

## INTEGRATE THEN INNOVATE

### ACCELERATING BUSINESS OUTCOMES WITH APPLICATION NETWORKS

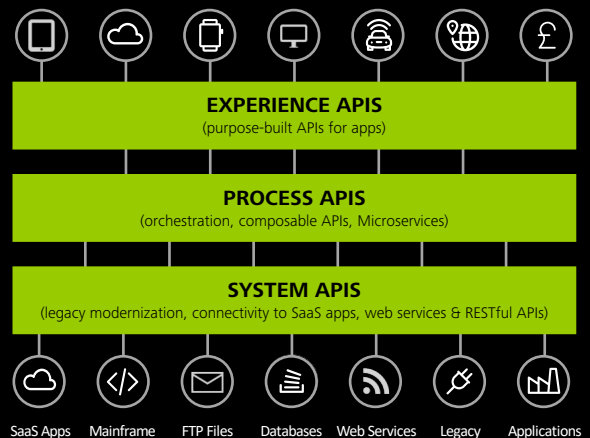

The transition to an API-led enterprise requires IT organisations to understand how connections to applications, data and devices affect the everyday life of customers, employees, and suppliers. To become a flexible API-led enterprise requires a systematic and holistic re-orchestration of technology and a shift in the wider business operating model to allow organisations to address new threats and opportunities found in the many disruptors of our day.

Together MuleSoft and Deloitte help empower our clients to reimagine how they connect and engage with their customers, and start thinking about their digital strategy through the lens of their corporate strategy.

#### MuleSoft AnyPoint Platform™ solves the most challenging connectivity problems across SOA, SaaS and APIs

A unified, highly productive, hybrid integration platform that creates a seamless application network of apps, data, and devices with API-led connectivity:

- Turn IT assets into reusable, self service building blocks to automate business processes
- Rapidly build new products and services
- Reuse connectivity assets as your consumer or market demands change

#### Deloitte's MuleSoft Practice

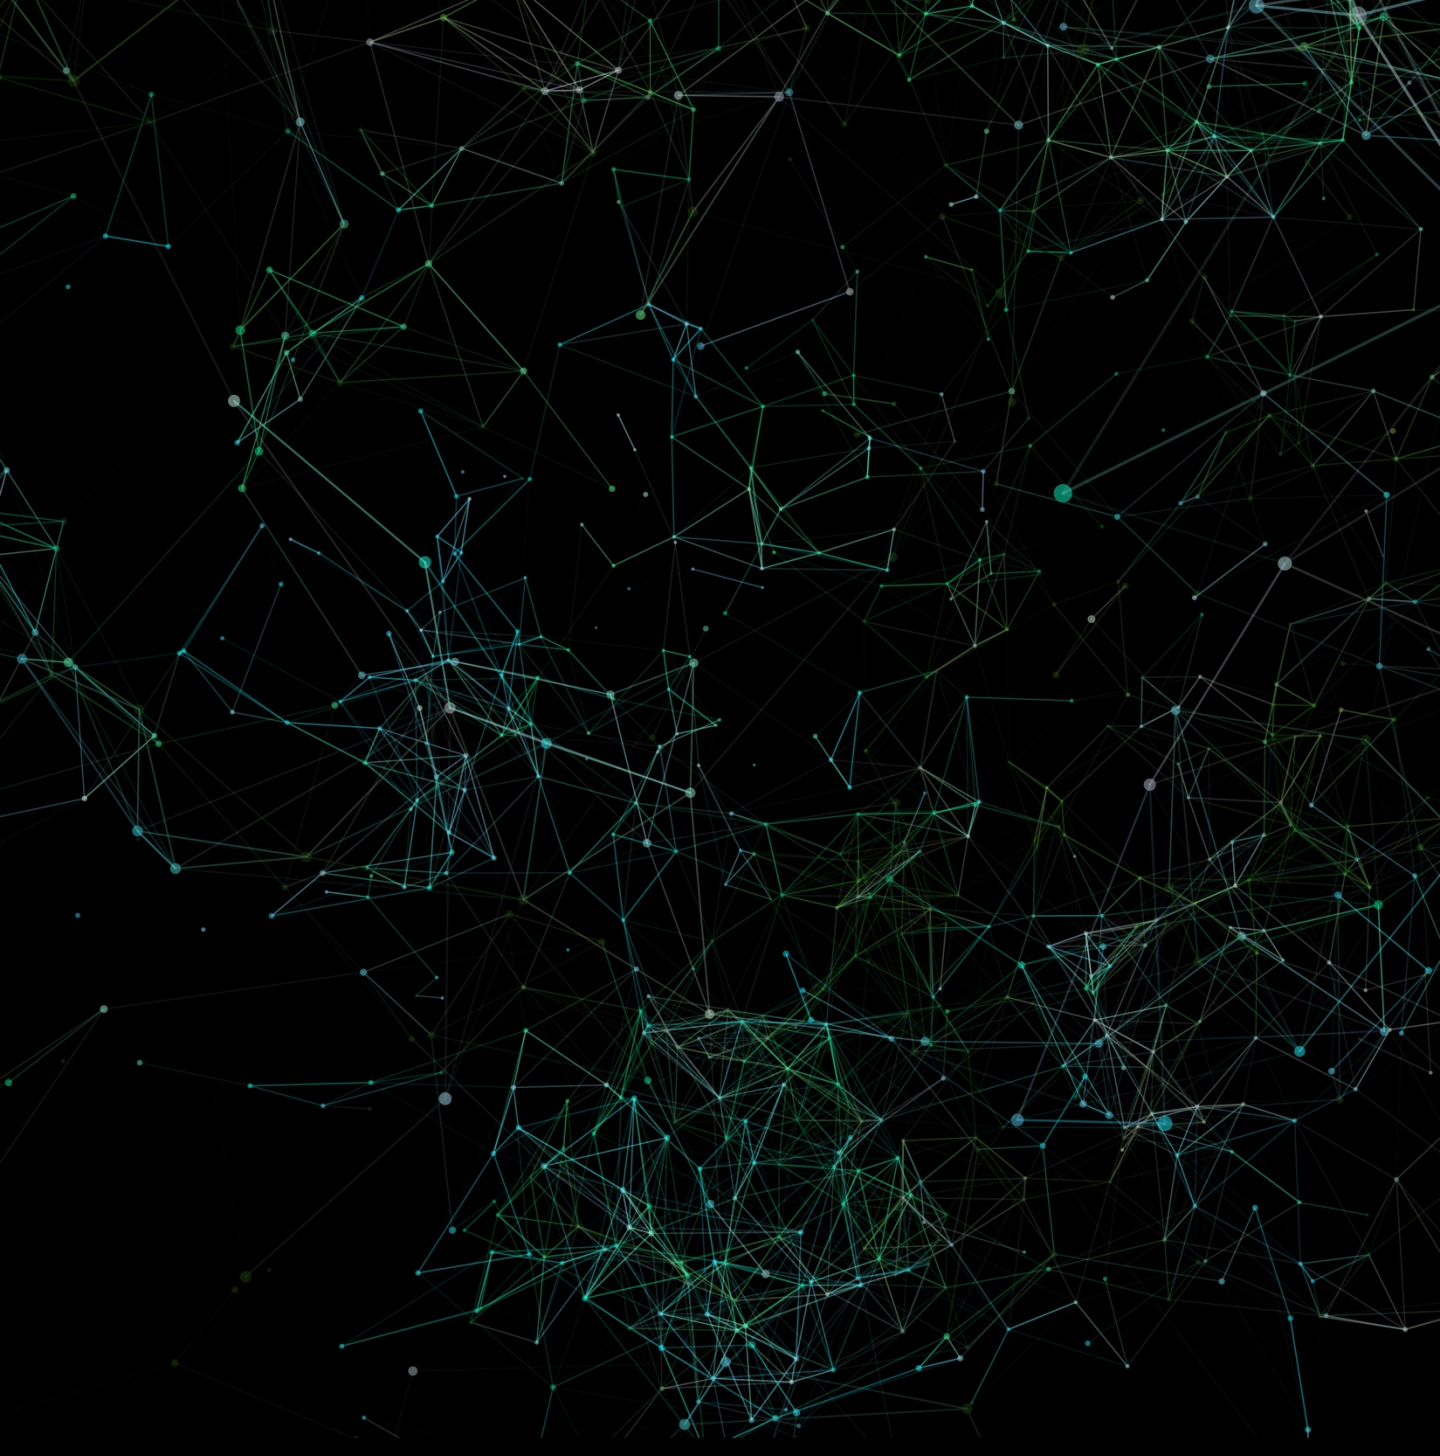

Deloitte's Integration Capability offers a full spectrum of services

- **Integration Strategy** - Helping our clients to navigate internal and external influences to shape and execute an integration strategy that delivers against business need
- **Integration Architecture** - Cataloguing as-is architecture, highlighting hot-spots and visioning the target state. Capturing guiding principles, technologies and standards along with core information such as source and target systems, purpose, frequency, patterns & anti-patterns and volumes.
- **Integration Platform Delivery** - Deliver on premise, hybrid and cloud based integration platforms reliably and at pace leveraging on and off-shore resources supported by tools and accelerators to deliver consistency and quality
- **Centre for Enablement** - Designing and implementing an operating model to enable and promote self-service, reusability and discoverability. We bring a host of tools and accelerators to set our clients up for quick and sustainable success.
- **API Factory** - Agile delivery of APIs (System APIs, Process APIs and Experience APIs) through design, build and test through both on and off-shore teams.
