBAM data via the CBAM Exporter Portal to your EU customers, assisting them to comply with their CBAM reporting obligations. By offering accurate, timely, and well-organised emission values, you can effectively demonstrate your value as a trusted supplier and secure a competitive edge over non-EU exporters of CBAM products.
-  **Reduced risk** of incorrect emissions reported by your customers, and audits by EU authorities.
-  **Your data is protected** through Deloitte’s systems. This ensures that all emissions data is provided securely and handled in accordance with best practice data protection principles.
